2nd.—To purchase ores from the mines in the district.

3rd.—To reduce and smelt these ores, as well as gold and silver ores which may be sent to the Company's smelting works by their owners.

The works, comprising watercourse, with ample water wheels, buildings, and dressing-floors, have been fitted up with furnaces, plant, machinery, and apparatus, specially designed for treating the ores of the district by the proprietor, Mr John Collom, one of the best-known and most successful mining managers in America. The works will require to be enlarged, and for this object a sum of £5,500 will require to be spent on them. The profits from these smelting operations have been carefully estimated to yield an annual minimum of £13,000. The profit from the three sources, after making every reasonable deduction, may be taken as follows:—

	£
1st.—Profit from mines (per annum £25,000, but (say)	20,000
2nd.—Profit from buying ores (per annum) (say)	10,000
3rd. Profit from smelting ores (per annum) (say)	10,000
	40,000

Or a total clear annual profit of 66 per cent. upon the whole capital of the Company.

The Clear Creek Mining Company, the owners of these mines and works, have entered into an agreement to sell to this Company, conditionally upon the statements as to value and title being fully corroborated. For the purpose the Directors of this Company will despatch a trustworthy authority to Colorado, and if his report be satisfactory, the agreement will be confirmed and completed.

Subject to the confirmation of the vendors' statements, the property will be transferred to the Company for the sum of £27,000, and the vendors agree, if so required, to accept £27,000 in fully paid-up shares of the Company, and the balance of £5,000 cash, in cash, that sum being required to pay out several existing small joint proprietors.

It will be evident that the success of the Company will largely depend upon the skill, ability, and integrity of the Manager of the Works. Mr Collom, who has had the management of some of the largest and most successful mining and smelting works in America, has consented to give his services to the Company for some years at a remuneration largely depending upon the profits of the Company.

It is proposed that £1 per share shall be paid up on the completion of the contract for the purchase of the property, and the balance in calls of £1 each at intervals of not less than four months. Until, however, the Directors receive confirmatory evidence of the vendors' statements, and give notice of such, it is proposed that all applications for shares shall be in the form annexed, making it optional to the applicant to complete, on the scrip being ready for delivery, and that a sum of 5s per share only shall be paid on application, such sum to be applied to meet the costs of the investigation.

The agreement in relation to the vendors and this Company for the conditional purchase of the properties is—

Between James Kirkwood, on the part of the Clear Creek Mining Company, of the one part, and William Chambers, on the part of the Swansea Smelting and Silver Mining Company (Limited), of the other part, and is dated the 14th June, 1871.

THE SWANSEA SMELTING AND SILVER MINING COMPANY (Limited).

The Applications already received being for more than two-thirds of the shares to be allotted, notice is hereby given that the SMALL LIST will be CLOSED on WEDNESDAY NEXT the instant.—By order,

J. BIRNIE, Secretary (pro tem.).

THE WELLINGTON, GREY, AND BRUCE RAILWAY COMPANY OF CANADA.

Chartered under Acts of the Legislatures of Canada, and the Province of Ontario.

Issue of £71,000 Sterling 7 per Cent. First Mortgage Bonds.

In 710 Bonds of £100 Sterling each to Bearer,

Dated 1st July, 1870, and payable 1st July, 1891, but subject to acquisition at par, by the Great Western Railway Company of Canada, by semi-annual drawings in July and January of each year, until the whole are acquired.

Principal and Interest payable at the Bank of Montreal, 27 Lombard street, London, and at Hamilton, Ontario.

Price of Issue, £90 per Cent.

Messrs FIELD, WOOD, and HAYNES are authorised to receive subscriptions for £71,000 First Mortgage Bonds of the

WELLINGTON, GREY, AND BRUCE RAILWAY COMPANY,

in bonds of £100 sterling each, being the residue of £118,300 sterling, issued in respect of the section from Guelph to Harriston, at the price of £90 per cent., and payment will be accepted as follows:—

£10 on application.
£15 on allotment.
£25 on 1st September.
£25 on 1st November.
£15 (less half-year's interest £3 10s) on 1st January, 1872.

Subscribers will be at liberty to anticipate the whole or any of the instalments, receiving discount at the rate of 6 per cent. per annum.

Scrip certificates will be issued on production of the banker's receipts, and will be exchanged for bonds upon payment in full.

These bonds bear interest at 7 per cent. per annum, from 1st July, 1871, payable semi-annually on the 1st of January and July, at the Bank of Montreal, Lombard street, London, and Hamilton, Ontario.

The Acts of Incorporation of the Company, the agreements with the Great Western Railway Company of Canada, and the bye-laws of the various municipalities granting aid in the construction of the line, may be inspected at the Offices of the Great Western Railway Company of Canada, and of Messrs Field, Wood, and Haynes.

Applications, accompanied by the payment of 10 per cent., will be received on the enclosed form, which should be filled up and forwarded to the Bank of Montreal, 27 Lombard street; to the Secretary of the Great Western Railway of Canada, Gresham house; or to Messrs Field, Wood, and Haynes, 9 Warnford court, Throgmorton street, E.C., from whom prospectuses may be obtained.

In the event of no allotment being made, the deposit will be returned in full.

In default of payment of the respective instalments at their due dates, all previous payments will be liable to forfeiture.

The Directors and Officers of the Wellington, Grey, and Bruce Railway Company, are—

CHAIRMAN—Wm. McGivern, Messrs Wm. McGivern and Co., Hamilton.

VICE CHAIRMAN—Geo. D. Furguson, Esq., of Fergus, Canada.

James Turner, Esq., Messrs J. Turner and Co., Hamilton.

John Stuart, Esq., Messrs Harvey, Stuart, and Co., Hamilton.

D. McInnes, Esq., Messrs McInnes Brothers and Co., Hamilton

A. T. Wood, Esq., Messrs Wood and Legget, Hamilton.

A. Strout, Esq., M.P., County of Bruce.

James Wilson, Esq., Fergus.

J. M. Frazer, Esq., Elora.

John Ferrie, Esq., Hamilton.

The Mayor of Hamilton, ex officio.

CHIEF ENGINEER—George Lowe Reid, Esq., C.E.

SOLICITORS—Messrs Barton and Bruce, Hamilton.

BANKERS—The Bank of Montreal.

SECRETARY—Mr J. O'Beirne.

OFFICES—Hamilton, Ontario.

LONDON AGENCY.

The Great Western Railway of Canada, 126 Gresham house, Old Broad street.

The prosperity of the province of Ontario is well exemplified by the fact that its Legislature, in February, 1871, was enabled out of its surplus revenue to set apart one million five hundred thousand dollars as a railway fund to be distributed as free grants in aid of the construction of railways in that province.

The Wellington, Grey, and Bruce Railway is situated in this province and, as shown in the map accompanying the prospectus, is connected with the Great Western Railway system at Guelph, and which is leased to Lake Huron with its 100 miles long. Through its entire length it traverses a country rich in agricultural produce and timber. The population is a most thriving one, and is largely increased yearly by emigration. Out of 18,000 emigrants who entered the Dominion of Canada in 1870, 17,301 settled in the Province of Ontario.

The various municipalities through which the line passes have granted free grants or bonuses in aid of its construction to the amount of 525,000 dols. or (say) £105,000 sterling.

By agreements confirmed by the Legislatures of Canada and the Province of Ontario the Great Western Railway Company of Canada have undertaken—

1st. To work the line in perpetuity.

2nd. To provide locomotive engines and rolling stock.

3rd. To repair and maintain the line.

4th. To pay over 30 per cent. of the gross traffic receipts to the Wellington, Grey, and Bruce Railway of Canada.

5th. To set aside 25 per cent of the gross traffic receipts after charged with the Wellington, Grey, and Bruce Railway for the acquisition at par of the mortgage bonds by semi-annual drawings until the whole are acquired and redeemed by the Great Western Company.

Under these agreements the total issue of mortgage bonds cannot exceed 12 per miles, or £2,465 15s per mile. They constitute a first charge upon the line, and no prior security can be created. The bonds to be redeemed in each half-year are drawn by lot, in the months of May and November, in the presence of two Directors of the Great Western of Canada and a Notary Public; and the numbers of the bonds drawn are advertised in London and in Canada. The first drawing took place in May, 1871, when 15 bonds were drawn, being the produce of 20 per cent. of the interchanged traffic resulting from the working of seven months on 16½ miles open, equal to a sinking fund of about 7 per cent. per annum.

Bonds to the amount of £118,300 are issued in respect of the section from Guelph to Harriston, a distance of 18 miles. Of this amount the £71,000 bonds now offered form a portion, the remainder having been taken by investors, mostly resident in Canada.

Upon the lowest estimate the 30 per cent. of the gross traffic receipts will be more than sufficient to cover the interest on the bonds, and the result of the working of the short distance already opened for traffic just first is expectation; but in order to allow ample time for the development of the traffic until and after the opening of the line to Harriston, which will take place not later than the beginning of November next, the first year's interest up to 1st July, 1872, inclusive, on the issue of £118,300 will be invested in the 6 per Cent. Debentures of the Great Western Railway of Canada, and the debentures deposited in the Bank of Montreal, Lombard street, in the names of

The Right Hon. The Lord Mayor of London, President, and

Gilson Homan, Sandford house, Kirstall, Leeds, Vice-President,

(of the Great Western Railway of Canada)

who have consented to act as trustees for this purpose.

Taking into account the dates of the payment of the instalments, and the fact that the full half-year's interest will be allowed on 1st January, 1872, the price of issue is in effect reduced to 88½. At this price the bonds yield 8 per cent. to the investor, in addition to the advantage arising from the redemption fund provided under the agreements with the Great Western Railway Company, by the application of which the whole of the bonds will probably be paid off at par within 14 years.

They can therefore be confidently recommended as a sound and highly remunerative investment.

London, 27th June, 1871.

ISSUE OF £71,000 STERLING 7 PER CENT. FIRST MORTGAGE BONDS, IN 710 BONDS OF £100 STERLING EACH, OF THE WELLINGTON, GREY, AND BRUCE RAILWAY COMPANY OF CANADA, at the price of £90, and redeemable at par by semi-annual drawings in July and January of each year, until the whole are redeemed.

FORM OF APPLICATION.

To be retained by the Bankers

To Messrs Field, Wood, and Haynes,
9 Warnford court, Throgmorton street, London, E.C.

Gentlemen,—Having paid to the Bank of Montreal, the sum of pounds, being £10 per bond on my application for 7 per Cent. First Mortgage Bonds of the Wellington, Grey, and Bruce Railway Company of Canada, I request you to allot me that amount, and I hereby agree to accept such bonds, or any less number that may be allotted to me, and to pay the balance in respect of such bonds, according to the terms of the prospectus dated 27th June, 1871.

OFFICES—24 Gresham street.

PROSPECTUS.

This Company is formed to take over the works of an established business for the manufacture of American Leather Cloth at North Woolwich.

The buildings and machinery are completely furnished with all the best and most modern appliances, and the works are ready for full and immediate operations.

The machinery is capable of turning out from 70,000 to 80,000 pieces per annum, and this can be doubled at a trifling expenditure; but taking the annual produce of 80,000 pieces at the moderate profit of 2s per piece, a net income of £8,000 can be realised. It will thus be seen that a net return of at least 16 per cent. will arise even supposing that the whole capital be paid up, whilst, on half the nominal capital (which will probably be sufficient for permanent operations), 32 per cent. would result.

For full prospectuses and forms of application apply at the Offices of the Company, 24 Gresham street.

THE HANOVER AND BRUNSWICK ROCK ASPHALTE COMPANY (Limited).

Incorporated under the Companies Acts, 1862 and 1867, whereby the liability of the shareholders is limited.

Capital £100,000, in 10,000 shares of £10 each, of which 5,000 fully paid shares will be paid to the vendor, and 5,000 shares are now offered to the public. The £10 shares are to rank for dividend pro rata as to time, per annum, has been paid on the same shares.

Whilst 50 per cent. has to be paid on the issue of the shares for three years, then the remainder is to be paid in an equality with the other shares, 10 per £1, payable on application, and £2 on allotment. Further £2 and £2 three months after, and £2 between each such. It is not expected that more than £6 per share will be required for the first 12 months.

PROSPECTUS.

This Company is now established for the purpose of purchasing the lease, for 30 years, of the well-known Limmer Asphalte quarries, situate near the city of Hanover, together with other estate in Brunswick, formerly belonging to H. D. Henning, and for working the same.

An agreement has been entered into with the lessee for the purchase of the said lease for the consideration of £100,000, to be satisfied by Mrs Godfrey for the sum of £50,000 in cash, and 5,000 fully paid shares. The Company to take upon itself the amount of the charge of £20,000 secured by the mortgage from Mrs Godfrey, which amount is to be applied in the redemption of £20,000 of the 5 per cent. debentures, as follows:—£5,000 on the 1st July, 1871, £5,000 on the 1st July, 1872, and £10,000 on the 1st July, 1873.

The chain of machinery, land, and horses waggons, the latest to be taken over by the Company. All these plant, machinery, &c. are valued at £10,000, which sum is to be included in the purchase-money.

The purchase-money and valuations will cover the payment of all taxes and expenses for 30 years, exclusive of annual payment to the farmers whose lands may be required for the working, and the purchase and re-purchase of the lease for which has been agreed upon.

The business of the Company will comprise the working of the Limmer and Brunswick Asphalte Quarries, and the sale of the products of the same, and generally everything connected therewith.

The right of working these quarries extends over about 1,000 English acres, for all of which are leased to Mr Henning by the Government of Hanover, and the remainder in Brunswick. The mode of working is now carried on by the Limmer Company is a very old one, and is limited to about 30 feet deep.

The Company will have the most modern machinery and appliances for working the quarries, and will be able to produce a very large profit and carry on a very extensive business.

The Limmer Asphalte has the most special and first place in the Exhibition of 1862, and has been used in the construction of many of the principal streets in London, as well as in Paris, Berlin, Vienna, and other cities in Europe and America. It is the only asphalte which has been used in the construction of the Thames Embankment, and has been found to be the most durable and economical material for that purpose. It is also the only asphalte which has been used in the construction of the Houses of Parliament, and has been found to be the most durable and economical material for that purpose. It is also the only asphalte which has been used in the construction of the Houses of Parliament, and has been found to be the most durable and economical material for that purpose.

Prospectus of the Limmer Asphalte when brought to the notice of the public will show that of the 30 years to run, the Company will be purchasing and delivering in London for £2 per ton, and receiving a yearly average of £4 per ton. The profit which can be calculated at the Company's figure of £2 per ton.

Mr Godfrey, the executor of the late H. D. Henning, the owner of the quarries, has consented to accept a portion of the purchase-money in the profits of the undertaking.

The present position of the quarries and the Manufactory and Asphalte Association, together with the business hitherto carried on, is such as to afford to intending Purchasers and Investors a most favourable opportunity of becoming interested in the Company. The quarries have been carefully surveyed by Mr Magrath and Mr Coode, the Engineer to the Company, and the Directors have had a report from Mr Magrath, who has had the management of the business for a number of years, and is thoroughly acquainted with the working of the quarries. Another of the Directors, Mr Bingham, has also visited the quarries, and has confirmed the report of Mr Magrath. The Directors have reason to believe that the Company will be able to pay a dividend of 10 per cent. on the capital, and they have every confidence in recommending the undertaking to the public.

Applications for shares may be addressed to the offices of the Company, 37 Fenchurch street, London, E.C., and must be accompanied by a deposit of £1 per share. Where no allotment is made the deposits will be returned in full.

The following contract has been entered into:—

Articles of agreement made the 19th day of June 1871, between Alexander Magrath, of the city of London, Merchant, for and on behalf of the intending Company to be called the Hanover and Brunswick Rock Asphalte Company, Limited, of the one part and Mary Ann Godfrey, widow, of the other part.

COPY REPORT of ALEXANDER MAGRATH Esq., C.E., on the LIMMER ASPHALTE QUARRIES.

The district over which Mr H. D. Henning's title to dig for asphalte extends comprises 500 German acres, or about 875 English acres, and is about one mile in length by somewhat more than half a mile in breadth.

The quarries have been worked for some 40 years, the quantity taken out up to recently was comparatively small, but latterly there have been 5,000 or 6,000 tons per annum obtained.

Openings have been made in various places along the line of greatest length, showing a bed of asphalte of 30 to 40 yards wide at the north-west point and the borings at various openings indicate that it extends throughout the whole length of the property, and that the amount of asphaltic substance from this vein may be estimated at over a million tons, or practically inexhaustible.

The dip of the bed of asphalte is about 30 degrees, discovering at the greatest depths yet reached a face of sound asphalte rock, varying from 20 to 40 feet in thickness, increasing with the forward progress, and evidently dipping down to a much greater depth. A comparatively limited area has as yet been broken, and not more than 2,000 superficial yards have been worked to the depth referred to.

The surface earth lying on the asphalte bed averages from four to six feet thick.

The manufactory is at a cost two miles from Hanover and two miles from the mines, on the banks of the river Leine, a tributary of the Weser, by which the asphalte is carried direct from the factory in small vessels to Bremen and Haven Bremen.

A new 20-horse power engine has recently been erected, and all the other machinery, buildings, and premises are in good and substantial repair.

The net cost at which the rock as quarried can be delivered is 15s per ton, and the manufactured asphalte 50s per ton, free in the Thames or at Hull.

A. MAGRATH.

Langhourn chambers, Fenchurch street,
London, 24th April, 1871.

The following are a few testimonials showing the value and durability of the Limmer asphalte:—

After a five years use of the asphalte pavement in the streets here, and with Limmer asphalte they have proved faultless up till to-day, and have required no repair whatever yet. The same cannot be said of those pavements of Limmer asphalte which have been laid within the last five years.

(Signed) SPIES, for the Metropolitan Board of Works.

Hanover, 6th March, 1868.

I hereby certify, on the part of the Metropolitan Board of Works, that asphalte pavement laid at pavement have been laid with Limmer asphalte, they have proved faultless up till to-day, and have required no repair whatever yet. The same cannot be said of those pavements of Limmer asphalte which have been laid within the last five years.

(Signed) L. SPIES, Borough Engineer for the Metropolitan Board of Works.

Hanover, 31st July 1867.

We testify, with pleasure that the asphalte performances laid on Mr H. D. Henning at our city was, and are to our unbounded satisfaction, and are, after seven years use, still without fault, and require not the slightest repair yet. At the same time have executed pieces of work, and in the great number of buildings belonging to the city, which with the Limmer asphalte proved as confirmed to its purpose, that we have given order never to use any other material than Limmer asphalte. Two works done on Mr H. D. Henning's got further crevice through street, but do they get softened by heat. A similar case has never happened, which such is consequence with other material.

(Signed) DR. KRANKE, Royal Administration of Railways in the Kingdom.

Hanover, 9th November, 1864.

EXTRACT from DAILY NEWS, 10th May, 1871.

The asphalte pavement in Berlin.—The report made to the asphalte pavement in Berlin mentioned some time ago by a Committee of Municipal Councillors, has been published. The Committee, after visiting Hamburg, Dresden, Vienna, and other towns, has come to the conclusion that the Limmer asphalte laid down in that capital by Englishmen has proved to be a good, and almost the cheapest, pavement hitherto known. It was laid down in 1862, and although it has been exposed to the severest test of traffic, and to the most rigorous climate, it has not required repairs. The Committee, therefore, recommends the Limmer asphalte for adoption, and the Municipal Council will probably follow the recommendation.

EXTRACT from STANDARD 27th June 1871.

The truth is, we have in the asphalted road not a pavement but a complete tramway. It is asphalte which assures to us all that the tramways intend, with a great deal more. Here we have a road as easy and smooth only for carriages of a pair or four and which allows to pass along certain lines, but for all vehicles of every kind as pleasant for horse as for man, which portions of the street go right through and not lines but extend to with the track along the borders which is so useful for the carriages, as well as for the Wing horses and cars. Whatever good may there may be for the tramways most apply with tenfold force in favour of asphalte, and it is more than having in our hands the only real perfect solution of the question, we should not be unfortunate and set our liberal minds against a most valuable Company and be ignorant as the street tramway.

FORM OF APPLICATION FOR SHARES.

(To be left at the Bankers.)

THE HANOVER AND BRUNSWICK ROCK ASPHALTE COMPANY (Limited).

To the Directors of the Hanover and Brunswick Rock Asphalte Company (Limited).

Gentlemen,—Having paid to your bankers the sum of £ being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot to me that number, and I agree to accept such shares or any less number you may allot me, and to pay the further sum of £2 per share on allotment and I authorise you to insert my name on the Register of Members for the number of shares allotted to me.

Notice is hereby given that no APPLICATIONS for SHARES in this Company can be received after TUESDAY NEXT from London, and after WEDNESDAY NEXT from the Country.—By order of the Board.

PENNSYLVANIA RAILROAD SIX PER CENT. GENERAL MORTGAGE STERLING BONDS.

The DIVIDEND WARRANTS due on 1st July next, on the Pennsylvania Railroad Six per Cent. General Mortgage Sterling Bonds negotiated through the London, Asiatic, and American Company (Limited) (T. Wiggin and Co.), will be PAID on the 1st July or any succeeding day (Friday excepted), between the hours of Ten and Two, at their Counting-house, 26 Old Broad street, E.C., where the necessary forms may be obtained.

The Warrants must be left two clear days for examination at

No. 26 Old Broad street, London, E.C.

£20,000 LOAN.

THE WEST BROMWICH IMPROVEMENT COMMISSIONERS, having resolved to Borrow £20,000 under the powers of the "West Bromwich Improvement Act, 1854," are prepared to receive Tenders for the LOAN of that amount, in one sum, or in sums of not less than £1,000, the repayment to extend over thirty years, and to be secured by Mortgage of the Improvement rate.

Tenders under seal, stating name and address of party tendering, amount proposed to be lent, and rate of interest required, to be forwarded to me, and endorsed "Tender for Loan," on or before Tuesday, July 11, 1871.

If the amount should be advanced by one person, the Commissioners would arrange to take it by instalments.

The Commissioners do not bind themselves to accept any tender.—By order,

CHAS. H. BAYLEY, Clerk.

Parade, West Bromwich 12th June, 1871.

TURKISH SIX PER CENT. BONDS OF 1862.

Notice is hereby given, that in pursuance of the resolution unanimously passed at the General Meeting of Bondholders, held on the 3rd April, 1871, the syndicate formed for the special purpose of considering the Loan of 1862, and constituted in Constantinople and the provinces, has, since expenses have been advanced by the Committee. The Constitution of Our Policy in the Purchase of Coupons and Drawn Bonds as authorised by the Bondholders, to meet the expenses of the said syndicate will therefore commence from the dividends and coupons payable on the 1st day of July next, at Messrs. Glyn, Mills, and Co.'s. To facilitate the action the Committee request holders of bonds to give instructions to their bankers and agents to authorise the deduction.

EDWIN H. LAWRENCE, Chairman.
HYDE CLARKE, Secretary.
Committee of Turkish Bondholders of 1862, Council of Foreign Bondholders, 115 Palmerston Buildings, E.C., June 23, 1871.

ITALIAN SIX PER CENT. TOBACCO LOAN.

Messrs STERN BROTHERS beg to announce that on and after the 1st July next, they will be prepared to PAY the Coupons for the half-yearly interest on the Loan for on that date, which may be presented to be cut out of the Bonds.

Bonds of Series Q drawn in Florence on the 1st April last will be Paid at the same time, provided they bear the English Government Stamp.

Lists together with the Coupons and Drawn Bonds must be left for examination four clear days previous to asking for payment.

Angel court, Throgmorton street, June 22nd, 1871.

ITALIAN TOBACCO MONOPOLY COMPANY.

The shareholders of the Company are informed that on and after 1st July, the Coupon No. 5 will be PAID at the rate of one lira for each share in which Lire 4 for the same have been paid, being interest at 6 per cent. per annum for the half-year ending the 30th June.

The Coupons will be paid at the undermentioned places, viz.:—

In Florence By the Società Generale de Credit Mobiliare Italien.

Turin
Rome
Genoa
Milan
Venice
Naples
Palermo
Leghorn

By the National Bank of the Kingdom of Italy.

Geneva—By Messrs P. F. Bonna and Co.
Paris—By Messrs A. J. Stern and Co.
London—By Messrs Stern Brothers.
Berlin—By Messrs H. Warschauer and Co.
Frankfort-on-Main—By Mr Jacob S. H. Stern.

The payments will be made at the rate of francs 0.10 per share, and Coupon No. 5.

As the approval of the Chancellor of the Exchequer and Minister of the Interior for the year 1870 has not been voted by the General Meeting of the 30th May last, has not yet been given the Council according to Article 16 of the Statutes of the Company cannot proceed with the distribution of the Dividend for the 1st as previously stated, but therefore notice is hereby given that the payment of the dividend for the year 1870 will be made on the Coupon No. 6 as soon as the ratification of the same by the Minister has been given, and the terms of the payment will be duly announced.

Florence, 30th June 1871.

Quoted by the Chancellor of the Exchequer in his Speech on National Debts, June 2nd, 1871 (see pages 9 and 15).
London: Robert John Bush, 32 Charing cross, S.W.

THE HOUSEHOLD EDITION OF
THE WORKS OF CHARLES DICKENS.

Messrs Chapman and Hall propose to publish in
WEEKLY PENNY NUMBERS,
with New Illustrations, the Novels of the late Charles Dickens.

The Series will commence with "OLIVER TWIST," of which Number One and Part One are now ready.

Messrs Chapman and Hall trust that by this Edition they will be enabled to place the works of the most popular British Author of the present day in the hands of all English readers.
Chapman and Hall, 193 Piccadilly.

INVESTMENTS.—CAPITALISTS desiring to make safe and profitable investments should apply for the INVESTMENT CIRCULAR, published monthly, which contains valuable information regarding every kind of stocks and shares, together with selections of the best securities, returning from 5 to 20 per cent. Post free on application.—Bartlett and Chapman, Stock and Share Dealers, 36 Cornhill, E.C.

CRACROFT'S BANK DIVIDEND CHART, 1870-71.—Showing the Half-yearly Rates of Dividend declared by over One Hundred and Sixty Joint-Stock Banks—United Kingdom and Colonial; with Nominal and Paid-up Capital, Number and Amount Paid of Shares, Date of Payment of Dividends, Reserve Fund, Liabilities, Market Price of Shares, January, 1871, and Yield per Cent. on Purchase Price.
Price 2s 6d; or, mounted on roller, 10s 6d.

Now ready,
CRACROFT'S CONSOL-DIAGRAM,
shewing the Highest and Lowest Prices of Three per Cent. Consols each year from the French Revolution of 1789 to the Franco-German War of 1870, with the growth and decline of the National Funded Debt of Great Britain; the Yearly Average of the Bank Rate of Discount, and Tabulated Statement of the principal Events affecting the Prices of Stocks.
Price 2s; or, mounted on roller, 3s 6d.

Will shortly be ready, the Second Edition of
CRACROFT'S INVESTORS' RECORD of PURCHASES and SALES, with CALCULATIONS Adapted to every Investment. An additional portion especially adapted for the Legal Profession, containing Forms of Entry for Freehold and Copyhold Property; Leasehold, Let and Held; Mortgages Held and Effected; Insurances; Bills and Promissory Notes; Moneys Advanced or Borrowed.

"The object of this Memorandum Book is to enable every Investor to keep a systematic Record, producible in a Court of Law, of every investment transaction entered into. No such record was in existence previous to the first edition."
London: Effingham Wilson, Publisher, Royal Exchange.
Bernard Cracroft, 4 Austinfriars.

TO INVESTORS.
Now ready,
LAVINGTON AND PENNINGTON'S MONTHLY RECORD of INVESTMENTS, containing an Exhaustive review of the British and Foreign Stock and Share and Money Markets, etc., with an enumeration of safe investments yielding from 10 to 20 per cent. Price 6d per copy, or by subscription.
G. Lavington and A. Pennington, 44 Threadneedle street, London, E.C.

BLACKWOOD'S MAGAZINE, FOR JULY, 1871. No. DCLXIX. Price 2s 6d.
CONTENTS.
Fair to See.—Part VII.
Mr Mill on Land.

Macmillan and Co., London.

INVESTORS IN SEARCH OF GOOD sound Properties, paying 10 to 20 per cent. per annum, should send for Sixth Edition, BRITAIN'S METAL MINES, price 1s, or free per post 1s 1d, a complete Guide to their Laws, Usages, Localities, Statistics, and Share Market.
By JOHN R. PIKE,
Crown chambers, Threadneedle street, London.

LONDON LIBRARY,
12 ST JAMES'S SQUARE, LONDON.
Founded in 1841.
Patron—H.R.H. the Prince of Wales.
President—Thomas Carlyle, Esq.
This Library contains 85,000 volumes of Ancient and Modern Literature in various languages.
Subscriptions, £3 a year; or £2 with Entrance Fee of £6; Life Membership, £26.
Fifteen volumes are allowed to country and ten to town members. Reading room open from Ten to Half-past Six. Prospectus on application. Catalogue, price 15s; to members, 10s 6d.
ROBERT HARRISON, Secretary and Librarian.

FINE FLAVOURED STRONG BEEF TEA at about 2½d a pint. Ask for LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.
Excellent economical stock for soups, sauces, &c.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisham systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as Taught for upwards of 50 years by Mr Lewis, the real Inventor and first teacher of these world-renowned and only infallible systems, ensure perfection after a few easy and interesting lessons. Persons unable to take the lessons may obtain the Inventor's works for self-instruction at his only institution 113 Strand.

GRANVILLE COLLEGIATE School, East Cliff, Ramsgate.—The Rev. Dr Tandy has vacancies for one or two pupils. Reference kindly permitted to the Rev. John Gilmore, Rector of Trinity, Ramsgate; and to the Rev. A. Sitwell Vicar of Minster, Priest in Ordinary to the Queen, etc. There are also vacancies in the Granville Preparatory School, which is in connection with, though distinct from, the above.

EDUCATION.—"ONE YEAR'S Good Schooling" at the English and Continental College, Harrow (close to the station).—A few ANNUAL VACANCIES.—Parents anxious to give their boys, before they put them into any business, a year's finishing instruction in a highly recommended boarding school, of limited number, near town, to be perfected (even if backward) in penmanship, commercial and polite correspondence, arithmetic, bookkeeping (or mathematics and drawing), French conversationally, and gentlemanly manners, are invited to address the Principal, who is assisted by efficient and hard-working masters. Younger boys, to be prepared for public schools, the professions, and competitive examinations, are received for a longer period. Dry playground, with a gymnasium and a splendid cricket field, close to the house, which latter is replete in all its appointments. Highest references as to liberal board, kind treatment, excellent health, and first-class progress of the pupils. Eight first-class masters are engaged to secure the success of thirty pupils. Terms—30 guineas under 12, 35 guineas under 14, and 40 guineas per annum under 15 years of age. Fee for laundress, 10s for books and stationery, and for tuition of dancing, drilling, singing and brass band instruments. 10s per quarter are the only extras. Established 1857. Address Dr VELLERE Harrow

---

LONDON INTERNATIONAL EXHIBITION of 1871.
The GENERAL PUBLIC are admitted EVERY WEEK-DAY EXCEPT WEDNESDAY, from 10 a.m. to 6 p.m., on payment of ONE SHILLING. On WEDNESDAYS the price is HALF-A-CROWN.

LONDON INTERNATIONAL EXHIBITION OF 1871.
Schools and Parties of Workmen from Manufactories, &c., may obtain reductions in taking 100 or more admission tickets at one time, according to the numbers taken.
Application to be made to the Secretary.

WANTED, BY AN ENGLISH Gentleman of education, a situation as Manager in an Export house, or Secretary to a Company. Writes and speaks French, German, Italian, and Spanish. Eight years' experience as Manager. Unexceptionable references; accustomed to travel.—Address M. J. R., Deacon's, Leadenhall street.

TO STOCKBROKERS.—A Gentleman, who has been many years engaged in Banking, and who has a valuable connection, wishes to make an arrangement with a member of the Stock Exchange which would be mutually advantageous, either to learn the routine of the Exchange, or with a view to a Partnership.—Address F. J. D., care of Wm. Dawson and Sons, 121 Cannon street, E.C.

IRON TRADE.—PARTNER wanted, with £1,000 to £2,000 under his own control, solely for extending trade. Wholesale. Profits good. Settlements prompt. No liabilities. Location of works unequalled.—Apply to Mr Eamonson, Iron Merchant, 11 Dowgate hill.

A GENTLEMAN, naturalised British subject, with 20 years' experience in the manufacturing districts of England, France, and Germany, and in the Export business, having a perfect command of the languages of these countries, and a knowledge of those of several others, wants an ENGAGEMENT in Europe or Abroad as Manager, Representative of a House, or in some other suitable capacity. First-class references.—Address W. E. 948, Messrs Haasenstein and Vogler's, Advertising Agency, Hamburg.

THE ADVERTISEMENT AGENCY of Rudolf Mosse, in Hamburg, receives advertisements at the cheapest possible rates in all continental newspapers. This advertisement agency has offices in all the principal towns, and can be recommended to all bankers, merchants, and manufacturers in England.—A catalogue of the newspapers, with prices of insertion, will be sent gratis and post free.

LONDON AND ST KATHARINE'S DOCKS COMPANY.
The Directors are prepared to issue, under the provisions of the Company's Act, a limited amount of FOUR-AND-A-HALF PER CENT. PREFERENTIAL STOCK, to be applied to the reduction of the Debenture debt. The net income of the Company, after payment of all working expenses, exceeds £325,000 per annum, being nearly thrice the amount of the Debenture interest. There is also an accumulating reserve fund, which now exceeds £165,000.—Application to be made at the Dock House, 109 Leadenhall street.
Dock House, 16th May, 1871.

IMPORTANT INFORMATION.—Previous to the removal of our Cornhill Plate and Cutlery Warehouse to those new premises now building
OPPOSITE THE MANSION HOUSE,
we are selling on the premises, 71 and 72 Cornhill, London, the whole of our valuable stocks of Silver, Electro-Silver, Dressing Bags, and Fine Cutlery, at a discount of from 25 per cent. to 40 per cent. off our catalogue prices.
MAPPIN AND WEBB,
99 Norfolk street, Sheffield.

SPANISH FLY IS THE ACTING ingredient in ALEX. ROSS'S CANTHARIDES OIL, which speedily produces Whiskers and thickens Hair. 3s 6d, sent by post for 54 stamps.—ALEX. ROSS, 248 High Holborn, London, and all Chemists.

HAIR-CURLING FLUID, 248 HIGH Holborn, London.—ALEX. ROSS'S CURLING FLUID curls Ladies' or Gentlemans' Hair immediately it is applied. Sold at 3s 6d, sent free for 54 stamps. Had of all Chemists.

GREY HAIR, 248 HIGH HOLBORN, London.—ALEX. ROSS'S HAIR DYE produces a perfect colour immediately it is used. It is permanent, and perfectly natural in effect. Price 3s 6d, sent by post for 54 stamps; and all Chemists.

HAIR DESTROYER.—248 HIGH Holborn, London.—ALEX. ROSS'S DEPILATORY removes superfluous hair from the face, neck, and arms, without effect to the skin. Price 3s 6d, sent for 54 stamps. Had of all Chemists.

HAIR COLOUR WASH.—BY damping the head with this beautifully perfumed Wash, in two days the hair assumes it original colour, and remains so by an occasional using. 10s 6d, sent for stamps. ALEX. ROSS, 248 High Holborn, London, and all Chemists.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

Prices made up to June 28.

Advertisements for next Number, to be published on July 29, must be sent to [illegible] on or before July 27.

OFFICE—346 Strand.

THE VERY REMARKABLE ACCOUNTS OF THE BANK OF FRANCE.

The accounts which the Bank of France has this week again for the first time since September began to publish, are perhaps the most remarkable bank accounts which were ever issued. They represent the effects of a greater destruction of the political elements of credit (taking the war and the civil commotion together) than have ever been known since banking became a trade, and that effect has been shown by the accounts of a bank much larger and much stronger than any which has ever before been subjected to an equal or an analogous experience.

The most important fact is, that after all the calamities which have happened, even now the Bank of France cannot be said to stand at all badly, if we take due account of its peculiar position and circumstances. Of course the liabilities of a bank which has been required by its Government to suspend specie payments, and which pays its outgoings in its own inconvertible paper, are for the present only nominal; they would only become real if specie payments were resumed. But if specie payments *were* resumed, and if the liabilities of the Bank of France in consequence became real, these are what they would be:—

	£
Notes and drafts in circulation	89,985,000
Public deposits	5,631,000
Private deposits	22,246,000
	117,862,000

—and the reserve would be nearly 22 millions, or very nearly ⅓th. And this is really a very large reserve for a country like France, where banking is very little developed. It is certainly a much larger proportionate reserve than exists in this country. The peculiar provisions of Peel's Act, which separates the banking from the currency reserve, make a comparison with any other country always difficult, since no other country has any corresponding circulation. But if we take the banking liabilities of six joint stock banks only, and remember that the reserve of notes and coin in the Bank of England is the only store of actual cash which England possesses to meet the banking liabilities of these banks and others, we find that—

Banking Liabilities of Bank of England and Six London Joint Stock Banks, Dec. 31, 1870.

	£	£
Bank of England—		
Public deposits.....	6,286,000	
Private deposits	20,283,000	
Seven-day and other bills ...	750,000	
		27,319,000
London and Westminster.....		22,869,000
London Joint Stock		17,315,000
Union...		15,413,000
London and County		16,506,000
City.....		4,274,000
Consolidated		2,496,000
		106,192,000

And the reserve of notes in the banking department is 12,574,000*l*, or 12 per cent. of the banking liabilities. Or if we include the banknote circulation, and make the Bank of England accounts up into the "old form," as it has now for so many years been called, the account is:—

Liabilities including Circulation of Bank of England.

	£
Bank of England—	
Circulation and deposits	51,812,000
London and Westminster.....	22,869,000
London Joint Stock	17,315,000
Union...	15,413,000
London and County	16,506,000
City.....	4,274,000
Consolidated	2,496,000
	130,385,000

—and coin and bullion in both departments is 22,381,000*l*, or 17 per cent. of the entire liabilities, whether of banking or of circulation.

In both cases, where we include only six joint stock banks, we find that the ratio of the English reserve to the English liabilities is less than that of the French reserve to the French liabilities. And the liabilities of these six banks are only an inconsiderably small part of the liabilities of England. If we could give all the liabilities of the

private banks, all the liabilities of English country bankers, whether on deposits or circulation, and all those of the Irish and Scotch bankers, we should have a most formidable total. Broadly speaking, the reserve in the Bank of England is the only reserve (except the cash in the till, and the comparatively small sums kept in Scotland and Ireland in conformity with the Act of 1845) which is held against it. But the French liabilities outside the Bank of France are in comparison very trifling. So that we are left with the great and strange result that, after the invasion and after the civil war, the credit system of France rests on a larger basis of cash, and is supported by a far larger percentage of reserve to liabilities than our English credit system, though the latter is in its ordinary state, and has not been tested either by invasion or internal convulsion.

The principal reason of the remarkable present strength of the Bank of France is its unparalleled strength last year. At that time its liabilities were—

	£
Notes and drafts	59,588,000
Public deposits	7,031,000
Private deposits	17,864,000
	84,483,000

—and its bullion and specie nearly 52,000,000*l*, or 62 per cent. of its liabilities. Probably never since banking has become a trade—at least has taken its modern form of a receipt of deposits and an issue of promissory paper—has any bank held so large a proportion of cash reserve to its current liabilities as the Bank of France last year held. Most fortunately these strange and unprecedented political calamities attacked the Bank at a period of exceptional strength, and therefore it has been able to surmount them so easily, and to stand so well at last.

The next most remarkable point—indeed in one sense the most remarkable of all, for it is quite new and has never been stated before—is that the advances to the trading community of France have diminished. In September, in the last account which was published till now, the discounts had risen to 64,000,000*l*. And it would not have been unreasonable to think that they would have been as great now. Certainly most bankers would have anticipated that it would be very difficult to get in money during an invasion and revolution. Their bad and dubious customers, they would imagine, would certainly stop at such a time, and even their best customers would require to be "kept going," and would not be able at such a crisis of difficulty to refund or to do without any large amount of the advances usually made to them. But the figures of the Bank of France show a contrary result. They are—

	£
Discounts running	21,462,000
Overdue bills	14,855,000
	36,317,000

—showing a reduction of nearly a half since September. Nothing can speak more conclusively for the substantial soundness both of the business of the Bank of France and of French commerce in general, than that it should have been possible for the Bank to obtain, and for the community to make, this immense repayment.

The immense augmentation in the paper circulation was obvious, was known before the publication of the accounts, and has therefore been much discussed. On one important aspect of it we elsewhere say something. But there is another important point on which it is desirable that opinions should be clear. As yet the issue of banknotes by the Bank of France during the invasion has been like the issue of banknotes by the Bank of England in a panic, and after the suspension of Peel's Act. In such cases with us a great auxiliary circulation of cheques is on a sudden rendered less efficient than usual, and requires at the same moment a greater support of banknotes or coin than usual. Consequently in that moment of fear an issue of banknotes can occur without depreciation, which at any other time would cause depreciation. Just so in France: the metallic circulation has lately been largely hoarded, and therefore the paper circulation has been needed to take its place, and has taken it without being depreciated. But soon these hoarded sums of metallic money will come forth—some are now being sent forth in consequence of the loan; and it is not very easy to see how, if the metallic money comes out, the paper money can remain as large as it is without falling considerably in value.

The enormous augmentation of the loan by the Bank of France to the French Government was a necessity in their position. They obtained the means to make it partly by diminishing their bullion, but mainly by an augmentation of paper currency, which they could not have obtained without the leave of the Government. And as the Government gave that leave, they were right to obtain the principal benefit from it.

The Bank of France is an institution entirely opposed to all English ideas. The governor and deputy-govenor are appointed by the State, and they are in fact supreme in the Bank. And the intervention of the Executive Government in banking is opposed to established opinion, and to sound political economy. But this much at least may be said. If the State in any country begins to foster banking it should do so in such a manner as to have a perfect control over the banking which it fosters. The French Government did not, like the Government of India, with the old Bombay Bank, give the credit of its sanction to a bank over which it had no control. It took absolute authority over the Bank, and by means of a council of skilled *regents*, it is enabled to exercise this authority fairly. This may not be as good as a system in which deposit banking, at any rate, is open to all the world; but it is the next best substitute for it. And at the moment of this disastrous invasion it has enabled the State and the Bank to co-operate and to aid one another in a singular and felicitous manner.

BANK OF FRANCE ACCOUNTS.

	June 30, 1870.	Sept. 8, 1870.	June 29, 1871.
LIABILITIES.	£	£	£

* The items thus distinguished appear only in the new account.
† Including (in the new account) the amount of the operations relative to the loan in the branches not yet classified.

THE LAST FRENCH ELECTIONS.

THE last French elections have resulted, as is so usual in France, in a great triumph for the *de facto* Government. By far the greater number of 120 vacancies have been filled up by candidates pledged to support a moderate Republic, in other words, pledged to M. Thiers. Nothing can illustrate more curiously what has often been asserted, that elections in France do not tell you what the people wish but what has been suggested to them by their immediate rulers. Like those children who always respond to a leading question by answering implicitly to the lead, the French people almost always seem to reflect the counsel offered them by their existing rulers. They are not high-minded, and have no proud looks; they refrain their souls and keep them low, and apparently very much because they feel the same kind of helplessness and anxiety to follow where they are led, which other races reserve for an invisible power, and a guidance more or less brought home to their own consciences and endorsed by their own minds. It is really no exaggeration to say of the French electors that they look to their Government to guide their political judgment almost as in comparatively patriarchal times, "the "eyes of servants looked unto the hands of their masters, and "the eyes of a maiden unto the hand of her mistress." They have none of the steady self-confidence of the English elector, who, if he knows very little about politics, is always sure to

think that he knows about as much as anybody else, and may at least follow his own bent. The typical French elector, on the other hand, is full of care and fear about political dangers. Why should he vote for an unsuccessful party? Would it not involve a new struggle with the party now in power—a new struggle in which quiet people are always likely to lose? If you vote for those who are uppermost they will at least stay uppermost, and it requires no earthquake, no political convulsion, to effect that; but if you vote for those who are under, the men at the top will probably not yield their power without a struggle, and then there will be more uncertainty, more fighting, more danger, and more loss. Such is, we suspect, the sort of half instinctive reasoning which induced the French peasant to support Napoleon while he was at the top, and then M. Gambetta, and now M. Thiers, and to refuse entirely all complicity in the attempt to pull down any political edifice giving signs of power. These people know what is—how shall they know what may be? A living ass may be better than a dead lion. Ensure the present as well as you can, and let the conspirator who wants to replace it by a more glorious future, have all the burden of his work to himself. If he succeeds, why then it may be time to take his part too against the troublers of peace. But till then resist him.

Now this is a state of popular feeling which we English are apt to regard with profound scorn as unmanly and even base. But it is fair to remark that it has great advantages—great advantages which even political theorists have striven to attain by far more artificial means in vain. An able English statesman, who has speculated much on the theory of our representative system, once suggested that Governments are apt to be too weak for administrative purposes in countries like England, where a Parliamentary vote may at any moment overturn them, and that each Government ought to be allowed to *nominate* to Parliament a certain number of its own supporters so as to lend an inertia of dead weight to the side of authority, whatever party may happen to wield it. In America, the framers of the Constitution attempted to compass the same thing by very different means. They made the President and his Administration eligible for a given period and during that period, quite independent of any vote of Congress, unless indeed the President should do something warranting his impeachment and condemnation by the Senate. Both these expedients for lending a certain permanence to authority are evidently very inferior devices to that popular French preference for authority which so readily accords a genuinely popular *imprimatur* to the men at the top, and says in so many words that he who *has* power shall have the right to it. The suggestion that a Government shall nominate a certain number of supporters to increase its own dead weight is one which popular feeling would never listen to for a moment. Such nominees would be a distinct class, a class of privileged and favoured men, and therefore the objects of general attack and dislike on account of the courtier-like position in which they would be placed towards the Administration which had nominated them. The American scheme has the great merit that it prevents the removal (except by revolution) of a Government which is really misrepresenting the country, breaking the thread of political precedent, and preparing gratuitous difficulties for its successor. But the popular French leaning to the actual rulers does directly what both these schemes do indirectly; and without the same opening for abuse. It lends popular strength to the existing Government because it is the existing Government, and of course only on condition that that Government does not actually outrage the wishes of the people. In a word, the French disposition to back up the powers that be, does render it very much easier for a Government to hold its own, unless it commits such flagrant errors as the Emperor committed when he went to war. We now know that had he not declared war and been ignominiously defeated, he would, in all probability, have reigned in France to his dying day, and very likely even have been succeeded by his son. It was not the French people who overthrew him. We may safely say, from the whole experience of the last 80 years, that almost any Government which can hold Paris and the great cities against the revolutionary class which is found there, and only there, and which can also keep out of the risk of foreign defeats, can not only rule France, but can safely call the French people to witness that they are ruling France by popular consent. Louis Philippe was overthrown because he could not or would not hold down Paris, the Emperor, because he could not or would not keep out of conflict with a vastly superior foe; but even M. Thiers, who is not the candidate of the Church, and is not the favourite of the bourgeois class, can get ample support from France, although as yet the days of his Government have been few and evil. Paradoxical as it appears, France is not a country of unstable but of stable political equilibrium—at least for any ruler who has physical force enough to resist insurrection, and either the physical or the moral force requisite to keep him out of foreign complications.

We do not say that this condition of things is altogether desirable. France would be safer if her people had more real political life of their own. The timidity and ignorance of the peasantry encourages the arrogance of the city mobs. It is impossible to respect a political opinion which appears to be so time-serving as that of the French peasantry; indeed it is not so much a political opinion as a political fear. The French peasantry would hold their own far better if they knew what system they preferred, and let the cities understand that what they prefer they will vote for and establish if they can. As it is, they encourage speculative dashes at the Government by the tameness with which they endorse success. Still, in default of any other more solid ballast, this deep-rooted tendency of the French peasantry to prefer any rule to the prospect of immediate change, is in a very real sense Conservative, and must in common fairness be set against all that is written, and rightly written, about the mercurial temperament of that great people.

THE PEERS AND THE ARMY BILL.

It is no secret that the House of Lords intends to vote next week on the Army and Ballot Bills upon somewhat unusual and exceptional grounds. A theory has taken possession of the majority which may, we believe, be expressed very accurately in this way:—"Our House is, as a body, very much "opposed to the drift of all recent legislation. It did not "approve the Reform Bill of 1867, or the Irish Church Bill, or "the revolution effected in Irish Land Tenure. It does not "now approve the Army Bill, or the Bill establishing secret "voting. Nevertheless it has accepted all previous changes, "and the danger is that if it accepts these it will lose all "prestige whatever; will sink into a mere Court of Registra- "tion, as all the Senates of the continent have done; and will "lose all the sympathy it now possesses from the Conservative "elements within the kingdom. Moreover, if we are to speak "frankly, we think our personal importance a good thing for "English society, and we think the ultimate basis of that "importance something better and nobler than our wealth. "We are political entities in the community, have nearly the "position of county members, but if we never exert the au- "thority legally vested in us we shall lose it, and shall sur- "render, from mere slothfulness or timidity, what is, in part "at least, a trust. It may not be expedient of course under "a Government of compromise to stretch our powers to the "full, but we must show that they exist by rejecting one of "these two Bills. Preferentially it will be better to reject the "Army Bill, first, because it is less liked by the country, and "secondly, because it is distinctly disliked by the majority of "the profession it affects."

We do not think any reasonable Peer will deny that this is a fair estimate of the floating opinion of his House, and we cannot think that opinion altogether wise. It is in fact identical with that policy of fighting for mere prestige which has impoverished and endangered so many nations, and is all the more dangerous because victory is so uncertain. Those who hold these views seem to us to forget the future for the sake of the present, and to overlook the true dangers which threaten, in a very peculiar way, the British House of Lords. The special strength of that House—indeed its only strength now that the middle-class, which likes Lords, has parted with its power—is the support of the Conservative feeling throughout the country. Most powerful classes look to the Lords as their inner line of defence, as the only power which could compel democracy, whenever it comes to threaten instead of supporting the Government, to reconsider itself, and submit to the compromises which democracy by inherent instinct detests. The moment this support is withdrawn the power of the

Lords is gone, and there is one consideration which may induce its withdrawal. The propertied classes may get frightened at the democratic effect of the Peers' policy. Our readers know well how deep and bitter is the Conservative distrust of Mr Disraeli, owing to the democratic effect which always follows his accession to power; and if the result of the Peers' action is always an increase in the volume of movement, if the Bill which they reject always comes back to them in a more stringent shape, and is then passed, the conclusion of Conservatism will be that the method of resistance is wrong, and that the Upper House, like Mr Disraeli, instead of being a bulwark against democracy, is a dam just high enough to collect the waters for a rush. Can any cool-headed Peer doubt that in the case of these two Bills this will be the effect? Is there the faintest chance that a constituency in which barely 20 per cent. pay income tax will endure that commands in the army should be attained by wealth alone? It is clearly the interest of the majority of electors to abolish that system, and what is to be the restraining force upon the other side? Aristocratic feeling? It exists no doubt, but the exceptional right of a military tailor's son to buy over the best blood in the land is not a privilege which stimulates the lingering penchant for the historic names. Purchase is the right of rich Smith to degrade poor Percy, which is not exactly the aristocratic idea. It is ignorance? The professors, as Mr Disraeli once said in one of the few speeches which attract to him respect from Liberals, are leading the masses, and they are not ignorant. Indifference? We admit fully that no military question has any strong hold over the English mind, but it rests with Mr Gladstone and a few prominent men to dispel that indifference at a blow. Let the people be but told in half-a-dozen of the kind of speeches which impress them—speeches which Mr Trevelyan can make almost as well as the Premier—that purchase is injurious to them, that its first object is to retain the power of the sword in the hands of capitalists, and we shall have a Parliament pledged to its lips to its summary extinction without compensations. It will then appear to everybody, Conservatives included, that the Lords in their campaign for prestige have lost sight of the object of the war; that they have unintentionally repeated Mr Disraeli's mistakes, and in order to secure the victory have sacrificed their standing ground. No doubt the honesty of the Peers will not be questioned as that of Mr Disraeli sometimes is, but their wisdom will be, and no one excites such distrust as an unwise advocate.

Again, in rejecting the Bill the Peers will be incurring another and very remarkable form of danger, one to which they have never yet been exposed. They will incur the hostility of the statesmen. Hitherto the governing men of Great Britain have been almost all aristocratic men, bound by a thousand ties to the House of Peers, imbued with its feelings though not with its policy, and unwilling to make any impassible chasm between it and them. Earl Grey, it is well known, in the very crisis of a revolution, shrunk from lowering his Order by swamping the House; and the single great exception to our rule, Sir Robert Peel, was dependent throughout three-fourths of his career on aristocratic support. But the Peers have only to look round to see that this state of affairs has passed away, that the rising men are from the middle-class, that substantial power can scarcely again accrete itself to a Peer. If, therefore, they break with the administrators they break with men with no secret sympathy with them, perhaps with a latent hostility to them—men who will go far in reforming their House. Now there can be no doubt that the rejection of strictly Executive Bills, and especially Bills about the services, irritates administrators excessively, makes them doubt if Government can be carried on so, and inclines them towards serious constitutional change. Prince Bismarck is no democrat, but it was this kind of resistance which induced him at last to throw over the titled squires, and seek for protection in that new machine, which though Conservative is essentially not aristocratic, which he calls the Federal Council. We have no wish to menace the Peers, but we have less wish to see them act without careful and deliberate forethought as to the results which may and, as we think, will, follow their action. And above all, we have no wish to see them with deliberate perverseness fling away substantial power in pursuit of an unsubstantial prestige.

THE EFFECT OF THE LARGE DIMINUTION OF THE BULLION IN THE BANK OF FRANCE, AND OF THE LARGE AUGMENTATION OF ITS BANK-NOTE CIRCULATION.

It has been said that during the last year the bullion reserve of the Bank of France has been diminished by 30,000,000*l*; that the note circulation of that Bank has been increased, singularly enough, by 30,000,000*l*; also that 60,000,000*l* has been added to the effective funds of the European money market, and therefore that we need not wonder that the value of money has declined when its supply has so much augmented. But this reasoning is wholly, or almost wholly, erroneous. As far as respects the 30,000,000*l* of bullion which has left the Bank of France, it is not so much added to the effective currency of the money market—it was *in* the money market when it was in the Bank of France. In truth while it was in the reserve of the Bank of France it was in a peculiarly effective position for influencing the rate of interest. That Bank had this time last year 52,000,000*l* of bullion and specie, and of course it was most anxious to lend them, and not to let a sum so extravagantly large lie idle. Now that 30,000,000*l* is scattered in various hands, in some degree is perhaps hoarded, and therefore it does not produce a greater effect on the value of money now than it did last year, even if it produces as great an effect. And as respects the addition to the French banknote circulation, this is largely, if not entirely, compensated by the hoarding of the former French metallic circulation, which has been consequent on the German invasion and the civil confusion. With their usual cautious and timid nature the French have retained all the pieces of gold and silver money which they could retain. And the proof that the 30,000,000*l* of banknotes are, in the main, a substitute for a disappeared circulation, is that they are not depreciated. If that immense sum had been added to the effective circulating medium in France, they would, according to all theory and all experience, have sunk to a discount. Greenbacks did so immediately in the Northern States of the American Union, where there was no hoarding equivalent to the issue. No material part therefore of the present cheapness of money throughout the world can be attributed to the reduction in the amount of bullion in the Bank of France, or to the extension of the banknote circulation of that Bank. Neither constitutes any real or effective addition to the circulating and lending medium. But it is nevertheless true that, though the diminution of bullion in the Bank of France produces no effect on the aggregate and average money market of the world, it may nevertheless have some effect on the cheapness of money in particular places. Some of the gold now in the Bank of England would have been in the Bank of France if these events had not happened. Now so related are the money markets of the world that bullion in the Bank of France, by cheapening money there, soon tends to cheapen it in London. Still the direct and immediate effect on Lombard street of money in Paris is not so great and not so quick as that of money in London; and to the extent of that difference the Franco-German war has tended to create a local congestion and reduced value of money in London, just as it has caused a local diminution in the amount, and an augmented value, of money in Paris.

BOARD OF TRADE RETURNS.

The Trade and Navigation accounts for June were published yesterday, and we give below our usual figures relating to the principal articles of import and export. Our readers will bear in mind that the comparison does not hold good in all respects—more especially as regards the import trade—owing to the alteration in the mode of making up the returns; the results are therefore only approximate. Our full tabular statement will appear next week. The value of the imports of foreign and colonial produce into the United Kingdom during the six months ended June 30 was—

	£	
1869	125,215,086	(computed).
1870	138,638,205	—
1871	155,356,414	(declared).

In June only the imports were—

	£	
1869	24,116,230	(computed).
1870	26,791,472	—
1871	28,431,364	(declared).

The declared value of the exports of British and Irish produce and manufactures during the six months under review was—

	£
1869	91 [illegible]
1870	97 [illegible]
1871	101 647,970

And in June only—

	£
1869	16,740,645
1870	17,307,324
1871	19,208,[illegible]

The following statement shows the increase or decrease in the declared value of the imports of the several articles enumerated during the first six months of the current year, as compared with the computed real value of the imports during the corresponding period in 1870:—

Articles.	1870. £	1871. £	Increase. £	Decrease. £
Coffee	1,750,385	2,471,089	720,704	...
Wheat	[illegible]	[illegible]	[illegible]	...
Cotton	[illegible]	37,[illegible]	2,910,104	...
Flax	[illegible]	[illegible]	...	439,346
Hemp	[illegible]	[illegible]	381,702	...
Silk	[illegible]	3,[illegible]	...	415,147
Manufactures	[illegible]	[illegible]	...	2,786,194
Sugar, unrefined	[illegible]	[illegible]	455,896	...
Tallow	1,208,477	1,[illegible]	81,741	...
Timber	[illegible]	[illegible]	247,277	...
Wine	[illegible]	[illegible]	[illegible]	...
Wool	[illegible]	[illegible]	[illegible]	...

Annexed we give a statement showing the increase or decrease in the leading articles of export during the same periods:—

Articles.	1870. £	1871. £	Increase. £	Decrease. £
Beer and ale	1,[illegible]	1,[illegible]	...	65,039
Cloth &c.	[illegible]	[illegible]	55,099	...
Copper	[illegible]	[illegible]	...	[illegible]
Cotton yarn	[illegible]	[illegible]	...	214,[illegible]
Woollen do.	[illegible]	[illegible]	...	92,[illegible]
Earthenware	[illegible]	[illegible]	...	19,[illegible]
Haberdashery	[illegible]	[illegible]	515,187	...
Hardware	[illegible]	[illegible]	...	119,[illegible]
Iron and steel	[illegible]	[illegible]	...	[illegible]
Linen yarn	[illegible]	[illegible]	...	121,[illegible]
Machinery	[illegible]	[illegible]	...	21,[illegible]
Silk manufactures	[illegible]	[illegible]	71,057	...
Woollen and worsted stuffs	[illegible]	[illegible]	...	[illegible]
Miscellaneous	[illegible]	[illegible]	1,[illegible]	...

The following are the totals of wine imported and entered for home consumption respectively in the six months ended June 30, 1870 and 1871:—

	Imports. Quantities. 1870. gals.	1871. gals.	Value. 1870. £	1871. £
Red wine	[illegible]	[illegible]	[illegible]	1,[illegible]717
White wine	[illegible]	[illegible]	[illegible]	2,217,431
Total of wine	[illegible]	9,[illegible]713	2,[illegible]142	3,587,148

Entered for Home Consumption.		1870. gals.	1871. gals.
From France	Red	[illegible]	[illegible]
	White	[illegible]	[illegible]
From Portugal		[illegible]	[illegible]
From Spain	Red	[illegible]	[illegible]
	White	2,[illegible]	2,[illegible]741
Other countries		[illegible]	[illegible]
Total	Of wine	7,527,708	8,[illegible]921
	Red	3,[illegible]	3,[illegible]144
	White	4,124,782	4,[illegible]922

The following is an account of the quantities of certain principal articles of imported merchandise (subject to duties of Customs) remaining in the bonded warehouses of the United Kingdom on the 30th June, 1871, compared with the quantities in warehouses on the 30th June, 1870:—

		1870.	1871.
Cocoa	lbs.	[illegible]	[illegible]
Coffee		[illegible]	[illegible]
Pepper	cwts.	[illegible]	[illegible]
Rice		[illegible]	[illegible]
Spirits—Rum	proof gallons	[illegible]	[illegible]
Brandy		[illegible]	[illegible]
Sugar—Refined and candy	cwts.	[illegible]	[illegible]
Unrefined		[illegible]	[illegible]
Molasses		[illegible]	[illegible]
Tea	lbs.	[illegible]	[illegible]
Tobacco		[illegible]	[illegible]
Manufactured and snuff		[illegible]	[illegible]
Wine—From France	gals.	[illegible]	[illegible]
Portugal		[illegible]	[illegible]
Spain		[illegible]	[illegible]
Other countries		[illegible]	[illegible]
Total of wine		[illegible]	[illegible]

* Including the stock in the Customs warehouses of spirits and wines received under bonds from the Customs warehouses under 43 & 44 Vict. c. 123.

BUSINESS NOTES.

The Supposed Decline of the Revenue.—A good deal has been written this week about the unsatisfactory state of the revenue, particularly of the Customs, as shown by the return for the quarter ended 30th June, but some material facts have been forgotten. There is, it is admitted, an increase for the quarter of 527,000*l*, but it is pointed out that this is chiefly in miscellaneous receipts, and the decline of Customs by 302,000*l*, and taxes by 415,000*l*, are considered to be somewhat alarming. As regards Customs, however, at least part of the falling off, and probably the larger part of it, is fully accounted for by the reduction of the sugar duties, which did not come into effect till the 2nd of May last year, so that in the June quarter of 1870, with which the present return is compared, there was at least one month of sugar duty at the old rates. This would cause some difference, and we should think that instead of a decline of 302,000*l* there is a real though not apparent increase. As regards taxes again, the truth is that the change in the time of collection, which Mr Lowe proposed in his first Budget, is only now completely taking effect, while they are also affected by transfers to other heads of collection. Generally any comparison of one quarter with another is for the present all but impossible, as not a few of the changes proposed by Mr Lowe in his Budget of 1870 were only to come partially into effect that year. We are now experiencing the full effect, but the comparison is made with quarters in which the changes had not begun to operate.

M. Wolowski.—The return of M. Wolowski at the head of the poll for Paris is an event in which political economists everywhere may express some satisfaction. As one of the foremost representatives of the French school, and an ardent Free-trader, M. Wolowski has made himself a name far beyond the limits of France, and his writings, we should think, are almost as well known among economists here as in France. Whatever aberrations the Parisian constituencies may have been guilty of, the return of M. Wolowski will be accepted as an indication that they are coming back to right reason and common sense at last—that Paris is to be represented in the Assembly by at least sane men, who are accustomed to deal with political questions in a scientific and practical spirit, and who bring to bear on them habits of investigation and study which are essential to definitive solutions, and not merely temporary expedients. Perhaps, as our Paris correspondent hints, M. Wolowski's economic merits have been less in the minds of a portion of his constituents than political considerations, but M. Wolowski's fame has been chiefly in economic science, and we cannot but think his superior popularity is due to a recognition of his real merits.

Mr Gladstone and the Metropolitan District Railway.—The opening of the Mansion House Station of the Metropolitan District Railway is certainly an event of some importance in relation to the railway communication of the Metropolis. It provides a short line to the City for several populous districts in the west of the Metropolis which have been without that advantage, though they have possessed a railway connection of a somewhat inferior kind. It also provides a new channel by which certain of the great trunk lines—especially the Great Western, London and South-Western, London and North-Western, and Midland—may communicate with the City. But we doubt whether the event, important as it is, deserves all the fuss made about it at the opening of the new station on Saturday, and whether the shareholders are equally to be congratulated with the public of London on the new facilities provided. This last point is the more interesting because the Prime Minister announced himself a shareholder, and spoke in sanguine language of the prospects of himself and his partners. We hope Mr Gladstone is at least a preference shareholder, as the prospects of the ordinary shareholder, who is usually understood when the shareholder simply is spoken of, are anything but brilliant; and even the preference shareholder has not very good expectations of immediate profit. To give the ordinary shareholder 2¼ per cent., the line should yield the following net revenue:—

£		£
1,750,000	Debenture stock and loans at 6 per cent. ...	75,000
1,[illegible]	Preference shares at 5 per cent.	75,000
2,250,000	Ordinary stock at 2½ per cent. ...	56,250
	Total net revenue required ...	206,250

Allowing only 40 per cent. for working expenses, which is hardly a sufficient allowance, looking at the experience of the original Metropolitan line, it would take a gross traffic of 343,750*l* per annum, or 6,600*l* per week to yield this net revenue of 206,250*l* required to pay the ordinary shareholder the very moderate dividend of 2¼ per cent. But as the present traffic is only about 2,800*l* per week, it would take an *increase* of 3,800*l* per week, or far more than double, to realise even this

moderate expectation. There is no precedent for any similar increase in the history of Metropolitan railways—certainly not for so vast an increase from so comparatively small a cause as the addition of a city station to a line circumstanced like the Metropolitan District. The only precedent spoken of is the increase of traffic on the original Metropolitan Railway on the extension from Farringdon to Moorgate street; but the circumstances are not similar, as the Metropolitan serves larger and more populous districts, and it had then no competitor. As we showed some time since, the Metropolitan District will in fact be fortunate if it obtains at a reasonably early date a traffic of 4,200*l* per week, which would pay the preference shareholders about half what they are entitled to receive, leaving a large margin to be covered before the ordinary shareholders get anything. We are sincerely sorry for Mr Gladstone's sake that any part of his fortune should be embarked in so doubtful a speculation, and we are equally sorry that he should have been led to speak in public in praise of his adventure, as not a few will be persuaded to embark in it on his authority, believing that he has studied it more carefully than he appears to have done. In any case it is rather unbecoming in public men to vaunt a particular business, and perhaps unwittingly assist some unworthy stock-jobbing manœuvres.

THE JOINT STOCK BANK DIVIDENDS.—Notwithstanding the low rate of discount which has prevailed, the past half-year cannot have been an unprofitable one for bankers. The dividends of the London Joint Stock Banks and Discount houses already announced compare as follows with those of the corresponding half of last year:—

	1st Half-year, 1871.	1st Half-year, 1870.
London and Westminster	18	18
London Joint Stock	20	14½
Union	20	20
City	8	7
National Discount Company	18	16

There is thus in some cases an improvement, while in the others an equality with the dividend of the corresponding half of the previous year has been maintained. The inference is that the quantity of good business in the country must have increased in the interval, as the banks have made rather better profits with a lower rate for money. During the last six months the Bank rate was 2½ per cent. for four months, viz., from January 1 to March 1, and from April 13 to June 12; six weeks at 3 per cent., viz., from March 1 to April 13, and between two and three weeks at 2½ per cent., viz, from June 12 to the close of the half-year. In the corresponding half-year of 1870 however, the rate was 3 per cent. during the entire half-year. The exceptionally large increase of profit of the London Joint Stock Bank is probably the result of the negotiation of the German loan, the profits of which operation were carried over to the last half-year.

TRUSTEES AND DEBENTURE STOCKS.—The Bill to enable trustees, authorised to invest in debentures, to do so in debenture stocks, unless where expressly prohibited, has now become law. On account of its interest to business men, we print the Act in full:—

AN ACT TO REMOVE DOUBTS AS TO THE POWER OF TRUSTEES TO INVEST TRUST FUNDS IN DEBENTURE STOCKS.

Whereas, by divers Acts of Parliament, and more particularly by the Companies Act, 1863, and the Acts amending the same, companies authorised to issue debenture stock are empowered to raise, by means of such stock, all moneys which they may for the time being be authorised to raise on mortgage or bond:

And whereas, doubts are entertained whether it is lawful for trustees who may be authorised to invest trust funds in the mortgages or bonds of companies to invest such funds in debenture stock:

Be it enacted, &c.:—

1. Where a power has before the passing of this Act has been or shall at any time hereafter be given to trustees to invest trust funds in the mortgages or bonds of a railway company, or of any other description of company, such power shall, unless the contrary is expressed in the instrument creating the power, be deemed to include a power to invest such funds in the debenture stock of a railway company or such other company as aforesaid, and an investment of trust funds in debenture stock may be made accordingly.

2. The expression "trustees" shall include executors and administrators and any other persons holding funds in a fiduciary capacity.

3. This Act may be cited for all purposes as the Debenture Stock Act, 1871.

As the Act has been interpreted to give a general authority to trustees to invest in debenture stocks, it may be expedient to call attention to the limitation that it is only trustees who are authorised to invest in debenture bonds who are empowered to take debenture stocks instead. The limitation to cases where there is not an express prohibition of debenture stocks is also important.

STOCKBROKERS AND THEIR CLIENTS.—The case of Mathias *v.* Scrimgeour and others, which has just been tried by the Lord Chief Baron and a special jury at the Guildhall, is of a somewhat curious description, raising a practical question as to the possible consequences to brokers of taking verbal orders. Business could hardly go on without such orders; but if a client is disposed to raise difficulties, brokers may sometimes find themselves involved in troublesome litigation. The present action was brought by a foreigner against the defendants, a firm of brokers, for not carrying out instructions he had given in regard to the sale of 50,000*l* stock of the French National Defence loan which they had bought for him. He had told them, he said, on the 12th of April, to sell the stock at 92½, and buy it back for him for the next account at the same or a less price; but they had sold at 91⅛, and had not bought back. According to the defendants' account, which the jury, by finding for them, appears to have accepted, and which is certainly much more *vraisemblable*, they had at first received instructions to sell at 91⅞ to 92¼, but were unable to do so at that price, and then received the plaintiff's authority to sell at 91⅛—nothing being said about buying back. This last account seems more like a real transaction than the other; but then to corroborate it, as the orders had been verbal, it was necessary to give evidence as to the quotations of the day for the stock in question, and as to the practice of the Stock Exchange with regard to such an order as the plaintiff says he gave—an order which was obviously impossible of accomplishment. Fortunately for business, respectable brokers and their clients can trust each other sufficiently to give and act upon verbal orders, the habit being strengthened by the large credit regularly given in the rapid transfer of securities for cheques; but occasionally the nice credit system breaks down, and the brokers concerned are involved in some difficulty and trouble.

RAILWAY TRAFFIC AND DIVIDENDS.—In writing last week on the increase of railway traffic and probable dividends, it was necessary to make an estimate for the remainder of the half-year which had to run after the date to which we had the actual figures. That no material error has arisen is shown from a comparison of our estimate with the actual results now published in the case of the railways whose half-year is completed. The comparison is—

	Estimate. £	Actual Result. £	Excess or Deficiency upon Estimate. £
Bristol and Exeter	5,000	5,064	+ 64
Great Eastern	23,000	23,814	+ 814
Great Northern	33,000	39,014	+6,014
Lancashire and Yorkshire	113,000	116,248	+3,248
Chatham and Dover	5,000	7,378	+2,378
London and North-Western	183,000	180,830	−2,170
London and South-Western	32,000	32,650	+ 650
Sheffield	20,000	21,248	+1,248
Metropolitan	7,000	7,455	+ 454
Metropolitan District	32,000	32,293	+ 293
Midland	114,000	121,871	+7,871
North-Eastern	176,000	175,064	− 936

The differences are thus insufficient to cause any appreciable difference in reckoning the benefit to the shareholder from an increase of traffic. Such as they are they are almost all in his favour, the estimate we made being rather under than above the reality.

PAYMENT OF A BILL BY A BANKER.—A case—Pollard *v.* the Bank of England—in which the question was as to what constituted payment of a bill by a banker, has just been decided by the Court of Queen's Bench. The action was brought by a customer of the branch Bank of England, at Newcastle, who had received instructions to collect a bill due to the plaintiff, and, according to the plaintiff, had received payment from the acceptor's bankers; but after doing so, the acceptor himself having failed, had debited him with the amount of the bill as dishonoured. The dispute arose out of a *quasi* clearing-house system in practice among the Newcastle bankers—the bankers of the town balancing the bills or cheques payable among each other and giving cheques for the differences. It was also the custom where a bill was held payable at another house to send in the course of the day to know if it would be paid, and if it was initialled and returned to include it in the account thus settled by cheque. The

plaintiff's bill in the present case had been so dealt with, and at the close of the day it was included in the cheque given to settle the account. Soon afterwards, however, it was found that the acceptor had stopped payment, and the bank which had given the cheque desired the repayment of the amount of the bill, which, however, the Bank of England branch refused, though it afterwards—being indemnified by the other bank—claimed to debit the plaintiff's account with the 500*l* as unpaid. The question thus was whether the Bank of England branch had received payment, and the Court now decided unanimously that it had. Mr Justice Blackburn said that what was done amounted to far more than a mere provisional arrangement. An understanding that "all errors "and mistakes should be corrected" did not affect the question, as the giving of a cheque was not a mere formal and provisional act. Judgment was therefore given for the plaintiff.

PERSONAL AND REAL PROPERTY.—A case, which puts in the strongest light the absurdity of the legal distinction between personal and real property, especially in the difference of the rules laid down for succession, came before Vice-Chancellor Wickens this week. The point in the case—Fowler *v.* Scott—was whether certain property in Chancery was to go to the husband of a deceased lady or her sisters, and it all depended on the question whether the property was personal or real. If personal it would go wholly to the husband, if real to the sisters. It appeared that the estate was real estate; but a decree had been made in the cause directing its sale, to which the lady before marriage had given her consent, and this was interpreted by the Court as showing an intention on her part that it should be converted into personal property. Consequently the husband was held entitled to succeed. Clearly a mere chance has in this instance been held to regulate the destination of property, as no lady was at all likely to contemplate so incidental an effect of her consent to a sale as that it would decide the succession to her estate. If she had thought about the matter at all she would have ascertained there was a legal doubt, and made a will. No case could show more forcibly the absurdity of legal distinctions about property which make its destination at death dependent on a mere chance.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending June 30:—

	Receipts of Week Ending June 30.
	£
Customs	262,000
Excise	145,000
Stamps	151,000
Taxes	4,000
Income tax	47,000
Post Office	275,000
Telegraphs	50,000
Crown lands	20,000
Miscellaneous	41,141
Total	994,141

The total receipts of the previous week were 1,117,078*l*.

The Exchequer issues of the week on account of expenditure were 3,124,633*l*, viz.:—

	£
Interest of debt	nil.
Other charges on Consolidated Fund	80,000
Supply services	2,974,633
Telegraph services	70,000
	3,124,633

During the week the cash balances have decreased as follows:—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on June 24	5,551,659	1,192,504	6,744,163
— June 30	3,991,908	1,067,992	4,344,170
Decrease	1,559,751	124,512	2,399,993

The other receipts to date were 5,918*l*, the other payments were 109,859*l*.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, July 6.

The Government has not yet published the precise figures of the subscription to the Loan, and consequently subscribers do not know the rate per cent. they will get. In a matter of such importance, expedition is highly desirable; but when the finances of the country are administered not by a practical financier, but by a cotton spinner, delay and bungling are to be expected.

In the elections that have just taken place, it is to be noted that what the French call Free-trade was of small account, and yet it is audaciously attacked by the men now in power. M Rouher, who after M. Michel Chevalier is the principal author of the Treaty of Commerce with England, has been beaten both at Bordeaux and in the Charente Inferieure—the wine and brandy exporting districts, which have immense interest in the Treaty; and some of his followers have been unsuccessful in other places. It is true that these gentlemen are Imperialists as well as Free-traders, and Imperialism is not fashion just now; but it is sad to see that the French do not attach more importance to the permanent interests of their country than to mere politics, which with them change like the cut of ladies' dresses, and have about as much reason for changing. As a set-off to these checks, M. Wolowski is elected in Paris, and at the head of the poll too. One of the luminaries of economic science, and as such, having contributed largely to promote commercial reform, his success will be applauded by all who like to see merit recompensed: all too who desire that France may be quiet and prosperous, and are convinced that for her, as with us, material prosperity and political tranquillity are to be found in the application of economic doctrines. And yet he was chosen by Paris less for economic than for political considerations. Seeing how deeply this city is concerned in the maintenance of the system that M. Thiers and M. Pouyer-Quertier are attacking, it is much to be regretted that it did not take M. Wolowski exclusively for the reason that he is *libre échangiste*, and did not elect with him many others of his way of thinking.

Although in the elections the question of Free-trade, as the French designate it, though nothing like Free-trade exists in France, did not obtain the attention it deserved, we may expect that now that political strife is over it will become one of the principal subjects of public concern. M. Michel Chevalier has already come forth to do battle on it, and as during long and weary years he fought to obtain commercial reform, we may be certain that he will now struggle energetically to maintain what he obtained. And though he can no longer speak to the country from the tribune of the Senate, he still possesses his Professor's chair at the Collège de France, and has still at his disposition the leading newspaper of Paris, and his lectures and his articles will assuredly be studied by tens of thousands. His opening discourse at the Collège de France was mentioned in a preceding letter, and may well have to be said about it when it is printed. Since then he has published in the *Journal des Débats* an article which has set its readers thinking, and has, we may be sure, caused great discomfort to M. Thiers and M. Pouyer-Quertier—those astonishing statesmen who see no other means of rescuing France from the financial difficulties that beset her than in the re-establishment of Protectionism. Under pretext of examining the statistical documents published by our Board of Trade and our Customs' tariff he makes the most cruel and crushing criticism of the Protectionist project of his two countrymen that it is possible to conceive. He shows that with us the more Customs have diminished the more revenue from them has increased; that a host of duties on high things are less profitable than moderate duties on a few great ones; that though we get a larger income from a penny postage than we did from high rates, we are reducing postage below a penny, and are expecting to get still more by doing so—all of which is the exact contrary of what the wise M. Thiers and his Norman colleague are proposing. If in this country questions were decided by common sense, M. Michel Chevalier's article would instantly annihilate the Government project; but though France with the exquisite modesty for which she is distinguished, thinks herself the most enlightened nation in the world, and says so she is undeniably wanting in *bon sens*. In the course of his lucubration, M. Michel Chevalier condemns the Empire for having contrary to the principles it professed yielded to Protectionist clamour in the matters of printed calicoes, iron for machinery, and sea fisheries. He also blames the English Government for not amending the duty on sugar, which, as it is established, seems to him not in accordance with sound principle.

That, as said above, the revival of Protectionism which the Government proposes will work evil to general interest is evidenced from the fact that even in the bulletin of commerce that has marked the past week cries have been raised and have been extremely earnest about it at Lyons, Marseilles, Havre, Bordeaux, the towns that are chiefly threatened by it in their

manufactures, their commerce, and their shipping. Lyons, not content with protesting through its Chamber of Commerce, is making its population sign a petition to the National Assembly, which says:—"The proposed tax on raw materials will not be a new resource for the Treasury. It will inevitably produce a diminution in public wealth, and cause fatal trouble in the existing conditions of labour, because it will weaken the great commercial and industrial movement which alone developes the forces of the country, and enables savings to be effected." At Havre one of the principal shipowners, M. Quesnel, has published a letter to show that tonnage dues on ships, and extra duties on goods brought in under foreign flags, will be profitable to shipowners, but disadvantageous to the country. Another resident of Havre, M. de Coninck, in a letter to one of the local newspapers, mentions a fact which shows in a striking manner how M. Pouyer-Quertier's system of taxing cotton and other raw materials is expected to work. "A cotton spinning factory at Barentin was sold last year for 80,000f. On the 27th June, 1871, it was bought by auction for 178,000f." "No doubt," M. de Coninck remarks, "the purchaser thinks that in less than two years he will be able to make French consumers pay the price."

The Bank of France on Friday last published a return of its situation, and as it was the first issued since 13th September, 1870, a few days before the city was invested by the Prussians, it excited great interest. It showed that the coin and bullion in hand on the 29th ult. were 549,846,061f, and the notes in circulation 2,212,884,865f; that the bills discounted in Paris were 153,410,403f, those "prorogued" (due but not paid), 371,385,060f; and those due that day (the 29th), 7,673,179f; those of the branches, 217,071,181f. In addition the Treasury bills, to the amount of 1,193,000,000f, were held. The deposits in Paris were 451,255,131f; in the branches, 72,883,588f; and of the Treasury, 140,787,164f. The return contained a new item—"advances to the City of Paris"—and it was of 210,000,000f. On the 13th September, 1870, the coin and bullion were 790,100,000f; the circulation, 1,774,000,000f; the discounts, 1,360,200,000f. On the 30th of June of the same year these items were 1,297,500,000f, 1,447,100,000f, and 649,500,000f. Formerly the Bank used to issue its returns on Thursdays; but none has appeared to-day. It is officially announced that on the 13th a meeting of shareholders will be held to receive a complete report on the operations of 1870. In January, during the siege, in an assembly of the principal shareholders who had remained in Paris, an incomplete report was presented.

The following is the return of the Bank of France for the week ending the 29th of June, 1871, together with the corresponding figures of the previous account:—

	June 29, 1871.	Sept. 8, 1870.
Dr.		
Capital of the bank	182,500,000 0 ...	182,500,000 0
Profits in addition to capital (Art. 8, Law of June 9, 1857)	7,246,906 47 ...	7,045,160 82
Reserve of the bank and its branches	22,105,750 14 ...	22,105,750 14
Reserve of landed property	4,000,000 0 ...	4,000,000 0
Notes in circulation	2,212,884,865 0 ...	1,745,050,775 0
Banknotes to order, receipts payable at sight	36,732,872 68 ...	84,769,321 70
Treasury account current, creditor	140,787,164 93 ...	178,779,821 42
Current accounts, Paris	451,225,131 56 ...	334,406,630 31

Government stock reserve	12,980,750 14 ...	12,980,750 14
Do disposable	71,557,187 21 ...	80,557,187 21
Rentes Immobilisées (Law of June 2, 1857)	100,000,000 0 ...	100,000,000 0
Hotel and furniture of the bank, and landed property branches	8,728,222 0 ...	9,033,882 0
Expenses of management	9,647 65 ...	1,332,965 35
Advances to the City of Paris, Feb. 11, 1871	210,000,000 0 ...	...
Sundries, including the amount of the operations relative to the loan in the branch banks	74,359,650 72 ...	16,596,546 57
Total	3,188,409,149 90 ...	2,694,757,406 92

It is stated, but not officially, that a sum of 200,000,000f has, within the last few days, been paid to the Prussians on account of the indemnity; and before the 10th a farther sum of 300,000,000f, taken from the loan, will be given. Five hundred millions, it will be remembered, were to be paid within a month from the capture of Paris, but the French have had to ask for a few days grace.

The National Assembly has once again been under the necessity of modifying the law relative to the payment of commercial bills, and the following is the principal enactment of the new measure:—

"Art. 1. The delay of seven months accorded by Art. 2 of the Law of March 10, 1871, for the protesting of commercial bills due from 13th August to 12th November, 1870, is prolonged for four months; the said bills being then payable, date for date, from 13th July to 12th October, 1871. Bills due from 13th November to 12th July next, shall be payable, date for date, from 13th October to 12th November. These enactments are only applicable to bills due in Paris and in the other communes of the department of the Seine, and for bills issued previous to 1st May last. Bills issued since 31st May and already due, or falling due before the promulgation of the law, must be protested within five days from the promulgation."

In the course of the discussion to which the preceding Bill gave rise, complaint was made of the refusal of Courts of Law in Germany to recognise the delay granted in France for bills since the outbreak of the war—a refusal which has had the effect of permitting German debtors not to pay their French creditors, on the pretext of presentation not being made in due time. The Minister of Foreign Affairs said he had made diplomatic representations on the subject, but intimated that he had small hope of obtaining redress.

It has been stated that the Municipality of Lyons has re-established the octroi, which was abolished by the Commune. But a resolution of the Municipal Council declares that system of taxation to be bad in principle, and that it is only revived temporarily, from "the absolute impossibility of finding other receipts." From the resolution it appears that, contrary to what was stated, the Government has made no advance of money to Lyons. The Council describes "the financial situation of the city as most critical."

The Bourse has been much occupied with the new loan, and has made it the pretext of an "explosion de hausse," which has extended to most other securities. Not a few authorities think that the advance has been put higher than was prudent. The London loan, or, as it is called here, the Morgan, has not yet been admitted to the quotation, and the Government has not notified what it will do with respect to it. Complaints are heard that the Treasury is making subscribers in Paris to the 750,000,000f pay interest on calls in arrear during the Commune epoch, though none was exacted for arrears previous thereto, and though, the Government having fled, there was no means of paying up in Paris. The advance in the Credit Mobilier will be noted: it is owing to reports that M. Pereire is reviving projects conceived before the war. The following are the quotations of the week:—

	June 29.	July 6.
	f c	f c
Threes	52 90 ...	56 2

Messrs de Rothschild have been paying since the 1st the dividends of the Italian 5 per Cent. stock. A tax of 13.20 per cent. is deducted from them.

In a meeting of the shareholders of the Western Railway it was stated that the dividend for 1870 will be 20f. which is 15f less than the year preceding, but that it cannot be paid for the present.

The directors of the Lyons and Mediterranean Railway announce that they have fixed the dividend of 1870 at 40f. Of this sum 10f were paid in November, and the rest is to be given "at an epoch to be hereafter appointed." The annual meeting of this company is to be held on 3rd August.

The Credit Industriel is paying 10f per share as balance of dividend (12f 50c of 1870.

The Spanish Credit Mobilier is from the 7th to pay the 30f per share voted in the recent meeting of shareholders.

The payment of the coupons of the Ottoman loans, 1863 and 1865, due 1st July, is being made by the Credit Mobilier, and that of the 1860 loan by the Credit Industriel. The latter, yesterday (the 5th), proceeded to the drawing of bonds of the said 1860 loan, destined to be paid off.

The coupon of shares and bonds of the Italian Tobacco loan, due 1st July, is being paid by Messrs Stern. The dividend of 1870 is to be paid hereafter.

The dividend of the Coal Pits de la Grand Combe for 1870 is 50f.

The Medoc Railway is to pay from the 15th the coupons of obligations due in January and July.

The Coal Pits and Ironworks of Commentry, Fourchambault, &c., are to pay from the 15th half-a-year's interest on bonds.

The French Transatlantic Cable is to distribute from the 10th 12f 50c as balance of dividend for 1870.

The payment of a coupon of the mortgage bonds of the Viceroy of Egypt and of bonds drawn is to be made at Paris and Marseilles from the 7th by Messrs Pastré.

The meeting of the Comptoir d'Escompte, fixed for the 14th, has had to be postponed to the 29th in consequence of a sufficient number of shares not being deposited.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the fourth week of June, 1871, and of the corresponding week in 1870 :—

In 1861, greater ease in the open market had been produced by the payment of the dividends. The famine of cotton was beginning to be seriously apprehended.

In 1868, money was still at 2 per cent., and the accumulation in Lombard street was receiving daily additions. A gradual fall in the price of wheat was expected from the excellent prospects of the harvest.

In 1869, money was tending downwards as usual after the payment of the dividends, and in the absence of speculative activity. The new Bankruptcy Bill was making progress.

In 1870, money was easy, the payment of the dividends having caused a large transfer of means from the Bank to the general market. On the Stock Exchange, the Hohenzollern incident, which led to the war of last year, had produced a great effect, and there was a decline in all classes of securities. The Lords had just assented to the Irish Land Bill, after a final crisis respecting the Commons' dealing with their amendments.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,985,993*l*; in 1868, an excess of 4,745,649*l*; in 1869, an excess of 3,681,873*l*; and in 1870, a deficiency of 339,779*l*. In 1871, there is an excess of 3,809,820*l*.

Discount and Money Market.—Since last week the aspect of the money market has greatly changed; at that time there was some momentary stringency on account of the deposits necessary for the subscription to the French loan, and also on account of the usual preparations by joint stock banks and others for the close of the half-year. But these temporary causes of pressure have this week disappeared; the large subscription of the loan in France has removed apprehensions as to the effect of the French money being called for, and the entrance upon a new half-year at once releases the banks and other institutions from the necessity of adjusting their business so as to show a strong account. The quarterly payment of the dividends has likewise, as usual, contributed to the ease of the money market during the first week of the half-year. The rates charged are accordingly much less than those quoted last Friday, being 2 per cent. for the best short-dated paper, instead of 2½, while the rates for paper at longer dates have also fallen in proportion. Both at the Bank and in the open market there is a very slack demand, and great superabundance of money. On the Stock Exchange money is lent from day to day on English Government securities at 1 per cent.

The changes in the Bank account for the week show its continued strength. The public deposits have decreased 670,000*l*, but there is an increase of 1,852,000*l* in the private deposits. On the other hand, the private securities have increased 521,000*l*, and the public securities 1,883,000*l*. The changes are mostly indicative of the payment of the dividends, the Bank having apparently increased its advances to the Government for that purpose, while the increase of the private deposits shows that the dividends paid were in transit to the open market, upon which they now have a sensible effect. The proportion of reserve to the banking liabilities is less than it was last week; and the stock of bullion in both departments has been reduced about 115,000*l*.

With regard to the great accumulation of money in Lombard street, it is again stated that leading bankers have advices of drafts upon them from Paris which will carry away some of the surplus; but it is not now expected that any such quantity can now be taken away as will cause any pressure.

We subjoin our usual quotations for mercantile paper having various periods to run:—

Bank bills—2 and 3 months	2	per cent.
Do 4 months	2¼	per cent.
Do 6 —	2¾	per cent.
Trade bills—2 and 3 months	2¼	per cent.
Do 4 months	2½ 3	per cent.
Do 6 —	3 ¼	per cent.

The allowances for money at the joint stock banks and discount houses are as follow:—

Joint Stock Banks at call	1½ per cent.
Discount houses at call	1¼ per cent.
Do with seven days' notice	1⅜ per cent.
Do fourteen days'	1½ per cent.

The discount quotations current in the chief continental cities are as follows:—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	2½	6	2½	...
Vienna	5	5	5	5
Berlin	4	4	3¾ 4	3½
Frankfort	3	3½	2½	3½
Amsterdam	3	3½	2¾ 3	3¼
Turin	...	6	...	6
Brussels	2½	4	2½	3½
Hamburg	...	...	3½	3½
St Petersburg	...	8	5 6	6

The Stock Markets.—The activity which set in last week consequent on the success of the French loan has been continued during the present week. The markets have been exceedingly buoyant after a slightly drooping tendency early in the week, due apparently to the efforts of large buyers, who wished to have a good start for the general rise which is anticipated. English Government securities and English railways have especially advanced, but in Foreign stocks, especially in the scrip of the French loan, which gave the tone to this department, there has been a similar improvement, and miscellaneous securities generally have also advanced. No other causes can be assigned but the cheapness of money, the continued prosperity of the country and accumulation of money, and the prospect of undisturbed peace on the continent for at least many months to come. With regard to the cheapness of money, we have already mentioned in our remarks on the money market that money is lent from day to day on English Government securities at 1 per cent., and as advances of other kinds are proportionately cheap, it will be understood at once how favourable the circumstances are for a speculative rise. Of course an upward movement is also favoured by the real increase in value of the leading securities, such as railways and banks, under the influence of the growing prosperity of the country, which continues without a check.

English Government Securities.—The advance in this department, which has had a great collateral effect on the other markets, has been very important. The closing price last week was 92⅛ ⅛, but to-day it is 93⅛ ¼ for the account—a rise of 1¼ per cent. for the week. The market is moreover very firm, the upward movement having been strengthened by the scarcity of stock at the settlement. It is pointed out that Consols are now hardly any better than at this time last year, when there was a smaller accumulation and greater demand for money, and the Bank rate was 3 instead of 2½ per cent. As we pointed out last week however, the imminent rush of new undertakings and new loans will not be favourable to the long-continuance of a high price of Consols, though in the present state of the market we shall probably touch even a higher figure before there is a turn. The improving prospects of the harvest, increasing the likelihood of continuous prosperity among the masses, and large profits in all trades, with consequent savings and accumulation of money, are also having a great effect on this department. To-day the market closes at the highest point of the week.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	92½	92⅝	92½	92⅝	par to 5s pm
Monday	92⅝	92½	92⅝	92⅝	par to 5s pm
Tuesday	92⅝	92⅝	92⅝	92⅝	par to 5s pm
Wednesday	92⅝	92⅝	92⅝	92⅝	par to 5s pm
Thursday	92⅝	92⅝	92⅝	93	3s to 8s pm
Friday	92⅝	93⅛	93	93⅛	4s to 9s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Victoria 6 %	110½ 11½	111 12	+ ½
Ditto New 5 %	105 6	103 4 xd	+ ½

Foreign Government Securities.—As we have stated, there has been all but a uniform rise in foreign securities, and we can only refer to the subjoined list to show what the rise has been—subject to the remark however that to-day the best prices of the week have hardly been maintained, owing to sales for realisations. The market however closes very firm, and a farther rise is anticipated. But great caution will be requisite on the part of investors, on account of the abundance of fresh demands which may be looked for.

The most noticeable feature is the improvement in French securities. The rise for the week in Rentes is about 3½, in the National Defence loan about 2½, and in the new loan 2½, in which the final quotation is 4⅛ ⅛. Better prices were reached

early in the week, but the market is now again very firm. In regard to the new loan, great uneasiness is beginning to be expressed as to the allotment, and doubts are freely expressed as to whether subscribers in London will receive anything. The prospectus, as we pointed out at the time, said nothing about reserving a portion of the issue for each financial centre in which applications were invited, and as the loan was closed on the evening of the day of opening, it is inferred that only subscribers whose applications were received in Paris on that day will receive anything. It is plain however that the applications at all the various places of issue ought to be treated on precisely the same footing, and subscribers out of France should have an equal claim with subscribers in Paris. We see no cause for uneasiness therefore beyond the certainty that there will be a short allotment, owing to the amount of applications on the first day. Still the great delay which has occurred is causing some anxiety among those who have applied for allotments.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

The Dunedin and Port Chalmers Railway Company (Limited) are offering 100,000*l* 5 per cent. mortgage debentures at a price of issue of 80*l*. The Bank of New Zealand act as agents in London. The debentures will be in amounts of 100*l* and 500*l*, and will bear interest for July 15. The principal is redeemable at par in London by annual drawings of not less than 2½ per cent., commencing on June 15, 1873.

AMERICAN SECURITIES.—The demand for Government bonds has continued steady, and the upward movement has made further progress. With regard to the new Funding loan, small investments continue to be made in the United States, but no transactions have been reported in this market. Prices of the old issues have been strongly supported by a large continental inquiry.

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Virginia 6 % Bonds	54 6	54 5	... ...

JOINT STOCK BANKS.—There has been a steady inquiry for joint stock bank shares for bona fide investment, and the tendency of the quotations has been upwards. British North American has advanced 3; London and County, London Joint Stock, Australasian, Ionian, and Oriental, 1; Anglo-Austrian, New Zealand, London Chartered of Australia, and Union of Australia, ½; Agra, Anglo-Egyptian, Imperial Ottoman, London and South-Western and Metropolitan, ¼; Land Mortgage of India debentures have given way 2, and London Bank of Mexico ½.

TELEGRAPHS.—A large business has been done in cable shares at advancing quotations. Anglo-American have been in request, and have risen 5 on the week, while there is an advance of 9 in Anglo-Mediterranean. French cables are ¾ higher; British Australian, ¼; British Indian Extension and Panama, ¼; China Submarine, ⅜; and Cuba, ½. Telegraph Construction shares have risen 1⅜, but Silver's India Rubber are ¼ lower on the week.

MINES.—Some important changes have taken place in the quotations for British mining shares, although the transactions during the week have not been extensive. South Caradon shares are nominally 20, and Wheal Bassett 10 lower; North Roskear have given way 8; East Lovell, 4; Van, 1; Wheal Grevill, ¼; Assheton and Marke Valley, ¼. South Condurrow and West Bassett have advanced ⅜; Great Laxey and Great Wheal Vor, ½; Margaret, 1; Herod's Foot, ¼. The only variations worthy of note in the foreign market are an an advance of 2½ in St John del Rey, and a decline of 1 in Eberhardts.

An issue of 10,000 shares of 1*l* each in the Old Treburgett Silver and Lead Mining Company (Limited), is announced. 20,000*l* has already been subscribed. This property, situate in the parish of St Teath, Cornwall, was successfully worked 40 years ago, and recently it was accidentally discovered that the capel, or wall of the lode, thrown away on the rubbish heaps, contained a true silver ore, distinct and separate from the lead, and this ore, gathered from the rubbish heaps, which had lain unnoticed for 30 years, realised as much as 40*l* a ton. The first parcel of lead, silver, and blende ores, raised from all parts of the old workings by the present company have just been sold by public tender, and have realised high prices.

Another new mining venture is the Taliesin Company (Limited), the proposed capital being 30,000*l*, in 5*l* shares. According to the prospectus the "company is formed for the purpose of acquiring, working, and developing the Taliesin Silver Lead Mines in Cardiganshire. The sett comprises an area of nearly 150 acres, held under lease for 27 years from 1868." The directors have made arrangements for the general management of the undertaking for a percentage of 10 per cent. of the net profits.

The Snowdrift Silver Mining and Reduction Company (Limited), is announced, with a capital of 75,000*l*, in 2*l* shares. The prospectus states that the company has been formed for the purpose of acquiring and working the "Snowdrift" (1,400 feet in length) and the "Daniel Peters" (also 1,400 feet in length) lodes, situate on the south slope of Republican Mountain; the reduction works situate at the foot of such mountain (the buildings for which are alleged to be completed), and water rights. No money or shares is to be paid to the vendors until the property has been examined, and the statements in the prospectus verified. If the report be, in the opinion of the directors, unfavourable, the deposit and allotment money will be returned, less 6d per share to meet expenses.

A prospectus has been issued of the Australian and New Zealand Dividend Gold Mines Investment Company (Limited), the object of which is to apply to gold mining speculation the principle of insurance by investments, which was first worked out by the Foreign and Colonial Government Trust. It is stated in the prospectus that there are many local companies in Australia and New Zealand whose shares are largely held in this country, which pay large profits, but they can with difficulty be dealt in here, owing to the delay of the transfer, while the ordinary investor cannot be expected to discriminate between colonial securities. The present company will do the work for him, and enable him to receive the profits of gold mining enterprise with a minimum of risk. The whole capital of the concern will be 50,000*l*, but the amount will be issued in successive series of 5,000*l* each, the present issue being of Nos. 1 and 2.

MISCELLANEOUS.—The dealings in this department have been of fair average importance, and the market has closed with a firm appearance. The principal movements on the week are—An advance of 3 in Australian Agricultural; 2 in Roumanian Bridges Annuities; 1 in Foreign Government Trust; ¾ in Berlin Waterworks; ¼ in Hudson's Bay and National Discount. City Offices and Ebbw Vale have given ½, and North Metropolitan Tramways ¼.

We have received the prospectus of the Leipzig Tramways Company (Limited), the proposed capital being 75,000*l*, in 10*l* shares. The object of the concern is to carry out a concession for the construction of tramways in Leipzig.

The Lisbon Steam Tramways Company (Limited) has been formed for the purpose of affording tramway accommodation to the city of Lisbon, for which a concession has been granted. The present issue consist of 20,000 10*l* shares. The directorate comprises some well-known names in the financial world, and the company appears to have been launched under favourable auspices.

The prospectus of a new undertaking, entitled the Bee Hive Fire Insurance Company (Limited) has appeared. The capital of the undertaking is 50,000*l*, in 1*l* shares, of which 5s is payable on application, and a similar sum on allotment.

EXCHANGES.—There is no particular change from last week to notice in the continental exchanges.

The tenders for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were—to Calcutta, 300,000*l*, and to Bombay 100,000*l*. The minimum price was fixed as before at 1s 10⅜d on all the presidencies, and tenders on Calcutta and Madras at 1s 10⅜d will receive about 12 per cent., and on Bombay at that price about 45 per cent.; those above in full. These results show a slight further increase in the demand for means of remittance to the East.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The demand mentioned in our last circular has quite subsided, and all arrivals are now purchased by the Bank, the amount sent in since the 29th ult. being 351,000*l*; on the other hand, sovereigns to the value of about 90,000*l* have been withdrawn for transmission to the Cape and Brazils. The City of Dunedin has brought 43,500*l* from New Zealand; the City of Auckland has brought 50,000*l* from New Zealand; the C. McAusland has brought 36,000*l* from New Zealand; we have received 280,500*l* from New York—total 410,000*l*. Some very large arrivals are expected within the next fortnight from Australia and New York.

Silver.—Owing to the fulfilment of orders the market is now not quite so firm, and the price to-day may be quoted at 60½d per oz standard. The demand is entirely for the continent. We have received about 133,500*l* from New York during the week, and further amounts are expected. The Tasmanian has taken 3,980*l* to the West Indies.

The *Gazette* return shows that the imports of the precious metals into the United Kingdom during the week ended

July 5, were—gold, 405,871*l*; silver, 159,794*l*. The exports were—gold, 55,230*l*; silver, 71,612*l*.

The sum of 50,000*l* in bar gold was sent into the Bank; 6,000*l* in sovereigns was withdrawn for India, 2,000*l* was sent to Brazil.

The following notice has appeared in the *Gazette*:—The Lords Commissioners of Her Majesty's Treasury having certified to the Commissioners for the Reduction of the National Debt, in pursuance of the Act 29 and 30 Vict., cap. 39, sec. 16, that the actual surplus revenue of the United Kingdom of Great Britain and Ireland, beyond the actual expenditure thereof for the year ended 31st March, 1871, amounted to the sum of 246,680*l* 18s 6d, the Commissioners for the Reduction of the National Debt hereby give notice that the sum of 61,670*l* 4s 7d, being one-fourth part of the said surplus of 246,680*l* 18s 6d, will be applied under the provisions of the said Act in the quarter ending the 30th day of September, 1871, toward the reduction of the National Debt.—A. Y. SPEARMAN, Comptroller-General.—National Debt Office, July 1, 1871.

South American, Lombardo-Venetian, and Central Italian Railway, general, Paris.
United Kingdom, general.
Hudson's Bay Company, special, City Terminus Hotel.

Friday, July 14.

Consolidated Bank, general, Manchester.

NOTICES AND REPORTS.

STOCKS.

Brunswick per Cent., 1865.—Bonds, representing 43,500*l*, have been drawn for redemption.

British—National Debt Reductions.—The sum to be applied during the current quarter towards the reduction of the National Debt is 61,670*l*.

Buenos Ayres Bonds.—Messrs Baring Brothers and Co. notify that the sum of 10,483*l*, set apart in January last for the 28th redemption of Buenos Ayres 3 per cent. bonds, has been employed in the purchase of bonds amounting to 17,300*l*; also that 6,457*l* has been employed in the purchase of Buenos Ayres 6 per cent. bonds, representing 6,500*l*.

Egyptian 7 per Cent., 1862.—Bonds, representing 21,000*l*, of the 1st issue and 10,500*l* of the second issue, have been drawn for redemption on the 1st September.

Peruvian 5 per Cent., 1865.—Bonds, representing 336,100*l*, were drawn on the 1st instant for redemption at par on the 1st of October.

RAILWAY COMPANIES.

East Indian.—At the meeting it was stated that the falling off now visible in traffic was counterbalanced by a large reduction in the working expenditure.

Illinois Central.—A dividend of 5 per cent. is payable on the 1st of August.

Louth and Lincoln.—The prospectus states that the share capital is 250,000*l*, in 10*l* shares, and the company will have borrowing powers to the extent of 83,000*l*. The Great Northern Company will work the line for 50 per cent. of the gross profits. The company offer 20,000 shares, 5,000 being reserved and agreed to be taken up in payment of land, &c.

Mont Cenis Railway, Limited.—Creditors are required to send particulars of claims to Mr J. A. Longridge, Westminster, the official liquidator, by the 14th instant, the 28th instant being appointed for adjudicating upon them.

BANKS.

City.—A dividend is notified at the rate of 8 per cent. per annum, while 5,000*l* is added to the reserve.

Colonial.—At the half-yearly meeting, the net profit was stated at 46,648*l*, and an ordinary dividend of 6 and an extraordinary dividend of 2 per cent. was declared for the six months.

Commercial Banking (Liverpool).—Half-year's dividend declared at the rate of 10 per cent. per annum.

London Joint Stock.—A dividend at the rate of 20 per cent. per annum has been resolved upon, as contrasted with 14½ per cent. at the corresponding period, carrying forward the sum of 14,700*l*.

London and Westminster.—A dividend at the rate of 18 per cent. per annum is announced for the past half-year, leaving a balance of 6,460*l*.

North and South Wales.—Dividend recommended, 17½ per cent. per annum.

Union Bank of Liverpool.—Half-year's dividend declared at the rate of 10 per cent. per annum.

Union Bank of London.—A dividend at the rate of 20 per cent. per annum is recommended, carrying forward 31,406*l*.

FINANCE, CREDIT, AND DISCOUNT COMPANIES

Imperial Mercantile Credit Association, Limited.—Messrs A. Young and John Ball, the liquidators, notify that Vice-Chancellor Bacon has now sanctioned the reconstruction arrangement. Shares in the new company will be given in exchange for fully paid-up shares in the association.

National Discount.—A dividend is recommended for the past six months at the rate of 18 per cent. per annum, free of income tax, the corresponding distribution being at the rate of 16 per cent.

New Zealand Loan and Mercantile Agency.—Interim dividend paid at the rate of 10 per cent. per annum.

ASSURANCE COMPANIES.

Atlas.—Dividend declared at the rate of 16 per cent.

Clergy Mutual Assurance.—Year's new life premiums, 11,728*l*. The number of policies in force is 5,609, upon which there is receivable 118,752*l* in premiums, while the total income is 198,314*l*.

Edinburgh Life.—At the annual meeting the report showed that during the year 715 new policies had been issued, and that the sums assured thereby amounted to 426,000*l*, yielding in new premiums 11,758*l*. The report on the septennial investigation, with the view to a declaration of profits, was also submitted to the meeting and approved of *ad interim*. As required by the regulations, a second meeting has been called for the 21st inst., to confirm this approval.

Home and Colonial Marine.—Dividend recommended at the rate of 6 per cent. per annum.

Union Marine.—Interim distribution notified at the rate of 10 per cent. per annum.

MISCELLANEOUS COMPANIES.

Castle Tavern, Limited.—Mr James Cooper has been appointed official liquidator.

Edinburgh Tramways.—Incorporated by Act of Parliament with a capital of 300,000*l*, in 10*l* shares—one-half to be first issued. This new undertaking will introduce the tramway system into Scotland, by the construction of about 18 miles of double line in Edinburgh, with branches to Leith and Portobello. A large omnibus proprietor has agreed to withdraw his

vehicles and to horse the tramway cars upon reasonable terms, and profits of 13½ per cent. are calculated upon for the first issue of capital. The board has a powerful standing in Scotland.

Falmouth, Gibraltar, and Malta Telegraph.—The gross revenue for the six months ended March amounted to 42,291*l*, and the working expenses to 10,226*l*, leaving a balance of 32,064*l*, or nearly 10 per cent. upon the capital. The result would be still more favourable but for the break in the cable, which occurred on the 28th November, and lasted 75 days. The cost of repairing this break, less the reserve of 2,296*l*, amounted to 13,554*l*, which has been written off, together with income tax (274*l*), leaving 18,236*l* as the available net profit on the half-year's operations. The directors have declared a dividend on account at the rate of 5 per cent. per annum, amounting to 16,500*l*.

Foreign and Colonial Government Trust.—At the meeting of the certificate holders of the second issue, Lord Westbury stated that the public began to recognise the value of the security offered, and that the third issue had been readily taken up.

Italian Tobacco Monopoly Company.—Half-year's interest announced at the rate of 6 per cent. per annum.

John Howell and Co., Limited.—Capital, 300,000*l*, in 100*l* shares. This new company has been formed to take over the business and premises of Messrs Ellis, Howell, and Co., warehousemen, St Paul's churchyard.

London Wharves and Warehouses, Limited.—Messrs Eve, Whiffin, and Randall, the liquidators, have issued notices for the payment of a fourth and final dividend of 8s in the pound to the creditors of the company. This dividend completes the payment of 20s in the pound.

Palmer's Shipbuilding and Iron, Limited.—At a special meeting for confirming the settlement with the vendor consequent on the expiry of the period of his guarantee, all the recommendations of the board were unanimously adopted, including the issue by way of bonus of one new 7*l* share in respect to each old share.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade to-day at Mark lane was again much depressed, owing to the more satisfactory accounts received of the growing crops, and to the continued liberal imports. There was some disposition to press sales of wheat and flour, but business was not sufficiently extensive to test prices. Maize and oats gave way 6d per quarter, but there was no alteration in the value of any other description of produce. This week's imports into London have amounted to 23,410 quarters of wheat, 5,950 barley, 53,110 oats, 2,200 beans, 700 peas, 2,900 maize, 6,280 sacks and 6,530 barrels of flour.

At Liverpool and Wakefield this morning the wheat trade ruled dull, at nominal currencies.

The Liverpool cotton market has been very strong during the week, and prices have advanced ⅛d to ¼d per lb. The total sales are 122,540 bales, of which the trade have taken 74,810 bales, speculators and exporters 46,730 bales. The imports for the week are 76,543 bales; the actual exports, 14,110 bales; and to-day's stock is 715,310. Quotations for American descriptions are ⅛d to $\frac{7}{16}$d per lb; East Indian, ⅛d per lb; and Bengals ¼d per lb dearer since last Friday. To-day the market closes strong; sales, 18,000 bales, at unchanged rates.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended July 6, 1871:—

	Imported.	Exported.
American bales	37,359	6,282
Brazilian	10,753	1,757
East Indian	21,259	8,887
Egyptian	5,978	654
Miscellaneous	1,627	807
Total	76,976	18,387

At New York, on July 6, middling Upland cotton was quoted at 20¾ cents per lb.

We extract the following from Messrs Wm. Nicol and Co.'s circular, dated Bombay, June 6:—The premium at home upon "arrival" Dhollerah has caused importers here to direct their attention mainly to purchases in such cotton, but the scarcity of really passable selections in strict Dhollerah, Mowa, and Bhownuggur has caused the lower grades of Ahmedabad, Veerungaum, and Verawul to be much run upon at rates correspondingly lower. For Oomrawuttee descriptions there has been a good inquiry, principally on account of continental houses, and latterly very high rates have been paid looking to the quality of cotton now obtainable. Sawginned Dharwar has been in eager request at prices ranging as high as 209 rs per candy, and there are still buyers in the market at very full rates. The transactions of the past ten days aggregate more than 14,000 candies, of which 4,000 candies are composed of Dhollerah and Bhownuggur, 2,500 candies Veerungaum, Verawul, &c., 2,000 candies Oomrawuttee, Barsee, &c., 1,500 candies new sawginned Dharwar, 1,200 candies Vingorla, and the remainder of Broach machine and native-ginned. Arrivals have been freer, but still there is almost no cotton passing into stock, and we expect we shall enter upon the monsoon with a stock of not over 80,000 bales, the greater portion of which will be very inferior cotton. Quality—The Dhollerah now being offered for selection is very disappointing. It exhibits much stain, and is generally very dirty. From Bhownuggur a clean but very soft cotton is coming forward with very little staple, and altogether of a poor description. Dharwar does not improve, and moreover we fear it will be found that old and new cotton have been packed together in the bales to a great extent. Most of the cotton presently exposed will be warehoused in a few days. Carwar—The steamer Sheraz sailed on 1st instant, carrying 1,884 bales of cotton from this port. From Tinnevelly we have a telegram, dated 5th, quoting 6¼d per lb.

EXPORT OF COTTON FROM BOMBAY to June 5.

	1871.		1870.
London.....bales	17,137	.....	1,420
Liverpool	403,188	.....	511,365
Total, Great Britain	420,325	.....	512,785
Channel for orders	37,183	.....	10,379
Continent	163,410	.....	116,573
China	29,889	.....	28,792
Grand total	650,807	.....	668,529

Actual exports since last mail left, 76,429 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, June 23:—With more favourable accounts from Europe, and a continued good demand, prices of cotton have further advanced during the week ¼d to ½d per lb. A large business has been transacted in contracts for fair, November delivery, the highest point, equal to 10¾d to 10¼d, f.o.b., being reached on Wednesday last. To-day we are fully ¼d per lb lower. We quote:—Fair, with staple, 8¾d to 8¾d per lb f.o.b.; good fair, ditto, 9¼d to 9¾d, ditto, fully good fair, ditto, 9¾d nominal, ditto. Shipments from June 16 to June 22—England, 4,921 bales; Italy, 50 bales—total, 4,971 bales.

The sugar market has closed with steadiness, and a good business has been done in British West India, at steady rates. Good colory coffee have commanded former terms, but inferior sorts have been easier to purchase. The market for cocoa and rum has ruled quiet. Rice-meal has been inquired after.

Messrs Mohr Brothers and Co., of Rangoon, writing on May 27, remark:—As tonnage has arrived more freely of late, the stocks of rice in the place are fast diminishing and consequently a better demand has sprung up for our staple again. Supplies of Burmese paddy, which had nearly entirely stopped, are increasing, and exporters have raised their purchasing rates to 82 rs per 100 baskets, equal to 134 rs per 100 baskets or 5s 9d per cwt. free on board, for 5 to 6 parts rice. The now ruling price being a remunerative one for the dealers, we look shortly for greater supplies of Natsain grain, of which there are still pretty large stocks in the interior. The tonnage in port loading rice for Europe aggregates about 11,000 tons burthen. Supplies of Nyaikyaws that have ceased to come forward as prices for the same rule proportionately higher in the interior than those last paid on our market. On the other hand, there is almost no inquiry for this kind of rice, the demand being limited to a few small cargoes for the Straits. Exports of rice during the last six years compare as follows:—

	To Europe	To Coast, United States, and Coast	To Straits, China, and Coast	Total.
	tons.	tons.	tons.	tons.
1871:	138,139	...	2,564	140,704
1870	107,264	...	21,923	129,187
1869	141,256	500	24,623	166,378
1868	87,220	657	2,457	90,324
1867	92,389	1,174	39,456	133,020
1866	89,693	1,060	89,741	179,834

Annexed is Messrs Durant and Co.'s circular:—The month opens with a buoyant market, large business, enormous deliveries, and prices generally 1s to 1s 6d above the lowest moment. It must not however be forgotten that the deliveries owe their extent almost entirely to the large quantity sent to France with the intention of saving the contemplated duty on importation. As regards the altered state of the market too it must be recollected that the present movement and rise in prices is as much speculative as was the previous depression and inaction. At that time all parties, both buyers and sellers, were under the influence of political and financial difficulties on the continent and the expectation of large crops in all quarters. Now these political and financial difficulties seem to have vanished for the present, and the expectations of large crops have become materially modified. It is now said that Europe will produce 10 per cent. less than last year, and that China will not send more than 45,000, some say 42,000, bales. The result is that best No. 3 Tsatlees are again 28s, and red peacock 25s to 25s 6d, at which some considerable sales have been made for arrival from early shipments. All classes of silk have shared more or less in the general movement and increased deliveries, but not all classes to the full extent in the advance of price. In Japan silk the advance has been rather more than in China silk, but this class was previously more depressed. In Canton silk the market is materially relieved by the enormous clearances and sales, but the stock was so overwhelming that prices show comparatively small improvement. In Bengal silk business has been confined chiefly to filature silk, and even in this the advance is very small.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, June 2:—There is very little change to report in the prospects of the growing crop. The latest returns from Eastern Bengal show a marked improvement in the yield from the plant, although the fall of rain has been rather more than was wanted. Manufacturing has commenced in part of Bhaugulpore, and will be general over the district in a few days. Malda, Moorshedabad, and Purneah also will shortly be at work. From Kishnaghur and Jessore the advices continue good, but there are some complaints of too much rain in the latter. From Tirhoot, Champarun, and Chuprah we still receive satisfactory accounts; here and there, where the rain has been partial, a portion of the plant shows symptoms of burning, but on the whole there is every promise of an early manufacturing season. In the Benares and North-West provinces everything is progressing satisfactorily.

The following is from Messrs T. J. and T. Powell's circular:—The leather market of the past month has shown more activity than usual in the month of June. Nearly all goods have participated in the demand, and prices, which with very few exceptions have been firm, have for some articles decidedly advanced. There has been some export demand, but the home trade has been good, and with the general prosperity of the manufacturing districts a large and continuous consumption may fairly be expected. The present advanced rates of heavy South American hides are very inadequately compensated for by the prices obtainable for the tanned article, but we hope this unsatisfactory position of the market may be ameliorated later in the season. Raw goods are generally higher. The imports, with the exception of East India kips, are moderate; they have been augmented by a large number of hides from France, some of which have come upon the market and have realised the prices at public sale. The stocks are generally of limited extent.

The quantity of Banca tin now afloat for the Dutch Trading Company is 14,600 peculs, equal to 912 tons, against 12,800 peculs, equal to 800 tons, last year. The estimated quantity of Billiton tin now afloat is 7,999 peculs, equal to 500 tons, against 8,645 peculs, equal to 540 tons, last year.

Messrs Churchill and Sim have published the following statistics:—

STOCK OF TIMBER, DEALS, &c., at the PUBLIC DOCKS on 1st July.

	1871.		1870.		1869.
Foreign—					
Deals .....pieces	854,000	...	542,000	...	1,014,000

Pine timber .....loads	700	...	1,500	...	2,800
Red Indian lumber	5,800	...	5,200	...	12,900

Mr L. Th. van Heeren thus reviews the Dutch tin trade:—Throughout June tin has been in active demand for export, in consequence of which prices have considerably advanced, the market being rather quieter at the close. Banca was selling at 75fl in the beginning of the month, but the continued inquiry, partly from France, caused an improvement to 79fl. In the autumn sale a few transactions are reported at 76fl to 77fl. The supply of Billiton is much reduced, and with a strong demand the prices advanced from 75fl to 78fl, closing at 77fl. 7,000 peculs Billiton offered in public sale at Batavia on the 5th inst. fetched the average price of 80.15fl costing to sell here about 74fl. The following statement shows the

position of Banca tin in Holland on the 30th June, from the official returns published by the Dutch Trading Company:—

	1871.	1870.	1869.
Import in June .....slabs	16,864	24,825	3,173
Previously this year	49,850	89,652	38,241
Total 6 months.....	66,714	114,477	41,414

The annexed is dated New York, June 23:—In the general merchandise and produce markets there is very little change to note. As usual at this period of the year, the volume of trade is light, and the fluctuations in prices for the most part unimportant. There is a more active demand for money, particularly on account of produce transactions, and with the seasonable movement of the wool clip, a light drain of currency to the west is now going forward. This depletion of idle capital, which has long been accumulating in our eastern centres, is really healthful in its commercial effects, and is not likely for the present to lead to any inconvenience among our merchants and business men. The export trade shows a little improvement, though the outward movement in cotton is still restrained by higher relative value of the staple at home than abroad. Gold is firm, under an increased demand to purchase foreign exchange, notwithstanding the Treasury Department has given notice that the disbursement of the July interest will commence on Monday, without rebate. There is, however, very little animation among the speculators. Foreign exchange is scarce, and rates have again advanced. Money is easy at the close at 4 to 5 per cent. on call, and 5½ to 7 per cent. discount of prime paper.

THE COTTON TRADE.

LIVERPOOL.—July 6.

The cotton market was excited upon the declaration of stock on Friday, and, with a very extensive business, prices advanced ¼d per lb; on Monday and Tuesday there was less animation, but yesterday and to-day the transactions have again been large, at extreme rates. For Sea Island, of the medium and higher grades, there continues a good inquiry, at full prices; the lower qualities are still neglected. American has been in general demand, and has risen about ⅛d per lb. New York advices to the 6th inst. quote middling Upland 20½ cents, costing to sell in Liverpool 10½d per lb, by steamer. In Brazil the business has been extensive throughout the week, and on an average is ¼d per lb higher than the quotations of last Thursday. Egyptian has been in good request, and is quoted ¼d per lb higher. East Indian has been in moderate demand, but with only a very limited supply offering, prices have advanced ¼d to ⅜d per lb, the better qualities being chiefly in request.

In cotton "to arrive" the business has been very large, particularly in East Indian descriptions, at advancing rates; the latest quotations are—American, basis of middling, not below good ordinary, New Orleans, August delivery 9⅛d, 9 5/16d; Texas, September delivery 9⅛d: ship named, at sea 9 5/16d; New Orleans, from New York, not below low middling, August-September delivery 9⅛d: low middling, Texas, not below ordinary, August-September delivery 9d; ordinary, New Orleans, June shipment 7⅞d; Bahia, basis of fair, ship named, mutual allowances 8⅛d; Maceio, fair, mutual allowances, actual tare, ship named, 8⅛d; Hingunghat, good fair, ship named, Cape, 8d; Dharwar, sawginned, fully fair, ship named, Cape, 7⅞d; Broach, good fair, machine ginned, Cape, ship named, 8⅛d; fair new merchants, June shipment, 7½d; Dhollerah, Cape, fair new merchants, May shipment, 7½d; May-June, 7 7/16d; June sailing, 7½d; ship named, 7½d, 7 7/16d; good fair, April sailing, 7⅝d; ship named, 7⅝d; Oomrawuttee, fair new merchants, Cape, ship named, 7 7/16d, 7⅝d; April sailing, 7½d; April-May shipment, 7½d; Canal, May-June shipment, 7½d; Cocomada, fair new red, Cape, ship named, 7d; Rangoon, Cape, fair new merchants, ship named, 6¾d per lb.

The sales of the week, including forwarded, amount to 122,540 bales, of which 33,620 are on speculation, and 14,110 declared for export, leaving 74,810 bales to the trade. The actual export this week amounts to 12,417 bales, consisting of 5,157 American, 1,922 Brazil, 617 Egyptian, 451 West Indian, and 4,270 East Indian, which is not deducted from the stock, as it was not included in the stock declared on the 30th ultimo. The difference between the actual and estimated stocks, as declared last week, has been added to the amount taken by the trade for the past 27 weeks.

July 7.—The sales to-day will probably amount to about 15,000 bales, with a firm market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	768,620
An increase of quantity taken for consumption of	382,150
An increase of actual exports of	294,910
An increase of stock of	141,540

In speculation there is an increase of 123,130 bales. The imports this week have amounted to 76,543 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to June 30) is 103,000 bales, against 95,000 bales last year. The actual exports have been 12,417 bales.

LONDON.—July 6.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

There has been a large demand during the week (Tuesday excepted), and almost all descriptions, either on the spot or afloat, have found ready buyers at daily hardening rates. The market has still an upward tendency, and closes very strong at an advance of about ¼d per lb.

Sales to arrive:—1,600 bales Tinnevelly, at 7 7/16d to 7⅜d, April sailing to July-August shipment for good fair; 6,300 bales, Western Madras, at 6¾d to 6⅞d, March-April, for fair old; 6⅞d to 7d, May to July shipment, for fair new; 5,800 bales Coconda, 6¾d to 7d, March to May sailing, July-August shipment, for fair red; 500 bales Broach, 7⅛d to 7¼d, April sailing, for fair; 1,800 bales machine-ginned Broach, 7¾d to 8d, March to May shipment and sailing, for fully fair; 7⅞d to 8⅛d, April to June; 5,200 bales Dhollerah, 7¼d to 7⅜d, March to May sailing, June-July shipment, for fair; 2,250 bales Oomrawuttee, 7⅛d to 7¼d, March sailing, to June-July shipment, for fair; 1,000 bales Comptah, 6¾d to 7d, ship named, for fair; 7⅛d, for fair new; 6,500 bales Bengal, 6 1/16d to 6½d, February to May sailing and

July to August shipment, for fair; 950 bales Rangoon, 6¼d to 6¾d, February to April sailing, for fair—total, 31,900 bales.

NEW YORK.—JUNE 23.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports &c., of cotton for the week ending this evening, June 23. From the figures thus obtained it appears that the total receipts for the seven days have reached 22,564 bales, against 24,040 bales last week, 28,136 bales the previous week, and 36,102 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,869,044 bales, against 3,813,323 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,055,721 bales. The exports for the week ending this evening reach a total of [illegible] bales, of which [illegible] were to Great Britain, 8,109 to France, and 280 to rest of the continent, while the stocks as reckoning this evening are now 204,593 bales. Below we give the receipts and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the [illegible] ports this day:—

Week ending June 23.	Exports to			Total this week.	Same week 1870.	Stock.	
	Great Britain.	France.	Other Foreign.			1871.	1870.

[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of [illegible] bales, while the stocks to-night are 2,253 bales less than they were at this time a year ago. The following is our usual table showing the receipts of cotton at all the ports from Sept. 1 to June 16, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

The market the past week has fluctuated considerably, and yet the sales have been very small, operators waiting for something decisive to happen which will indicate whether prices have reached their highest point and are to react, or whether there is to be further progress in the upward movement. All reports with regard to the weather are, therefore, strictly watched and weighed; while holders, in view of the limited amount of the present crop left for disposal, and the possibility of a tight squeeze when the July contracts are covered, remain pretty firm, notwithstanding the less favourable accounts from Liverpool the last half of the week, and the more favourable crop accounts, the close here being at 20¼c for middling Uplands, only ¼c lower than last Friday. In the forward delivery sales there have been no special features, prices having fluctuated in the main to correspond with the changes in the quotations for spot cotton, but with about ¼c decline during the week for the summer and early autumn months. Low middling closed to-night at 19c for June, 19¼c for July, 19¼c for August, 18¾c for September, 18¼c for November, and 17¾c for December. The total sales of this description for the week are 83,950 bales. For immediate delivery the total sales foot up this week 10,596 bales, including 98 for export, 4,213 for consumption, 1,084 for speculation, and 4,601 in transit. The following are the closing quotations:—

The above totals show that the interior stocks have decreased during the week 1,277 bales, and are to-night 25,854 bales less than at the same period last year. The receipts, however, have been 642 bales in excess of same week last year.

The exports of cotton this week from New York show a decrease since last week, the total reaching 2,284 bales, against 2,727 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks, also the total exports and direction since September 1, 1870, and in the last column the total for the same period of the previous year:—

Exports of Cotton (bales) from New York since Sept. 1, 1870.

—*New York Commercial and Financial Chronicle.*

NEW YORK, June 30.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 18,000 bales, and since the 1st September 3,890,000 bales. Shipments to England, 15,000 bales; to France, none; and to the continent, 4,000 bales; total since the 1st September, 3,071,000 bales. Stock at all ports, 163,000 bales. Middling Upland, 9⅜d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, July 6.—Owing to the continued excitement in the cotton market, and almost a daily advance in price, spinners and manufacturers have been compelled to raise further their prices for yarn and cloth. These advanced rates have naturally circumscribed business, as neither the home nor any large foreign market has yet responded to this. The large daily sales in cotton is caused by the large and wealthy spinners laying in supplies, in many cases sufficient to last a year; having done so, they still continue their purchases to advance further the value of the raw material. This must have an end. In the meantime, it stops business to a large extent, as buyers do not believe in its permanence, and besides cannot obtain from consumers a proportionate advance for their stocks. The home trade continues very quiet, and the grey and white houses, as well as the calico printers, cannot move their stocks except at the old low prices. The shipping trade generally is very quiet, as prices in the various large consuming markets of the East do not respond to the advance here. The market closes very firm, but only a moderate business doing.

Messrs Alex. Collie and Co. received the following telegram from Manchester yesterday:—Owing to the continuous advance in cotton, spinners and manufacturers are demanding about a farthing per pound on yarns, and 1s 2d on cloth above Tuesday's quotations. In consequence of this advance very little business has been done to-day.

BRADFORD.—There is little change in the wool market. Staplers and spinners are buying wool freely in the country at higher rates than can be realised in this market. Deep grown wools and wethers are at present in better requet than hogs, and command better prices. In the yarn market there is a revival in the demand for middle and super 30's wefts, though it seems to some extent of a speculative character. There is little new business doing in the piece market; manufacturers continue very busy, and quotations have an upward tendency.

CARDIFF.—The steam-coal trade is still in an extremely unsatisfactory state, owing to the continuance of the strike. The few collieries at work are fully employed, but the proprietors are not yet able to turn out anything like the quantity required, and many orders have in consequence to be sent to other districts. In the house-coal trade there is a considerable degree of vitality evinced, and quotations are somewhat firmer. The usual regularity characterises operations at the ironworks, the American orders on the books being still large.

DUNDEE.—Our flax market has lately been quiet, and the amount of business doing in goods on the spot has not been very extensive. Our consumers have in most instances received supplies, which enable them to keep out of the market for the present. The demand for medium qualities of tow continues good, but the quantity offering for sale is not large. In the finer descriptions there is little doing. In jute there is no change to notice; holders of the article continue very firm. The yarn market has been quiet but very firm. In flax and tow yarns there has not been much business passing, but jute yarns have been active at stiffening prices. In linens there is a large amount of business doing, and manufacturers are generally well employed, except in the canvas trade, which still continues dull. In jute goods there continues to be great activity, and manufacturers have employment on hand for some time to come.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—JUNE 23.

The market generally has had a downward tendency, but closes firmer, though not very active. Flour has arrived more freely, and prices have slightly declined for nearly all descriptions, though being below the cost of production holders have not readily made any concessions. The market has, therefore, been stagnant, a reduction being made on the limited business done, but full prices necessary to free purchases. When good shipping extras touched $6.20 to $6.25 delivered, a better demand sprung up, and some lines were sold; the medium extras for the West Indies, made partly from winter wheat, have brought full prices; but family flours have been dull. Some of the latter from new wheat have arrived from St Louis, and will be coming along soon very freely, as the yield of winter wheat in that quarter is much larger than last year. To-day, with 6d advance reported from Liverpool, holders were firm with the trade more disposed to buy, but the export demand not pressing, and no decided advance established in prices. Wheat has been dull and drooping. Early in the week quotations from Liverpool showed a decline; the receipts at this market were more liberal, and there was an advance in ocean freights, under which No. 2 spring declined to $1.46 to $1.47, and amber winter Ohio to $1.56 to $1.57, all afloat; even at this decline there was little demand, but holders withdrew samples, and to-day, with a penny advance in Liverpool, prime No. 2 spring brought $1.48, and amber winter $1.57½ afloat, the latter being taken for the continent, whence there is some renewal of inquiry. The receipts of wheat at Chicago show a considerable falling off as compared with last year, but at other receiving ports the receipts are a full average. New winter wheat has begun to arrive here from Delaware and Maryland, where the crop has been harvested in good condition, and is much greater than last year. Corn has arrived more freely, and has met with a good demand, both for home use and export, but an advance in ocean freights has rather weakened prices. Good to prime boat loads Western mixed sold at the close at 74½c to 75c afloat. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

There is no feature of particular interest to notice in the corn trade this week. Demand, under the influence of the more satisfactory reports received of the growing crops, has ruled extremely inactive, and values have remained nominally unchanged in the absence of important business. Supplies of English wheat on sale have been very limited, but the condition of the samples has continued good. On the other hand,

the imports of foreign produce have been on a liberal scale. Mr George Dornbusch observes:—"The stock of wheat in most of the leading seaports is in excess of what it has been for years past, barring Liverpool, where last year it was exceptionally large; but then, the last return for June, 1871, is larger than in any preceding month of June as far back as 1866. In Glasgow also the stock appears in excess of any of the last six years, as far back as 1865. In London the stock appears now about 10 per cent. smaller than last year, but more than twice as large as in 1869, when the stock was reduced to a very low ebb. The stock of home-grown wheat in the English farmers' hands is generally supposed to be reduced within a small compass, in consequence of the large exportation which has taken place for months past. But at the same time it is supposed that last year's wheat crop was considerably more productive in grain than had at first been presumed."

All kinds of spring corn have participated in the general dulness, and maize and oats show a decline of 1s per quarter on the week. Transactions in flour have been on the most limited scale, and stocks being heavy the tendency of the quotations has been downwards. Barley, beans, and peas are nominally unchanged in price.

Imports of Grain, &c., into the United Kingdom

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 54 grain and seed-laden vessels have been reported arrived at ports-of-call, viz.:—20 wheat, 10 maize, 1 beans, 1 millet-seed, 3 ground nuts, 3 cotton-seed, and 1 valonea. The floating grain trade has been inactive. Wheat has been dull, and to make sales lower prices have have had to be accepted. Maize—Old corn neglected after—steady; new corn neglected, and cheaper. Barley steady. Rye quiet—no cargoes off the coast have been offering. The reported sales are as follows:—Wheat—3 cargoes arrived: Galatz, 48s 6d per 492 lbs; Wallachian, 44s; Danubian, 42s per 480 lbs. Maize—8 cargoes arrived: Odessa, 35s; old and new mixed Galatz, 33s 9d; old Galatz, 35s 3d per 492 lbs; Bulgarian and Danubian, 32s 3d and 32s; Wallachian, 29s 6d; American, 33s; mixed Philadelphia, 32s per 480 lbs. 1 cargo Odessa, arrived in London, at 31s 9d; 1 cargo American, to be shipped, 29s 6d per 480 lbs. Barley—1 arrived cargo Danubian, 26s; 1 cargo on passage, 27s 9d per 400 lbs. Rye—1 cargo Odessa, arrived off Amsterdam, at 22s 6d per 480 lbs. Linseed steady. Rapeseed quiet. Cotton-seed unaltered—quiet.

prices, and a limited quantity was offered on Wednesday. 684 bag Trinidad principally found buyers, at 60s to 75s for ordinary to fair, and 78s to 95s for good to fine quality. 426 bags Grenada partly sold, at 47s to 51s 6d for low and ordinary, and 54s to 56s 6d per cwt for good. A few sales have been effected in Trinidad by private contract. Quayaquil remains firm.

RICE.—There has been rather more inquiry for floating cargoes. The sales include two of Rangoon at 9s 10½d, continental terms. One of Moulmein at the same price. One of Bassein, 9s 6d, ex ship, for London. 2,100 tons Bengal afloat at 9s 6d to 9s 7½d for Rario. By private contract the sales are limited, including a parcel of Rangoon at 9s 3d; Madras at 9s 6d, and good white Bengal at 12s; Dacca, 9s to 9s 5d; Balkam, 9s 6d, ex ship. 1365 bags Bengal by auction were bought in at 11s 6d per cwt for middling white.

IMPORTS and DELIVERIES of RICE to July 1, with STOCKS on hand.

SAGO.—849 bags offered by auction partly sold at 16s to 16s 6d for small grain.

TAPIOCA.—1,189 bags Penang were bought in at 2½d per lb.

BLACK PEPPER.—Sales of some extent have been made at ⅛d advance. Latest transactions were at 5⅞d for Singapore, 5⅞d to 5¾d for Penang. At the sales, 1,330 bags Singapore part sold: grey to fair quality, 5⅞d to 5⅞d. A good business has been done for arrival, including Singapore at 5¾d to 5 1/16d: Penang, 5⅝d to 5¾d; Aleppy, 6d per lb. 350 Cochin for the continent, price not reported. About 13,300 bags Singapore and Penang have arrived by two steamers, but the very large export deliveries keep the stock down to a lower point than usual.

WHITE PEPPER is very firm. A few parcels of Singapore have changed hands at 9½d per lb.

OTHER SPICE.—At Wednesday's sales prices generally were steady. 137 bales Ceylon cinnamon part sold: fine first sort, 3s 2d to 3s 4d; very superior, 3s 6d to 3s 7d; second sort, 2s 5d to 2s 11d; third, 2s 8d; fourth, 2s to 2s 4d. A few lots bark and common chips, 2d to 3d. 1,825 bags pimento went rather dearer, selling at 1⅞d to 2⅛d. Zanzibar cloves of good quality cannot be bought under 3d. Common have sold at a shade less. 14 cases Penang nutmegs sold as follows: 84 to 82, 2s 5d to 2s 6d; 70, 3s; 160, 2s 3d to 2s 4d. 3 casks from Amsterdam, 90 to 94, 2s 3d. 24 cases bought in. 4 cases bright Penang mace sold at 3s 8d to 3s 9d, per lb being full prices. 249 barrels Jamaica ginger brought full rates: ordinary to bold, 40s to 67s; a few lots low at 37s. 686 cases Cochin sold steadily: ordinary to middling, 44s to 64s; bold, 74s to 90s per cwt. Business has been done in cassia lignea for arrival. On the spot, pile 3 sold at 110s per cwt.

SALTPETRE.—The market is firm, and there have been a few sales made at fully last week's rates. Bengal on the spot: refraction 15, 26s 3d; 8/9, 26s 9d. 70 tons for arrival at 27s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to July 1, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported.....tons	6150	5660	5060	3420
Total delivered	5970	7830	4590	5340
Stock	2570	2660	4060	6220

Deliveries last week, 239 tons.

OTHER DRYSALTERY GOODS.—A very large business has been done in Bengal turmeric to arrive at 19s 4½d to 19s 6d, and latterly a portion at 19s 9d. 1,002 bags by auction sold as 19s 6d. Cutch is quiet. 612 packages were taken in. Privately the sales have been limited. Gambier firmer, with sales at 16s 3d on the spot, and 16s, ex ship. Safflower has been sold for arrival. 23 bales by auction brought 4/ 17s 6d to 5/ 2s 6d per cwt for low qualities. Cochineal has been in good demand for exportation: China galls sold at 50s to 51s per cwt.

METALS.—The recent improvement in prices has been maintained, and the markets remain steady. English tin has been advanced 3/, and prices still show an upward tendency. Foreign again rather dearer. Banca has sold at 135/; straits, 132/ 10s to 133/ 10s; afloat, 133/. Tin plates are in good demand. Spelter has been quiet. Silesian about 18l. Stock in the kingdom on the 1st inst, 5,500 tons. A good business was done in Scotch pig iron during the early part of the week up to 58s 4½d cash, but the market was rather weaker, closing at 57s 10½d. Copper is higher. Chili bar, 66/ 10s to 68/. Burra and Walaroo 76/ 10s to 77/. No change in English. Lead without alteration.

SHELLAC.—268 cases sold at full prices: fine orange, 6/ 17s 6d; second orange, 6/ 7s 6d to 6/ 12s 6d; good button, 7/. Business has been done privately, including a parcel to arrive.

HEMP.—Manila is firm. By private contract business has been done at 46/ for fair roping and 40/ for brown. The sound portion of 2,176 bales by auction was taken in. Sea-damaged sold at 12/ to 19/ 5s. 327 bales East India were partly disposed of at 16/ 15s to 18/ 10s.

JUTE.—There has been a moderate business done, chiefly for arrival, and prices remain without alteration. Trade in Dundee is steady, but not very active.

LINSEED.—The market has been dull on the spot, but several sales reported for arrival. Calcutta, 61s 3d; Black Sea, 61s per qr. A cargo of the latter sold.

OILS.—Olive continues dull, and sales have been upon a small scale, including Mogadore at 44/. Fish oils quiet: sperm, 81/ 10s 82 to 82/; pale seal, 33/ to 34/ per tun. The market for linseed is firm. On the spot, 32/ 15s to 33/ paid, and 32/ 15s quoted for forward delivery. English brown rape lower, viz. 42/ 5s to 42/ 10s on the spot and to the end of the year. Refined, 44/ 10s; foreign, 46/ to 48/; cocoa-nut dull: Ceylon, 39/ to 40/. Cochin scarce, and the price quite nominal. Palm fine, in limited supply, at 37/ to 37/ 10s. Other kinds unchanged.

PETROLEUM dull on the spot, but a large business for the last four months, 1s 6d per gallon.

TURPENTINE.—French, 40s 6d to 41s; American, 41s 6d per cwt, with a firm market.

TALLOW.—The market is firmer, with a steady business, prices of Russian having advanced about 3d to 6d, although the supply of colonial is still large. Petersburg, 44s 3d; October to December, 46s per cwt.

PARTICULARS OF TALLOW—Monday, July 3, 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is steady; 4,042 bags Penang, by auction, part sold at 29s 6d to 33s for brown and soft yellow. The bulk, consisting of soft brown sorts, withdrawn. 2,235 baskets Java were chiefly taken in at high prices for grainy white. A few lots grainy yellow sold at 38s 6d. Sales of West India 1,060 casks. For the week, 3,931 casks Jamaica, by auction, 28s to 32s for brown and yellow; grainy Demerara, 37s 6d to 38s 6d; grainy Barbadoes, 32s to 34s 6d; soft kinds as previously quoted. 82 casks Honduras concrete, 29s. A parcel low basket Penang at 20s per cwt.

COFFEE.—The public sales to-day comprised 1,248 casks 519 barrels and bags plantation Ceylon, which went off steadily at former rates. 219 half-bales Mocha were bought in. 400 bags Guatimala part sold at 58s 6d to 59s.

RICE.—Quiet.

BLACK PEPPER.—Singapore sold at 5⅞d per lb cash.

SALTPETRE.—700 bags Bengal of low quality sold at 26s 6d per cwt.

GAMBLER.—2,300 packages cubes were sold at 19s 6d per cwt.

TURMERIC.—Further sales of Bengal at the prices previously quoted.

OIL.—516 casks cocoa-nut part sold at 39/ 15s to 40/ for Ceylon. The remainder bought in. 20 tons 241 casks Cochin fish part sold at 30/ per ton.

TALLOW.—1,937 bags Australian, by auction, went rather dearer for good sorts. Mutton, 42s to 44s 3d; beef, 36s 6d to 43s. 243 casks South American, 40s to 43s per cwt for sheep tallow.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market has been without change for the past week; prices very firm. The Dutch market has advanced 6d per cwt. The transactions have been restricted.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that Valencia oranges are finished for the season—Lisbon sold at an advanced rate. Sicily lemons improving in value with a limited stock. Barcelona nuts without alteration. Arrivals of New Brazil nuts, which are in much request. West India pineapples land in good condition, with a ready sale. Large arrivals of coker-nuts, and in moderate demand.

DRY FRUIT.—A quiet market well supported as to currants, holders appearing confident in the ideas engendered by reports of the coming crop. From Spain announcements of the approaching season appear most favourable. From Smyrna we have as yet but little information that seems reliable.

COLONIAL WOOL.—The public sales progress firmly with good spirit. Owing to the large quantity sold each day, they are likely to terminate earlier than was at first fixed. The French and American demand continues very good.

FLAX market very firm.

HEMP market for Russian very dull. Manilla firmer, and a good business done at an advance of 20s to 30s per ton.

SEEDS.—The arrivals of seeds at this season of the year are small and quotations undergo little change, except for mustard seeds, the crops of which are badly spoken of. Prices remain the same, these seeds are however higher in value.

TOBACCO.—There has been a slight improvement in the demand for North American tobacco, transactions have however been upon a limited scale, buyers generally confining their operations to supplying their immediate requirements. Prices for pure to fine classes continue firm. In segar and other tobaccos there has been but little doing.

METALS.—There has been a steady business doing all the week without excitemet. Copper is well maintained at the advanced rates. Tin has ceased to advance, but prices are well maintained, and parcels daily changing hands. Spelter is steady. Lead continues quiet. Tin plates find a ready sale at full rates.

METROPOLITAN CATTLE MARKET.

MONDAY, July 3.—The total imports of foreign stock into London last week amounted to 15,406 head. In the corresponding week in 1870, we received 10,208; in 1869, 11,970; in 1868, 8,419; and in 1867, 10,343 head.

Notwithstanding the shortness of the supplies, the cattle trade has been characterised by quietness; nevertheless prices have ruled firm. As regards beasts, the arrivals from our own grazing districts have been tolerably good, so far as numbers are concerned. The Norfolk beasts, the season for which is now about coming to a close, have been hardly of so good quality. Lincolnshire stock has come sparingly to hand; but the receipts from Leicestershire and Northamptonshire have been more liberal. Foreign breeds have been poorly represented, but full prices have been obtained for them. The demand for home-fed stock has been quiet, but at full prices. The best shorthorns have sold at 5s 6d to 5s 10d, and the few prime Scots on sale have realised 5s 10d to 6s per 8 lbs. The market has been fairly supplied with sheep. The demand has been to a moderate extent, on former terms. For the best Downs and half-breds 6s 4d to 6s 6d per 8 lbs has been paid. Lambs have been disposed of at from 6s to 7s 4d per 8 lbs. Calves have been quiet at late rates. Pigs have sold on former terms.

SUPPLIES ON SALE.

	July 4, 1870.	July 3, 1871.
Beasts	3,780	2,700
Sheep and lambs	28,250	25,000
Calves	472	402
Pigs	160	175

METROPOLITAN MEAT MARKET.

Veal	5	0		5	6	Small pork	4	4		5	0

Lamb, 6s to 8s 6d.

HOP MARKET.

FRIDAY, July 7.—A fair amount of animation has been observable in this market, and for all descriptions prices have ruled firm, the report from the plantations being still of an unsatisfactory character. Mid and East Kents, 50s to 147s; Weald of Kent, 50s to 90s; Sussex, 50s to 90s; Farnham and country, 70s to 112s; olds, 20s to 35s per cwt.

POTATO MARKETS

FRIDAY, July 7.—Large supplies of potatoes have been on sale. There has been a fair demand at late rates. Prices, old, 50s to 80s; regents, 50s to 60s; rocks, 40s to 55s per ton; kidneys, new, 9s to 12s; Jersey, 8s to 10s; French, 6s to 7s per cwt.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 7.—The sales this week have been to a very fair extent, at fluctuating rates. Fashion prefers wools and America for the 15th inst., when other River Plate (Peru, Entrey &c., will be brought forward. The new season's East India wools will commence on the 18th inst., the quantity for which will be below the average.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 7.—The supplies of corn have been a fair average at this market to-day. Wheat was very quiet at Tuesday's dull rates. Flour was in limited demand, without change in value. For beans there was more inquiry at a somewhat advancing. All other articles were unchanged.

MANCHESTER, Friday, July 7.—There has been a continuance of wet, sunless weather, which has always been believed at this period of the year to be detrimental to the growing crops of wheat. This market has been fairly supplied with wheat, and factors asked rather higher prices. Business was confined to a few small forward parcels.

The Gazette.

TUESDAY, July 4.

BANKRUPTS.

Thomas Cooper, Bettle place, Rotherhithe, builder.
Charles Roberts, Yore road, Lambeth, mercantile agent.
Frederick Smythe, North Woolwich road, brewer.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For private houses, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the paint extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN.

Is recommended for all kinds of

OUT-DOOR WORK.

Is specially applicable to

WOOD, IRON, BRICK, STONE, AND COMPO.

HOLLOWAY'S OINTMENT AND

PILLS.—Incomparable remedies.—In the use of these medicaments there is no combination of circumstances of climate, locality, age, previous regimen, or habit of living, to which they are not perfectly adapted. The ointment stands entirely alone for its capacity to penetrate the most internal parts of the system when the most inveterate cases and ulcers, and in cases of old sores and bad breasts they are as a charm. The pills are the most effectual remedies ever discovered for the cure of all complaints, diseases most dangerous in their effects arising from the proper functions of the organs affected, including restlessness, weariness, incapacity, inclination to sleep, and pain in the side, until the whole system is enervated. These wonderful pills do not act according to the general directions accompanying each box, etc as at the root of the malady, eradicate the humours and drive into a healthy action, and effect a permanent cure.

THE EDINBURGH TRAMWAYS COMPANY.

Incorporated by Special Act of Parliament, whereby the liability of the shareholders is expressly limited to the amount of their shares. Capital, £300,000, in 30,000 Shares of £10 each. PROSPECTUS.

This Company is incorporated under a special Act of Parliament, which received the Royal assent on 29th June, 1871, for the purpose of carrying out a system of street tramways in Edinburgh and its suburbs, under the direct sanction of the Corporations of Edinburgh, Leith, and Portobello.

Street tramways, although hitherto practically unknown in Scotland, have been for some time in successful operation in London and Liverpool, and for a great many years in most of the large cities of America and Canada, as well as on the continent of Europe. They are evidently destined to revolutionise the whole system of street conveyance, by affording to the public greatly increased comfort and accommodation, with diminished expenditure of horse-power.

The earlier tramways laid in this country failed, owing to the manner in which the rail was laid, as well as to the form of the rail itself. These objections have been removed by the adoption of the grooved rail, which is laid flush with the pavement, and has now been in successful use for several years both in this country and on the continent. There is no prejudicial interference with the street; on the contrary, carriages and vehicles of every description can cross and recross the rails without inconvenience.

The facility with which carriages can be drawn along the smooth rails permits them to be constructed of larger size, and so with much greater regard to the comfort of passengers than ordinary omnibuses. First, they are lower hung, so that the timid and infirm can get in and out of them without difficulty. Second, they are 12 inches broader (without occupying more road space, from the position of the wheels), so that the central passage gives ample room for passengers to pass from one end of the car to the other, without interfering in the least with the comfort of those occupying seats. Third, they are as lofty as a first-class railway carriage, and thus there is no difficulty in walking from one end to the other.

The tramway greatly relieves the horses engaged in traffic; in fact, it has been found that one horse on the tramway will do the work of more than three horses on an ordinary street.

By the system of brakes employed, the cars can be stopped while running, within the distance of their own length.

The tramway cars do not intercept, but on the contrary, are found to regulate the general traffic.

During the severe snow storms of last winter, the tramways in London were kept open without interruption and at the usual fares while the ordinary omnibuses either ceased running, or charged double fares.

There already exists in Edinburgh certain established lines of omnibus traffic, well patronised by the public, along which tramways will, in the first instance, be carried. New routes will be developed as the interests of the public and the success of the enterprise demand.

Ample data exist for calculating the probable profit arising from a well-arranged system of tramways, from the actual results of the working of tramways, both in this country and abroad.

It has been ascertained that were tramways, on a far less comprehensive system than that proposed for Edinburgh, have been established, they carry in some cases as high as ninety, in others sixty times the entire population per annum. Assuming in Edinburgh that only thirty times the entire population should be carried by the proposed tramways, this will show at twopence a head (being the lowest average) gross returns of £360,000 a year, and deducting two-thirds (a very high percentage) for working expenses, a net profit of £120,000, or equal to £13 17s 6d per cent. on an outlay of £1,200,000, would be realised.

The distinguishing feature between tramways and omnibusses is the question of working expenses—the average in the case of a tramway being about 60 per cent., while omnibusses rarely be worked at a much higher percentage.

It is an important fact that the omnibus traffic in Edinburgh and its suburbs is already very large in proportion to the population; and wherever this has been the case, tramways have been proved by experience to be successful.

In London, the shares of the recently-constructed tramways already command from 15 to 40 per cent. premium. In Copenhagen (a town considerably less in size than Edinburgh), the shares of the Tramway Company command 40 per cent. premium, and similar and even better results are now attained from the working of tramways elsewhere.

The works of the proposed tramways will be offered for public competition, so as to ensure the utmost possible economy; and in this way, and from the special arrangements made as to the horsing, these tramways will involve much less than the usual capital outlay.

The equipment will be limited to providing the cars, an arrangement having been concluded with the well-known firm of Messrs John Croall and Sons for the horsing of the tramways on favourable terms; and it is part of the agreement with that firm that its omnibusses shall be withdrawn from the routes of the tramways.

By these arrangements, the first issue of capital will probably suffice for the construction and equipment of all the lines (about 18 miles in length of double line) authorised by the Act, and the costs and expenses of the Act, including one per cent. on the authorised capital, to be paid to the promoters as compensation for their risks, and which they agree to take in paid-up shares.

Subsequent issues of shares, if required, will be offered from time to time, preferentially, to the then existing shareholders.

Applications for shares may be lodged with the Bankers, on or before Friday, the 14th day of July, 1871.

Forms of application may be obtained at the Offices of the Company, or of the Brokers or Solicitors, where the Act of Incorporation of the Company can be inspected.

63 George street, Edinburgh, July 5, 1871.

FORM OF APPLICATION FOR SHARES.
Referred to in Prospectus of
THE EDINBURGH TRAMWAYS COMPANY.
Incorporated by Special Act of Parliament.

To the Directors of the Edinburgh Tramways Company.

Gentlemen,—Having paid to your bankers the sum of £ , being a deposit of One Pound per share, I beg to apply for shares of £10 each in the above Company, and I hereby agree to become a shareholder, subject to the rules and regulations of the Company, and to accept such shares, or any less number, that may be allotted; and I authorise you to place my name on the register of shareholders in respect of all shares which you may allot to me, and to sign subscription contract when required.

AUSTRALIAN AND NEW ZEALAND DIVIDEND GOLD MINES INVESTMENT COMPANY (Limited).

Capital, £50,000, in shares of £1 each, in Ten distinct Series of Investments of £5,000 each. The present issue will consist of No. 1 Series, for Australian Investments, £5,000: No. 2 Series, for New Zealand Investments, £5,000. 5s per share to accompany each application; 5s per share to be paid on allotment; and 10s per share one month after the date of allotment.

BANKERS.
The London and County Banking Company,
21 Lombard street, E.C.

The object of this Company is to make a selection of investments in the principal dividend-paying gold mines of Australia and New Zealand.

Investments can be made in the local markets at rates which yield a return of from 30 to 50 per cent.

Prospectuses, with forms of application and all particulars, can be had by applying to the Secretary, THOS. DICKER, Esq., at the Offices of the Company, 4 Royal Exchange avenue, E.C.

IMPERIAL OTTOMAN BANK.

GENERAL DEBT OF THE OTTOMAN EMPIRE.

The Imperial Ottoman Government hereby give notice to the bearers of Bonds of the General Debt (5 %) of the Ottoman Empire, who intend to receive in Europe the current half-yearly Interest, that they must declare such intention at the Agencies of the Imperial Ottoman Bank in London or Paris, or at its correspondents in Frankfort and Amsterdam, between the 6th and the 11th July, 1871, inclusive.

This declaration must be accompanied by a list of the numbers of the Coupons intended to be deposited, but not by the Coupons themselves.

After the 13th July, the Coupons of which the lists have been sent in, in accordance with the above directions, are to be deposited for verification, together with a duplicate list, at the Agencies of the Imperial Ottoman Bank in London or Paris (in London daily, Saturdays excepted, between the hours of 11 and 3), or at its correspondents in Frankfort and Amsterdam, when they will be exchanged for a receipt payable at ten days' date.

Those Coupons which, although declared as above, shall not have been presented for payment at the places indicated before the 13th October, 1871, will, after that date, be payable at Constantinople only.

The necessary forms can be obtained on application at the offices of the Imperial Ottoman Bank, 4 Bank buildings, Lothbury.

N.B.—Cheques can be sent by post only at the written request and risk of the holder of the Bonds.

LEIPZIG TRAMWAYS COMPANY (Limited).

Capital, £75,000, in 7,500 shares of £10 each.

Deposit on application £1 per share, which will be returned in full if no allotment is made.

Further payments to be as follows:—

On allotment	£2 per share.
On August 15th ...	£2 —
On September 30th	£2 —
On November 15th	£2 —

And the balance of £1 per share when required. (The liability of each shareholder is limited to the amount of his shares.)

AUDITORS.
Messrs Chadwicks, Adamson, Collier, and Co., 65 Moorgate street, London.

SECRETARY (pro tem.)—Mr Charles Fraser.

Offices—12 Great Winchester street.

PROSPECTUS.

This Company is formed for carrying out a concession to construct and work Tramways in the important commercial City of Leipzig and to its principal suburbs, as shown in the map accompanying the prospectus.

The remunerative nature of Tramways as an investment is now completely established by the experience not only of foreign towns, but lately of the Metropolis itself.

Leipzig is particularly well adapted for Tramways, and contains, with the suburbs which the lines conceded will serve, a population of over 110,000. It is, besides, the seat of the great German Fair, which is held there three times a year, each time lasting a month, and which brings to Leipzig, as appears by the police returns of the last two years, an average of 125,000 visitors annually.

The concession reserves no head money or tax on traffic, the undertaking having been, as it states, "sanctioned solely as a means of facilitating the traffic, and not as a source of profit to the commune of the city." "Regulations will be issued to the effect that all other traffic has to give way to the tram carriages."

The concession has been transferred to the Company by Mr Hutton Vignoles, who has also entered into a contract with the Company to construct and completely equip, with cars, horses, &c., the whole of the Tramways shown on the map, comprising over eleven miles of line, including passing places, to provide the land and buildings required, and to pay the expenses of the undertaking prior to the allotment of shares, for the sum of £66,500. Both transfer and contract are by deed dated the seventh day of July, 1871, and made between Mr Hutton Vignoles of the one part, and the Leipzig Tramways Company (Limited) of the other part.

The concession and all privileges attached to it, including the right to £2,050 deposited in Saxony as caution money, are made over to the Company absolutely as part of the consideration for the contract; and the whole of the Tramways are, under the contract, to be delivered to the Company, equipped and in working order, before the 15th of November in the present year.

The Directors have carefully examined the estimates of traffic and working expenses submitted to them, and judging by the experience of similar undertakings, many of which are paying from ten to fifteen per cent., are of opinion that, after making all necessary reserves, the shareholders may fairly anticipate a most liberal dividend.

Power is taken in the Articles of Association for increasing the capital of the Company, so as to allow of its operations being extended to other towns in Germany, or elsewhere, where concessions for tramways may be granted. Negotiations for a concession are already in progress with an important German city, and in the event of its being obtained by the concessionaires of the Leipzig Tramways, the shareholders in this Company will have the first offer of it.

The Articles of Association, concession, and transfer of it to the Company, and the contract for the works, may be seen at the Offices of the Company's Solicitors.

Applications for shares should be made to the Bankers, and prospectuses, with forms of application, can be obtained of the Brokers, and at the Offices of the Company.

LEIPZIG TRAMWAYS COMPANY (Limited).
APPLICATION FOR SHARES.

To be retained by the Bankers on payment of the deposit.

To the Directors of the Leipzig Tramways Company (Limited).

Gentlemen,—Having paid to your Bankers the sum of £ I request you to allot to me shares of the Leipzig Tramways Company (Limited), and I hereby agree to accept the same, or any smaller number that may be allotted to me, and to pay the further sum due on allotment, and the balance by the respective instalments appearing by the prospectus, and otherwise upon the terms of the Articles of Association of the Company.—Your obedient servant,

ABRIDGED PROSPECTUS.

This Company has been formed to purchase, as a working concern, carry on and develop the Brewery known as the Kirkstall Brewery, together with the property of Messrs. Benjamin Dawson and Co., with the exception of certain portions of that Estate, which will be sold under the same order of the Court of Chancery, owing to the death of Mr. Benjamin Dawson, and the consequent dissolution of the partnership.

For this purpose a Contract has been made by which the Company will purchase the Brewery, goodwill, stock in trade, and certain leasehold properties, consisting of Brewery premises at Kirkstall, and land and premises adjoining, and in the neighbourhood of Leeds, held by the Company for the residue of terms of 21 years and 7 years respectively. The purchase also includes the trading stock, together with the valuable machinery by which the whole of the work is done, and important business connection of many years' and long standing. The Company will further take over such of the loans and book debts of the firm as may be considered advantageous for the purpose of securing the trade to an amount not exceeding £25,000.

For the Brewery, including all machinery, fixed plant and goodwill, and the existing interests in the London stores, wharf, and offices, £47,500 will be given, while the other assets above mentioned are to be purchased by valuation, to be professionally made between the vendors and the Company.

The average annual returns from the brewing business only of the late firm amounted to the sum of £144,980 17s 9d for the years 1868, 1869, and 1870, notwithstanding that the operations of the last year were much restricted in consequence of the negotiations then pending for the transfer of the business to a Joint-Stock Company.

These totals have been ascertained from the books of the firm by Messrs. Moore and Wallis, public accountants, and are certified by them as correct. Owing to the admirable situation of the Brewery for traffic arrangements,—the local advantages in lowness of wages, cheapness of coal, and facilities for disposing of the grains, the brewing expenses have been and are exceedingly moderate in comparison with similar undertakings in other parts of the kingdom.

The Company will be able, without doubt, to extend the average trade of the concern; but should only the present rate of conversion of malt be maintained, it is estimated that a profit of at least 12 per cent. will be earned on the capital employed.

It is likewise estimated that the capital of the Company, after payment for the purchase of the Brewery, fixed plant, and rolling stock, will provide about £50,000 for working capital and increase of trade.

The Company has been fortunate in securing the services, as manager and brewer, of Mr. J. T. Swift, late of the Albion Brewery, Mile End, who, having been for some years the principal brewer at one of the most successful London breweries, is, by his special knowledge, thoroughly qualified to produce articles fitted for the London trade, which it will be one of the chief objects of the Company to foster and extend.

The experienced staff of Messrs. Benjamin Dawson and Co. will transfer their services to the Company.

The Stock of the City of London Brewery Company (Limited), issued at 90, has steadily risen to 140

The shares of the Lion Brewery Company (Limited), £17 paid are now quoted at £21 10s per share, or 26 per cent. premium.

Both the above undertakings were introduced by Messrs Seymour and Co., who now invite subscriptions for the Shares of this Company.

The deposit paid on application for Shares will be forfeited and the allotment cancelled in all cases where the further payment on allotment is not duly made in accordance with the terms of the letter of allotment.

Prospectuses and Forms of Application can be obtained at the temporary offices of the Company, 28 Martin's Lane, Cannon Street, London; at the Brewery, Kirkstall, near Leeds; at the Offices, 5 Dock Street, Leeds; at the Bradford Old Bank, Bradford, Yorkshire; and of the Brokers of the Company, Messrs. Seymour, Elwyn, and Godden, 38 Throgmorton Street, E.C.; and Messrs. Ridsdale and Wailes, Albion Street, Leeds. The contract for purchase and the Memorandum and Articles of Association of the Company can be inspected at the Office of the Solicitors, Messrs. Nash, Field, and Layton, 2 Suffolk Lane, Cannon Street, E.C.

KIRKSTALL BREWERY COMPANY (Limited).

Notice is hereby given, that no further APPLICATIONS for SHARES in this Company will be received from London after WEDNESDAY NEXT, the 12th instant, and on the following day (THURSDAY) from the Country.—By order,

WALTER COLEY, Secretary.

NEW ZEALAND.

THE DUNEDIN AND PORT CHALMERS RAILWAY COMPANY, LIMITED.

Issue of £100,000 5 per Cent. Mortgage Debentures.

Principal redeemable at par in London by Annual Drawings of not less than 2½ per cent., commencing on the 15th of June, 1873.

DIRECTORS.

A. J. Mundella, Esq., M.P.
William S. Grahame, Esq., Director of the Bank of New Zealand.
Robert Porter, Esq., Director of the Bank of New Zealand.
Emanuel Boutcher, Esq., Director of the New Zealand Loan and Mercantile Agency Company.

BANKERS—Bank of New Zealand.

SOLICITORS—Messrs Paine and Layton, Gresham House, E.C.

BROKERS—Messrs J. and A. Scrimgeour, No. 18 Old Broad street, London.

The BANK OF NEW ZEALAND are authorised to receive subscriptions for the above.

The price of issue is £80 per £100 Bond.

The Debentures will be in amounts of £100 or £500, and will bear interest from 15th July.

The Coupons for half-yearly interest will be payable at the Bank of New Zealand on the 30th day of June and 31st day of December in each year.

The Annual Drawings will take place on the 15th of June in each year.

The Company reserve the right to increase the amount to be drawn at any of the annual periods by giving six months' notice by advertisement in the *Times*, or by private arrangement with the holders.

Applications, in the form annexed to the prospectus, will be received at 50 Old Broad street, London, up to Wednesday, the 12th July, at 11 o'clock, when, in the event of more than the full amount being applied for, a *pro rata* distribution will be made; otherwise they will be recorded in the order in which they are received.

Payment will be required as follows, viz.:—10 per cent. on application, and the balance on the 31st day of July, when the Debentures will be delivered.

Dunedin is the capital of the prosperous gold-producing province of Otago, possessing the largest trade and most numerous population of all the provinces of New Zealand. Port Chalmers, as per map annexed to the prospectus, is separated from the capital by a shallow harbour, eight miles in length, and the vexatious delays which were experienced by the mercantile community of Dunedin in gaining possession of their goods after arrival (all imports having to be transhipped at the port into lighters at considerable cost and risk of damage), at last led to public pressure being exercised on the Government to offer inducements to capitalists in the shape of a guarantee, to press on a work, which, independent of any such assistance, would be a very prosperous undertaking.

By a contract dated the 25th of January, 1870, between the superintendent of the province of Otago, New Zealand, and certain contractors for the making and maintaining a railway from Dunedin, the capital of the province, to Port Chalmers, a distance of 8 miles, in the said province, and wharves and other works in connection therewith, the Provincial Government of Otago guarantee the payment to the contractors for the term of fifteen years of 8 per cent. per annum on the capital, not exceeding 70,000*l*, which should be expended in the making of the said railway and works; and for the purpose of assuring said guarantee the superintendent leased to the contractors for a term of sixteen years, from the 1st day of January, 1871, the tolls, dues, and wharfages of the several jetties at Dunedin and Port Chalmers at a nominal rent.

The jetty dues, included in the said lease, amounted to £4,164 18s 6d in the year 1869-70, as per certificate of the provincial treasurer; and the Government of Otago undertake that the jetty dues shall be raised from time to time, as may be required to make up the sum of £5,600 per annum, being the guaranteed interest of 8 per cent. on the £70,000.

Of the said eight miles of railway about five miles of earth-works and viaducts have been already constructed at an estimated outlay of £18,000; and this Company (the capital of which is £120,000 divided into 12,000 shares of £10 each) has acquired from the contractors their rights and interests under the said contract and lease, together with such portion of the undertaking as is already constructed, in consideration of a sum not exceeding £25,000 as may be proved to have been expended on the construction of the works, and an allotment to the contractors of 11,975 fully paid-up shares, but upon the terms of the contractors entering into a contract with the Company for the due completion of the whole of the said railway and other works by the 14th day of March, 1872, for the sum of £70,000 (inclusive of the said sum not exceeding £25,000), and also depositing with the New Zealand Loan and Mercantile Agency Company, Limited, as trustees, pending the completion of the said undertaking, 11,775 paid-up shares, and a sum of £12,000 cash, as collateral security during that period, for the due payment of the interest on the debentures now offered.

The property therefore forming security for the due payment of these debentures, and now vested in the trustees under a deed of trust which has been executed for that purpose, is as follows:—

(1) The whole of the property purchased from the contractors and the portion of the undertaking already constructed, together with the above-mentioned guaranteed interest of £5,600 per annum, which is of itself more than sufficient to meet the interest on the mortgage debentures, and is now being collected, and applicable for payment of interest on the amount of capital actually expended.

(2) The sum of £12,000 cash and 11,775 fully paid-up shares in the Company held as collateral security, according to the above-mentioned arrangement, until the due completion of the undertaking by the contractors, according to their contract with the Company.

The import and export tonnage of the port for the year 1868-69 amounted to 123,434 tons, and for the portion of the following year, up to which returns could be ascertained, the imports and exports were at the rate of 15 per cent. increase, as indicated by the letter of the Superintendent of October 2, 1869, and the Provincial Treasurer's letter of 23rd December, 1870, relative to the amount of jetty dues received for that period.

The passenger traffic on a somewhat similar line between the town of Christchurch and Port Lyttelton, accommodating a smaller population, produces an annual income of about £10,000.

Upon these facts the following estimates may be based:—

	Tons.	£
General merchandise, inwards	77,903	
— outwards	6,325	
Wool and flax, outwards	11,787	
	96,015 @ 4/6 =	21,603
Passengers		10,000
		31,603
Less working expenses and maintenance, 50 %		15,801
Leaving net proceeds of		15,802

to pay annual charge of £7,500 for interest and sinking fund on the £100,000 Mortgage Debentures.

The several documents above referred to may be seen at the Bank of New Zealand, 50 Old Broad street.

LOUTH AND LINCOLN RAILWAY COMPANY.

Incorporated by Act of Parliament.

To be worked by the GREAT NORTHERN RAILWAY COMPANY at 50 per cent. of the gross receipts, according to an Agreement ratified by and incorporated in the Act of Parliament.

SCRIP ISSUE.

Share Capital, £250,000, in Shares of £10 each. Borrowing Limit, £83,000.

The Company invite subscriptions in respect of 20,000 shares of £10 each, 5,000 shares being reserved and agreed to be taken up in payment of land, preliminary expenses, and otherwise.

The price of issue is par, less two years' interest at 6 per cent. per annum, being £8 16s per share, or £88 for each £100 capital, payable by instalments as follows, viz :—

£1	0	0	in respect of each share, payable on Application.			
£3	0	0	—	—	—	Allotment.
£2	0	0	—	—	—	1st October, 1871.
£1	8	0	—	—	—	1st January, 1872.
£1	8	0	—	—	—	1st May, 1872.
£8	16	0				

Discount on prepayment of calls at the rate of 5 per cent. per annum will be allowed.

A scrip certificate or certificates will be issued by the Company in respect of each subscription, and every certificate so issued will be transferable either by delivery or by special endorsement.

The possession of the scrip certificate will, subject as after-mentioned, entitle the holder thereof for the time being to complete the payments in terms of the subscription in respect whereof the certificate has been issued, and on such completion and the surrender of the certificate to the Company, will entitle the holder to be duly registered as a shareholder, and to receive share certificates accordingly.

Non-payment of instalments will render all previous payments liable to forfeiture.

Copies of the Company's Act, and of the agreement made with the Great Northern Railway Company, may be seen at the Offices of the Company, where prospectuses may be obtained, as well as from the Company's Brokers.

Applications, accompanied by the payment required to be made on application, will be received on the annexed form, duly filled up and delivered to the Bankers of the Company.

SECRETARY—Charles Walker, Esq.

OFFICES—2 GREAT GEORGE STREET, WESTMINSTER.

The Louth and Lincoln Railway, about 24 miles in length, commences on the Great Northern Railway, near Lincoln, passing through the rich agricultural and mineral district of Central Lincolnshire, and terminates at Louth, on the East Lincolnshire line, whence the traffic will be duly and efficiently conveyed by the Great Northern Company, according to their agreement, along the East Lincolnshire Railway to Great Grimsby, thus forming the most direct communication between that flourishing seaport and the Midland counties.

The Louth and Lincoln Railway will also secure to East Lincolnshire, and to the district through which the line runs, direct access to the North of England, by connecting with all trains running on Lincoln, by the Great Northern Railway, as well as to the manufacturing districts of Lancashire, by the Manchester, Sheffield, and Lincolnshire Railway.

By the construction of this line, a saving in distance will be effected of 34 out of 50 miles between Louth and Lincoln over the present circuitous route via Boston. From Louth and its neighbourhood large quantities of agricultural produce are sent to the Midland manufacturing districts.

In addition to the ordinary passenger traffic, a considerable income will be derived from visitors frequenting Cleethorpes—the principal watering place on the Lincolnshire coast, distant only four miles by railway from Great Grimsby.

Cleethorpes is supplied by the Manchester, Sheffield, and Lincolnshire Railway Company with seven trains daily. By the Louth and Lincoln Railway a saving of nearly three hours will be effected in the journey.

The map accompanying the prospectus will give the best idea of the value of the line.

The cost of the line taken at the nominal share capital, will be only £14,286 per mile, the average of English railways being £34,000 per mile.

The commercial value of the Louth and Lincoln Railway is much enhanced by the large mineral traffic which is well developed from the Derbyshire, Nottingham, and Rotherham Valley Coal-fields, also from the working of the extensive beds of ironstone which are situated on both sides of the line according to the accompanying report of Mr Rowley, Mining Engineer, whereby it will be seen that an estimate of the quantity of ironstone of excellent quality in the neighbourhood of Apley is [illegible] tons per square mile, which, taking only two square miles on each side of the line for a distance of three miles, gives in this area 12,000,000 tons of stone; and again at Donnington, where the line crosses extensive beds of the same minerals, he calculates 9,000,000 tons per square mile.

Mr Myers estimates the gross revenue as follows, viz. :—

	£
From the coal traffic, 90,000 tons, at 3/4ths of a penny per ton per mile over the whole line	18,750
From the carriage of ironstone, 200,000 tons, at 1/4th of a penny per ton per mile, over 14 miles	9,114
From passenger and ordinary goods traffic	30,000
	57,864
Deducting 50 per cent., payable to the Great Northern Railway, for working, as per contract	28,932
Net revenue	28,932
Less 5 per cent. interest on £83,000 debenture capital	4,150
There would remain	24,782

Equivalent to about 10 per cent. free and on the whole share capital.

There are no preferential shares to absorb any part of the profits.

The estimate of receipts for the carriage of ironstone is small; but the erection of the smelting furnaces in North Lincolnshire renders it almost certain that furnaces will be erected also in the iron districts traversed by this line, in which case the traffic will be very much increased.

The above estimate of traffic is equal to only £16 per mile per week, whilst the receipts on the Great Northern Railway system, of which the Louth and Lincoln will form an important section, amount to £83 per mile per week.

A contract has been entered into with Mr Frederick Appleby, of Manchester, for the construction of the whole line, including stations, sidings, telegraphs, and all accessories, within the authorised capital and borrowing powers of the Company.

PEYTON WM. CLEMENT, Secretary.
144 Leadenhall street, 3rd July, 1871.

EGYPTIAN 7 PER CENT. LOAN OF 1868.
Notice is hereby given, that the Half-Yearly COUPONS, due 15th July, and the BONDS DRAWN for redemption at PAR, may be presented for payment on and after that day (between the hours of 11 and 3) at the Imperial Ottoman Bank (London Agency), 4 Bank buildings, E.C. They must be entered on forms, which can be had on application, and be left three clear days for examination before payment.
WILLIAM W LANDER, Secretary.

HOLLAND: STAATSEISENBAHN BETRIEBS GESELLSCHAFT (Company for Working the Dutch State Railway).—The Director-General begs to announce that the THIRD COUPON of the BONDS of the 5 per Cent. Preference Loan, of 6,667,000 fl nominal, will be PAID on and after 1st July, 1871, as under:—
In Amsterdam, at Messrs Lippmann, Rosenthal, and Co.'s, and Messrs Wertheim and Gompertz.
In Frankfort-on-the-Maine, at the Branch of the Bank für Handel and Industrie.
In Brussels, at M. Jacques Errera Oppenheim's.
In Berlin, at Messrs Cohn Bürgers and Co.'s.
In London, at Messrs G. and A. Worms.

NEW RIVER COMPANY'S PERPETUAL DEBENTURE STOCK.
The Directors of this Company (under the provisions of their Act of 1857) are ISSUING the above STOCK at par, for the purpose of extinguishing their Bond debt.
The interest upon this Stock, at the fixed rate of 4 per cent., is payable half-yearly, on the 1st of February and the 1st of August, in priority of all dividends upon the shares of the Company.
Any amount of Stock not being the fraction of a pound can be subscribed for and transferred.
Applications to be made to New River Office, E.C.
ALEX. INGLIS, Clerk of the Company.

NETHERLANDS INDIAN RAILWAY COMPANY.
ISSUE OF 4,000,000f FOUR-AND-A-HALF PER CENT. OBLIGATIONS GUARANTEED BY THE HOME GOVERNMENT.
Notice is hereby given, that the Ninth Coupon, due 15th July next, will be PAID on and after that day, at the option of holders, either in London, at the Office of Messrs Horstman and Co., with £1 18s 1d, or in Amsterdam, at the Office of the Kas Vereeniging, with 22f 50c, or at the Hague, at the Office of the Company, with 22f 50c.
The Hague, June 29, 1871.

DEBENTURES AT 5, , AND 6 PER CENT.

CEYLON COMPANY (LIMITED).

The Directors are prepared to Issue DEBENTURES to replace others falling due, viz., for 1 year at 5 per cent., for 3 years at 5½ per cent., and for 5 years at 6 per cent. per annum, also for longer periods on terms to be ascertained at the office of the Company
R. A CAMERON, Secretary.
Palmerston buildings Old Broad street, E.C.

KINAHAN'S LL WHISKY.

This celebrated and most delicious old mellow spirit is the very
CREAM OF IRISH WHISKIES,
in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.
Note the words—
"KINAHAN'S LL WHISKY,"
on seal, label, and cork.
Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY, BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

A COMFORTABLE NIGHT'S REFRESHING sleep is insured by Dr Locock's Wafers.—Mr John Pearson, 67 York street, Wolverhampton, June 20, 1871, writes:—"I had no sleep for five weeks till I tried Dr Locock's wafers, and I have had such relief to the cough that I could not have believed."—Asthma, consumption, colds, gout, rheumatism, and all nervous pains are instantly relieved by Dr Locock's wafers, which taste pleasantly. Of all druggists at 1s 1½d per box.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for June, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Railway, Banking, Financial, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to June 28.

Advertisements for next Number, to be published on July 29, must be sent to insure insertion on or before July 27.

OFFICE—346 Strand.

THE REDUCTION IN THE BANK RATE.

The reduction of the Bank rate to 2 per cent. has been universally expected. The accumulation of money in Lombard street is almost if not quite unprecedented, and there could be no greater evil than the maintenance of an unduly high rate at this moment. If it is foreign money lent to us which is depressing the market, it is plain we cannot make good use of it, therefore cannot afford to pay interest on it. If it is our own money, of which we have too much, it should be encouraged to employ itself elsewhere, in places where the rate of interest is higher, because for the moment loanable capital is scarcer in proportion to the demand there than it is here. It might be better that loanable capital should be more fixed in value; if we were making an ideal money market we might contrive it so; but taking the commercial world which exists, and in which we have to live, it is the only cure for an overplus of any article that its price should be lowered, and that those who want it should have the only effectual signal to come here and use it or take it away. Until we submit to the cure we shall have the disease. 2 per cent. may or may not be an intrinsically desirable thing, but until we consent to it, and consent to it for some time, we shall have no valid or firm ground for a higher rate, for the mass of the supply of loanable capital above the demand will continue undiminished.

CAUTIONS AS TO THE MODE IN WHICH COMPANIES ARE NOW BEING STARTED.

Everything shows that we are returning to a time when new schemes will be constantly placed on the market. Already the state of our advertising columns reminds us of 1863 and 1864. But the machinery of these undertakings is perhaps necessarily new. So many people have been ruined by taking shares in companies with limited liability that most persons are now—rightly or wrongly—deterred from doing so to any large extent. Except under peculiarly favourable circumstances, it would be difficult now to raise any large sum in that once usual manner. The ability of speculators has been racked to find a substitute, and they have invented at least two.

The first is that the company shall consist of fully paid-up shares only. And at first sight it will be said, what can be the harm or danger of this? If people choose to pay down hard money to go into industrial undertakings, that is the best test that such undertakings are at bottom sound. And when money is *really paid* on such shares, so it is. We ask for nothing more. But a most dangerous class of shares is coming up, in which no money has really been paid, but which upon some account or other are "taken as fully-paid" in the books of the company. And as to these, we feel much difficulty. Suppose that a concern worth only 10,000*l* has been valued at 100,000*l*, and that the 100,000*l* has been taken in "fully paid-up shares,"—can it be said that in fact these shares have been paid-up? The sellers are the originators of the company; they nominate the first directors; they sell to the company certain property at *their own price*, and take that price in the company's shares. Can these shares be said to be, in any real sense, paid-up? If the company came to be wound-up, and the case were gross and clear, we do not doubt that the Court of Chancery would compel the original holders to pay up the shares in real money if they could. And we do not feel sure that in some cases the law might not go farther, and say that purchasers from those holders must, as the phrase is, "stand in their shoes," and take only that which they had to sell. At any rate, we would advise buyers of nominally paid-up shares, or advancers on them, to be on their guard, and not in a dubious case act without due caution and legal inquiry.

But shares "paid-up" from the beginning are a heavy stock to float in the market. They necessarily require much money, and even in the most legitimate and ultimately prosperous cases, the returns of industrial undertakings are at first small. They are generally supplemented therefore by an issue of *debentures*. And here there is great reason to caution the public. It is often proposed to pay at first and from the

beginning an immense rate of interest, say 13 or 14 per cent.; in addition perhaps the debentures are to be paid off by quick drawings, with a bonus of (say) 20 per cent., and in some cases the holders are even to have a farther bonus in paid-up shares. Now is it reasonable that those who lend to such undertakings at a fixed rate, who cannot lose more than the amount of their debentures, should have rates of interest much surpassing the ordinary profits of business? Everyone knows it is unlikely, and everyone who lends at such an immense interest is likely to lose his money.

Then again the debenture holder should look to his security. In some cases it consists of a property sold to the company at such and such a price (say) 400,000*l*, of which the debenture holders pay 300,000*l*, and the sellers take the rest in paid-up shares. Suppose the concern to be unprofitable, upon what property have the debenture holders a security? Nothing was paid in but their own money, and they do not know how much of that staid in, and how much was divided by the promoters as preliminary expenses, or under some such name.

The plain duty of the lender of money on security is to see that such security is worth very considerably more than the money he lends, else it is no security at all. And in the case of a company he ought to assure himself that there is a large *really* paid-up capital, which was, as well as the amount of the debentures, invested in the fixed property mortgaged to him. Without that he cannot be sure that when the company breaks, and he has to realise the debentures, the property will sell in fact for a sixpence. And the lender should now be peculiarly suspicious of high interest. The shareholders of the company —the people who work it and manage it—always ought to have a principal share in the accruing profits. If not the concern cannot be safe. But how can the shareholders and managers get anything when the debenture holders get 13 or 14 per cent. from the beginning, besides being paid off in a year or two with extravagant additions to principal?

We warn the investing public that they must be watchful, and look to themselves. They lost large sums in the panic of 1866, and they will lose again if they do not inquire carefully and see what they are doing.

THE DUKE OF RICHMOND'S MOTION TO REJECT THE ARMY BILL.

We wrote so fully last week on the Peers and the Army Bill that we have little that is new to say on the main issue involved. After all which has been said on the Army Bill we cannot now discuss its merits or demerits again. But there are one or two remarks which should be made on the Duke of Richmond's motion, and on the changed aspect of the question in consequence of it.

First. The species of motion is one of the worst in Parliamentary procedure. It is in appearance an objection to the form, while the real objection is to the substance. In the traditions of Parliamentary logic there is this precept for a member of Opposition—"If a measure of the Government be "partial, oppose it, because it does not go far enough; if it is "complete, oppose it, because it goes too far." Between the two there is always a reason for opposition. But this country is too accustomed to Parliamentary Government, and too used to its tactics to be much led by such reasons. We all know that they are never used when a valid argument affecting the substance of the matter can be given. In this case no one can imagine that we should have heard of the incompleteness of the Government measure if the Upper House had not disliked the abolition of purchase, and if it had not disliked to say so clearly.

Secondly. There could be no greater misfortune for the House of Lords, as a body, than their rejecting this Bill. We do not pretend that it is a Bill for which the nation now cares. But we are sure it is a Bill for which the nation *would* care very much if the Lords were to refuse to pass it. The Lords are not as yet an unpopular body in England; they have still great traditional influence; they are protected by the most powerful instincts of Englishmen. The belief is that we have prospered exceedingly under the existing institutions, and that the source of that prosperity being somewhat uncertain, those institutions must not be changed without a good reason, and unless it be proved that the part of them to be changed is now doing clear harm. If on a great issue, on which the nation was undecided, and on which the Lords could be thought to be impartial, the Peers were to oppose the Commons, we believe that, still diminished, and daily diminishing more and more, as their influence is, the opposition would have great weight. We believe it would cause the country to suspend its judgment; that the country would acquiesce in delay; that it would not move towards or hint at an abolition of the House of Lords. But in this case the Lords would not be believed to be impartial. Really very few Lords perhaps care much for the purchase system in the army. But they are *thought* to care; it is invincibly believed that the purchase system is a part, and the most conspicuous part, of the system by which poor people are excluded from the English Government and by which the aristocracy retain it. If then the Peers were to throw out the Bill, and if (owing to a change of Ministry or otherwise) there were to be a dissolution with the purchase question in the front, a demagogue could wish for no better cry. He could say, and would say, "that the industrious "poor were kept out of the army, and that rich idlers "monopolised it." As for the reply that these rich people were not necessarily or even commonly men of noble birth; that the money of a tailor was as effectual in purchase as the money of a duke; that the system is in some sense favourable to men with newly-made money, for it enables them to buy a gentleman's position for their sons (assuming that position to be worth buying) easier than they buy it elsewhere,—as for these and similar true arguments, they are refinements which a large and mixed public meeting would not hear or heed. They would be lost in the gross idea "that purchase is the "rich man's gain and the poor man's difficulty, and that "the Lords stand to it because the Lords are rich beyond "measure." A worse election for the Lords, or one more likely to diminish their power and to lessen their likelihood of lasting, cannot be mentioned.

Thirdly. It is no doubt a serious defect in our English institutions that this question, or that any important question, should not be freely decided on in both Houses, but should be withdrawn from the revising assembly; but this *is* a defect in our institutions, and it must do us harm not to recognise it. The House of Lords, as a class assembly, cannot really and freely decide on what is thought to affect the interests of that class,—still less, being an assembly resting on privilege not merit, can it decide on the maintenance of a practice (like purchase) which is and always will be thought to deny something to merit, and to give something to privilege. This being an intrinsic defect in the constitution of the House of Lords, that House will, in an age of popular vigour like this, only injure itself and others by refusing to see it, and by blindly acting as if it did not exist. No assembly—no kind of possessors of any sort of political power—ever can be strong which refuses to perceive the limits of that power; and it is the House of Lords (and not the Army Bill) which is now on its trial, for we wait to see whether it will conform to this prime condition of useful continuance, or whether it will rush into conflict with forces which it could once easily vanquish, but which in the course of years have been constantly growing while it has been constantly fading, and which are now far the stronger.

THE COMTE DE CHAMBORD'S MANIFESTO.

The Comte de Chambord has vividly illustrated what is always likely to be the difficulty of a Legitimist monarch who clings to the divine right of lineages the narrowing effect on the minds of a chronic confusion between means and ends. He appears to be a man of quiet and even candid temper, who really cares for France more than he cares for his own throne, who had the good feeling and the good sense to urge on his immediate followers the duty of defending France under any flag whatever against foreign invasion, but who nevertheless is too weak in intelligence to appreciate the relative importance of institutions and their symbols, of good government and its heraldry. You may understand his strange and quaint identification of his own honour with the "white flag" of his ancestors in two ways,—the one of which is unfavourable to his political independence of a party, the other to his political intelligence altogether. His enthusiasm for "the white "flag" may be meant to convey to the Catholic Church his pure devotion to her interests, at a time when the red flag has meant war to the knife with the Church, and the tricolour has meant at most patronage, and rather desultory and untrustworthy patronage, of her cause. If this is the real drift of the grotesque fidelity with which the Comte de Chambord unfurls the white flag to the nation as inseparable from himself, it

may indicate almost heroic loyalty, but it must indicate that he who unfurls it is out of all sympathy with the mass of his subjects. The Republican party is more or less hostile to the Pope, the extreme Republicans bitterly so; the Orleanists are cold not cordial Catholics; even the moderate Church party in France is at the present moment anxious to resent, and to be known to resent, the recent triumph of the Ultramontanes. The Ultramontanes themselves have very little real popular power in France, and what little they have only through the women of France. If, therefore, this outburst of emotion in favour of the white flag is an outburst of love for the sacerdotal party, it is a confession that the Comte de Chambord sides with a section of the people against all the remainder of it — not a confession very likely to win for him the throne of his ancestors.

But the second hypothesis seems to us far more probable, that the intensity of feeling expressed for the white flag is a family and, so to say, an heraldic feeling—the feeling of a feeble dreamer about ancestral honours, of an exile who has been accustomed to associate with that single symbol in his primitive reveries all the honours of his line, and his disgust as well as pique at the family disloyalty shown by Louis Philippe and his sons in their willingness to accept from the nation a standard intended to efface the memory of the glories of the Bourbons. The passage in which the Comte de Chambord hymns the achievements of the white flag appears to prove the family vanity rather than the orthodox disposition of his declaration. "Whatever charges about privileges, "absolutism, and intolerance—about I know not what,—about "titles, about feudal rights, the most audacious bad faith "may lay against me, whatever phantoms it may conjure up "to prejudice you against me, I shall not suffer the standard "of Henry IV., of Francis I., and of Joan of Arc to be torn "from my hands. It is by that Flag that national unity was "established; it is by it that your fathers, led by mine, "have conquered that Alsace and that Lorraine, whose fidelity "will be the consolation of our misfortunes. It is "that flag which conquered barbarism in that land of "Africa which saw the earliest days of arms of the "Princes of my house; it is that flag which will over-"come the new barbarism by which the world is "threatened." These are words which point to a real confusion in the poor Prince's mind between signs and things. If the recollections of the Bourbon dynasty are so pleasing and glorious to France that it is an additional strength to his claim to recall them, why then no doubt, though it cannot be said that his "honour" requires him to stick to it, his interest does, and there would be nothing but good in adhering to it. But if, in fact, the intolerable feudal oppressions to which this passage significantly and boldly refers made the past era of Bourbon rule hateful to the peasantry of France, and render it desirable that a new prince of that blood should show by every sign in his power that he has no intention of identifying himself, even in feeling, with the *ancien régime*, then all this trash about the flag which "never followed "any path but that which leads to honour" is a most gratuitous attempt to raise impressions unfavourable to himself. The Count says, indeed, that he is for universal suffrage and the ideas of 1789, but then "the white flag" did not favour these ideas at all, and indeed itself encumbered to those ideas. What can be weaker than to appeal ostentatiously to traditions altogether hostile to the modern profession of faith, which he tries in somewhat stammering accents to utter. France says very justly that the Comte de Chambord is eloquent while he is praising the deeds of ancestors under whom France suffered bitterly, but extremely brief and even negligent while declaring his intention to abandon the old principles and cleave to the new. If he had wished to be believed, why not be willing to owe to France the national flag under which the nation has done so much more for herself than Bourbons ever knew how to do for her? The Comte de Chambord could not thereby have lost the advantage of his descent. On the contrary, only a prince of the ancient line who had shown himself heartily averse to the ancient abuses would be able to reap the full advantage of his lineage. *He* might unite the ancient and the modern, might at once gratify the yearnings of Brittany and fulfil the hopes of Paris, but anyone who did not separate himself wholly from the policy of the old Bourbons would inspire even Brittany itself with little enthusiasm, and all the rest of France with loathing. Admit that the Comte de Chambord believes too much in the divine right of an hereditary claim to be willing to ignore it, still, as he clearly does repudiate the idea of an hereditary policy, why could he not have accepted from France the flag which symbolises a popular policy, instead of adhering to the one which symbolises the oppressive feudal policy of that Louis who identified the State with himself? The poor Comte de Chambord is really the victim of his own armorial bearings. He throws away his only chance of reigning, because he will not disown the *colour* under which his ancestors did what he does disown. It is clear that such a mind as this has not the breadth to rule.

This weak manifesto will, however, do good, though not to him who issued it, and hardly even to the prince of the rival branch of the family—the House of Orleans. Everything that illustrates vividly to the French the danger of committing themselves to a new dynasty will help the Republic, and will help it the more now that a man of rare force and ability like M. Gambetta, is watching the administration of M. Thiers, and able to check its Conservative excesses. The weak proclamations of Napoleon and the Comte de Chambord will do something to apply the far more striking lesson given by Louis Napoleon's collapse, in teaching the French that there is no magic either in Emperor or King; that quietness and safety, and even prosperity, are quite as likely to be secured for France by sagacious statesmen without a throne as with one. Men who make flourishes about eagles and white flags, in great public crises are likely, after all, to teach trust in themselves, even to the narrowminded but shrewd peasantry of France. When silly words follow close upon insane deeds, there is some chance of even poor farmers taking warning, and saying to themselves that after all a dynasty with a great name is no security for peace or plenty, that humbler men might succeed at least a little better. And at present it looks as if the lesson might really be learned. If M. Thiers can only be quiet and avoid similar flourishes, the Republican idea will probably gain strength. Every month's delay is dangerous to the Princes, and favourable to a moderate Republic.

THE PROPOSAL FOR A LOCAL GOVERNMENT BOARD.

The Government has taken a long step in the right direction in the matter of local government. It has recognised at last the necessity of linking the municipal and county organisations to the central power, and has brought in a Bill for consolidating all the functions and powers now entrusted to the Poor Law Board, the Sanitary Committee of Privy Council, and several dependent departments of the Home Office, in the hands of a single officer, who will sit at Gwydyr House, and be styled by the somewhat cumbrous name of the "President "of the Local Government Board." This officer, who, we would venture to suggest, had much better be called Warden or Chancellor of Municipalities, will be supreme over all matters connected with the Poor Law, the laws of health, the registration office, the municipalities, the Drainage Acts, the Baths and Wash-houses Act, public improvements, the Artisans' Dwellings Act, and in fact local taxation of every kind and description. He will be the Parliamentary referee on all these subjects, and will, we trust and believe, be allowed to lay on the table every year a clear exposition of the local taxation of the United Kingdom—a work never yet attempted except by Mr Goschen when introducing his new scheme of parochial government, but felt to be of the highest importance. The local expenditure of the country has risen by degrees until it adds 45 per cent. to the total outlay of the community, and nearly a third to its taxation,—the difference being mainly provided by loans,—yet no member of Her Majesty's Government has hitherto been responsible even for observing it. Nobody can say, for example, with official authority whether the five or six millions borrowed last year by local authorities was raised for wise purposes or in a reasonably business-like manner, whether any given borrowing body is assuredly solvent, or whether any less costly mode of raising money could or could not be devised. The municipal bodies are independent of the Treasury, it is the Treasury's interest to diminish taxes at the expense of rates, and the ratepayer alone among taxable Englishmen has been left unrepresented in the Cabinet. Except as regards Poor-law expenditure, there has been no connecting link between the counties and the urban municipalities, no Minister with the right even to advise on local expenditure, still less any Minister

interested in doing for local taxation what has been done for the taxation of the Empire. The consequences have been first a split between the community and the Government as to the just incidence of local taxation; secondly, a quarrel as to the proper structure of the local spending bodies; and thirdly, an extreme reluctance on the part of responsible officials to undertake the difficult task of improving local administration. It greatly needs improvements. The large towns are administered in many departments through separate and conflicting authorities; the capital cannot be said to be administered at all by any responsible body; the small towns are governed by haphazard vestries, with powers much too limited; and in the country there is not even a unit of administrative area smaller than the county itself. The very method of improvement to be adopted is undecided, a long-standing quarrel between the ratepayers and the landlords having resulted in a kind of a compromise which does not work, the representative members (say) of the Highway Boards illegally ousting the nominee members by refusing to do business in their presence. All these things, which involve collectively the good local government of the kingdom, its principles, practice, and machinery, require attention; and it is under this Bill the duty of a Cabinet Minister, with an existing and competent staff, to attend to them, to answer questions about them, to seek a reputation by removing their defects. The Bill of course gives him no new power of action or control. It does not centralise anything except responsibility, but in fixing that it creates an office to which Parliament at its discretion may from time to time entrust limited powers of supervision.

We cannot conceive any ground of opposition to such a Bill, nor indeed do we apprehend any. The municipalities, whether county or urban, have long desired to be represented in Parliament and within the Executive Government itself, and a full and accessible representation is now secured to them in an office which they understand, which they can fully inform, and with which they are accustomed to do business. Their authority is not diminished but rather increased by the change, while the representation of their constituencies is decidedly and directly improved. Their tendency, we imagine, will not be to oppose, but rather to heap powers and duties upon the new officer, until he gradually supersedes the Home Secretary in all his functions except those of Minister of Justice and Internal Order. That change will be no disadvantage to the business of the State, while it will decidedly improve and expedite the work of local administration.

BUSINESS NOTES.

Exemptions from Inhabited House Duty.—A point of some importance to the taxpayer and to the revenue was touched by a question which Mr Mundella put to Mr Lowe on Thursday night, respecting the Inhabited House Duty. Mr Mundella inquired whether the Chancellor of the Exchequer "proposed during the present Session to relieve "bankers, merchants, traders, and professional men who left "their business premises in the care of a watchman and his "family from the charge of an inhabited house duty;" and if the suggestion were carried out, as Mr Lowe, said he must lose a good deal of money. But not only is the question a matter of public interest in this way, if we look into the reason of the proposal we find that the object is to extend an exemption of a very doubtful sort, and by which the Exchequer already loses a good deal of money. The complaint in fact is, that the following clause in the Acts relating to the inhabited house duty causes a very unequal exemption:—"Any tene-"ment or part of a tenement occupied as a house for the "purposes of trade only, or as a warehouse for the sole pur-"pose of lodging goods, wares, or merchandise therein, or as a "shop or counting-house, or being used as a shop or counting-"house, shall be exempt from inhabited house duties, "although a servant or other person may dwell in such "tenement or part of a tenement for the protection "thereof." Under this Act it is said that warehouses, shops, and counting-houses which are used exclusively for purposes of business are exempt from the duty, but lawyers' chambers and the offices of bankers and professional men generally are liable, though they are as much places of business as shops or counting-houses. But this, instead of being an argument for extending the exemption, is rather a reason for abolishing it altogether. Except perhaps as regards warehouses, a house duty which would apply to all houses, and not merely to those which are technically termed inhabited, is not an occupier's grievance. Such a duty at least in a place like the City, whence the cry for exemption comes, really tends to fall on the owner of the property, and not on the occupier. The chief part of rental there is a monopoly rental, and the imposition of the State charge, as it cannot raise the demand, operates to diminish the profit of those who have the monopoly of the supply. That the occupiers at any rate do not really feel about the duty, and have no substantial grievance, is obvious, if we only think for a moment what profits are made in the city in places of 200*l* or 300*l* a year rental, and how small a charge a 9d house duty would be in relation to the working expenses or net profit of the business. Even if the house duty therefore did not fall on the owners, it would rather be a good tax if it were made to fall universally on places of business, as it would at the utmost be a minute charge upon profits, which no particular person would really suffer from, and which would not diminish in the slightest appreciable degree the general rate of profit in the country. We hope then that Mr Lowe, instead of listening to the cry for extending mischievous exemptions, will inquire whether something cannot be done to abolish them, and make so good a tax as the house duty more productive. Let the word "inhabited" be struck out, and let exemptions be abolished. The present agitation, we are convinced, is really promoted not by occupiers, who have no real interest in the matter, but by gentlemen who have a large interest as owners, and who will gain in rental what the State will lose.

The Brighton and South-Eastern Dividends.—Among the causes which have influenced the English railway market this week is the declaration of the dividends of the Brighton and South-Eastern lines, which have acted in different ways—the Brighton being rather better than the current anticipation, and the South-Eastern not so good. From an investor's point of view neither of the dividends is unfavourable. The Brighton is especially satisfactory, because, as we pointed out a fortnight since, only about a ¼ per cent. per annum would have been payable if the new traffic had been earned at a proportionate rate of working expenses, and the payment of ¾ per cent. ought to be a proof that the working expenses have not been the same, but that a very large part of the new traffic has been all net profit. The total increase of traffic is 35,000*l*, and as it takes about 8,500*l* to make a half-year's dividend at the rate of ¼ per cent. per annum, it follows that two-thirds of the increase has become available for the ordinary shareholder. But the announcement of the South-Eastern dividend is really not unfavourable. The actual increase of traffic dealt with is less than in the case of the Brighton line, about 23,000*l* only; but then the account is for only five months, owing to the change which is now being made in the termination of the half-years, and these five months are also the worst of the year. The South-Eastern, moreover, has suffered specially, as the Brighton did not do, from the interruption of traffic by the war. In some degree however the South-Eastern profit has been earned at a diminished rate of working expense. A dividend of 2⅝ per annum for five months is equal to a dividend of 3½ for six months, which would have been an increase of ⅝ on the corresponding dividend for 1870. But the dividend, calculated with the same working expenses was 3 per cent., so that the shareholders with 3½ per cent. get rather more than the proportionate benefit. The account does not show quite so well as the Brighton; but to some extent they both confirm the expectation that the increase of traffic last half-year being to a greater extent than previous half-years in passenger traffic, would be unusually profitable to the shareholder.

Trustees and Debenture Stock.—A reference made in the prospectus of the issue of debenture stock of the East and West Junction Railway to the recent Act authorising trustees to invest in debenture stock as a substitute for bonds, suggests to us the expediency of pointing out to trustees and their advisers that if the Act is rashly acted upon they may get involved in serious difficulties. It is quite true that the Act authorises trustees to invest in debenture stock in place of bonds, but it does not dispense them from the duty of exercising proper care in the selection of the security upon which they "lend." In taking

a mortgage they know that any gross negligence in estimating the value of the security offered them, by which the trust-money was lost, would be visited upon themselves. The same rule we imagine would hold good in the selection of "debenture stock," which is only a mortgage of a particular sort. And the hazards to which trustees will be thus exposed, unless they take care, will be very great. In any case we doubt if it would be very safe for them to take the debenture stock of an unfinished railway, and we are sure it would not be safe unless they are peculiarly careful, and verify for themselves all the calculations of expected traffic, retaining besides proofs that they had done so, which could hardly however be sufficient in any event if the lines which they helped to build turned out to be gross failures. To put an end to all doubts we should be inclined to suggest that trustees should be prohibited from taking debenture stocks or bonds, except upon finished undertakings. Where there is a going concern there is some means of judging as to the sufficiency of the security; but an unfinished line is a mere speculation, even for the debenture-holder—in too many cases unfortunately, in these days of contractors' lines, a more than doubtful speculation. If the Legislature or Judges do not interfere, those who leave money to trustees should put the requisite limitations on their powers.

The European Assurance Society.—We do not think there will be much doubt of the propriety of the decision which Vice Chancellor Malins has come to, that there is a *primâ facie* case made out by the petitioners for winding-up the above company, and that the petition accordingly is to be heard on the merits. The facts especially dwelt upon by the Vice-Chancellor were, that according to the report of Mr A. G. Finlaison, the actuary, the society on Dec. 31, 1869, showed a surplus of 95,165*l*; that this surplus would not exist unless the unpaid capital was included as an asset, and that probably 115,000*l* of this capital, if not more, was irrecoverable. The net result is a slight apparent deficiency, and the margin being so narrow there is at least room for an inquiry and a full hearing of the case. The wisdom of the provision in the last Insurance Act, enabling the Judge to take into account contingent and prospective liabilities of the company, is shown by a case like the present. Unless such matters can be considered, a company which ought to do no speculative business, and is thus prohibited from one mode of recovery, would be enabled to go on for years with an accumulating deficiency, before there was such an insolvency as a Judge would take notice of. Of course the application of such a rule will require the exercise of great discretion on the part of the Judge, and for this purpose it will no doubt be useful that the Judge, as the Vice-Chancellor hints, can direct something to be done, "it might be far short of winding-up, to improve the financial position of the company."

American Securities and the Rate of Exchange.—A praiseworthy novelty, we observe, is introduced in the issue of the First Mortgage Debentures of the First Division of the St Paul and Pacific Railroad Company, which is brought before the public this week. At present the investor who buys American securities is greatly puzzled about the real price by the Stock Exchange practice of converting all transactions in securities expressed in American dollars at the fixed exchange of 4s 6d per dollar. This was always different from the real exchange, and the discrepancy, since the introduction of depreciated paper money, has of course been much greater. To meet this the English agents for the present American company have very properly recommended that the bonds should be expressed in sterling as well as dollars, and that the fixed rate of exchange should not be 4s 6d but 4s, which is comparatively near what is now the par of exchange; and as investors have the option of receiving payment in New York, is likely to be beneficial to them should American paper ever rise to par, or should there be a return to a gold currency. It would be expedient however for the Stock Exchange to alter its rule and make its fixed exchange more like the average rate now current. To experts the matter is of no consequence but the ordinary investor is puzzled by the difficulty of knowing how much he will have to pay when he purchases American securities at a given price.

Non-Disclosure of Facts in Insurance.—The Court of Queen's Bench has now had before it the case of Gandy v. the Adelaide Marine Insurance Company, in which the question was whether there had been a non-disclosure by the insurer of material facts. The plaintiffs were the owners of a ship classed A1 at Lloyds, but on 22nd October, 1869, when half of the eight years for which it had been classed expired, declined to submit it to the re-survey which was necessary to a continuance of the classification for the remaining four years. A few days afterwards they made proposals for insurance, which were at length arranged with the defendants on the 15th of November, they having in the meantime referred to the register and found the ship classified there without the usual correction made when there had been no re-survey, though such a correction was actually made on the 15th of November. The ship was lost in the month of December, and the defendants having ascertained that the ship had ceased to be A1 at the time of the insurance, declined to pay, holding that the plaintiffs had suppressed a material fact. In opposition, the plaintiffs urged that they had suppressed nothing, that it was for the defendants themselves to ascertain the facts as to the registry. The decision of the Court was now given in favour of the plaintiffs' view, but not unanimously, the Lord Chief Justice being of opinion that the fact of a re-survey having been *declined* was a material fact relative to the vessel. The plaintiffs were not bound to inform the defendants of the state of the register, but beyond the state of the register the defendants were entitled to be informed of such a material fact as the declinature of the re-survey.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending July 8:—

	Receipts of Week Ending July 8.
	£
Customs	287,000
Excise	138,000
Stamps	189,000
Taxes	29,000
Income tax	226,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	27,516
Total	896,516

The total receipts of the previous week were 994,141*l*.

The Exchequer issues of the week on account of expenditure were 5,390,763*l*, viz.:—

	£
Interest of debt	5,228,091
Other charges on Consolidated fund	65,672
Supply services	97,000
Telegraph services	nil.
	5,390,763

During the week the cash balances have decreased as follows:—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on June 30	3,291,388	1,057,202	4,348,590
— July 8	819,602	933,219	1,752,821
Decrease	2,471,786	123,983	2,595,769

The other receipts to date were 1,898,478*l*, the other payments were *nil*.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

Paris, July 13.

The return of the Bank of France for the week ending July 13, shows the following changes compared with that of last week:—

Increase.	francs.
Cash	7,000,000
Current accounts	2,000,000
Increase.	**francs.**
Notes in circulation	59,000,000
Bills discounted	61,000,000
Treasury balance	12,000,000
Advances	1,000,000

After astonishing the country by the presentation of a financial scheme which for ignorance of economic science, for contemptuous disregard of the interests of the nation, and for the audacious insolence with which it proposes to make the "rich richer, and the poor poorer," is unexampled in the history of

any nation. M. Thiers and M. Pouyer-Quertier have had recourse to an expedient, disgraceful in itself, injurious to commerce, and outrageous to a Parliament. They have forced on, without notice, and compelled the adoption without discussion in the Legislature of part of that scheme. In the sitting of Saturday, whilst the Assembly was absorbed in a debate on an important domestic matter, the Government, without a word of warning, suddenly presented a Bill establishing some of the duties it proposed, and insisted on immediate adoption. The augmented duties were not even set forth in print. They were read from a manuscript covered with blots, erasures, and interpolations. Some deputies demanded a postponement to consider the matter, and to let commerce have time to speak, but they prayed in vain. M. Pouyer-Quertier said that in anticipation of higher duties, commerce was importing large quantities of goods; that the Treasury was losing millions of francs per day, and that delay could not be accorded. The clauses of the Bill were accordingly adopted in hot haste one after the other, and the next day the measure was promulgated as law.

Under the new law, sugar of all kinds is augmented three-tenths. Coffee is to pay 150f the 100 kilogs, which is 50f more than at present when brought direct from producing countries or French possessions, and 170f if from bonding warehouses; if roasted or ground it is to pay 200f. Tea is doubled, being put at 200f the 100 kilogs from countries out of Europe, and 260f from bonding warehouses; pepper, pimento, cloves, cinnamon, nutmegs, cassia lignia are at 200f or 240f, which is also double; cocoa is to pay 100f or 120f; chicory, 53f; chocolate, 160f. The duty on petroleum and on schist oil is 20f or 25f, and if refined, 32f or 37f, according as it may be brought from producing countries, or from bonding warehouses. Some other articles are augmented, but the only one that is of interest in England is spirits, which is to pay 30f the hectolitre. (In English, 25f equal 1*l*, and the 100 kilogs, in round figures, are 2 cwts—the hectolitre is rather more than 22 gallons.)

The law said nothing of floating cargoes; but a new one, adopted yesterday and published to-day, enacts that sugar, coffee, and all the other articles comprised in the aforesaid measure, shall, if despatched at a date previous to that at which "*the presentation* of the Bill could be known" in the exporting ports, only pay the pre-existing duties, provided that on arrival in France they be declared for consumption. In England an enactment so loosely worded would give rise to litigation; but in France little attention is paid to legal technicalities. The Bill in question was presented on the 14th June. English people importing cargoes of coffee, tea, sugar, &c., must therefore ascertain at what date subsequently the fact was "known" in the ports from which their ships sailed.

By the preceding measures, the commercial and shipping interests of Bordeaux, Marseilles, Nantes, and Havre are seriously affected, and those interests suffer still more from the unseemly haste with which they have been passed. In all the ports loud dissatisfaction is expressed at the manner in which the Government has acted.

With regard to the rest of the famous Governmental scheme—the taxation of raw materials—it raises a general outcry. The industries specially concerned, and the Maritime Chambers of Commerce, have beset the Ministers and the Committee on the Budget with deputations to protest against it; and written protests, in the shape of petitions and letters, are showering on them every day. Lyons, on its part, has shown such determined hostility to paying 20 per cent. on silk—the raw material of its splendid industry—that it has extorted the promise of a reduction to 2 per cent., or thereabouts. Marseilles, too, has grumbled so loudly at having its commerce interfered with, especially that in oleagenous seeds, which of late years has taken great development, that a letter has been written to it, under ministerial inspiration, to intimate that the objectionable measure may be postponed, and that accordingly it need not agitate. But let us hope that Lyons and Marseilles, and the other towns interested, will not allow themselves to be duped by shallow promises. The surprise of Saturday shows that they have unscrupulous people to deal with, and that they cannot be too watchful.

It is said above that the plan of M. Pouyer-Quertier and Thiers displays ignorance of economic science. In proof, take the lecture delivered by M. Michel Chevalier, on opening his course last month at the College de France. The text on which he spoke was—"How a nation re-establishes its prosperity;" and he showed that it is by the pure and simple application of economic doctrines. He stated that one of the first and most important of these doctrines is that people must work; and that in working each man must be free—that is, "have the right of working according to the processes he thinks best of taking his raw materials, his tools, his apparatus where he finds them on the best conditions, whether in a foreign country or known; and of being free from vexatious regulations and from monopolies." M. Michel Chevalier developed this theme in eloquent language, and demonstrated from the acts of law under the Regency, and from those of the great revolution, that departure from sound doctrines produces national disaster. He did not of course speak directly of the Governmental project, but it is evident that he had it in his mind, and that he wanted to make his hearers see that it is from beginning to end contrary to the science he professes. It will be well for France if the National Assembly would judge the project by the light of this lecture.

The Society of Political Economy on its part, in its last monthly meeting, at which M. Michel Chevalier presided, dealt with the matter. All the speakers condemned the famous invention of M. Thiers and his associate, and recommended an income tax. One of them, M. Villaume, said that in France the poor classes frequently pay in proportion 20 per cent. more than the rich; and another, M. de Parien, declared that if the rich were not taxed great discontent would be excited.

A law promulgated on Tuesday, re-establishes the deposit of caution-money for newspapers. The political character of this law does not concern one, but in a financial point of view it may be well to note that the measure not only relieves the Government from the necessity of restituting the money deposited under the Empire, but will compel a number of new journals to deposit. In presence of the triumphant success of the last loan, your readers will perhaps think it odd that that the retention and obtaining of a few score thousand pounds should be thought desirable.

The municipal authorities have resolved on raising a new loan for Paris, and propose to fix the amount of it at 600,000,000f; but a new municipal council is to be elected on the 23rd, and it will have to decide on the matter. If the election of a council had been accorded in due time, the Commune would never have existed.

The *Journal de Credit Public*, by the pen of M. Ropiquet, announces that a project is under the consideration of some financiers for buying from the Bank of France the whole of the unpaid bills that it holds, paying for them partly in money and partly in Government stock or other securities; afterwards obtaining the payment of the bills from the debtors under conditions to be fixed, one of them being the grant of delays, extending in certain cases to as much as five years. The advantage of this system, according to M. Ropiquet, would be to afford the Bank the disposition of a large amount of capital, which would enable it to give great impulsion to commerce. On what terms it is proposed to buy up the bills he does not state.

Before the war, the Bank of France used to publish its weekly returns on Thursdays—the day of the week to which they were made up: and that day was generally convenient. But since it has resumed publication it only brings them out on Fridays, though made up, as before, on Thursdays. The reason of the delay is probably that it has to send them to Versailles, to be printed in the *Official Journal*. But could it not make them public *in Paris* on Thursday afternoons as previously.

The following is the return of the Bank of France for the weeks ending the 6th of July and 29th of June, 1871, together with the corresponding figures of the previous account:—

	July 6, 1871.		June 29, 1871.		Sept. 8, 1870.	
DEBTOR.	f	c	f	c	f	c
Capital of the bank	182,500,000	0	182,500,000	0	182,500,000	0

Although the Credit Foncier has not suffered so much from the bombardment of Paris as was apprehended, the war will seriously hinder the payment of the annuities due to it, both as the period and the amount difficult. Accordingly it will probably give the dividend for 1870—nothing more than the ordinary interest.

Commercial life seemed quite busily busy here, particularly in the commercial parts and in the wine districts. The railways report every all the goods presented, and there are such complaints.

So many thousands of Paris workmen have been shot or arrested or have had to take to flight that serious fears are beginning to be manifested that the peculiar industries of Paris will suffer greatly and it may be permanently.

Some journals have stated that great damage has occurred at the Entrepôt of Macé Gross and that part of it has fallen in. But the Paris branch of inspectors of the Embassies of Upper Egypt, which receives every day telegrams and letters, affirms that all these statements are absolutely without foundation.

A French and German commission is now engaged in tracing the line of the new frontier between the two countries. The part of it already fixed gives to Germany the iron works of Wendel, Hayange, and Moyeuvre, those of Ottange, Aix and Micheville, Neuwelt, and Hadange. It will be curious to see how the passage of these important establishments under foreign domination will affect the iron trade of France.

The shareholders of the Northern Railway held their annual meeting a few days back. The report stated that the gross receipts of the old net work of 1870 were 71,365,020f, about 14,500,000f less than in 1869, and that those of the new net work presented a deficiency of 2,000,000f. After deducting expenses of working, charges for loans, and other outgoings, there remained 22,700,827f for the shareholders, which gives 42f per share. The damage done to bridges and the works in the war was 1,500,000f, that to rolling-stock has not yet been estimated.

The Southern Railway received in 1870 from the old network 44,700,286f, and from its new 32,092,284f, and after deducting working expenses, charges for loans &c., there remained 8,994,197f, permitting 16f per share to be distributed.

Although the Western Railway suffered greatly from the war—the destruction of bridges &c., of rolling-stock, amounting to 15,000,000f,—it will be able to give 20f per share for 1870, but cannot distribute it for the present.

The report of the Credit Industriel et Commercial Bank of Paris presented in a recent meeting of shareholders states that in 1870 the discounts were 204,877,788f, but the previous amount of bills left unpaid, under the decrees and laws granting delay, was not mentioned. The deposits made were 173,020,220f, nearly 50,000,000f less than in 1869. The gross profits were 2,800,733f, the expenses, 1,121,033f; so that there remained 1,678,700f for the shareholders—a sum sufficient to give 14f 50c per share, and to leave 178,703f to be carried forward.

The Credit Industriel Bank of Marseilles—one of the several banks of shares established of late years—earned in 1870 a dividend of 7f 50c, the net profits being 474,513f.

In the meeting of the French Transatlantic Company the receipts of 1870 were stated to be 10,141,000f, which were less by 219,000f only than those of 1869. The war reduced the passenger traffic considerably in the latter part of the year, but the loss was compensated by the import of arms from the United States. The net profits were 800,000f, sufficient to give 10f per share; but they cannot be distributed until the subvention due from the Government be paid.

The Company of the Entrepots et Magasin Généraux of Paris is unable to distribute any dividend for 1870, the siege having reduced its operations greatly, and some of its buildings having been destroyed by fire under the Commune.

The Banque Franco-Egyptienne is paying 13f 50c as dividend of 1870.

The payment of 30f by the Spanish Credit Mobilier was mentioned last week. The gross receipts of this establishment in 1873 were 5,414,087f, and after deducting expenses of management and the guarantee to the Gas Company of Madrid, there remained 4,332,414f.

The Company Immobiliere announces that it is under the necessity of postponing the payment of interest on bonds due 1st July.

The Charentes Railway Company is to pay from 1st August the interest of 10f on shares falling due on that date.

The Mines of Pontgibaud have fixed the dividend of 1869-70 at 45f. Of this sum 15f have been distributed, and the rest is now being paid. A further sum of 15f is also being paid on account of 1871.

The meeting of the Orleans Railway Company is fixed for the 2nd August.

The following are the prices received from the markets of the last three days:—

Cotton.—At *Havre*, New Orleans very ordinary disposable 111f to 112f the 50 kilogs; Ouararattee, good ordinary, 89f to 90f. The quotations fixed by the brokers on Friday were—New Orleans, 109f; Ouararattee, 88f; Tinnevelly, 87f; Bengal, 76f. The total sales at all ports from 1st June up to yesterday have exceeded 290,000 bales.

Coffee.—At *Havre*, Hayti, 126f to 131f the 50 kilogs, duty paid; Guatemala, 135f, sold in bond, 82f 50c; Guatemala, 137f; Porto Cabello, 137f 50c; Cupicuma, 126f and 127f; Mysore, 130f; Mocha, 235f; La Guayra, 137f and 138f; Rio, 124f to 127f, and in bond, 74f 50c to 78f; Santos, 128f; Malabar, 90f. These prices are 5f to 7f higher than those of last week. At *Marseilles*, Hayti, 127f 50c; Mocha, 180f. At *Bordeaux*, Rio, not washed, 71f in bond, and washed, 83f.

Indigo.—At *Havre*, Bengal, 2f 50c the ½ kilog above the estimates. Kurpah at established prices.

Tallow.—At *Havre*, Monte Video saladeros ox, 57f to 58f 12½c the 50 kilogs; La Plata sheep, 56f 50c.

Cocoa.—At *Havre*, 82f to 87f 50c the 50 kilogs. Bahia, 90f to 93f. Para, 120f.

Hides.—At *Havre*, Rio Grande salted saladeros ox, 70f; ditto matadero, 67f the 50 kilogs.

Wool.—At *Havre*, Buenos Ayres unwashed, 165f the 100 kilogs.

Oleaginous seeds.—At *Marseilles*, Calcutta sesame, 51f the 100 kilogs.

Flour.—At *Paris*, 43f 75c the 100 kilogs, and 78f the sack of 157 kilogs.

Spirits.—At *Paris*, 3/6 90 degs. 73f the hectolitre.

[N.B.—The 50 kilogs are about 1 cwt; the hectolitre about 22 gallons; and 25f equal £1.]

COMMERCIAL AND MISCELLANEOUS NEWS.

The Board of Trade have received from the Secretary of State for Foreign Affairs a copy of an Official Notification published in the *St Petersburg Journal*, relative to the increase of certain Harbour Dues at Cronstadt.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria cap. 32, for the week ending on Wednesday, the 12th day of July, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	41,111,160	Government debt	11,015,100
		Other securities	3,000,000
		Gold coin and bullion	26,115,160
		Silver bullion	—

Total.....	86,871,000	.....	120,650,000	.....	71,916,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, July 13th, 1871.

The total since the 4th of January, 1871, is 2,309,989,000*l*, compared with 2,089,465,000*l* for the corresponding period last year, showing an increase of 220,524,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week	July 17, 1861.	July 16, 1869.	July 14, 1869.	July 13, 1870.	July 12, 1871.
Circulation, including bank post bills.....	£ 21,097,360	£ 25,433,023	£ 24,420,176	£ 24,353,213	£ 25,811,779

Clearing-house return..	...	69,944,000	62,369,000	71,916,000	86,871,000

In 1861, there was a moderate demand in the money market, but the supply of money was scanty—the ease of the market being due to the contraction of business. President Lincoln had just sent to Congress an exceedingly warlike message, which rendered the prospect of a cotton panic more imminent.

In 1868, the 2 per cent. period after 1866 continued. A Swedish and Egyptian loan had been introduced—the former for 1,150,000*l*, and the latter for 11,890,000*l*—but the effect on the money market was only momentary. The Trades' Union Commissioners had just ascertained in their investigations that the depression in the London shipbuilding trade, and the transfer of the business from the Thames had been brought about by Trades' Unions.

In 1869, the Bank rate was reduced from 3½ to 3 per cent. Renewed activity in foreign bonds, which had been one of the chief causes of the recent advance in the rate, was being manifested. The domestic situation in France was becoming more and more alarming, in consequence of the Emperor's difficulties in making himself a mere constitutional sovereign.

In 1870, the Hohenzollern incident had resulted in the declaration of war by France against Germany. In consequence the panic on the Stock Exchange, which had commenced the previous week, was carried to an extreme, and there was a great decline in values. The first effect of this panic, by making it impossible to lend money on the Stock Exchange, was to cause a rather full supply in the general discount market, and the pressure which was felt the week after was not anticipated.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 6,216,332*l*; in 1868, an excess of 5,175,574*l*; in 1869, an excess of 4,245,966*l*; and in 1870, an excess of 298,600*l*. In 1871, there is an excess of 9,135,234*l*.

Discount and Money Market.—On Thursday the Bank of England reduced its minimum from 2½ to 2 per cent., the open market rate having previously gone a point below the latter figure. The move on the part of the Bank had thus been fully anticipated, and as the Bank account for the week shows a great addition to its previously superabundant resources, and the supply of money is accumulating in Lombard street, the fall to 2 per cent. was not to be avoided. To-day there has been a good demand for money both at the Bank and in the open market, chiefly in connection with the Stock Exchange settlement, though it is also noticed that the trade demand is good. Still the demand is not such as to make any impression on the rates in the face of the abundant supply.

The rate in the open market for the best short paper is 1¾ ⅝, and the rates for long-dated paper correspond. The joint stock banks and discount houses have reduced their allowances for money at call to 1 per cent., and at from 3 to 14 days' notice to 1¼ per cent.

In consequence of the heavy settlement on the Stock Exchange, the demand for money was very active; but there being a full supply, the rates charged were low. The rate for money at call on English Government securities is 1 per cent.

The changes in the Bank account for the week are—an increase of 421,783*l* in the bullion, a decrease of 5,011,266*l* in the public deposits, while the private deposits have increased 2,964,581*l*, and a decrease of 2,360,911*l* in the private securities. The changes are partly incidental to the payment of the dividends, which has added greatly to the accumulation in the money market. We observe from a telegram received to-day that the return of the Bank of France also shows an accumulation of means. Among the changes are an increase of 280,000*l* in the bullion, a diminution of the note circulation by 2,360,000*l*, and a diminution of the discounts by 2,400,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months.....	1⅞ ¾	per cent.
Do 4 months	2 ¼	per cent.
Do 6 —	2 ½	per cent.
Trade bills—2 and 3 months.....	2	per cent.
Do 4 months	2 ¼	per cent.
Do 6 —	2¾ 3	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call.....	1	per cent.
Discount houses at call	1	per cent.
Do with seven days' notice	1¼	per cent.
Do fourteen days'	1¼	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.		Open Market, per Cent. 1870.	1871.
Paris	2½	6*	.....	2½	...
Vienna	6	5	.....	6	5

	Bank Rate. Per cent. 1870.	1871.	Open Market. Per cent. 1870.	1871.
Berlin	6	4	...	3½

Amsterdam	3	3	3	3¼
Brussels	2½	4	2½	3½
Hamburg	...	...	...	3½
St Petersburg	6	6	7	6

* Nominal.

THE STOCK MARKETS.—The upward movement in all departments, which was in full progress when we last wrote, has not received any material check this week, and on all sides there is an important advance of prices to chronicle. This is especially the case in English railways, which are specially acted upon by the remarkable prosperity of the country, and in the leading foreign securities, including the principal foreign and colonial railways. Banks and miscellaneous shares have also greatly improved, a noticeable feature in the latter department being the great advance which has occurred in Asphalte Paving companies' shares, which have come greatly into favour in consequence of the successful experiments in Cheapside, Lombard street, and other City thoroughfares. Apart from the permanent causes of improvement to be found in the general prosperity of the country and the general abundance of money, the events of the week appear to have been in favour of an advance. The reduction of the Bank rate to 2 per cent. had a certain effect, as an official recognition that money was at its lowest point, and was not likely soon to rise in value. In the foreign market again the issue of the allotment letters of the French loan, giving from 45 to 50 per cent. of the amount applied for, furnished the best confirmation of the reports as to the amount of the applications, and the immediate result was a strengthening of the premium, which reacted upon other securities in this department. In English railways a similar effect was produced by the unexpectedly good dividend of the Brighton Company, which more than balanced the disappointment occasioned by the South-Eastern dividend. There was also a scarcity of stock for delivery at the fortnightly settlement, indicating a continuous absorption of every description of security by investors. This latter fact has been very conspicuous at the close of the account to-day, and the absorption, we believe, has been on an unusually large scale. The events stated are themselves mainly due to the general causes of improvement which support the markets, and make it inevitable that a still higher level of prices will be reached.

As might have been expected, the state of the markets and the cheapness of money are bringing out a host of new companies and applications for loans. Beyond a City of Paris loan for 16,000,000*l*, which is spoken of as imminent, there is no farther mention of any important foreign commitment.

Another feature which may find a place in this introductory notice is the real inquiry which is beginning to be made for the new Funding loan of the United States. With French 5 per cent. securities rising rapidly to par, and a glut of money in all the financial capitals of Europe, it is likely enough that the 5 per cent. loan of the United States may after all have a complete success, though the financial policy of the Government is far from skilful.

ENGLISH GOVERNMENT SECURITIES.—The closing price last week was 93¼ ⅛ for the August account, and ⅛ less for money, and notwithstanding the very considerable advance which this showed on the previous week, a higher price has since been touched. On Wednesday the closing price was 93⅜ ½, and although there was a fall from this high point on Thursday to 93⅛ ¼, the market to-day was again stronger, and the final quotation is 93⅜ ½.

The comparative weakness in the middle of the week appears to have been mainly due to realisations, and there is a strong speculative account for a farther rise. It is pointed out that even yet the price is not so good as at corresponding periods, when the rate of money was lower; but there is now more activity in other departments than at the periods with which comparison was made, while the competition of such stocks as debenture stocks, increasing rapidly in quantity and favour, is a new cause against former high prices being reached. But the plethora of money, on the other hand, has never been greater than it is.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	93¼	93⅜	93⅜	93⅜	5s to 10s pm
Monday	93⅜	93⅜	93⅜	93⅜	5s to 10s pm
Tuesday	93⅜	93⅜	93⅜	93⅜	5s to 10s pm
Wednesday	93⅜	93⅜	93⅜	93⅜	8s to 10s pm
Thursday	93⅜	93⅜	93⅜	93⅜	6s to 10s pm
Friday	93⅜	93⅜	93⅜	93⅜	7s to 12s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	93 5/16 ⅜	93⅜ ½	+ 1/16
Ditto (Aug.) account	93 5/16 ⅜	93⅜ ½	+ 1/16
Reduced 3 %	93 5/16 ⅜	93⅜ ½	+ 1/16
New 3 %	93 5/16 ⅜	93⅜ ½	+ 1/16
Bank Stock, last dividend 4½ %	235 7	237 9	+ 2
India Stock, 10½ %, red. at 250 Apl. 30, 1874	204 6 xd	204 6	... ...
Ditto 5 %, red. at par, July 5, 1880	110 ½	110½ ⅝	+ 1/16

EXCHEQUER BILLS.—7s to 12s prem.

COLONIAL GOVERNMENT SECURITIES.—The following shows the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	106 7 xd	106 7	... ...
Ditto 5 %	99½ 100½xd	100 1	+ ½
New Zealand 6 % Consolidated Bonds	99½ 100	100 ½	+ ½
New South Wales 5 % Bonds, 1888 to 1886	101½ 2½ xd	101½ 2½	... ...
Nova Scotia 6 % Bonds, 1875	100½ 1½ xd	100½ 1½	... ...
Queensland Government 6 % Bonds, 1884-5	107½ 8½ xd	107½ 8½	... ...
Victoria 6 %	111 12	111½ 12½	+ ½
Ditto New 5 %	103 4 xd	103 4	... ...

FOREIGN GOVERNMENT SECURITIES.—The rise in this department, as we have stated, has been continued this week, French securities receiving the largest amount of attention. The issue of the allotment letters on Thursday, to the extent of only 45 per cent. of the amount applied for, had an especially good effect, the premium closing on that day at 5⅞ ½, or ¾ higher than last Friday. The National Defence loan has also been largely dealt in, though until to-day the 3 per cent. Rentes, though firm, had not quite maintained the high prices reached last Friday. Generally in other departments, as well as in French securities, there has been an active demand, and Turkish, Egyptian, Brazilian, Peruvian, and Russian were all higher. Spanish were also strong early in the week, but were afterwards weaker, in consequence of the perversity of the Cortes respecting the financia measures of the Government. To-day, notwithstanding a great amount of attention given to the settlement, there has been a renewed upward movement, and the alterations for the week are important. The closing quotations and the new French loan is 5½ ⅜ pm. The rise in Turkish was especially marked to-day.

With regard to the various descriptions of French securities, it is observable that the three securities dealt in—the New loan, the National Defence loan, and Rentes—are by no means on a level as regards the annuity receivable by the investor for his investment. At present prices they would pay as follows :—

	Per Cent. to Investor.
3 per cent Rentes, at 56	5¼
New 5 per cent. loan, at 88	5¼
National Defence, 6 per cent., at 99	6 1/12

Thus, while Rentes pay 5¼ and New loan 5⅔ per cent., the National Defence loan pays a fraction more than 6 per cent. Of course the explanation is that there may be a capital rise in the two former cases, and this rise is discounted, while the National Defence loan, as it is repayable at par on six months' notice, can hardly go any higher. Still, for a certain class of investors, the latter loan offers some temptation. The relative difference of price between it and the other securities is a margin which secures the investor against a fall, so that he may thus get a 6 per cent. annuity, with the comparative certainty of obtaining his capital when required, and the chance of a bonus of 1 per cent., should the French Government, as it probably will do, give notice of the repayment of the loan.

With regard to the new Turkish loan, the *Levant Herald* of July 6 states :—

> A hope appears to have arisen that the difficulties connected with the guarantee of the new loan may be overcome so as to admit of the transaction being carried through in its integrity; but the position of the Ministry being one of rebellion in all but the name, it is not easy to understand what grounds there are to justify any such expectation; the state of the financial situation of the Khedive is really so desperate, that even his assent to the direct application of the unpledged portion of the tribute to the service of the loan in question cannot create that degree of confidence which attended his predecessor's recognition of the loan of 1864.

The correspondent of a contemporary complains of what appears to be rather an inexcusable act of sharp practice on

the part of the Turkish Government. The drawings for the 6 per Cent., 1865, loan, which should have taken place last November, did not take place till June this year; but the coupons on the bonds drawn due on the 1st inst. have been refused payment, on the ground that the bonds drawn should have been paid off in January. Thus bondholders, because faith was not kept with them at the time of drawing, are not even to get the interest on the bonds during the time they have been overdue. The Turkish Government may perhaps plead that the money has been waiting for the drawings, and that it was no fault of theirs the drawings did not take place; but unfortunately the Turkish Government took no steps at the time, as it ought to have done, to *deposit* the money for the benefit of the bondholders whose securities should be drawn. Even in the latter case it would be judicious to pay the interest, as the bondholder naturally expects his interest till the bond is paid off.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.

English Railways.—The improvement in this department has perhaps been greater than in any other. The contangoes at the settlement were particularly light, and as there was a scarcity of stock generally, the permanent causes of improvement were unchecked. Two dividends were announced in the middle of the week, the South-Eastern at 2⅝ per cent. per annum, and the Brighton at ¾ per cent., and though the former was considered somewhat disappointing the greatest effect was produced on the market by the Brighton announcement, which being considered highly favourable, gave a good tone to the prospects of the half-year. Brighton has accordingly advanced, and a corresponding, or even greater, improvement has been produced in Great Northern, Great Northern A, and Caledonian, the latter stocks being both susceptible of great improvements from comparatively slight additions to the net revenue. Most of the other lines however improved, including Great Western, London and North-Western, North-Eastern, and Great Eastern; and the principal exceptions to the general upward current have been South-Eastern, Chatham and Dover Preference, and Metropolitan District—the two former receding in sympathy upon the disappointing South-Eastern dividend, and the latter suffering a reaction after the speculation of the last few weeks, and on account of a smaller increase of traffic than was looked for on the opening of the Mansion House Station. To-day there has been a renewed improvement all round, owing to the unusual absorption of stock by investors, and the changes for the week are all but universally considerable and in the upward direction.

The traffic returns of the week are on the whole considered to be good, several of the companies comparing with a heavy week last year. July is by comparison a slack month, and August will furnish a better criterion as to the immediate prospects of an addition to the value of railway property.

There has been some movement to-day in the shares of the Sheffield Company, which advanced 1 per cent. in anticipation of the dividend, but subsequently relapsed, on a dividend of 1½ per cent. per annum being announced. The closing price is 55 ¼, or ⅝ higher than yesterday's.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
Caledonian	95½ ⅜		97⅞ 8⅜	+	2⅜
Great Eastern	40¾ 1		41⅛ ⅞	+	⅛

London and Brighton 4½ %	100 2 xd		102 4	+ ½
London, Chat., & Dover Arbitration 4½ %	94 6		94 6	... ...
Metropolitan District 6 %	123 5 xd		123 5	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending July 8 to 794,663*l*, being an increase of 38,827*l* on the corresponding week of last year. The principal increases are—North-Eastern, 7,216*l*; Midland, 5,819*l*; London and North-Western, 5,467*l*; and Lancashire and Yorkshire, 5,027*l*. This being the first week of a new half-year in most of the companies, we do not state any general aggregate. The South-Eastern has now commenced making up its accounts to June 30 and December 31, according to the general practice. The following shows the details of the increase or decrease in each case :—

RAILWAY TRAFFIC RETURNS.

American Securities.—Almost all descriptions of

American securities have been in good demand during the week, and prices show a general advance. The principal fluctuations have been in Erie shares, which advanced on Thursday upon a report that Mr Fisk had been shot in the Orange riots at New York, but relapsed again to-day on contradiction of the reports as to Mr Fisk's death. During the week some inquiry has been made for the New Funded loan, which has been quoted at 89½ to 90½.

The following are the changes for the week in this department :—

	Closing Prices last Fri. day.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5-20 Bonds, exchange 4/6	92 ¼	92¾ ¼	+ ¼

Pennsylvania Central Mortgage 6 % Bonds, 1877	81 ¾	81 ¾	... ...
Pennsylvania Gen. Mort. 6 % Bonds, 1910	93½ ¼ xd	93½ ¼	... ...
Virginia 6 % Bonds	54½ ¼	54½ 5/8	+ ⅛

Subscriptions are invited by Messrs Lippmann, Rosenthal, and Co., of Amsterdam, and by Messrs Robert Benson and Co., of London, for 15,000,000 dols United States currency, or 3,000,000*l* sterling, 7 per Cent. First Mortgage Extension Bonds of the First Division of the Saint Paul and Pacific Railroad Company. The "First Division," being already the owner of two lines of railway through fertile parts of the State of Minnesota, is authorised to construct two extensions, one of 293 miles, to cross the Northern Pacific Railroad and terminate in Pembina County, on the Red River and on the British frontier, and the other of 35 miles, to make a junction with the Northern Pacific at Brainard, to which the latter company has already constructed a line from Duluth on Lake Superior, which will become an outlet for the produce to be carried over the present extensions. It is pointed out in the prospectus that the cultivated area of the State of Minnesota has increased from 1,000 acres in 1850 to 1,387,470 in 1868, and the population from 5,354 in 1850 to 470,000 in 1870. As an additional security, land lying along the extensions, amounting to about 2,227,000 acres, and comprising "some of what is known as being the best land in the State," are mortgaged to the bondholders, and it is stated that the average price of the lands sold last year by the company was 7.68 dols per acre, at which price the lands mortgaged for the present bonds would yield upwards of 17,000,000 dols. As the lands are sold the bonds are to be paid off; and the bonds or coupons of the present issue may also be used at par in payment for lands in the State. The price of issue is 145*l* sterling for each 1,000 dols bond—that is, at the fixed exchange of 4s per dollar, and the interest will be payable, free of United States Federal taxes, either in United States currency at New York, or in London in sterling at the same rate of exchange. Allowing for discount on prepayment the bonds are estimated to return about 9½ per cent. to the investors. The quotation to-day is ½ to 1¼ prem.

Messrs Benson and Co. have, previous to and during the year 1869, issued the bonds of the St Paul and Pacific Railroad (of which the First Division is now a branch) which something to a telegram received last evening is now completed.

Joint Stock Banks.—Owing to the generally favourable feeling in the tone of the market has ruled steady, and a further improvement has taken place in prices. Egypt and British North American have advanced 2. Land Mortgage of India Five per Cent Debentures 1; Anglo-Austrian, Bermuda, Chartered Mercantile of India, ½; Agra A. and London and South-Western, ½. London and County shares have given way ½.

The report of the directors of the Imperial Bank states that the balance of profit for last half-year is 50,724*l*, making for the year, after deducting working expenses and rebate on bills not due 18,792*l*. Out of this the directors propose a dividend of 6 per cent. per annum, free of income tax, absorbing 14,400*l*, and leaving a balance of 4,392*l* to be carried over. The deposits of the bank are now 2,254,037*l*.

Telegraphs.—There has been an active inquiry for telegraph shares, and the market closed to-day with renewed firmness, especially for Anglo-American and Anglo-Mediterranean, which show a rise of 1½ and 1¼ respectively. Falmouth and Gibraltar have advanced 1½; Marseilles and Algiers, 1½; British Australian, British India Submarine, China Submarine, ½; Panama and French Cables, ¼, and British India Extension, ⅛. Telegraph Construction shares have risen 3; India-rubber Works 1; and Hooper's Telegraph ¼ on the week.

Telegraphic Receipts.—The British-Indian Extension Telegraph Company for the month of June received 5,098*l*; the China Submarine Telegraph Company, for the 23 days ending the 30th of June, amounted to 3,438*l*; and the Great Northern Telegraph Company received for the month of June 108,020f (4,321*l*), against 96,900f (3,876*l*) for June, 1870, making the total receipts of the Great Northern Telegraph for the half-year 575,479f (23,019*l*), against 444,488f (17,779*l*) in the same half in 1870.

Mines.—The market for British mines has remained firm, though not much activity has been apparent. A nominal advance of 30 has taken place in South Caradon, and of 5 in Wheal Bassett. Asheton have risen 1¾; Great Wheal Vor, 2; South Condurrow, 1¼; Wheal Mary Ann, 1. North Roskear have farther given way 5. The most important movements in the foreign markets are a rise of 4 (ex div.) in Eberhardts; 1 in Cape Copper; and a decline of ½ in St John del Rey.

The quotations of the shares of the North American Gold Mining Company is ¼ to ½ prem. The directors have received a favourable telegram from the gentleman selected to examine the property.

A prospectus is issued of the Whitehaven Iron Mines, Limited. Capital, 95,000*l*, in 9,500 10*l* shares. The object is to develop two extensive Hematite Iron Ore Royalties in Cumberland. The area is stated to be upwards of 6,000 acres, and to contain "veins of the rich red kidney and Whitehaven iron ores." At present prices the anticipated output of the mines is estimated to yield from 70,000*l* to 100,000*l* a year.

Miscellaneous.—The changes in the quotations for miscellaneous companies have not been numerous, but are generally of a favourable character. The dealings to-day were not extensive. British Indian Tea have risen ½; East Indian Land Credit, Peel River Land and Mineral, Peninsular and Oriental, and Royal Mail Steam, 1; National Discount and North Metropolitan Tramways, ¼; Madras Irrigation stock has given way ¼.

The prospectuses are issued this evening of the following tramway companies :—

(1) The General Tramways Company. Capital, 1,000,000*l*, in 50,000 shares of 20*l* each; present issue, one-half the shares. The object is "the purchase and acquisition of privileges and concessions for tramways in populous towns of the United Kingdom and on the continent, for undertaking the construction, working, and maintenance of such tramways, and for disposing of the same from time to time." The directors have already acquired Parliamentary powers for the following tramways :—From Birmingham to Handsworth, West Bromwich and Tipton, Aston Park, Moseley road and King's Heath. Negotiations are in progress for other Birmingham tramways, and also for tramways in Lisbon and Saragossa, Florence, and other places not mentioned.

(2) The Dublin Tramways Company. Capital, 240,000*l*, in 24,000 10*l* shares. The object is to work tramways in Dublin and suburbs. Contracts for 17 miles of double line are stated to have been entered into with Messrs Fisher and Parrish, at a price considerably within the authorised capital.

(3) The Foynes, Limerick, and Tralee Tramway Company (Limerick and North Kerry Tramways). Capital, 50,000*l*, in 10,000 5*l* shares. It is proposed to construct the tramway through the district of North Kerry and West Limerick, between Foynes and Listowel, on the side of the road, commencing at Foynes, which is the terminus of the Limerick and Foynes Railway; and the Bill now before Parliament will authorise the use of steam locomotion. Statistics are given in the prospectus of the business of the district.

A prospectus is issued of the Brazilian Sugar Refinery Company—capital 500,000*l*, in 10,000 5*l* shares, comprising 5,000 preference shares now offered for subscription, 600 already appropriated, and 4,000 ordinary shares. The company is formed to construct and work a Refinery and Rum Distillery at Assuaja, the chief port and capital of the province of Sergipe in Brazil. A yearly profit of 24,415*l* is anticipated, and the Government of Sergipe guarantee 10 per cent. upon a capital of 200,000*l*, out of which it is proposed to pay 7 per cent. to the present preference shares.

In the new undertakings, Val de Travers Asphalte shares have again been in strong demand, and close at 28½ to 29. Anglo-Austrian Bituminous Paving shares are quoted 1½ to 2

premium. Anglo-Hungarian Bituminous shares 4 to ½ premium, Anglo-German Bituminous shares 2¼ to ¾ premium, and Neufchatel Bituminous shares 21 to 22. Submarine Cable Trust shares remain steady at ½ discount to ½ premium, Hungarian Land Credit shares ⅞ to 1⅛ premium, Edinburgh Tramway shares ¾ to 1 premium, Lisbon Steam Tramways 1½ to 2 premium, and Mexican Railway debentures 3 to 2 discount.

EXCHANGES.—Bills upon Amsterdam, Rotterdam, Antwerp, and Hamburg have been rather more in demand this week.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—There is no export demand for gold, the Bank having purchased, since our last circular, about 521,000*l*; while 20,000 sovereigns have been withdrawn. We have received this week about 640,000*l* from New York. The shipments are—20,000 sovereigns, per Sweden, for Cape of Good Hope; 5,932*l*, per Douro, for Brazil; 20,000*l* in sovereigns and in bars, per Pera, for Ceylon and Madras. The Australian steamer has reached Galle with 615,500*l* in gold; this will be due here in about a month.

Silver.—The silver market has been quiet within the last few days. We quote the price 60 1/16d per oz standard. About 100,000*l* has come to hand this week, chiefly from New York. We have no shipments to report.

Mexican dollars maintain their price. About 275,000*l* has arrived, chiefly from New York; these have realised the rates recently current, viz., 58⅞d for the new coinage, and 60¼d for the old. The Peninsular and Oriental steamer Pera, on the 8th instant, took 15,170*l* for Penang, 23,500*l* for Singapore, 34,850*l* for Hong Kong, and 1,650*l* for Shanghai.

Exchange on India for Banks' drafts, at 60 days' sight is 1s 10⅞d to 1s 10⅞d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 8¾d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0 1/16d per oz std; ditto containing 5 grains gold, 5s 0⅛d to 5s 1d per oz std, last price; Mexican dollars, 4s 10⅝d to 5s 0⅛d per oz, last price.

According to the *Gazette* return the import of the precious metals during the week ended July 12, were:—Gold, 628,557*l*; silver, 95,797*l*. The exports were:—Gold, 232,678*l*; silver, 255,495*l*.

The sum of 144,000*l* in bar gold was sent into the Bank; 9,000*l* in sovereigns were received from Paris, 4,000*l* in sovereigns were sent to Portugal, and 5,000*l* to India.

South-Eastern Railway, general, City Terminus Hotel.
Alliance Bank, general, City Terminus Hotel.
Ceylon, general, Palmerston buildings.
Metropolitan Bank, general, London Tavern.

FRIDAY, July 21.
African Steam Ship, special, 14 Leadenhall street.
Peel River, Land, &c., general, 4 Moorgate street buildings.

SETTLING DAYS.
Ticket Days—July 27th, August 15th and 30th.
Account Days—July 28th, August 16th and 31st.

NOTICES AND REPORTS.

STOCKS.

Greek Guaranteed Loan.—The numbers of 556 bonds of the English guarantee, and of 564 bonds of the Russian guarantee, have been published by Messrs Rothschild Brothers, Paris, for redemption.

RAILWAY COMPANIES.

Dutch-Rhenish. — The revenue receipts for the year ended 30th April were 400,093*l*, showing an increase of 37,945*l*. The working expenses for the year amounted to 155,686*l*, or 38·91 per cent., against 131,591*l*, or 36·33 per cent., showing an increase of 24,095*l*. The net profit applicable for dividend amounted to 188,284*l*, or 10,680*l* less than the previous year. A provisional dividend of 14s 5d per 20*l* share was distributed in January last, and it is the intention of the direction, after making the deductions prescribed by the statutes, to recommend a further payment of 14s 11d per 20*l* share, and 5s 11d per share on which 8*l* per share had been paid from the 1st of November, making the total dividend for the year at the rate of 7*l* 6s 8d per cent.

East and West Junction Railway—Issue of 5 per cent. First Debenture Stock.—A sum of 318,500*l*, the balance of 400,000*l* Perpetual First Debenture stock, has been offered at the price of 83½ per cent., at which price the return to the subscriber is exactly 6 per cent. Interest is payable on the 1st January and 1st July, at Messrs Smith, Payne, and Smiths, and three year's interest is invested in Consols. The East and West Junction line will be 33¼ miles long (about seven miles being now in operation) extending from Towcester, near Blisworth, on the North-Western, to Stratford-on-Avon, on the Great Western. As an important East and West route, a large through traffic is looked for upon completion next year, especially in the conveyance of Northamptonshire iron ore to South Wales.

Illinois Central.—A cash dividend, free of tax, of 5 per cent., is payable on the 1st August.

London, Brighton, and South Coast.—A dividend at the rate of ¾ per cent. per annum has been announced; surplus, 2,000*l*.

South Austrian, Lombardo-Venetian, &c.—It is stated that the forthcoming dividend will be 7f 50c per share.

South-Eastern.—The directors have notified a distribution at the rate of 2⅛ per cent. per annum.

St Paul and Pacific—(First division).—Issue of debenture bonds for 3,000,000*l*.—See *Money Article*.

BANKS.

Alliance.—Dividend recommended at the rate of 5 per cent. per annum.

Bank of New Zealand.—At the half-yearly on the 26th of April the report showed an available total of 82,389*l* (including 30,000*l* premium on the issue of new shares, and a previous balance of 7,745*l*), and recommended the appropriation of 30,000*l* to reserve fund, 30,000*l* as a dividend at the rate of 10 per cent. per annum, and 15,000*l* as a bonus of 5s per share, leaving 7,389*l* as surplus.

Consolidated.—The half-yearly report recommends a dividend at the rate of 5 per cent. per annum, which will absorb 20,000*l*, and leave 3,659*l* to be carried forward. An exceptional loss has been provided for, or a larger distribution would have been practicable. At the corresponding date of last year the dividend was at the rate of 6¼ per cent. per annum.

Imperial.—See *Money Article*.

Joint Stock Bank, Halifax.—The directors recommend an interim dividend and bonus of 15s per share (free from income tax), being 7½ per cent., for last half-year.

Metropolitan.—Dividend at the rate of 5 per cent. is recommended, leaving 2,270*l* 4s 2d to be carried forward.

Midland.—The report recommends an interim dividend at the rate of 6 per cent. per annum, the same as at the corresponding date of last year, which will absorb 4,813*l*, and leave 5,142*l* to be carried forward.

[CONTINUED FROM PAGE 848.]

Union of Australia.—A dividend at the rate of 13 per cent. per annum has been resolved upon.

Union Bank of London.—At the half-yearly meeting the net profits were stated at 121,280*l*, making, with 30,125*l* brought forward, a total of 151,405*l*. A dividend at the rate of 15 per cent per annum, and a bonus of 2½ per cent., were declared for the half-year, clear of income tax, leaving 31,405*l* to be carried forward. Current and deposit accounts 12,715,453*l* and acceptances 3,142,145*l*. Cash in hand and at call 5,110,847*l*; and discounts 9,528,068*l*.

FINANCE, CREDIT, AND DISCOUNT COMPANIES

Credit Foncier of England.—A dividend at the rate of 8 per cent. per annum for the half-year is announced.

English and Foreign Credit.—Half-year's gross profits 6,885*l*, including 415*l* brought forward. Dividend 5s 6d per share.

General Credit and Discount.—The usual interim dividend at the rate of 5 per cent. is recommended. The business continues to increase.

National Discount.—Including 2,136 from the previous half-year the available surplus is 73,117*l*. After payment of a dividend at the rate of 18 per cent. per annum, a balance of 1,648*l* remains. The deposits have increased to 9,570,646*l*.

United Discount Corporation.—At the half-yearly meeting a dividend at the rate of 8½ per cent. per annum was declared. 6,000*l* was carried to reserve, and 3,420 was carried forward.

ASSURANCE COMPANIES.

Colliery Insurance, Limited.—Capital, £1,000,000, in £10 shares. First issue 50,000 shares, of which it is intended to call up only £2 per share. It is intended to apply the principle of insurance to colliery property, and the value of such property will, it is expected be considerably raised in consequence. The prospectus states—

VALUE FOR THE OPERATIONS OF THE COMPANY.

The property in Britain [illegible] is valued at one thousand and sixty millions, and is [illegible] necessary to the national wealth, more [illegible] existing.

There are upwards of three thousand collieries, and on an average [illegible] annually.

The persons employed in the British collieries number more than [illegible] of whom upwards of one thousand perish annually [illegible] accidents in the pits.

The [illegible] property in British coal mines nor the lives of [illegible] workers are at present protected under any system of insurance.

Copper and Mining Mutual Insurance.—The directors recommend a 5s 6d final and bonus of 5s per share, making with 10s per share in January a dividend of 25 per cent. per annum for the year ended 30th June.

Union Mutual Insurance.—It is proposed to reduce the nominal capital from 50 to 20 per share.

MISCELLANEOUS COMPANIES.

Anglo-German Submarine Rock Planing, Limited.—Capital, [illegible] in 1*l* shares, of which 5,000 shares are given to the Submarine Engineering Rock Company for the monopoly. This new undertaking acquires the exclusive right of supplying the German Empire with Val de Travers asphalte.

Consolidated Argentine.—The directors will recommend a dividend of 1*l* 2*s* 6*d* per share at the annual meeting making, with the 10*s* 6*d* paid in February last, 2*l* 3*s* per share, against 1*l* per share for the preceding year.

Dental Hygienic.—An interim dividend at the rate of 5 per cent. per annum has been declared.

East London Tramway, Limited.—Capital, 20,000*l*, in 5*l* shares. An eligible site of 43 acres has been obtained near Plaistow station, and has been approved by the Government inspectors. It is calculated that the undertaking will prove a profitable one.

Estate Company.—Interim dividend 5 per cent. per annum.

Fore-street Warehouse.—The report recommends a payment of 20s per share, consisting of a dividend at the rate of 12½ per cent. per annum, which will absorb 25,000*l*, and a bonus of 5s 6d per share, [illegible] the rate of 2½ per cent. per annum, which will absorb 5,500*l*, and leave, after an appropriation of [illegible] to reserve, [illegible] raised to 20,000*l*, the sum of 14,282*l* to be carried forward.

Hudson's Bay.—The directors' report was adopted by 11,846 votes.

Lion Brewery.—Dividend declared at the rate of 10 per cent. per annum.

London and St Katharine Docks.—A dividend of 1½ per cent. for the half-year, free of income-tax, is recommended; surplus, 10,000*l*.

Peat and Peat Charcoal, Limited.—Capital, 20,000*l*, in 5*l* shares. Object—to purchase the lease of peat works on the estate of Flixton, Down, in the county of Glamorgan, and to manufacture peat charcoal and [illegible] patented processes.

United Service, Limited.—Mr Whinney, the official liquidator, is paying to the creditors a first dividend of 15*s* in the pound.

Worcester Brewery.—Dividend declared at the rate of 4 per cent. per annum.

Wild and Williams' Brewery, Limited.—Mr C. F. Kemp has been appointed official liquidator.

MINING COMPANIES.

Credit Lyonnais.—A further half-yearly dividend of 2½ per cent. for the year 1870 is recommended.

Eberhardt and Aurora.—Dividend declared of 1*l* per share.

General Brazilian.—At the meeting the directors were authorised to issue 50,000 preference shares of 1*l* each, bearing interest out of profits at the rate of 15 per cent. per annum.

Malpaso Gold Washing, Limited.—This company has been formed, with a capital of 30,000*l* in shares of 1*l* each, for the purpose of washing by the hydraulic process, as used in California, a large deposit of auriferous gravel situated in New Granada, and within 12 miles of a shipping port.

North American Gold Mining Company.—The following telegram has been received by the directors from Dr Henry Degroot, who was selected to examine the property:—"Morgan's report substantially correct. Property unexceptionable. Past yield certain 302,080 dols; prospective yield, 650,000 dols annually. Net profit half yield will continue 30 years. Labour now 3 dols per day." Mr George Penson, Westbourne terrace, Hyde park, it is stated, has joined the board. The share list will close on Tuesday next for London, and on Wednesday for the country at ¼ to ½ prem.

Peel River Land and Mineral Company.—The directors recommend an interim dividend of 1 per cent. free of income tax. They anticipate that, notwithstanding the improved prospects of the wool market, the profits will be less in the current than in the preceding year.

Pioneer Silver-Lead and Blende Mining, Limited.—The company is to go into voluntary liquidation, with Mr F. F. Buffen as liquidator.

Pont-Gibaud Silver Lead.—At the annual meeting, held at Paris on the 8th inst., the dividend for the year 1869-70 was fixed at 45 francs per share. The sum of 15 francs was paid on account in June, 1870, and the balance of 30 francs will now be distributed.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade at Mark lane to-day was dull and inanimate. The warmer weather has caused a great improvement in the appearance of the growing crops, and business has been much restricted in consequence. Prices of both English and foreign wheat showed a reduction of 1s per quarter as compared with Friday last, though English produce was somewhat firmly held, in consequence of the shortness of the supplies on offer. Flour ruled dull, in sympathy with the wheat market, and the general tendency of the quotations was downwards. Maize and oats were in plentiful supply, and sales could only be effected at a reduction of 1s per quarter. Barley, beans, and peas were nominally unaltered in value in the absence of important business. This week's imports of foreign and colonial produce into London have amounted to 59,180 quarters of wheat, 2,950 barley, 48,950 oats, 1,950 beans, 21,990 maize, 5,630 sacks and 10,090 barrels of flour.

At Liverpool and Wakfield, this morning, the wheat trade ruled dull, and prices were 1s per quarter lower on the week.

The Liverpool cotton market opened with a very active demand, which continued until Tuesday, when an advance of fully ⅛d per lb was established. On Wednesday the tone was considerably quieter, and the greater part of the advance has since been lost.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended July 13, 1871:—

	Imported.		Exported.
American bales	13,460	.....	4,080
Brazilian	14,465	.....	815
East Indian	4,427	.....	7,995
Egyptian	1,780	.....	322
Miscellaneous	2,847	.....	193
Total	36,979	.....	14,005

At New York, on July 13, middling Upland cotton was quoted at 20⅞ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, June 13:—During the week dealers have been busily engaged in placing their cotton in godowns, and the green is now entirely cleared of stocks. This occupation, however, has not interfered much with business, a very fair number of transactions having taken place from day to day. Home accounts have been very cheering since date of our last report, and the apparent strength of Liverpool has imparted an increased degree of confidence to holders of stocks in this market. Our latest telegram from Liverpool to hand yesterday is dated 10th instant, and quotes 6½d and 6¾d per lb for spot and May-June shipment Dhollerah respectively, and prices here have in sympathy moved upward about on an average 12 rs per candy. At the advance several European houses have been operating freely, doubtless to cover in sales made at home, as the transactions show a loss when compared with latest quotations received from Liverpool. Speculation in time-bargains has not been much resorted to in the bazaar during the present season, but the continuous favourable news from home has revived the evil, and already we hear of large contracts in Dhollerah having been entered into for closing date 1st proximo at 215 rs per candy. The effect of such gambling (if continued) upon this market, already unduly inflated, will be to force rates much beyond their legitimate levels, and render business during the monsoon impossible. The week's transactions sum up to a total of 7,900 candies, of which Dhollerah, Ahmedabad, and Veerumgaum grades form the bulk. From Tinnevelly we have a telegram dated 12th instant, quoting 115 rs per candy.

Export of Cotton from Bombay to June 12.

Grand total	723,282	.....	735,501

Actual exports since last mail left, 72,475 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, July 1:—A slightly-improving cotton market during the week, without much business, owing to reduced stocks and little or no selection. News of yesterday's date announcing a deficiency of 136,000 bales in Liverpool stock has again excited buyers, and contracts for November delivery have advanced, and are now equal to about 10¼d to 10⅜d, f.o.b. We quote:—Fair, with staple, 8⅝d to 9d per lb, f.o.b.; good fair, with staple, 9¼d to 9⅜d, ditto. Shipments from June 23 to June 29:—To England, 1,970 bales; to Italy, 40; to Austria, 34—total, 2,044 bales.

The following report, dated June 10, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—During the fortnight just elapsed the weather has been continually unsettled, with frequent heavy squalls from the westward, suspending all shipping operations for successive days. The clearances outwards have consequently been few, and, as will be seen, the exports of coffee have at length fallen considerably below those at the corresponding period of last year. Their distribution is as under:—

Plantation Coffee.

	1871.		1870.
	cwts.		cwts.
To Great Britain	624,849	.....	679,010

	675,250	.....	726,736

Native Coffee.

	1871.		1870.
	cwts.		cwts.
To Great Britain	78,950	.....	59,249
Foreign ports	22,564	.....	38,068
Australia and India	3,243	.....	2,137
	104,757	.....	99,454

The business in parchment coffee has been confined to a few crops from Badulla and Happotella, transactions in which have gone rather in favour of buyers; owing to unfavourable weather, very little of this has been prepared for shipment. Parcels of native Ouvah coffee find their way in slowly, and have changed hands at our previous quotations.

The colonial produce markets have ruled dull during the week, and the general tendency of the quotations has been downwards. Stocks of sugar have increased, and are now only about 25,000 tons, less than at the corresponding period last year. The market has consequently been inactive, and prices have given way. Large supplies of coffee have been offered at auction, and as the additional duty has checked the exports to France, holders have had to submit to a decline of 1s to 2s per cwt. Rice has changed hands to a fair extent on former terms. Cocoa is without alteration in value.

Messrs Southey, Balme, and Co., observe:—The advance in the value of wool established during the first week of the series has been firmly maintained to the present date, and the circumstances which have caused this improvement appear to be of such a nature as to warrant the expectation of its maintenance, at all events during the remainder of the present wool season. The demand from America continues on a considerable scale, and has again mainly contributed to the very extreme quotations made for greasy wool; this is explained by the falling off which has taken place in the American production consequent on the low prices prevailing there, as elsewhere, during the last few years, which have caused a diversion among farmers to more profitable sources of investment of their capital. A deficiency in the home clip, which is variously estimated under the average yield of previous years, the prospect of a more moderate increase in the colonial production than had been generally looked for, and the improving condition of trade, are other important elements, all contributing to strengthen the position of the wool market. We now quote an advance on the closing rates of May, in greasy Australian and New Zealand of all kinds 2d to 2½d per lb; middle and low class fleeces, 2d; scoured wools, 2½d; in Capes there is an improvement in grease wools, 1½d to 2d; fleeces, especially bold, fully-stapled kinds, 1½d to 2d; snow-whites, from 1s 6d to 1s 9d; and scoured wools 1d. In the higher classes and fine wools of Australian production, as well as in the best description of snow-whites, the advance in value has been comparatively slight, in many instances hardly exceeding ½d per lb. The arrivals for the fourth series of the year, which will probably be held in the early part of September, amount to date to 10,017 bales Sydney, 10,773 Port Phillip, 5,140 Adelaide, 133 Swan River, 16,316 New Zealand, 10 Cape —total, 42,386 bales.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on May 30, observe:—During the past month the wool trade has had to contend with many adverse circumstances, among which may be mentioned the placing of three consecutive mail steamers in quarantine, and the loss of the steamer Gambia, all of which has deprived us of tonnage for 9,000 to 10,000 bales, and has caused a great advance in rates by sailing vessels. There is also great tightness in the money market. The amount absorbed by the country, whether for the Diamond Fields or for general purposes, has been much greater than was expected, and the specie balances at the banks have run very low, and prevent their giving the necessary accommodation to shippers. The rate of exchange has also been a great check to business. Although the season is now well on, there is not the rush that there generally is at this time of the year. Wagons have become very scarce, and transport has advanced at least 50 per cent. Such is the scarcity of the means of transport, that we doubt if the present season's wool will all be down before the new season commences in October. For Uitenhage scoured wools there is a good inquiry at fully former rates. The stock of superior, however, is very limited, owing to the American demand for good grease wools. Of country scoured the arrivals have been moderate, prices remaining about the same as last quoted. Considerable transactions have taken place in fleece-washed wools; but as the bulk of late arrivals have been of that description, stocks are accumulating. The favourable advices from England have had the effect of keeping prices of washed wools steady, in the face of high freights and discounts and scarcity of money. In good grease wool the American buyers still sweep the market, taking every bale directly it comes in. A larger quantity will be shipped this year for America than has been the case since 1864. At one time during the month there were ten vessels on the berth loading for the States and Canada. There is no change to report in wools suitable for washing.

Annexed is Messrs Wm. Moran and Co.'s indigo report, dated Calcutta, June 9:—The crop advices received during the past week do not show any important change in the prospects of the season. In Eastern Bengal there has been too much rain, and the yield from the plant has again fallen off. We have not yet seen any returns from the factories that have commenced "mahar" in Bhagulpore, but we hear that the produce is as good as it usually is at the commencement of manufacture. In Kishnaghur matters still promise well. Jessore is in want of a few hot sunny days after the late rain. The advices from Maldah and Moorshedabad, and Purneah are mostly good, but there are some complaints of the rain having been partial, and part of the cultivation still stands in need of a good fall. The same remark may be applied to Tirhoot and Chumparun; from Chuprah the reports are very favourable. There is nothing new to report from the Benares provinces or the Doab. Exports of indigo from Nov. 1, 1870, to June 8, 1871:—To Great Britain, 10,667 chests, France, 513, Trieste, 2,700, Foreign Europe, 250, America, 2,448, Gulfs and Levant, 1,764—total, 24,402 chests.

The annexed is dated New York, June 28:—The plethora of currency, and low rates of interest for the same, have been the conspicuous features of the money market for many weeks, and all the indications point to continued monetary ease

during the summer and autumn months, unless the market shall be subjected to other influences than the natural laws of trade. General trade is quiet, as usual at this period. There is a moderate export movement, but domestic trade is extremely slow. There is rather more inquiry for currency, thus enabling banks and private lenders to obtain employment for their balances, either in loans on collateral security, or in discounts of notes and acceptances. The supply is so large, however, that rates do not vary. On call, 3 to 4 per cent; discount, 5 to 7 per cent. Gold is higher, under a light supply and good demand for duties and the purchase of exchange, which is also higher.

THE COTTON TRADE.

LIVERPOOL.—July 13.

The cotton market was strong in the early part of the week, and on Monday became animated at advanced prices. On Tuesday the demand was less extensive, and a quiet tone has since prevailed, with some giving way in prices, but quotations generally are rather higher than those of Thursday last. The Bank rate has this day been reduced to 2 per cent. For Sea Island there continues a good demand, and full prices have been paid for all grades. In American the business has been considerable, and after an advance of nearly ¼d per lb, prices have receded, and are now about $\frac{1}{16}$d above last week's rates. New York advices to the 13th instant quote middling Upland, 20¾ cents, costing to sell in Liverpool, 10⅝d per lb, by steamer. In Brazil an extensive business was transacted during the early part of the week, the greater part on speculation, at fully ¼d per lb advance, but prices are now only ⅛d to ¼d per lb above the quotations of last Thursday. Egyptian has been in good demand, and the current qualities are ⅛d to ¼d higher. For East Indian there has only been a limited inquiry, but owing to the smallness of the supply, prices of the better sorts have advanced ⅛d to ¼d per lb. Bengal and Scinde are unchanged, and the lower descriptions, particularly of the old crop, are very unsaleable.

In cotton "to arrive" the transactions were extensive in the early part of the week, at advanced rates; on Monday the prices were—American, basis of middling, not below good ordinary, bales, September delivery 9⅛d; Orleans September delivery 9⅛d; Dhollerah, fair new merchants, Cape, May-June shipment 7⅞d; ship named 7⅞d; Oomrawuttee, fair new merchants, Cape, May shipment $7\frac{1}{16}$d per lb. Prices have since given way, and the latest quotations are—American, basis of middling, delivery, Savannah, not below low middling, August-September 9d; bales, not below good ordinary, September, 9⅛d; not below barely middling, August, 9⅛d; new crop, per steamer from New York, October shipment, 9⅛d; September-October, 9⅛d; Bahia, basis of fair, ship named, 8⅞d; Maceio, fair, mutual allowances, actual tare, at sea, 8⅞d; Hinguughat, good fair new merchants, Cape, at sea, 8⅛d; Broach, Cape, machine ginned, good fair, May sailing, 8⅛d, 8⅛d; April, 8⅛d; ship named, $8\frac{3}{16}$d; fully fair, May-June, 8d; Dhollerah, fair new merchants, Cape, ship named, $7\frac{7}{16}$d; May sailing, $7\frac{7}{16}$d, 7⅛d; May-June shipment, $7\frac{7}{16}$d; June sailing, 7⅛d; Cape or Canal, May-June shipment, 7⅛d; Cape, fully fair, sailed, 7⅛d; Oomrawuttee, fair new merchants, May-June shipment, Canal, 7⅛d; Cape, 7⅛d; Bengal, fair new merchants, July-August shipment, 6⅞d per lb.

The sales of the week, including forwarded, amount to 126,980 bales, of which 38,250 are on speculation, and 7,770 declared for export, leaving 80,960 bales to the trade.

The actual export is not deducted from the stock this week, as it was not included in the stock declared on the 30th ultimo.

July 14.—The sales to-day will probably amount to about 15,000 bales, with a strong market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	721,786
An increase of quantity taken for consumption of	415,780
An increase of actual exports of	298,620
An increase of stock of	68,030

In speculation there is an increase of 157,090 bales. The imports this week have amounted to 25,412 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to July 7) is 93,000 bales, against 70,000 bales last year. The actual exports have been 9,787 bales.

The following is a return showing the number of bales of cotton imported, exported, and forwarded inland for consumption during the month of June, 1871, and also showing the stock on hand on the 29th day of June, 1871, and the total imports and exports of cotton during the first six months of the year:—

LONDON.—July 13.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market opened with extreme activity, both for spot and arrival cotton, and an advance of ⅛d to ¼d per lb was obtainable, but since Tuesday it has relapsed into a quiet state, and quotations at the close show but little change from those of last Thursday.

Sales to arrive—3,000 bales Tinnevelly, at 7⅛d to 7⅞d, March to May sailing to June-July shipment, for good fair; 4,500 bales Western Madras, at 6⅞d to 6⅞d, May-June, for fair old; 7d to 7⅛d, May to July-August shipment, for fair new; 500 bales Coconada, at 7d to 7⅛d, June-July shipment to March sailing, for fair red; 150 Broach, at 7⅞d, May sailing, for fully fair; 8d for good fair; 900 bales machine-ginned Broach, at 8⅛d to 8⅛d, April-May, for fully fair, 8⅛d for good fair; 2,700 bales Dhollerah, at 7⅛d to 7⅞d, April to July shipment, for fair; 7⅞d, June sailing, for good fair; 3,800 bales Oomrawuttee, at 7⅞d to 7⅞d, March-April sailing to June-July shipment, for fair; 200 bales Comptah, at 7d to 7⅛d, May-June shipment and ship named, for fair; 9,500 bales Bengal, at 6⅛d to $6\frac{7}{16}$d, February to May sailing and June to August shipment, for fair; 1,050 bales Rangoon, at 6⅛d to $6\frac{7}{16}$d, April-May sailing, for fair—total, 2,630 bales.

NEW YORK.—JUNE 28.

The market for cotton on the spot was dull, and prices generally were quoted a shade lower. It is difficult to ascribe any good reason for the change, for spinners are still in the market to a moderate extent, notwithstanding the fact that they are already consuming full stocks, and from the shorts there is some call for spots, to apply on expiring contracts. Holders do not accept the decline with willingness, and in very many instances refuse to acknowledge it, asserting that they are full higher rates than are quoted. The general supply on the market is small and is confined to the lower grades, such as are suited to the uses of American spinners. We quote as follows:—

	Upland and Alabama.	Orleans.	New Orleans.	Texas.

Fair	...	...	...	...

The transport market was moderately business doing, but prices were nearly irregular. For July the market was fairly steady, but for the latter months a decline of about ¼ was established. The shipments generally were fair, but the receipts continued to fall considerably below July, which is somewhat with large inland firms is unsatisfactory, and of course [illegible] Total receipts at New York since September 1, 1870, 2,278,043 bales; total receipts for the same time of last year, 2,817,750 bales; total receipts for the same time of 1869, 1,973,471 bales; total receipts for the same time of 1868, 332,967 bales.

The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the season:—Receipts at outside ports since Sept. 1, 1870—New Orleans, 1,043,255 bales; Mobile, 308,744; Charleston, 244,225; Savannah, 339,270; Texas, 151,032; New York, 242,100; other ports, 147,417; total, 2,278,043 bales. Exports since Sept. 1, 1870—To Great Britain, 787,081 bales; France, 108,642; other foreign ports, 359,470; total, 1,253,203 bales. Shipments to Northern ports since Sept. 1, 1870, 194,982 bales. Stock at all ports, 40,743 bales. Receipts at New York since Sept. 1, 1870, 242,100 bales; since Sept. 1, 1869, 127,398 bales. Exports since Sept. 1, 1870—To Great Britain, 57,834 bales; France, 70 bales; other foreign ports, 70 bales; total, 57,904 bales. Stock at New York, 66,000 bales.

New Orleans, June 24.—The following is our usual table showing the receipts of cotton at all the ports from Sept. 1 to June 23. We do not include our telegrams to-night as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1. 1870.	Receipts since Sept. 1. 1869.	Exported since September 1 to Great Britain.	France.	Other Foreign.	Total.	Shipments to Northrn. Ports.	Stock.

—*New York Commercial and Financial Chronicle.*

NEW YORK, July 7.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 19,000 bales, and since the 1st September 3,930,000 bales. Shipments to England, 8,000 bales; to France, none; and to the continent, 9,000 bales; total since the 1st September, 3,079,000 bales. Stock at all ports, 182,000 bales. Middling Upland, 9¼d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, July 13.—Our market has remained very strong in tone during the past week, but the actual business transacted has been much curtailed by the great advance which has taken place in prices. There is now a pause in the upward movement in the value of cotton, but we do not anticipate any reaction in price of moment as the raw staple is in strong hands, and cheap money is an inducement to continue speculative operations, and so bolster up prices. The home trade demand for yarns has been good to supply the wants of manufacturers, and full rates have been paid. For shipment the demand is not active, but spinners nevertheless show great firmness. The cloth market has been quiet, but makers generally are well under contract; they cannot now obtain, however, prices that will carry cost at present value of yarns, so are indifferent about selling extreme at extreme rates, which buyers are reluctant to pay. The market closes steady, but with little doing.

BRADFORD.—The wool market is exceedingly firm in tone. Country rates are continually hardening, and staplers are under the necessity of holding out for higher quotations. A fair amount of business has been done in lustre wools, at stiff rates. All other sorts are equally firm, although the demand is not so large. In the yarn market there is no relaxation of the recent buoyancy. The late rapid rise in wool compels spinners to ask higher rates, and quotations are again higher than they were last week. Not much actual change can be reported in the piece market. Manufacturers are exceedingly busy, and in many cases are issuing advanced price lists.

LEEDS.—The woollen trade of this district is undoubtedly more prosperous than it has been for a long time past, and though prices all round are very high, merchants, both home and foreign, have accepted the situation with alacrity. The purchases made for France, Germany, and Canada are still large.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—JUNE 28.

There was only a moderate trade in Western and State flour. The buyers were few, such purchases generally made for local wants. There was a moderate export demand, with some 4,000 barrels taken last evening and this morning. The market was easier in tone and concessions were necessary to sell freely. The market closed dull, buyers holding off. The firmness of ocean freights and the higher prices for wheat demanded by holders and the unwillingness of buyers to meet their demands,

checked business. The sales last evening and this morning were 73,500 bush, at $1.48 to $1.48½ for No. 2 spring; $1.58 for amber winter Western; $1.65 to $1.70 for white Michigan; $1.48 for No. 2 for Chicago; $1.48½ for No. 2 Milwaukee. The latter was mostly held at $1.49. The market closed quiet. The sales were mostly for export. Corn was fairly active, opening at 72½c to 73c for good Western mixed; choice No. 1 Chicago brought 73½c; 71½c for Western mixed in store, 71c for common Western mixed, 76c for Western yellow, 80c to 82c for Western white, and 88c to 90c for Southern white. The sales were mostly at 72½ to 73c, and aggregated 112,000 bush, closing firm, steady. Oats scarcely so firm, but more active, with sales 101,000 bush. at 65c to 66c for black to white Western, 67c for white Ohio on the track, and 68c for ditto delivery.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The weather has been variable since we last wrote, but has been not unfavourable to the development of the wheat plant. Reports of corn having been extensively lodged in some districts are current, but the damage resulting from the late heavy rains appears to have been partial only. The course of prices at Mark lane has been guided chiefly by the weather, which sufficiently accounts for the great dulness which has prevailed in the market. Neither factors nor millers have shown any disposition to conclude business, the former relying upon present shortness of supply and the latter being still heavily stocked with flour. The imports of foreign wheat however, have been heavy, and this, coupled with the generally favourable harvest reports, has enabled buyers to conclude bargains at a reduction of 1s per quarter on the week. English wheat has been more firmly held than other qualities; and the decline is chiefly apparent in Russian and American descriptions, which have been in very plentiful supply. Flour has tended downwards in value, in sympathy with the price of wheat.

Trade in spring corn has been very much restricted. Maize and oats have given way fully 1s per quarter, owing to the liberal imports; but business in barley, beans, and peas has been insufficient to test prices.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 76 grain and seed-laden vessels have arrived at ports-of-call, viz.:—33 wheat, 11 maize, 9 barley, 3 rye, 3 beans, 2 millet-seed, 1 linseed, 2 rapeseed, 6 cotton-seed, 2 valonea, and 4 sundries. The floating grain trade has been wanting in activity, and prices have been irregular. Wheat—For the few fine cargoes fully last week's prices were obtained, but inferior sorts were neglected. Maize—Old corn was in demand at fully last week's prices, but new was slow to sell. Barley—Most of the cargoes offering are imperfect, and sell slowly. Rye—For a good cargo 33s was asked. The reported sales were as follows:—Wheat—19 arrived cargoes: Berdianski, 52s and 52s 6d; Marianopoli, 50s; Ghirka, from Odessa, 48s 1½d to 49s; ditto from Galatz, 47s; from Nicolaieff, 51s; from Nicolaieff, 48s to 48s 6d; Nicopol Ghirka, from Odessa, 48s 6d to 49s 9d per 492 lbs; Danubian, from Ibrail, 41s; Wallachian, 41s; winter, from Sulina, 44s 6d; No. 1 spring, from New York, 52s 6d per 480 lbs. Maize—10 arrived cargoes: Galatz, 35s 6d; Odessa, 30s; Danubian, 35s 3d; mixed Philadelphia, 30s 9d per 492 lbs; Danubian, from Ibrail, 28s 3d to 30s 6d; Wallachian, 30s 6d; mixed American, from Montreal, 32s 3d; old mixed, from Montreal, 33s per 480 lbs. On passage, 1 cargo Galatz, 34s 3d per 492 lbs. Shipped or to be shipped, 1 cargo mixed American, from Philadelphia, 30s 3d per 480 lbs. Barley—4 arrived cargoes: Azow, 28s; Nicolaieff, 26s; Tultcha, 26s 3d; Eupatoria, 28s per 400 lbs. On passage, 1 cargo Taganrog, 26s 6d per 400 lbs. Rye—1 cargo Galatz, arrived at Amsterdam, at 27s per 480 lbs.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a very quiet market, prices occasionally showing some slight decline. Recent arrivals have given a better supply of West India, but transactions to yesterday amounted to only 1,475 casks. Jamaica by auction 26s 6d to 30s 6d. Barbadoes chiefly bought in. 1,500 bags grainy sorts part sold; including Berbice at 37s to 38s per cwt. Low brown sorts meet with little inquiry. Most of the Mauritius and Porto Rico by auction was bought in. A few floating cargoes have sold for the United Kingdom at rather lower rates. Refined is dull. The general statistics of sugar have experienced little change. Landings last week were rather heavy; deliveries steady and the stock at the close was about 21,600 tons less than the previous season's at the same date. Imports of British East India and Mauritius have been comparatively small.

Mauritius.—At auction 6,155 bags partly sold at 31s 6d to 33s 6d for soft grainy brown and yellow. The remainder bought in at 36s 6d to 38s 6d for fine grainy yellow and white.

Penang.—1,485 bags partly sold. Soft grainy sold at 32s 6d to 34s 6d for white. Privately 1,650 baskets brown at 20s.

Natal.—876 bags were withdrawn.

Foreign.—By private contract 200 casks Porto Rico have sold at 33s. 1,000 bags Manila unclayed at 21s 6d; Ilo Ilo, 24s to 25s 6d; 350 bags crystallised Guatimala at 36s 6d. At auction 280 casks were bought in at 33s 6d to 36s, one lot bright yellow selling at the latter price. 99 casks Guatimala part sold at 29s 6d to 34s.

Floating Cargoes.—One of Havana, No. 11½ at 30s, one No. 12½ at 30s 6d for the United Kingdom, and one West India (Trinidad) at 25s per cwt.

Refined.—The market is inactive, with prices about the same as last week. 5,164 foreign loaves by auction sold at 43s to 43s 6d per cwt. Pieces are selling rather slowly.

MOLASSES.—Sales on the spot have been limited. A cargo of Trinidad has sold at 11s per cwt for the United Kingdom. 469 packages South Sea by auction were taken in.

RUM.—The moderate transactions in West India have been at steady prices. Demerara, 1s 8½d to 1s 9d; Leewards, &c., 1s 6d to 1s 8d. 250 casks Mauritius at 1s 4d proof. Clean qualities of Jamaica continue in demand. Prices during this week have ranged from 3s 6d to 4s 6d per gallon.

COCOA.—All descriptions are rather quiet, owing to the decrease in the export demand. No further sales reported in Guayaquil. 252 bags Bahia by auction were taken in. The sales of Trinidad on Tuesday were only 318 bags, which went at 67s to 87s 6d per cwt for ordinary to good quality, being about the former value.

COFFEE.—The demand for France has subsided, owing to the increased duty being in operation. Large quantities of plantation Ceylon have been again brought forward in the sales, viz., 2,979 casks 896 barrels and bags, and the chief part sold at about last week's prices, a few pits showing a decline Low middling to middling colory, 63s to 70s; good middling to fine bold, 71s to 84s 6d; pale and grey, 60s to 71s 6d. Native is quiet, but the small supply prevents any change in prices. 150 bags by auction were taken in. 25 casks rather bold sold at 55s. 876 cases 2,396 bags East India mostly sold: Wynaad, Coorg, &c., 62s 6d to 73s 6d; Mysore, including Cannon's, 82s 6d to 94s 6d. 1,592 bags Singapore partly found buyers: sound, 58s to 63s; sea-damaged, in proportion. 1,639 bags Costa Rica part sold at 57s 6d to 59s. 434 bags Guatimala at 55s 6d to 59s 6d. 145 bags Rio and 434 bags Guatimala were bought in. 62 casks 330 barrels and bags Jamaica sold at 2s decline, from 52s 6d to 57s 6d per cwt for ordinary

to fine ordinary quality. There was not any material diminution in the export deliveries last week, but now the French demand is supplied the clearances may be upon a somewhat smaller scale than of late. The stock is about 5,200 tons less than at the corresponding date in 1870.

TEA.—The market is quiet, and will probably continue so until the new season's crop arrives. The Indian tea sales this week comprised 4,200 packages, of which about 2,500 sold with rather better spirit, but prices for the lower grades of broken teas show fully 1d per lb reduction—the market being now well supplied with these kinds. In other descriptions there is no material alteration, with the exception of Darjeeling growths, which are most difficult to realise, unless at considerably lower rates. Privately, there is a fair business passing, the chief inquiry being for fine pekoes and broken pekoes.

RICE.—Sales on the spot have been very limited. Rangoon, 9s 6d. Tates floating cargoes of Rangoon are reported at 10s to 10s 3d, for the continent. 600 tons Chittagong, at 8s 4½d, ex quay. A small parcel of Arracan sold at 9s 1½d per cwt, ex quay.

IMPORTS and DELIVERIES of RICE to July 8, with STOCKS on hand.

Deliveries	42070 ...	35000 ...	25000 ...	30070
Stock	20150 ...	19000 ...	32470 ...	19750

BLACK PEPPER.—The sales by private contract have been small, as the continental demand is now slack. 2,373 bags Singapore by auction were only partly sold at 5¾d to 6d. 170 bags Penang at 5¾d. No further transactions reported for arrival.

WHITE PEPPER has been firm, but quiet. 177 bags Singapore by auction was partly disposed of at 9¾d to 9¾d per lb. The sales privately are unimportant.

OTHER SPICE.—Nutmegs have advanced 2d to 3d per lb, the greatest advance being upon small shipping sorts. These last sold at 2s 5d to 2s 6d, 84's to 85's, 2s 7½d to 2s 8d. 15 cases Penang by auction at the former price. 4 casks Java, 118 to 120, 2s 2d to 2s 4d; 90's at 2s 4d. Mace is in better demand. Low Java kind by private contract sold at 2s 4d. 2 cases low and mouldy Penang by auction sold at 3s 1d to 3s 2d. 1,767 bags Pimento went rather dearer, from 1½d to 2¼d. 167 bales Cassia. 200 bales Cinnamon, part sold. 1st sort, 2s 3d to 3s; 2nd, 2s 6d to 2s 9d; 3rd, 2s 2d to 2s 4d; 4th, 1s 5d to 1s 10d; spurious and common qualities, 6d to 1s 2d. 418 chips, 2¾d to 5½d; good bark, 2½d to 2¾d per lb. 240 bags Cochin ginger went irregularly at occasionally lower rates. Rough 40s to 49s for ordinary and part scraped, 55s to 87s for middling to bold. 120 barrels Jamaica: ordinary, 43s to 48s; middling 52s to 61s per cwt.

SAGO.—At auction 2,206 bags were only partly sold: medium grain at 18s to 19s 6d, sold brownish at 17s 6d. The small grain sorts were bought in.

SAGO FLOUR.—1,869 bags Borneo were taken in at 16s. Of 703 bags Singapore a few lots sold at 15s per cwt. The remainder being taken in at 15s 6d.

TAPIOCA.—617 bags were chiefly bought in. A few lots Penang sold at 2¾d to 2¾d. 251 bags fine tapioca flour were bought in at 2¾ per lb.

SALTPETRE.—The market is firmer, with rather more business. Sales on the spot amounting to about 3,000 bags Bengal. Refraction, 7½ to 8 per cent, 28s 3d to 29s. About 250 tons afloat, at 27s 6d to 28s per cwt. These are rather higher prices than last quoted.

IMPORTS and DELIVERIES of SALTPETRE to July 8, with STOCKS on hand.

	1871.	1870.	1869.	1868.

Total delivered	6370 ...	8210 ...	4750 ...	5480
Stock	2450 ...	2200 ...	4700 ...	6355

Deliveries last week 2561 tons.

COCHINEAL.—A good demand still prevails, and the sales on Wednesday went at former prices to 1d advance. Of 1,050 bags Teneriffe, a considerable portion sold: silver, 2s 2d to 2s 3d; black, 2s 4d to 2s 8d; very fine to high as 3s 2d. 200 bags Honduras: silver, 2s 4d to 2s 6d; black, 2s 6d to 3s. 105 bags Mexican: silver, 2s 3d; black, 2s 5d per lb.

OTHER UNSALTERY GOODS.—Further business has been done in Bengal turmeric afloat, at 10s 6d to 10s 7½d. 1,587 bags by auction were held at the advanced price of 21s. Quotation firm. Present value on the spot, 10s 6d to 10s 9d; ex ships 10s 1½d. Cutch without change, and fine deserved inquiries. 440 chests red dye were bought in. 115 bales Senegal sold somewhat by auction partly at 44 for very low quality. 96 bags Turmeric part sold at 40s to 50s. A parcel of China galls bought in at 62s 6d per cwt.

INDIGO.—Owing to present purchases for export, partly for France, the supply of desirable shipping sorts had become much reduced, and the sales which commenced on Monday offered rather a limited assortment. The total printed was 9,148 chests. Mid Kurpa to good Bengal went 2d to 4d dearer. Many tubs ordinary without material change. Low descriptions of Oudes were cheaper. Parcels in second hands were generally unpurchased. Kurpas went 2d to 4d higher, excepting low and ordinary, which were about the same as in the previous sales. Low leaf Madras went very irregularly and latterly at some reduction. Holders had to withdraw numerous parcels, and of 7,000 chests passed in yesterday (Thursday) only 4,672 chests sold.

SPELTER.—Privately sales of fine sorts have been effected at 17s 6d. 470 cwts by auction partly sold at full prices, including 200 cwts Natives, ordinary to good ordinary, 16s 6d to 17s; fine garnet, 17s 15s; inferior, 16 7s 6d to 17 per cwt.

METALS.—The advance recently quoted is generally maintained, and the markets have been steady. A good demand prevails for copper. Pig iron is 2d dearer for shipping brands; prices have an improving tendency. Cleveland, 4os, have 67 on the spot, and the supply is expected to decrease. The last sales of Welshes were at 7l 5s to 7l 10s. For Scotch pig iron the demand has been good. The last sales were at 60s to 60s 3d cash. No change in the other iron markets. Spelter continues firm. A sale of Silesian is reported at 19l 7s 6d per ton. A considerable quantity of foreign tin has changed hands. Straits 103l to 103l, other, 102l 10s to 102l. Banca quoted 104l to 105l per ton. The market is now rather quiet. Lead quiet. Spanish soft, 17l 10s to 17l 12s 6d per ton.

JUTE.—There is not any new feature to report in this market, which has ruled rather quiet, and the state of trade in the north has been less active. Privately few sales are reported. By auction on Wednesday, 3,377 bales were about half sold. Low and ordinary to fair, 19l 5s to 25l 10s; good to fine, 25l 15s to 27l per ton.

MANILA HEMP.—The market has been firm. Holders are generally asking higher prices than can now be obtained, consequently few sales have taken place. Business has been done in Cocoanada, chiefly at 20l per ton.

HIDES.—At the sales of East Indian yesterday 212,300 hides, &c, chiefly sold at steady prices for all descriptions.

LINSEED.—There is a firm market. The small quantity of Calcutta seed here renders prices firmer. 63s 6d has been paid. Afloat, 61s 6d to 62s 6d; Bombay, 63s to 63s 6d; Black Sea, 61s 3d per quarter.

TURPENTINE.—American spirits, 41s 6d; French, 40s 6d to 41s.

PETROLEUM is firmer. American refined, 1s 6d, and ¼d to ½d per gallon more for the last four months.

OILS.—A cargo of olive has sold for the United Kingdom. Mytelene, at 43l 10s; on the spot rather more inquiry. Mogadore, 44l to 45l. Sperm very dull. Colonial, 81l 10s to 82l. Pale seal, 33l 10s per ton. Linseed oil has been in good demand, but is now rather less saleable, 33l on the spot, 32l 10s last four months. Rape closes firmer English brown, 42l 5s in all positions. Refined, 44l to 44l 10s. English, 46l to 47l. Ceylon cocoa-nut dull, at 39l 10s to 40l. Cochin, scarce and nominal, at 50l to 51l. There is more inquiry for palm, at 38l to 37l 10s per ton.

TALLOW.—Prices of foreign have been tolerably steady during the greater part of the week, although there is not any diminution in the supply of Australian, &c. (to-day's sales comprising about 2,300 casks), and the deliveries continue good. Petersburg now, 44s to 44s 3d: Oct. to Dec., 46s per cwt. The home deliveries show a considerable increase upon last year's. Stock in the kingdom on the 30th June 82,000,000 lbs, against 92,000,000 in 1870.

POSTSCRIPT. FRIDAY EVENING

SUGAR.—The market was quiet to-day. Sales of West India 340 casks, making 1,815 casks for the week. The Barbadoes and grainy West India by auction realised about previous rates. 1,574 bags Natal, part sold at 24s to 28s 6d for brown. By private contract 1,300 bags common Madras Jaggery sold at 19s. A floating cargo of Havana for a near port, 12½ to 13, at 31s 3d per cwt.

COFFEE.—Of 13,693 bags Costa Rica of the new crop the greater part sold at prices ranging from 57s 6d to 75s 6d. 1,488 cases 155 bags East India, and 434 casks 273 barrels and bags plantation Ceylon went at about previous quotations. 628 bags Guatimala at 58s to 59s per cwt.

RICE AND SPICE.—No change.

INDIGO.—The sales proceeded to-day, and will conclude early next week.

SALTPETRE.—Some business reported to-day at 27s 6d per cwt for low to middling Bengal.

OIL.—279 casks Ceylon cocoa-nut by auction were chiefly taken in. A few lots sold at 39l 10s. 190 casks Sydney sold at 32s to 41s 3d per cwt.

TALLOW.—The public sales went at barely last week's rates. 2,048 casks Australian chiefly sold—Beef, 37s to 43s 3d; good to fine mutton 42s 6d to 43s 9d. Of 190 casks South American, a portion sold at 42s to 43s per cwt for mutton.

ADDITIONAL NOTICES.

TOBACCO.—The market for North American tobacco continues in a very inanimate state. Buyers appear disinclined to operate to any large extent. Prices for fine old descriptions are firm, the stock of which however is very small.

LEATHER.—Since our report of last week the leather market has shown no change, the general firmness continues for almost all articles.

METALS.—The business of the week has been satisfactory. Copper has been in steady demand. Tin has fluctuated somewhat, but closes very strong, and a good deal changing hands. Iron is well maintained. Lead is quiet. Spelter is firm without much inquiry. Tin plates are in active demand.

METROPOLITAN CATTLE MARKET.

MONDAY, July 10.—The total imports of foreign stock into London last week amounted to 17,359 head. In the corresponding week in 1870 we received 15,027; in 1869, 10,617; in 1868, 16,191, and in 1867, 10,476 head.

The cattle trade has been without feature of importance to-day. The supply of English beasts has been less than the average as regards number, and the quality has been indifferent. Foreign stock has been pretty representative. For all qualities the demand has been inactive but prices have been steady. The best Scots and crosses have sold at 5s 10d to 6s per 8 lbs. There has been a fair supply of sheep in the pens. The demand has been to a moderate extent, but prices have ruled firm. The best Downs and half-breds have been disposed of at from 6s 4d to 6s 6d per 8 lbs. Lambs have been steady at from 6s 6d to 7s 8d per 8 lbs. Calves have been disposed of at about late rates. Pigs have sold on former terms.

SUPPLIES ON SALE.

Lamb, 6s 8d to 7s 4d.

HOP MARKET.

BOROUGH, Friday, July 14.—Very little animation has been observable in this market, and prices have ruled firm, owing to the unfavourable accounts from the plantations. Mid and East Kents, 56s to 147s; Weald of Kent, 56s to 90s; Sussex, 50s to 80s; Farnham and country, 75s to 112s; and olds, 20s to 35s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, July 14.—The supplies have been good. There has been a fair demand, on former terms. Flukes, old, 50s to 88s; regents, 50s to 60s; rocks, 40s to 55s per ton; kidneys, 9s to 12s; Jerseys, 8s to 10s; and French, 6s to 7s per cwt.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 14.—There is no abatement in the demand, and at the public sales held here on the 12th instant, when about 2,400 bales of Peruvian, Alpaca, River Plate, Spanish, Turkey &c., were offered, there was a fair attendance of buyers, and the greater portion cleared off at late rates. East India wool sales will be held here from the 18th to 21st instant, when it is expected that about 10,000 bales will be brought forward.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 14.—There has been only a moderate attendance at this market to-day. Wheat was very quiet at 1d reduction. Flour was slow. Indian corn was unchanged. Beans—American mixed, 31s 6d; washed mixed, 34s 9d: Saidi, 36s; mixed Saidi, 33s 3d to 33s 6d. Peas, 40s to 40s 6d. Oats were unchanged, the price being 3s 8d to 3s 11d. Oatmeal, 29s 6d to 30s 6d.

WAKEFIELD, Friday July 14.—With one exception rain has fallen here every day this week; but millers say flour dealers act as if the weather was all that could be desired. The threshing machine however will prove differently. Trade to-day is firm; but the business passing is small.

The Gazette.

TUESDAY, July 11.

BANKRUPTS.

Ellen Eliza Beverley, Jermyn street, St James's, licensed victualler
Daniel Tremlett Brewer, King street, Camden town, licensed victualler

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

KINAHAN'S LL WHISKY.

This celebrated and most delicious old mellow spirit is the very

CREAM OF IRISH WHISKIES,

in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.

Note the words—

"KINAHAN'S LL WHISKY,"

on seal, label, and cork.

Wholesale Depôt, 6a Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY,

BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS

is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c.,

for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d 7s 6d, 10s, and 16s each; postage, 6d.

PROSPECTUS.

Tramways are now largely engaging public attention, and in a proved exceptionable economical. They are being successfully adopted as the cheapest and most convenient means of transit for passengers and light traffic, and as forerunners of small expensive the means of railway communication on existing roads, and at the same time offering a safe and profitable return upon the capital invested.

The want of a more thorough system of communication in this part of the west of Ireland, and was strongly enforced on the attention of the Parliament in an address agreed to by both Houses of Parliament in April, 1869.

This want has been long and very seriously felt in North Kerry and West Limerick, and the whole district is entirely westward of Foynes to the Atlantic Ocean, which comprises the towns of Lanigh, Glin, Tarbert, Ballylongford, Ballybunion, Abbeyfeale, and Listowel, the last mentioned, although but isolated towns justly claimed the capital of North Kerry.

Through this district it is intended to construct a Tramway on the side of the land road, commencing at Foynes, the terminus of the Limerick and Foynes Railway passing through Glin and Tarbert, and terminating at Listowel, a total distance of 30 miles. The engineer to the Board of Works has effected a reported very favourable on the undertaking, and the necessary application from him for the sanctioning powers under the Tramways Act [illegible] to make the line.

The opposition by these roads to a portion of the Mail Coach and railroads ordinary traffic, and the [illegible] will be able to secure and retain the local work required. The traffic will be secured by [illegible] and the Bill now before Parliament will authorise the proposed steam locomotives.

The importance of [illegible] the present proposed tramways as a means of business operations is shown by the fact that a large number of pig markets all well supplied with stock, and attended by buyers from a distance, are held there annually. A weekly market for the sale of butter is also established, at which about fifty firkins are usually sold every day. The cattle, pigs, butter, eggs, sheep, grain, sand, lime-stone, peat, and flags will be the chief articles of traffic on the line. There is a thriving corn market at Tarbert, where most of the grain of the district is disposed of.

Direct communication from Listowel and the surrounding districts will be made to the junction at Limerick, and [illegible] to the Mail Coaches of the aforesaid Tramways, sufficient time having been allowed for the transmission of [illegible] instead of two days being occupied, as is at present the case.

The want of [illegible] has long been the source of the serious loss of the [illegible] and about 50,000 tons would be transported during the season, all of which would pass over the Tramways. A new pier is about to be built, and new markets established.

It is confidently expected that the steamers passenger traffic to Limerick and Kerry will be diverted over this line, and connected at Foynes pier, and the steamers would, instead of merely calling at Foynes, as at present, be supplied by the Tramways. The Post-masters General has expressed his willingness to enter into a contract for carrying the mails.

It is estimated that the cost of construction, including rolling stock will not exceed £1,500 per mile, and that the works will be completed to their opening for the commencement of the same. The average cost of Irish railways has been £10,000 per mile, and pay a dividend of 4 per cent.

From the nature of the traffic of the district through which the Tramways will pass, and other existing and known circumstances, the working expenses [illegible] are anticipated that a dividend of from 10 to 15 per cent will be paid.

At a meeting held at [illegible] on the 15th of March, 1870, the Knight of the Co. [illegible] a resolution [illegible] the proposed Tramways was very generally approved and would [illegible] the requirements of the [illegible] and [illegible] a company [illegible] and [illegible] representative [illegible] for promoting the proposed [illegible].

Applications for shares accompanied by a deposit can be made at the Bankers', Brokers', or at the Offices of the Company, where prospectuses and all further information may be obtained, and the Memorandum and Articles of Association inspected.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Foynes, Listowel, and Tralee Tramway Company (Limited).

Gentlemen,—Having paid to your bankers the sum of £ , being a deposit of £1 per share, I beg to apply for shares of £5 each in the above Company; and I hereby agree to become a member thereof, and to accept such shares, or any less number that may be allotted to me.

The chief objects of the "Colliery Insurance Company" are:—

The insurance of owners or lessees of collieries against loss in the collieries from explosion and fire.

The insurance of individual interests when the colliery, as a whole, is not insured.

The insurance of provision for widows, children, and dependent relatives of colliers killed by accidents in collieries.

FIELD FOR THE OPERATIONS OF THE COMPANY.

The property in British collieries is valued at one hundred and sixty millions, and the coal raised additionally to the national wealth more than thirty millions sterling.

There are upwards of three thousand collieries, and on an average accidents happen to one-third annually.

The miners employed in the British collieries number more than three hundred thousand, of whom upwards of one thousand perish annually by accidents in the pits.

But neither the property in British coal mines nor the lives of British miners are at present protected under any system of insurance.

ADVANTAGES OF THE COMPANY.

Inducement against loss by accident will, on its ascertainment, prevent [illegible] from inconvenience, and some [illegible] of waste.

Insurance will in all cases give increased value to coal properties as securities for loans, which may be wanted for the extension and improved working of pits, and which coal properties being uninsured, are not available at all advantageous.

Insurance will add considerably to the market value of coal mines, raising it in many cases from five to ten or more years' purchase.

Insurance of individual interest in collieries will enable partners and shareholders to protect themselves from loss resulting from accidents.

Insurance of the miners gives against fatal accidents in the pits will enhance a large amount of misery, which the power to answer to [illegible] appeals can do [illegible] than very partially alleviate.

The [illegible] have therefore, for many years felt the want of an institution for the insurance of capital invested in collieries, and for the insurance of colliers' lives against casualties arising from pit accidents.

The [illegible] and adverse risk of colliery accidents, and the [illegible] nature of many of them as regards life, have led many persons, [illegible] to [illegible] to consider the claims of property to be insured [illegible] by a system of insurance. The experience of the last twenty years, however, has [illegible] that the [illegible] insurance that the [illegible] with so much [illegible] has proved to be [illegible] of the ordinary forms of marine, fire, and life insurance.

Collieries are properties as accurately planned and as accessible as any manufactories insured against fire, and damage to their works is as readily ascertained.

The Colliery Inspector's Annual Reports to Government furnish reliable data of accidents and loss of life, and returns collected by gentlemen qualified for the task, give the pecuniary cost of all colliery accidents. Tables constructed from these sources show a recurrence, within given limits, of accidents uniform in number and results, and therefore capable of being provided for by a system of insurance.

Graduated premiums, calculated upon like principles to those which regulate ordinary insurances, prove that an income will be obtained from colliery insurance fully sufficient to cover liabilities, and to give very liberal profits to the shareholders of the Company.

General rates have been carefully determined for the coal districts of the United Kingdom, but as collieries differ from one another in respect of physical conditions and modes of working, so the general rate of a district will be modified according to the special circumstances of each colliery.

A general inspection of the collieries under insurance, for the private information of the Company, will be carefully maintained. The supervision thus exercised will be a reliable support to the colliery proprietor, and give that protection to the colliers which they will never perhaps be able, by legislative enactment, to obtain.

In establishing an office for the insurance of property and life in the collieries of Great Britain, this Company will enter on its business with undeniable prospects of success. No single insurance office deals, in actual practice, with one-tenth of the amount of business which this Company will undertake, and it has no competitor.

The capital of the Company is ample sufficient for all contemplated purposes. A large amount, while it diminished dividends, would not add to the power of the Company.

The profits of soundly constituted insurance offices, as shown by the value of their shares, have always been of large amount.

	Established.	Dividend, 1869-70	Amount paid on Share.			Market Value
		%	£	s	d	£
Royal Exchange Fire, &c.	1720	32	100	0	0 Stock, sells for	300
London, ditto	1720	30	12	0	0 Paid —	45
Norwich Union ditto	1797	70	30	0	0 Paid —	180
Imperial, ditto	1803	45	50	0	0 Paid —	345
County, ditto	1807	90	10	0	0 Paid —	85
Indemnity, Marine	1810	30	5	13	6 Paid —	116
Ocean, ditto	1839	30	5	0	0 Paid —	19

Shares in the capital of the "Colliery Insurance Company" will therefore be sought as investments of the most solid and remunerative character.

Letters from eminent insurance authorities and influential coal proprietors, express acceptance of the Company's system of colliery insurance as one certain to promote the more intelligent working of pits, and to secure the greater safety of the pitmen. The following are extracts:—

From WILLIAM FARR, ESQ., M.D., F.R.S.

"General Register Office, Somerset House.

"I fully concur in the opinion that the insurance of the collieries of this kingdom would be of great benefit to the colliery interest, and to the kingdom at large, by distributing losses over wide areas of such property, and thus preventing disastrous losses to individuals or firms.

"I think insurance as applicable to collieries as it is to other property."

From ROBERT HUNT, ESQ., F.R.S.

"Mining Record Office, Jermyn street.

"I am convinced that a system of insurance, judiciously organised, would be a means of relieving much of the distress which ever attends a colliery accident, and that the proprietors of coal mines would find it to be greatly to their interest to avail themselves of the advantages off red, as by them the burden of anxiety would be removed, and the fear of loss withdrawn."

From GEORGE ELLIOT, M.P. for North Durham.

"Houghton Hall, Fencehouses, Durham.

"I am very anxious to see the Colliery Insurance Company promoted."

From HENRY HUSSEY VIVIAN, ESQ., M.P. for Glamorganshire.

"Parkwern, Swansea.

"I wish well to the undertaking, and will assist it."

Applications for shares, addressed to the Directors in the annexed form, will be received by the Secretary, Stephen Sleigh, Esq., No. 2 Austinfriars, Old Broad street, London, E.C., and by the Bankers and Brokers of the Company, of whom prospectuses may be obtained. No application will be considered unless a deposit of £1 per share on the number of shares applied for has been made. In the event of the Directors not being able to make an allotment, the deposit will be immediately returned.

A [illegible] for the establishment of Local Boards should be sent, under seal, to the Solicitors of the Company.

FORM OF APPLICATION FOR SHARES.

To be Returned to the Bankers.

To the Directors of the Colliery Insurance Company (Limited).

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of £1 per share, I hereby request you will allot me shares of £10 each in the Colliery Insurance Company (Limited), and I hereby agree to accept such shares, or any smaller number that may be allotted to me.—I am, Gentlemen, yours obediently,

THE FIRST DIVISION OF THE SAINT PAUL and PACIFIC RAILROAD COMPANY, State of Minnesota, United States of America.—SAINT VINCENT and BRAINARD EXTENSIONS.—ISSUE of 15,000,000 dols UNITED STATES CURRENCY or £3,000,000 STERLING SEVEN PER CENT. FIRST MORTGAGE EXTENSION BONDS, in 15,000 Bonds of 1,000 dols United States currency, or at the fixed exchange of 4s to the dollar, £200 sterling, bearing interest at 7 per cent. per annum from 1st July, 1871, payable half-yearly by Coupons attached. Principal repayable at par on the 1st January, 1901, unless sooner redeemed by purchase by the Trustees. Principal and interest payable at the option of the holder, in New York in United States currency, or in London in sterling, at the fixed exchange of 4s to the dollar. Free of all Federal taxes in the United States. Issue price in London, £148 per 1,000 dols Bond, being 74 per cent. upon the nominal value.

The First Division of the St Paul and Pacific Railroad Company, of the State of Minnesota, in the United States, is prepared to receive, through its Bankers, Messrs Lippmann, Rosenthal, and Co., in Amsterdam, or through Messrs Robert Benson and Co., their correspondents in London, subscriptions for 15,000,000 dols United States currency, or £3,000,000 Sterling 7 per Cent. First Mortgage Extension Bonds.

The Companies interested in the railways which are the object of this issue are two—the St Paul and Pacific Railroad Company, subsequently referred to as the Original Company, and the First Division of the St Paul and Pacific Railroad Company, an offshoot from the former, but now a distinct Company, and subsequently referred to as the First Division Company.

The First Division Company is the owner of two lines of railway through some of the most fertile parts of the State; one, which is open and at work, called the Branch line, extending from the capital, St Paul, northwards to Watab; and one, called the Main Line, extending westward from St Anthony (a station on the branch line) to Breckenridge, on the Red River of the North. The first 135 miles of the main line (including the most difficult portion of the work), and the bridge across the Mississippi, were completed in 1870; the rails, &c., for the remainder are purchased, and the whole is expected to be completed by September next.

By an Act of the State of Minnesota, approved 6th February, 1864, and an Act of Congress, approved 3rd March, 1871, the Original Company has been authorised to construct two extensions from the branch line. One will commence at St Cloud, a station on the branch line, will cross the Northern Pacific Railroad, and will terminate at St Vincent, a town in Pembina County, on the Red River of the North, and on the British frontier. At this point it will have the benefit of connection with upwards of 1,000 miles of available river and lake communication; to which will probably, before long, be added the railway communications which are being projected in the British possessions. The other extension will start from Watab, the present terminus of the branch line, and will proceed to Brainard, where it will form another junction with the Northern Pacific Railroad.

The Northern Pacific Railroad, with which the proposed Extension will be connected at two points, is now in full working order from Duluth on Lake Superior (where it is connected with the system of the Great Lakes) to Brainard, at which place a bridge over the Mississippi is erected. The grading of the line for nearly 260 miles westward is completed, the rails are being laid, and it is hoped that by September next trains will run from Lake Superior to the Red River.

The new extensions will thus be connected with the most important lines of railway, lake, and river communication.

The length of the St Vincent extension is about 293 miles, and of the Brainard extension about 55 miles.

To aid in their construction Congress and the State of Minnesota have granted to the Original Company lands, lying along the extensions, at the rate of ten sections of one square mile each for every mile of the extensions, to be conveyed to the Company as the line is constructed. The total amount of lands thus granted is about 2,227,000 acres, and comprises some of what is known as being among the best land in the State.

According to the report of 1869 of the Assistant-Secretary of State for Minnesota, the cultivated area of that State had increased from 1,000 acres in 1850 to 1,387,470 in 1865, and the population had increased from 5,854 in 1850 to 470,000 in 1870, exhibiting a more rapid rate of progress than any other State in the Union. Upon the same authority there were in the State at the date of his report 749 miles of railway completed and 601 under construction. St Paul, the capital of the State, with a population of about 25,000, is connected with the great commercial city of Chicago and with Lake Superior and other parts of the Union by a network of railway in active operation.

A lease of the extensions for 99 years has been granted by the Original Company to the First Division Company dated 1st April, 1871, under which the latter is to construct, equip, and work them. For that purpose it is to issue the bonds now offered, payment of the principal and interest of which is secured by a mortgage dated the 1st April, 1871, made by the Original Company to Horace Thompson and George L. Becker, of Saint Paul, Minnesota, and Wm. G. Moorhead, of Philadelphia, as Trustees for the bondholders. The mortgage comprises the extensions, with their plant and rolling-stock, and all the lands granted by Congress in respect thereof.

The average price at which lands granted to the First Division Company in respect of its other lines were last year sold, is 7.68 dols per acre. At that rate the lands mortgaged to secure the present issue would produce 17,103,360 dols, being considerably in excess of the bonds now to be issued; and the bondholders will, in addition, have the security of the 348 miles of railway, with its rolling-stock, plant, &c.

All the proceeds of the sale of the lands are to be paid over to the Trustees. Sales may be made upon credit for any period not exceeding four years, but the land is to remain as security for the payment. Bonds of the present issue, or matured coupons thereon, are to be received at par in payment for lands. This will tend to produce a local demand for them until the price rises to par.

All bonds given in payment for lands are to be cancelled.

The Trustees are also to receive all the revenues arising from the working of the extensions, and to apply both that and the proceeds arising from the sale of the lands, first in the payment of the interest on the bonds, and then in the purchase of the bonds themselves at the lowest price, not exceeding a premium of 10 per cent. above their nominal value, by advertisement and tender, or by purchase on the Stock Exchange of London, Amsterdam, or New York.

Full power is given to the Trustees to take possession of and sell the extensions in case of default in payment of the principal or interest of the bonds.

The whole of the proceeds of the bonds will be invested by Messrs Lippmann, Rosenthal, and Co., in United States Federal Government Securities. A sum equal to 20 per cent. upon the nominal amount issued will be held by them as a reserve to secure the payment of interest during the first three years, which period, it is believed, will be amply sufficient not only for construction, but also for the development of the traffic. The remainder of the proceeds of the issue will only be paid over by them upon Certificates of the President of the Company and one of the Trustees authorising the payment.

The bonds will be of 1,000 dols United States currency, equal at the fixed exchange of 4s per dollar to £200 sterling each. They will bear interest at 7 per cent. per annum from the 1st of July, 1871. The principal will be payable at par on the 1st of January, 1901, unless sooner redeemed by the Trustees out of the proceeds of sale of the mortgaged lands and the revenues of the extensions.

Both principal and interest will be payable free of all United States Federal taxes, at the option of the holder, in New York, in United States currency, or in London in sterling money, at the fixed exchange of 4s to the dollar.

The bonds will be issued bearing interest from 1st July, 1871, at £148 sterling per bond of 1,000 dols (equal at the fixed exchange of 4s per dollar to £200 sterling), payable by instalments as follows:—

£10	per bond	on application.
18	—	on allotment.
60	—	on 15th August, 1871.
60	—	on 1st October, 1871.
£148		

Payments in anticipation of unpaid instalments may be made on allotment, or on either of the above dates, under discount at the rate of 5 per cent. per annum.

Taking into account the discount on prepayment the issue price of the bonds is reduced to about 73½ per cent., upon which price they will return about 9½ per cent.

Applications in London must be made in the annexed form and lodged at Messrs Glyn, Mills, Currie, and Co., 67 Lombard street, London, E.C., with a deposit of £10 per bond of 1,000 dols applied for. Applications in Amsterdam must be made to Messrs Lippmann, Rosenthal, and Co; and in Rotterdam to Messrs H. C. Voorhoeve and Co.

Where no allotment is made the deposit will be returned in full.

In case a less number of bonds is allotted than is applied for, the surplus of the deposit will be applied in whole or in part, as the case may be, to the payment of the amount due on allotment.

In default of payment of the respective instalments at their due dates, all previous payments will be liable to forfeiture.

Scrip certificates to bearer will be issued in exchange for allotment letters as soon as possible; and will be exchanged for the definitive bonds as soon as possible after the issue price is paid up. Allotment letters and scrip certificates, issued respectively in Amsterdam and London, can only be exchanged at the place of issue.

Copies of the Acts of Congress and of the Legislature of Minnesota, the Mortgage of the Extensions and Lands, the Agreement, for Lease, Construction, and Equipment of the Extensions, and the Definitive Bond, can be inspected by any intending subscriber at the Office of Messrs Bircham, Dalrymple, Drake, and Co., 60 Threadneedle street, London, E.C., and at the Offices of Messrs Allcock and Milward, No. 5 Union street, Birmingham.

Prospectuses and forms of application may be obtained—

In Amsterdam, at the Offices of Messrs Lippmann, Rosenthal, and Co.;

In Rotterdam, at the Offices of Messrs H. C. Voorhoeve and Co.

And in London at the Offices of Messrs Robert Benson and Co., 10 King's Arms yard, Moorgate street, City, E.C.; or Mr W. H. Bishop, No. 1 Royal Exchange buildings, London, E.C.

July 8, 1871.

FORM OF APPLICATION.

(To be left at Bankers with Deposit, and retained by them).

THE FIRST DIVISION OF THE ST PAUL AND PACIFIC RAILROAD COMPANY.

Issue of 15,000,000 dols United States Currency, or £3,000,000 Sterling Seven per Cent. First Mortgage Extension Bonds.

No.———

To the First Division of the St Paul and Pacific Railroad Company.

request that you will allot

1,000 dols Seven per Cent. First Mortgage Extension Bonds of your Company, in accordance with the Prospectus issued by you, dated 8th July, 1871, upon which I have paid Messrs Glyn, Mills, Currie, and Co., the deposit of pounds, being at the rate of £10 per bond, and I engage to accept the said bonds or any less number you may allot, and to make the remaining payments thereon in accordance with the prospectus.

Name at full length .....

Address.....

Date .....

THE FIRST DIVISION OF THE SAINT PAUL and PACIFIC RAILROAD COMPANY, State of Minnesota, United States of America—SAINT VINCENT and BRAINARD EXTENSIONS.

Notice is hereby given, that APPLICATIONS will be RECEIVED up to MONDAY, 17th inst., for town, and to TWELVE noon on TUESDAY, 18th inst., for country subscribers.

CREDIT LYONNAIS.

(Limited).

Capital, entirely paid up, 20,000,000 francs (£800,000).

Lyons, Paris, Marseilles, London.

A further Half-Yearly Dividend of 2½ per cent. for the year 1870 having been declared, notice is hereby given, that the Coupons No. 15 are now Payable at the Company's Offices in France, and also at the London Agency, No. 5 Austinfriars, E.C.

The General Meeting, deferred on account of the political events, will take place at the Palais du Commerce, Lyons, on the 31st of July, 1871, at 2 o'clock.

THE "NORTH AMERICA" GOLD MINING COMPANY (Limited).

Capital, £80,000, in 20,000 shares of £4 each, with power to increase.

Prospectuses and Forms of Application for Shares can be obtained at the Bankers and Offices of the Company.

NEW WHEAL SPEEDWELL TIN MINE (Limited).

Now that the price of tin has been raised so as to render the working of tin mines once more about one of the most profitable businesses in which capital can be invested, the attention of the outside public is being strongly directed to the oldest and what may be really termed the legitimate field of mining enterprise and speculation, the tin mining districts of West Cornwall. The advance in the price of shares in Cornish tin mines during the past month has been astonishing, and many investors have more than doubled their money during that time. For example, Carn Brea shares, which a very short time ago were unheeded at a price of about £20 per share, cannot now be bought under £100, and will doubtless soon go higher still. Indeed, it is the opinion of competent judges that now tin mines have begun to go up they will continue doing so for some time to come. Messrs LISCOMBE and CO., of 39 South Castle street, Liverpool, would therefore draw the attention of their clients and the public to the New Wheal Speedwell Mine, one of the most promising setts in a district which is unsurpassed for the value of its metalliferous deposits, and which is surrounded by mines which either are paying or have paid enormous profits. It immediately adjoins and is on the same lodes as Old Wheal Speedwell Mine, which on a small outlay returned upwards of £160,000 to its fortunate proprietors. Among other rich neighbours may be mentioned the Marazion Mines, which returned over £444,000; Great Wheal Fortune, nearly £600,000; Great Work, £700,000; Wheal Neptune (which is almost immediately contiguous to New Wheal Speedwell), £400,000; and a score of others with nearly as large returns. Indeed, such examples as these might be referred to without number, but the enumeration of all such would occupy too much space. Messrs Liscombe will only remind their clients that it has been computed by the best authorities that the gross returns of this district may safely be estimated at not less than six millions sterling. The New Wheal Speedwell sett is traversed by all the most productive lodes of the neighbouring mines, and is even now in a position to return a large quantity of tin before the great deposits of ore are reached. Messrs Liscombe beg that no time may be lost in applying for shares, as very few remain on hand, and they may speedily be expected to go to a good premium.

MILNERS' STRONG HOLDFAST AND FIRE-RESISTING SAFES (of Six Progressive Qualities and Prices, suitable for all amounts of risk), CHESTS, STRONG ROOMS AND DOORS with all the Latest Improvements. Effectually guarding against the novel modes of attack, as used by the Caseley gang in the Cornhill and other roobberies (against which, no safe made before 1865 is secure), but which addition to Milners' succession of improvements during the last half-century constitutes their safes the strongest, and (quality considered) the cheapest safe-guard against fire and the modern burglar. Milners' Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post.

THE WHITEHAVEN IRON MINES

(Limited).

Incorporated under the Companies Acts, 1862 and 1867, by which the liability of every shareholder is limited to the amount of his shares.

Capital, £50,000 in 5,000 Shares of £10 each.

Payable as follows:—

For 4,500 of which applications will be received by the Directors.

Deposit—on Application on £1 per share; on Allotment £3 per share. The remaining 5 shares as follows:—£2 on 1st September, 1871; £2 on 1st November, 1871; £2 on 1st January, 1872. With the option to subscribers paying the whole amount of the shares on allotment, to whom such payments will be recognised from the date of payment thereof.

Board of Directors.

The Right Honourable the Earl of Devon (Chairman of the Flotilla and Exeter Railway and of the Metropolitan District Railway, London, Chairman).

The Right Honourable Lord Ashburton, Port-land House, Hans place, and Ashburton, near Totnes, S.W.

Admiral the Honourable Sir Francis Keppel, G.C.B., Wimbledon, Surrey, and United Service Club, London, S.W.

Sir C. E. Eardley, Bart., of Eastwood, South Lincolnshire, and 10, Grosvenor gate, London, W.

Offices—No. 6 Queen Street, London, E.C.

FROM THE TIMES.

1. The object of this Company is to acquire and develop extensive mineral properties in the neighbourhood of Whitehaven, consisting of an area of [illegible] which [illegible] the Whitehaven Junction Railway, [illegible] Whitehaven and Furness Railway, [illegible] to Whitehaven Port, where it can be put down at [illegible] at an estimated cost of about 3s. 6d. per ton; but the Directors propose to construct a tramway along a part of the [illegible] Whitehaven, with a branch line to the [illegible] Railway, and a station in the Whitehaven and Furness Railway, a distance of about 2½ miles, for which they have been empowered under a special Act for the purpose, in the session of 1870, which will reduce the cost of carriage about 2s. per ton. The Directors are informed that they are to be [illegible] to other parties at an annual [illegible], by which means it will be unnecessary for them to [illegible] which is found, but only where they propose to carry it on.

2. This property is in the district of the celebrated Knockmurton mines and the Clifton Moor Ferruginous [illegible] from which [illegible] have been obtained during the last few years, and an [illegible] who has examined this neighbourhood [illegible] for [illegible] and the ease with which it can be [illegible] from the sea, a capable [illegible] to [illegible] Cumberland and Lancashire. It would be [illegible] to exaggerate this [illegible]. He added that—"There are two kinds of ore, the peroxide and the [illegible], the [illegible] averaging from 50 to 55 per cent., and the latter [illegible] to 45 per cent., and the [illegible] to 40 per ton. Cab. The Directors are advised that when these mines are fairly opened, and other necessary works executed, [illegible] will be produced at [illegible] per ton; and [illegible] of ore per annum may be raised. At the present [illegible].

3. The [illegible] Company extensive and valuable properties with the [illegible] of Cumberland have been wrought and [illegible] with enormous profits to the proprietors; I may be pardon to call attention to the following [illegible].

First, the mines to be worked by the Company are [illegible] of wards of 1,000 acres, are [illegible] with [illegible] of gold ore [illegible] and [illegible] [illegible] and [illegible] [illegible] [illegible]

ISSUE OF 5,600 SEVEN PER CENT. PREFERENCE SHARES,
WITH GUARANTEE BY THE PROVINCIAL GOVERNMENT OF SERGIPE, BRAZIL.

THE

BRAZILIAN SUGAR REFINERY COMPANY, LIMITED.

Authorised by a Decree of the Government of Sergipe, Brazil.

Incorporated under "The Companies' Acts, 1862 and 1867," and to be Registered in Brazil as a "Societe Anonyme," in conformity with the Laws of that Empire.

Capital, £50,000, in 10,000 Shares of £5 each.

Being 5,000 Preference Shares now offered for Subscription, 600 Preference Shares already appropriated, and 4,400 Ordinary Shares.

Interest at the rate of 10 per cent. per annum has been guaranteed by a Decree of the Government of the Province of Sergipe (Brazil), on a capital of 200,000$ reis (£20,000), which Guarantee will be applied to the payment of the 7 per cent. on the Preference Shares.

Deposit upon Application, £1 per Share; Payment on Allotment, £1 10s per Share.
The Balance of £2 10s to be paid on 1st February, 1872.

DIRECTORS.

Edward H. Bramah, Esq., Director of the Recife and San Francisco (Pernambuco) Railway Company (Limited).

AUDITORS—Messrs Good, Daniels, and Limbert, Public Accountants, 7 Poultry.

SOLICITORS—Messrs Masterman and Hguhes, 26 Austinfriars, E.C.

SECRETARY (pro tem.)—William Tadman, Esq.

TEMPORARY OFFICES—15 New Broad street, London, E.C.

The object of this Company is to construct and work a sugar refinery and rum distillery at Aracaju, the chief port and capital of the rapidly improving province of Sergipe, situated on the sea board of the Empire of Brazil.

The Government of Sergipe, being desirous of securing to the province and the country generally the advantages of home manufacture, has granted a concession for the establishment of a sugar refinery and rum distillery, with a guaranteed interest at the rate of 10 per cent. per annum upon a capital of £20,000—(such interest to commence from the date of the first expenditure on the works). Out of this guarantee it is proposed to pay a minimum dividend of seven per cent. per annum upon a capital of £28,000, to be represented by 5,600 preference shares.

The revenue of the province affords undoubted security for the punctual fulfilment of the Governmental guarantee.

The export of raw sugar from the province from 1859 to 1869 amounted in official value to £2,960, representing 12,336,371 arrobas (176,234 tons), and the rum exported during the same period amounted to 12,406 pipes, official value £68,380.

These statistics are verified by the Provincial Government's Report of 1870, published in the *Official Gazette* of the 19th July, 1870.

Sergipe is peculiarly adapted for the economical and profitable working of a sugar refinery, which, when established, will virtually possess the attributes of a monopoly. Large breadths of the finest land are devoted to the cultivation of the sugar cane, the soil, under the influence of a genial temperature, being remarkably prolific. A similar refinery at Bahia is now in successful operation.

Upwards of 500 estates are now in active operation throughout the province, for the production of raw or Muscovado sugar, the quality of which is well known for its fine grain, strength, and dryness. From the want of a refinery nearly the whole of the raw produce of these estates is exported to other markets, and refined sugar is reimported for consumption at Sergipe.

Constant supplies of fresh raw sugar can be obtained, the saccharine yield of which being undeteriorated by fermentation (the invariable effect of a long transit) is proportionately large.

An estimate of the revenue which the Company will probably realise from the refinery and distillery has been prepared and carefully scrutinised by Mr J. Jackson, civil engineer, who is practically acquainted with the process and results of sugar planting and refining.

A copy of his detailed and analytical report accompanies the prospectus.

It will be seen that Mr Jackson has based his calculation upon a monthly consumption of 200 tons of raw sugar, which, when converted into refined sugar and rum, will yield a net daily profit of £81 7s 8d, and reckoning 300 working days in the year, the total yearly profit will amount to £24,415.

From the result of these estimates, the shareholders may justly expect to receive dividends largely in excess of the guaranteed interest.

A provisional contract has been entered into with an experienced English contractor for the acquisition of the concession, with all its rights and privileges, the purchase of the land, the construction of the buildings, the supplying of the machinery, and the delivery over to the Company of the refinery and distillery, in full working order, within a period of twelve months, for £15,000 cash, 600 preference shares, and 400 ordinary shares fully paid-up, convertible into preference shares in the event of the creation and issue of preference shares beyond the original 5,600 such shares, and with the right on the part of the contractor to a further 1,600 ordinary shares in the event stated in the said contract. All the ordinary shares are by the Articles of Association convertible into preference shares in the events therein mentioned.

Applications for shares, accompanied by a payment of £1 per share to the Bankers, must be made on the annexed form. In the event of the full number of shares applied for not being allotted the balance of the deposit will be credited to the payment due on allotment, and should no allotment be made the deposit will be returned in full.

The following contracts affecting the Company have been entered into:—

Concession or Governmental Decree, No. 680, and contemporaneous contract between the Government of Sergipe and Pedro Pereira d'Andrada, dated respectively the 10th and 16th of June, 1864.

Contract above referred to for the purchase of the concession and land, and the execution of the works, made between Mr William Malam of the one part and the Company of the other part, dated the 11th day of July, 1871.

Copies of the above documents, and English notarial translations of the concession and Government Contract, together with the Memorandum and Articles of Association, can be inspected at the Offices of the Company.

THE BRAZILIAN SUGAR REFINERY COMPANY, LIMITED.

FORM OF APPLICATION FOR PREFERENCE SHARES.

To the Directors of the Brazilian Sugar Refinery Company, Limited

GENTLEMEN,—Having paid to your Bankers the sum of £ being a deposit of £1 per share, I request that you will allot me preference shares of £5 each in the above Company upon the terms of the prospectus and memorandum and articles of association; and I agree to accept the said shares, or any smaller number which you may allot to me, and to make the payment of £1 10s per share on allotment, and to become a member of the Company; and I request you to place my name on the register of members in respect of the shares which may be allotted to me.—I am, Gentlemen, your obedient servant,

The INVESTOR'S MONTHLY MANUAL for June, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies, New Companies and New Capital. Prices made up to June 28.

Advertisements for next Number, to be published on July 29, must be sent to insure insertion on or before July 27.

OFFICE—340 Strand.

WHY MONEY IS CHEAP.

There often is some mystery about the money market. It is not easy to say, or at least not easy to show palpably, why money is cheap. But in this case there is no difficulty at all—the accounts of the Bank, recently published, show that there is so much more of it. In the following table we give the deposits in the Bank of England, in the three largest Joint Stock Banks, and in one Discount Company, and the result is an increase upon last year of fifteen millions:—

	Deposits at 30th June, 1871.		1870.		Increase
	£		£		£
Bank of England (July 5)	34,220,000	.....	28,061,000	.....	6,159,000
London and Westminster	22,765,000	.....	19,600,000	.....	3,165,000
London Joint Stock (inc acceptances)	14,617,000	.....	12,812,000	.....	1,805,000
Union	12,715,000	.....	10,050,000	.....	2,665,000
National Discount Company	9,570,000	.....	8,079,000	.....	1,491,000
	93,890,000	.....	78,612,000	.....	15,278,000

It is right however to say that some part of the apparent increase this year over last is owing to this—that last year all the dividends had been paid when the Bank of England account was made up, and this year only part. But still, after allowing for this, the aggregate increase in these five establishments is very large; and of course it is not confined to them, but their augmentation is only a specimen, though perhaps a favourable specimen, of the augmentation which has occurred in all banks.

With this great increase in the supply of floating capital we need not wonder that the rate of discount is only 2 per cent., or that the last weekly Clearing-house return has reached the enormous sum of 122,000,000*l*, or 22,000,000*l* more than the corresponding week of last year. Nor is there the same likelihood as lately that our floating cash may be diminished by a bad harvest, and consequent payments for foreign corn. On the contrary, the prospects of our home harvest are improved, and we may fairly hope that we shall not have to pay any such sums for foreign corn as would affect sensibly the value of money.

THE ARMY BILL AND THE MORAL OF IT.

The Lords, as we last week feared, adopted the motion of the Duke of Richmond, which, by those who voted for it, was meant to be an end to the Army Bill; but, as Lord Derby warned them, it is not really an end to it. In this particular case a constitutional way exists of setting the House of Lords aside, and of permitting the House of Commons, as representing the nation, to do that which it deliberately wishes. The Queen (whether by express statute or by inherent prerogative does not nowadays matter the least) has the power to abolish purchase without consulting anyone; and upon the advice of Mr Gladstone the Queen has done so without consulting the House of Lords. In consequence the House of Lords have only to consider whether they will or will not read the Army Bill a second time, which gives the purchase officers, in the main and for the most part, the best terms they can ask for, and especially the over-regulation prices; or whether they will reject that settlement, and leave the House of Commons and the Government to make another in the Army Estimates, which, being made under irritation, will certainly not be better for the officers, and may be a worse, and which in that shape the House of Lords must take as it stands, without being able either to alter or reject it.

Perhaps every unprejudiced person, who cares nothing for party and who only looks to main issues, will be glad of this conclusion. It is a great evil that any great institution—whether pacific or warlike—should be kept in a state of transition. The inevitable consequence is dissatisfaction and disorganisation, and the probable result is inefficiency. When by irrevocable decision an executive instrument is to be abolished, it is good that there should be no delay, and that it should be abolished at once. Everyone suffers from the delay, and no one gains. That the Army Bill should be rejected this year, that it should be sent up again next year, that then or in

a future year it should at last pass, is of no use to anyone. There cannot be two Sovereigns in one country. Our present Sovereign—the nation—as shown by immense majorities in the Commons, has wisely, or unwisely, chosen to abolish purchase, and is not likely to change its mind. And this being so delay is certainly useless, and may perhaps be dangerous.

It is already certain that the Lords themselves will think so—that they will in reality set aside the Duke of Richmond's amendment—that they will pass the Army Bill substantially, and in material particulars, as it stands; and, consequently, that the threatened conflict between the two Houses will be averted, and that the decision of the nation will be ratified. In a week or two we shall hear no more of this matter; on this subject, at least, there will be harmony and peace.

But there is one disturbing reflection. If it is right that we should be able to act, then it is not right that we should only be able to act so by *accident*. We say advisedly accident, for it is quite of that nature that an old power of the Crown should "turn up"—there is no other word—just when it was wanted, and should relieve us from the threatened dissension, and at once and without conflict obtain what we desire. If it had not been for this old power of the Crown—which a fortnight since no one mentioned, and few knew of—all our present politics would have been different. The House of Lords would have been victorious, the Army Bill rejected, the nation beaten. It cannot be right that a vast political result should depend on a disused prerogative, or an obsolete law.

Plainly we are wrong in what we are doing in this case, or we ought to be able to do it in all cases. If it be good to set aside and overrule the House of Lords on the Army Bill because the nation has really determined on it, we ought to be able to overrule and set aside all other cases when the nation has really determined. There is nothing exceptional in this instance except that we have now—and have not generally—the happy aid of a constitutional "antiquity." But there is no sound reason in this; the policy of a great living country like England ought to be ruled by present reasons and palpable arguments; it ought not to be at the mercy of archaic researches and the happy discovery of ancient powers.

Nothing probably would be more really useful than to decide that any conclusion which a certain majority of the House of Commons (say three-fifths or two-thirds) should come to deliberately and repeatedly should be passed notwithstanding the House of Lords and, as it were, over their heads. Their veto would then be like the very powerful veto of the American President. Everyone who has studied American institutions well knows that the President at Washington in his time is an infinitely more powerful person than our Queen. He can really reject, and does daily reject, the most important laws. And generally the veto is submitted to, because it is exercised upon subjects which the nation is not sure about, and which it does not care about. But the framers of that constitution have provided ultimate means of saving the whole nation from the arbitrary caprice of one man. A veto come to by *two-thirds* of Congress will overrule the President's veto, and enact anything in spite of him. Mr Johnson, who fancied he was a dictator, and could manage as he wished, was thus in a moment reduced to and kept as a cypher. He wanted to use *against* the will of the nation a power only given him *pending* the will of the nation, and was soon taught his mistake. And such should be the veto of the Lords here—a veto to be used for the nation and when it has not determined, and not a veto to be used in opposition to it and when it *has* determined.

No doubt it will be said that this proposal is contrary to the immemorial maxim of the English constitution, which requires for all legislation the equal concurrence of three independent powers—Queen, Lords, and Commons. But in fact the English constitution never did require, and would not have worked for a year if it had required, the uninfluenced agreement of three unlike political entities. There has always till now been a hidden secret of harmony. At first there was a latent understanding, as there is in Prussia now, that, at last and after full discussion, both Houses were to do what the Crown wished. And this understanding being latent and unwritten, the King had to be careful not to push it too far; he had really and in the main to act as the nation wished, and then he did not much mind Parliament. The Tudors understood this limitation, and therefore were in appearance despotic; the Stuarts disregarded it, and in consequence were disobeyed, decapitated, and discarded. Then in later times, and after the power of the Crown decayed, the uniting secret of the Constitution was the aristocratic structure of the House of Commons. Before 1832 the Lords and the Commons had so much in common, were so much representatives, in different ways and forms, of the same ruling body—the English gentry—that substantial protracted dangerous disagreement was impossible. But since 1832 the union, by kindred and species, has been lessening year by year; since 1867 the last Reform Bill has changed it into a contrast. Now, for the first time in England, there are two really potent and utterly dissimilar political bodies, whose agreement is necessary to everything, and who, as we see in practice, are almost certain to disagree on everything. Now, for the first time, we want an avowed means of making harmony, for till now there have been means most effectual, though unavowed.

It may be said that we have already such a means, that new peers could be created by the Crown of the requisite opinions, and so the two Houses made to agree. But in practice this power is so cumbrous and seems so revolutionary that it is never used. There is always an outcry and an alarm at the bare mention of it. What is wanted is a simple well-known easy mode of superseding the Lords in specified cases, not a violent and impossible mode of superseding them in all cases.

It may also be said, that it is better to abolish the House of Lords than to deal with it as we say. But we reply, that a two-chambered Monarchy is in England our ancient government; that in such a nation as ours it might shake peace and order to change it; that by confession of constitution makers and by all experience, a second chamber is the part of free governments which it is hardest to construct; that our present House does much useful work well; that especially it gives free debates by people who have no constituents and speak their minds (which in the growing uniformity of Commons is required more and more), and that it gives a supply of Cabinet Ministers—Foreign Ministers especially—who are not exhausted by the prodigious labour of the House of Commons, who can apply fresh minds to great matters—who, in the case of a Foreign Minister who works in secret, may save us from irretrievable blunders, whereas if exhausted he might make blunders. Having an ancient institution which is in many ways so useful—we ought not to abolish it because it does one thing wrong; we ought to make it do that one thing right.

We need not write further on this subject. We mainly desire to direct attention to two points. First, that either we are wrong in setting aside the Lords now, or else that we ought to be able, in similar cases, to do it upon system; that it should not depend on antiquarian chance;—and secondly, that the whole position of the House of Lords is now new; that now, for the first time in English history (since till 1867 there were still lingering traditions), are two most unlike bodies always required to agree; that it is especially for the Conservatives who passed the Reform Bill of 1867 to see what they have done, and not, as Mr Lowe said, "first change "the basis of everything, and then expect everything else to "go on without changes."

MR GLADSTONE ON THE IRISH RAILWAYS.

THERE is a certain feebleness in the request so constantly preferred by the Irish directors and the Irish Members that the Imperial Government should do something for the benefit of the railways of Ireland. They allege, and with truth as far as we know, that those railways as a whole do not pay; that one of the reasons for failure is the division of power, involving as it does the payment of 480 directors, 56 solicitors, and 70 engineers-in-chief; and that another is the absence of courage to try the experiment of fares reduced until they are more in accord with the poverty of the people. But they never bring forward any proof that the evils of which they complain could not, to some extent at least, be remedied by themselves without the intervention of the Treasury. Suppose the directors of the 24 Irish lines were to hold a meeting next week, elect a General Board for the government of the entire system, which is after all much smaller than the system ruled by the Board of the Great Northern, draw up a Bill for the fusion of their concerns, and place their own

appointments in the hands of the General Board, does anybody believe that Parliament would not ratify their action? It might submit the terms of fusion to Lord Cairns to see if they were fair, or it might ask the General Board to allow Government to select their chairman, and thus mitigate their absolutism; but it would certainly throw no obstacle in the way of an experiment so reasonable and so self-denying. Nor is there any *à priori* reason why such an experiment should fail. A Board of that kind would, they admit, save 32,000*l* a-year at once by removing superfluous officers, and probably twice as much by stopping local jobberies, while it would be far better able than the 24 Boards are to raise money cheaply and try the experiment of reduced fares. It would moreover be able to negotiate with Government, and might, with the consent of the shareholders, be invested with considerable powers for concluding any arrangements Parliament might approve. At present no negotiation or whisper of negotiation is so much as possible. The moment Government makes the slightest concession, every company thinks it is going to have a pull at the British Treasury, tries to make the best terms for itself, and rushes into the most extravagant demands. We all know what happened in the negotiation with the telegraph companies, and although the extravagant prices given on that occasion caused no loss to the State, the Treasury will certainly not be deluded into a similar bargain with the Irish railways. They must at all events fix and adhere to the price they will take before Parliament can be induced to to entertain their request.

That request, we may add, ought not to be heard in any other form than as an offer of sale. With the Premier, we are willing to believe that the State control of Irish railways might be exceedingly beneficial to the people, and possibly even to the Treasury; that, at all events, it is in Ireland that the experiment of State control might most beneficially be tried. If the experiment succeeded there, it would succeed anywhere. If it were found that with concentrated management and great reductions of charge, these badly made, badly managed railways, in a country comparatively poor, and among a population accustomed to travel on foot, could be made to return reasonable dividends, then clearly the purchase of an English system of railways might be more profitable still to the taxpayer, and one of the largest questions of our internal administration might approach solution. But it is quite clear that no such result is to be anticipated, either from an Imperial guarantee or from a Treasury loan. The first of those alternatives is the very worst which could be suggested to the State. It may be broadly stated that no guaranteed shareholder ever will watch over his business, and that a sum of money raised under a guarantee is almost invariably wasted, the security tempting the creditor to carelessness, the cheapness tempting the debtor to extravagance. The experiment has been tried on an enormous scale, and under most favourable circumstances in India, and the result is that the shareholders have been inattentive, and the directing boards expensive, so that, despite the richness of the soil traversed by the lines, and the huge populations which they affect, they have on the whole failed to return their guaranteed dividend. This has been the case in spite of the almost despotic power of control vested in the Indian Government, a power which the Irish members do not offer to Parliament, and without which we seriously doubt whether the Indian lines would have returned even their present very moderate dividend. Guarantees in fact in every form act as substitutes for good management, and it is good management which, as all the speakers on Friday week admitted, the Irish railways require. Human nature is so constituted that no average man will take trouble unless his interests require it, and it is not required from the holder of State guaranteed bonds.

As to a loan, we cannot perceive the excuse for such an application. It would no doubt enable insolvent lines to become solvent, because the State would charge less than individuals, and this would be a "relief to "Ireland;" but then so would a State loan to her municipalities, or her counties, or for that matter her embarrassed landlords. There is no end to applications of that kind if once the principle is admitted, no end to the engagements into which the State might enter with a country whose representatives are always patriotic, always prefer their own constituencies to the Empire, and are always ready to consider any demand for repayment as a harshness of which, if Ireland were independent, she would not be guilty towards herself. We are quite ready to admit that the circumstances of Ireland are in some respects exceptional, and agree with the Member for Bodmin and Mr Gladstone—"that if he found there was a "practical accord among the Irish Members on this subject, "and that their demands involved nothing intolerable, he, for "one, would waive his own personal disinclination, and would "be ready to give his assent to a reasonable measure." But that measure must be one in which State control shall be coterminous with State assistance, and untainted by any theory of the right of Irish speculators to keep all their profits, and throw all their losses upon the Imperial Treasury. Irish shopkeepers might as well ask for State aid as Irish shareholders, and affected as they are by British competition, would have a far more plausible, though still an unfounded, claim to such assistance. The Irish shareholder demands sympathy, and should have it; but a proposal to tax the Great Eastern shareholder for his benefit could never, under any circumstances, be just. If the Irish railways are badly off, they are not worse off than the London, Chatham, and Dover, which has been extricated from its troubles—as far as its manangement goes—without the aid of a shilling from the Treasury in grant, or loan, or guarantee.

THE MONARCHY AND THE PEOPLE.

It is obvious from Mr Disraeli's well-considered and very strong language on Thursday night about the "avowed and "shameful conspiracy against the privileges" of the Lords, that he regards what we may call the ornamental elements in the Constitution of this country as still exceedingly popular with the nation—or at least with the counties; and thinks he can get up some such an election cry as "the Prerogative "of the Throne and the privileges of the Peers," and make it really effective. We are hardly disposed to agree with him that the time is at all favourable for a sensation election to be fought on issues of this kind. The country will hardly prove to be so sensitive and fastidious about the rights of the Lords as to condemn the Ministry for using definite administrative authority, for the exercise of which they and they alone are responsible, for a purpose which is not exactly approved by the House of Lords. And still less does the moment seem very favourable for a sensation cry about the royal prerogative and the sanctity of the throne. From causes which it is not difficult to define the Queen has done almost as much injury to the popularity of the Monarchy by her long retirement from public life as the most unworthy of her predecessors did by his profligacy and frivolity. We are not saying, and do not think, that the Monarchy is by any means an institution without deep roots in the country, or that it could be destroyed without the gravest possible mischief to the stability of the British Government, especially in the rural districts, where scarcely anyone has yet realised how very little substantial meaning, as distinguished from external show, the throne still has. Undoubtedly names are great powers in the world—great imaginative powers—and the name of Royalty has still a wonderful imaginative hold over the rural part at least of the population. But though we do not underrate, and should be very sorry to underrate, the attraction of cohesion which the influence of the Crown exerts over the British people, we cannot for a moment think that, without a formal attack upon it, this would be a happy juncture in which to get up and propagate that *thrill* of loyal feeling on which Mr Disraeli seems to count when he so carefully mixes up the sanctity of the prerogative with the privileges of the House of Lords. In point of fact there never has been a moment when what we may call the *showy* parts of the Constitution have been in less general favour than they are now. The Queen has been little seen in public, and it is of the essence of the showy parts of the Constitution to acquire importance and popularity by being shown. But not only has the Queen been absent from public life, she has not even kept up by delegation the popular idea of the splendour and importance of the throne. She has allowed royal guests to go to hotels instead of offering them her palaces. She has in fact lived too much like a sensible and economical private person who was tired of the grandeurs of life; and of course the nation has not been slow to observe that things have gone on quite as smoothly without a great display of majesty as they did with it. Moreover a considerable section of the people has begun to grumble that so many royal personages are highly paid by the people for doing nothing. With every new proposal to grant a dowry or

an allowance, this cry has become louder. In the House of Commons only three members voted against the Princess Louise's dowry, but a great number of popular meetings were really virulent against it, and meant what they said. The same cry has now arisen again about Prince Arthur's allowance, and last week a very crowded meeting at Birmingham came to the resolution that the Queen should support her own children, if they were not to earn their own living. Last week too the irritation felt and expressed in relation to the Prince and Princess of Prussia's stay at the German Embassy in London, instead of being entertained by the Queen, was very keen, and the general impression growing up has been of this nature, that the nation pays for a pageantry which it does not get, and which it finds that it can do very well without, but which, at all events, it objects to pay for so long as it does not get it. And this feeling, observe, though it is much stronger among the working-class Radicals, where the objection to being taxed for what is not useful to the nation and the objection to the inequalities of society are keenest of all, than it is among the rural population, is by no means limited to working-class Radicals. The middle class objects to a well-endowed throne that is not splendid. Even the country party feel a certain chagrin that an institution of which they have been accustomed to speak so grandly, is so little heard of. Universally the effect of simplicity and frugal and retiring habits in the tenant of a throne—where simplicity and frugal and retiring habits are out of place—has been discouraging. Mr Disraeli could not have a worse moment in which to be loud-mouthed against the party use of the royal prerogative. The point on which the country is likely to be sensitive is neither "the privileges of "the Peers," nor "the prerogative of the Crown." We do not say but what a direct and formal attack upon either might provoke warm and even popular opposition in many quarters; but we do say that the present moment would be exceedingly ill-chosen for inflaming the country with mere suspicion on either subject. The showy parts of our Constitution have not been very visible lately, and have not been at all visible on the popular side of any question. There is a disposition to guage them by the influence they have visibly exercised, and that influence has not been great. No maxim is more certain than that those people at all events who are chiefly known as the constituent elements of a pageant are likely to be valued very much in proportion to the value they set upon themselves. The Queen has had the unfortunate good sense to appreciate modestly her significance in the pageant of the British State, and her people taking the cue from her are very much disposed to appreciate it equally modestly, and to give a practical point to their criticism by complaining of the cost.

It is hardly at such a moment as this that Mr Disraeli can propose with any advantage to denounce Ministers for making a strained and excessive use of the prerogative of the Crown. The prerogative of the Crown is hardly more real a cry just now than the divine right of kings. The phrase is understood, but politically not respected. The Queen's prerogative has been for some time so much confined to social matters, and so little exercised even then, that to turn it into a popular watch-word would indeed be like beating a dead horse. The social power of the Throne is still a reality, but even it must be more used and displayed if it is to remain so. While the great towns are asking bitterly what are the means of Prince Arthur's mother, and referring him to her for an allowance, and inquiring why the Prince and Princess of Prussia stay at Prussia House instead of Buckingham Palace, it is hardly a fortunate moment for Mr Disraeli to raise a cry that Mr Gladstone is a tyrant because he has got the Queen's signature to a royal warrant abolishing purchase. The Monarchy is still strong, but it has not any redundant stock of popular grace on which to draw for the purposes of a cry of that kind. The people would be very apt to reply that the only proper use of the royal prerogative is the use the Queen, to do her justice, actually makes of it—namely to place it absolutely at the disposal of the Cabinet.

BUSINESS NOTES.

The Finance and Revenue Accounts.—The Fifth Report of the Select Committee on Public Accounts informs us that on next publication the Finance and Revenue Accounts will appear in a greatly altered form, the Committee having sanctioned various suggestions made respecting these accounts by Mr Foster, the permanent official at the Treasury, who has charge of this department. Most of the suggestions, we are happy to say, are such as will meet with general approval. Mr Foster in fact simply proposes to sweep away altogether certain accounts which are purely confusing, both because they exhibit mere details of Exchequer management, and because they are couched in ambiguous technicalities of expression which outsiders cannot comprehend. We should not commit ourselves to a full approval of all the changes without having a new issue to compare with the old, but in general they are apparently in the right direction. We must make an exception however as respects one of the principal changes to which the Committee, we fear, have been somewhat rash in giving their approval. This is the proposed abolition of the distinction between the various parts of the United Kingdom in the accounts. At present the accounts for Great Britain and Ireland are given separately, as well as the totals for the United Kingdom. Instead of abolishing the distinction, we should think that as regards receipts at least the proper course is to distinguish not only between Great Britain and Ireland, but between England and Scotland. So long as the three divisions of the United Kingdom are kept distinct for so many purposes, it is useful that, as far as possible, Imperial finance should also be exhibited separately. It furnishes information which may be combined with other knowledge which we have respecting the population, industry, and habits of the people of each section. Of course there would be no use in giving such figures if they were utterly fallacious, and Mr Foster almost affirms that they are so. He states that such are the ties between the two countries, that the expenditure on Imperial account in each country does not represent the real expenditure for its benefit, and that the receipts of taxes are also mixed up, money being received in one country which is really on account of another. But admitting the validity of the plea as regards expenditure, we take leave to doubt whether there is any such difference between the revenue received in one country and the actual receipts on its account, as to make the former figure utterly fallacious, or anything but an accurate enough figure for ordinary statistical purposes. A portion of our taxation is direct, or levied upon property actually situated within one or other of the three kingdoms, and as respects indirect taxation, so excellent are the expedients now devised for effecting the transit of goods in bond, that we doubt whether any material portion of the revenue is raised in one country on account of another. The principal cause of error will probably be in the income tax, the duty on public salaries and the interest of the National Debt being mostly levied in London; but we believe that no such error could arise here as would not be easily allowed for in many statistical computations. Altogether the figures are good enough to be given *quantum valeant*, and we hope that not only will the information now given not be omitted, but that the distinction between England and Scotland which formerly existed will be restored. While writing on this subject we may add that much good would be done by looking up the old accounts between 1822 and 1850, and restoring a great deal that has been from time to time omitted. Especially in the matter of receipts, a great deal of detailed information, for which we must now search the Customs and Inland Revenue reports, could very well be supplied here as subordinate to the general account of the receipts. At present besides there is much information which might be given that is not given at all, because the Customs year terminates on the 31st of December instead of at the end of our financial year. The perplexity in referring from the accounts to the reports will be familiar to all who have ever tried to analyse the sources of our Imperial revenue. Mr Foster promises that advantage will be taken of the space saved by his proposed changes to give additional information, and we trust the point we have mentioned will not be forgotten.

The Mode of Stating Bank Dividends.—We have again to call attention to the peculiarly cumbrous form in which several of our leading banks state their dividends. Half-year after half-year comes round, and though the grievance is one which is much talked of and felt, and public remonstrances are often made, bank directors persist in their old ways. The evils we refer to, as is well known, are two in number—the statement of the dividend as so many shil-

lings per share, and the division of it into dividend and bonus. Both modes of expression conceal more or less from the public what the dividend really is. Business men can of course translate the technicalities into the recognised and general form of so much per cent. per annum, but hundreds of people have investments in the leading banks who are not men of business, and who are puzzled by the mode of statement so foolishly adopted. Even as regards business men, the neglect to use a mode of expression which would be at once intelligible is most mischievous, and we are certain that more than one bank has its shares quoted at a less price than would otherwise be the case. The peculiarity of the question is that no defence can be imagined for the condemned practices. To say so much per share can of course convey no more information to anyone than so much per cent., while it prevents comparison with all other dividends. Again to divide the dividend into "dividend and bonus" is the more puzzling, because the "dividend" is usually stated at so much per cent. per annum, and the bonus simply at so much per cent. So puzzling is this that we have found very intelligent people in other respects, though not business men, anxious to know whether the London and Westminster Bank, which has a dividend of 6 per cent. per annum and a 6 per cent. bonus, pays only 12 per cent. Of course it is well known to pay 18, but the doubt we have stated has puzzled some of its shareholders. We are certainly much astonished at the leading joint stock bank perpetuating a barbarism of the kind. There might be some reason for speaking of an occasional division as a bonus, as something that shareholders were not to expect annually, but where the bonus is regularly the main part of the dividend the distinction is as purely ridiculous as it is in fact misleading. We hope that another dividend period will not come round without some of the offending banks abandoning their misleading announcements, and substituting a simple statement according to the recognised form of so much per cent. per annum.

Railway Extension in the Metropolis.—The report of the South-Eastern Railway, just issued, contains an interesting account of the proposed scheme for connecting its Charing Cross extension with the Midland and London and North-Western systems — in other words, the proposed "Euston, St Pancras, and Charing Cross Railway." From the statement made, it appears that there has been considerable progress with the arrangements which will be necessary to enable the promoters to carry through their design. By an agreement which is being settled, the South-Eastern are to pay 20,000*l* a year in commutation of tolls for their through traffic on the proposed line. It is farther stated that the Midland will pay 30,000*l* a year for a similar privilege, while provision is made for admitting the London and North-Western to contribute. These payments secure to the new company a considerable income, while by the agreement with the South-Eastern they are also to obtain a toll of ½d per passenger for all local traffic, except at the Strand Station, where it will be ¾d per passenger. As the new line will intersect the New road, Oxford street, and the Strand, the local traffic it is anticipated will be very great, while the public convenience of such a line in permitting communication between busy parts of London and the suburbs requires no statement. The same report states that the South-Eastern has finally concluded an agreement with the London, Chatham, and Dover for a short junction between the two lines, and the agreement, there is little doubt, will be sanctioned by Parliament. In the results, beside the local accommodation afforded, the South-Eastern "will obtain access to "all the principal stations in the Metropolis, as well as to "the London and North-Western, Great Northern, Midland, "Great Western, and Great Eastern systems"—the other companies with London stations obtaining from these and similar lines, either in operation or in progress, very similar advantages to those which the South-Eastern will enjoy. We fear that some of the schemes may be premature and costly, but their great benefit to the public and ultimate profitableness appear to be well assured.

The Ottoman Railway Company. — Vice-Chancellor Malins has just given a decision in the cross suits raised as to the appropriation of the sum of 130,000*l* paid by the Turkish Government to account of its guarantees of the Ottoman Railway. The proceedings disclose the injustice inflicted upon the unfortunate shareholders and creditors who have trusted the guarantee of the Turkish Government; and which injustice, according to the decision the Vice-Chancellor felt compelled to give, the payment to account will not mitigate except in one favoured instance. There are three or four claimants upon the fund—the shareholders, two classes of debenture-holders, and certain unsecured creditors who finally advanced money to complete the line; and the Vice-Chancellor has decided that the first debenture-holders have a prior claim, subject to an inquiry as to what advances were really made by the unsecured creditors to complete the undertaking. The Turkish Government owing 550,000*l*, which would be necessary to satisfy all claimants, it will be perceived that giving priority to the first debenture-holders, who claim 250,000*l* with 6 per cent. interest since May, 1861, prevents any of the other claimants from getting anything. And the disposition of the money is the more annoying, because the Turkish Government had given a fresh guarantee in order that the second debentures might be raised. Although there seems to have been little doubt in the Vice-Chancellor's mind as to the law of the case, the priority of the first debenture-holders over all the funds of the company being quite clear, yet the fact is unaltered that the Turkish Government is equally in default to the various debenture-holders and shareholders of the company, and that morally the payment to account should be equally distributed. The most interesting aspect of the case to the public however is the explanation it furnishes of the stoppage of railway enterprise in the Turkish Empire. The company may have been to blame in undertaking at first more than they were able to perform, but the line was at length made, and there is no excuse for shirking out of the guarantee on pretext of delay in completion. Time is not so very essential in such contracts. Any other technical objections to the validity of the guarantee, when the conditions have been substantially complied, with are equally disreputable. So long as such a case as this can arise, we may be sure it will not be easy to find money for making Turkish railways. The wonder is that such a Government can borrow at all, even directly. The distinction between a direct obligation and a guarantee is only one of form, and a State which repudiates the one is not far from repudiating the other.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending July 15 :—

	Receipts of Week Ending July 15.
	£
Customs	363,000
Excise	476,000
Stamps	229,000
Taxes	5,000
Income tax	14,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	14,378
Total	1,101,378

The total receipts of the previous week were 896,516*l*.

The Exchequer issues of the week on account of expenditure were 862,377*l*, viz. :—

	£
Interest of debt	700,000
Other charges on Consolidated fund	62,377
Supply services	100,000
Telegraph services	nil.
	862,377

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on July 8	819,692	933,219	1,752,821
— July 15	883,125	944,797	1,827,922
Increase	63,523	11,578	75,101

The other receipts to date were 100,700*l*, the other payments were 264,600*l*.

Agriculture.

BREAK IN THE CLOUDS.

A MORE beneficent change in the weather than that which has taken place in the Midland counties since last Saturday (15th July) morning has seldom been experienced. For three weeks previously scarcely twenty-four hours had passed without rain, and certainly three days had not gone by without the occurrence of very heavy rain. Gradually, however, the temperature had become warmer, until on Friday, the 14th July, a warm morning was succeeded by a very wet afternoon, and a night in which the fall of rain may well be termed a deluge. From thence improvement commenced, and since the weather has been warm and dry, with fair hope of its continuance. Much hay has now been carried in fair condition, though its long exposure to wet has considerably lessened its value. In the Midland districts many of the meadows were late, and the persistent rains rendered farmers unwilling to begin grass cutting, so that at the end of the past week fully three-fifths of grass land remained uncut. The grass thus became somewhat old but extremely heavy, and with a fortnight's continuance of fine weather we shall have an abundance of useful hay—much to be desired, as the stocks of old hay had been reduced into very narrow compass. It is remarkable that everywhere a great abundance of clover, trefoil, and wild vetch is observable in our meadows. This will improve the hay as provender where well saved. Although the rain has proved injurious to part of the hay crops, it has not been at all mischievous to the growing grain crops. On the contrary, wheat, oats, and barley have alike been improved by the rain, which was really required to fertilise the soil, the rainfall for the past two years having been so greatly deficient. The wheat is producing a good deal of straw, but it has not been much laid, while the oats and barley—relatively heavier crops—in some places rather beaten down, will quickly recover with fine weather. That the harvest will not be an early one is certain, but with warm days and dewy nights we do not believe that it will be a very late one.

That all the crops of grain and pulse will be largely productive is certain, while the growth of after grass and roots secures an amount of provender for livestock. The saving of hay and straw from a grassy summer and autumn is no inconsiderable benefit to the farmer. This has already told in the price of stock, sheep and cattle (the former especially) having both advanced within the past week.

Everything now depends upon reasonably fine weather for the next six weeks. With that the season of 1871 will not prove a bad one for the English farmer.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, July 21.

The return of the Bank of France for the week ending July 20, shows the following changes compared with that of last week:—

INCREASE.	francs.
Cash in hand	11,250,000
Private accounts	23,000,000
DECREASE.	francs.
Bills discounted	31,000,000
Notes	46,250,000
Treasury balance	30,750,000
Advances	250,000

PARIS, July 20.

In truth, France is the country of theatrical surprises. This has been demonstrated times without number in political affairs, and now we see it in economic questions. As is known, she, in the sorest financial straits in which nation was ever placed, could put the hand on nothing better than on M. Thiers, who, with the shallowness, obstinacy, and infatuation of extreme old age, proclaimed himself, "what he had always been, a Protectionist," and on M. Pouyer-Quertier, a sharp Norman cotton-spinner, who saw that in the mode of fixing taxes there was the means of making certain industries gain enormously at the expense of the whole community. These two wise and worthy men, just emerged from a conflict with the workmen of Paris — a conflict, of which the result was the killing of many thousands by one side, the burning of public buildings and private houses, followed by rankling animosity on the other side—had the cool audacity to propose that the greater part of the new monetary burdens the country has to bear should be thrown on those workmen of Paris, or their fellows in manufacturing towns, and on the peasants who till the soil; and that the classes who possess acquired wealth should pay no more per head than those poor wretches. In a political point of view their proposition was (as has already been remarked in your columns) like pumping petroleum on fire as the firemen of the Commune are accused of doing; in an economic point of view it was, as all your readers know, and as everybody who has examined the commercial reforms in England sees, absurd and idiotic. But such is the extraordinary *prestige* that in this country the "Government" possesses, that the most extravagant measures presented by it obtain favour,—witness, to cite one example out of a thousand, the reception given to the proposition of the ex-Emperor—a statesman of the Thiers and Pouyer-Quertier sort—to declare war on Prussia. Accordingly there was every reason to expect that the project of the two Ministers would, in spite of its monstrosity, pass as a matter of course. From Lyons, at whose industry it struck, from the seaports, whose commerce and shipping it impeded, from the agricultural districts, to which it threatened to close foreign markets, and from manufacturing towns, to which it seemed iniquitous, there came loud and indignant complaints; but they obtained little attention from the Chamber. M. Thiers and M. Pouyer-Quertier on their part even showed coolness for them by suddenly compelling the Assembly to adopt, without deliberation, part of their project (see last ECONOMIST). And that they would force on and carry the rest, in spite of all opposition, no one doubted.

But here comes one of those strange theatrical *coups* that occur in French affairs. When everybody was expecting that the Committee on the Budget, to which the Assembly, as the way is, had referred the remainder of the ministerial project, would recommend its adoption, lo! it has done the exact contrary. The part forcibly adopted by the Chamber provided for the taxation of coffee, sugar, tea, petroleum, cocoa, and other articles of general consumption; the part sent to the Committee imposed taxes of 20 per cent. on the raw materials of textile industry—cotton, wool, hemp, flax, and silk. These taxes the Committee has rejected by 17 votes to 5. It has also rejected a subsidiary proposition to reduce the duty on silk from 2 to 5 per cent., on condition of no drawback being allowed. The intention of the Government was to grant drawback to the articles taxed 20 per cent.

The vote of the Committee has, as may be imagined, created great sensation in the Parliament, and it will, we may be sure, be applauded throughout the country, with perhaps the exception of the industry with which M. Pouyer-Quertier is connected, and of one or two others. It is really important not only because it preserves maritime commerce and manufacturers from serious perturbation, but because it prevents the pure and simple re-establishment of Protectionism as it existed previous to the Treaty of Commerce—a re-establishment which that gentleman and his associate, M. Thiers, are seeking. Unfortunately, there is a dark side to the vote of the Committee. That body, whilst refusing to tax raw materials, is, it appears, not indisposed to tax the manufactured product—so much on a piece of silk, so much on a piece of calico or cloth. Such an impost, however, would reduce consumption, and would consequently be injurious to labour—the great thing to be encouraged at all times, and especially in a country in the position in which France stands. It would too of course be followed by an equivalent tax on foreign products of the like kind, and would thereby deprive treaties of commerce of much of their efficacy, the treaties containing clauses that permit such taxing. Added to this, the practical application of the impost would present considerable difficulty, and would be very expensive.

M. Thiers and M. Pouyer-Quertier are stated to be much irritated at the rejection by the Committee of their famous project, and they threaten to appeal to the Assembly to maintain it. But as public opinion will decidedly be with the Committee, the Assembly can hardly be so imprudent as to run counter. And if, whilst deciding against the Government in this affair, it would also decide against it in the matter of an income tax, it would preserve the finances from embarrassment, and would give calm and prosperity to the country.

In addition to its check before the Committee on the Budget, the Government has had to take steps which must have deeply wounded its Protectionist principles. It has had to present a Bill permitting foreign flags to take part in the coasting trade of France, which has heretofore been vigorously guarded as a sort of sacred monopoly. The reason of this measure is that railways cannot carry all the goods presented to them, and that consequently there are no means of sending away the huge quantities of wine that have accumulated in the producing districts, especially in those near the Mediterranean; and yet prompt removal is necessary, not only because holders want to turn their goods into money, but because they have need of room to store the yield of the approaching vintage. The Bill in question only proposes to permit foreign carrying coastwise to the 31st October next.

The difficulty railways have in meeting the public requirement is caused not only by the interruption of traffic during the war having caused large accumulations of goods, but by a vast number of railway waggons having been destroyed or seized by the Germans. In a recent debate in the Assembly, it was stated that there are at this moment not fewer than 10,000 vehicles in Germany, the property of French companies.

A decree of the Government establishes the extra duty of

3f 60c on wool imported by the land frontier from Nantes to Dunkirk, which was abolished during the war.

The Bank of France has not yet resumed the publication of its return on Thursdays—the most convenient day of the week, and that up to which the account is made. This is much to be regretted, especially as the transmission of the figures to London by telegraph is liable to error. In the return of last week it was noticed with regret that, compared with the week preceding, the new discounts presented a decline of more than 70,000,000f, putting them at a total lower than that at which they have stood since 1848 and 1849. But this falling off was compensated by an augmentation in the branches. It was also noticed with regret that at Paris the reduction of overdue bills did not amount to 9,000,000f. In the branches, however, it was proportionately much more considerable.

The following is the return of the Bank of France for the weeks ending the 13th of July and 6th of July, 1871, together with the corresponding figures of the previous account:—

	July 13, 1871. f c		July 6, 1871. f c		Sept. 8, 1870. f c	
Capital of the bank	182,500,000	0	182,500,000	0	182,500,000	0

The Bank has to-day reduced its rate of discount from 6 to 5 per cent., and the interest on advances from 6½ to 5½. It is thought that a reduction might have been effected much sooner.

The shareholders of the Bank held a meeting last Thursday and a complete report on the operations of 1870 was presented to them. This document has not yet been published. As soon as it appears it shall be analysed in the ECONOMIST. The long interruption of communications between the Bank and the branches prevented this meeting from being held sooner. In January during the siege, there was an assembly of the shareholders in Paris, but the directors could only speak of the transactions of the principal establishment in the last six months of the year.

On the Bourse the 3 per cent. has made a new advance, but it is of small amount, and the price the security has attained is beginning to be discussed. The following are the quotations of the week:—

	July 13. f c		July 20. f c

A decree of the King of Prussia, dated the 4th, authorises the Bank of Prussia to establish branches and agencies in Alsace and Lorraine, to put its notes into circulation, and to have them accepted in public offices. The decree moreover declares that the rights of the Bank shall be privileged over those of any other creditor, even in cases of bankruptcy, and that deposits in it can even be seized.

The Belgian Government is about to raise a loan of 50,000,000f, but has not yet decided whether to obtain it from bankers or by public subscription. The City of Brussels has just borrowed from a banker 15,000,000f for three years, at 4½ per cent.

The meeting of the shareholders of the South of Austria and Upper Italy Railways has been held, Baron Alphonse de Rothschild in the chair. The receipts of 1870 were stated to be 128,875,176f, being 3,972,197f less than in the year preceding, and accompanying this decline there was an augmentation of nearly 2,500,000f in expenditure. In definitive there was, after deduction of all charges, 9,509,368f for shareholders, sufficient to give 12f 50c, and a levy from the reserve was made to put the sum at 15f. The report stated that a loan of 157,815,000f was recently negotiated in London, to permit the company to repay the large advances it obtained from its bankers, and to regularise its position.

The Company of the Salt Works of the East (Anciennes Salines Domaniales de l'Est) distributes a dividend of 30f for 1870, of which 10f have already been paid, and the rest is now in course of payment. This dividend was entirely earned in the first half of the year. The buildings and mines of the company suffered nothing from the war. Part of the establishments of the company, among them that of Dieuze, are in the territory taken by Prussia; but if a tax be put on the salt sent from there into France, the company will have compensation in not having to pay import duty on the Prussian coal it uses.

The Franco-Egyptian Bank, which, as already announced, gives 13f 50c for 1870, realised net profits of 801,782f. In the accounts presented is the item "estimated depreciation of portfolio (bills, &c.) 456,174f."

The Sous Comptoir des Entrepreneurs, a bank for builders, called its annual meeting for 31st March, but political events prevented the holding of it. A new meeting took place a few days back, and the report stated that from the necessity of according delay to debtors it was not possible to fix a dividend in addition to the 5f 50c paid. The meeting was not attended, and resolved that a new assembly should be held on the 25th September to reconsider the matter. On the 30th June the bank held 2,137,338f of bills overdue.

The Company of the Halle aux Cuirs (leather market) of Paris, in the foundation of which English capital took part, reports that it sustained no loss in 1870, though it is not able to give a dividend. It has duly paid the interest on bonds.

The Company of the Steamboats that carry passengers on the Seine at Paris, realised in 1870 sufficient profits to give 30f per share, and to add about 350,000f to the reserve fund.

The Compagnie Generale des Marches (markets) is giving a dividend of 20f for 1870.

The Company of the Baths of Enghien, near Paris, reports that on the outbreak of the war its receipts entirely ceased, and that during the occupation of the village by the Germans its buildings and furniture sustained injury to the amount of 373,100f. Nevertheless the revenue of 1870 exceeded the expenditure by 26,708f, but no dividend can be declared.

The Mines de La Loire (coal) are giving 19f as dividend of 1870.

The Coal Pits of Carmaux are paying 24f for 1870.

The Financial Commission of Tunis announces that the public revenues and commerce having suffered from the recent events, it is not possible to pay completely the coupon due 1st July on the different securities, but that 6f 50c will be given on account. It adds, what seems very extraordinary, that payment can only be made at Tunis.

The following are the quotations of the last three days from the produce markets; they are per 50 kilogrammes when not otherwise stated, and are duty paid:—

COTTON.—At *Havre*, Oomrawuttee fair, 87f 50c and 87f; good ordinary, 90f to 91f; New Orleans very ordinary, 109f to 110f. Sales have been about 2,700 bales. The prices fixed by the brokers on Friday on the quotations of the week were—New Orleans, 110f; Oomrawuttee good ordinary, 90f; Tinnevelly ditto, 88f; Bengal ditto, 79f.

COFFEE.—At *Havre*, Hayti, 130f; Porto Rico, 135f; Costa Rica, 137f 75c; Rio, 127f to 130f; ditto washed, 138f; and in bond, 90f; Malabar, 86f; Wynaad, 139f; Ceylon, 124f; Gonaives, 135f; and in bond, 79f to 85f; Port de Paix, 132f 50c; Porto Cabello garbled, 142f 50c; Capitania, in bond, 78f; Santos, 132f; Manila, 137f. At *Marseilles*, by auction, Porto Rico, 139f to 141f 75c; Rio, 118f 25c. At *Nantes*, La Reunion pointu, 150f. At *Bordeaux*, La Guayra garbled, 147f 50c.

COCOA.—At *Nantes*, Para, 120f; Trinadad, 124f.

HIDES.—At *Havre*, Valparaiso drysalted, 87f; Monte Video salted saladeros ox, 75f; ditto cow, 71f.

PEPPER.—At *Havre*, Singapore, 155f. At *Bordeaux*, Penang, 160f; Mahé, 170f.

SUGAR.—At *Havre*, French West India, 58f, bonne quatrieme. At *Marseilles*, ditto, 35f 50c, bonne quatrieme.

WOOL.—At *Havre*, Russian unwashed, 217f 50c the 100 kilogs. La Plata lambskin, 210f to 230f.

OLEAGINOUS SEEDS.—At *Marseilles*, Calcutta black, 52f the 100 kilogs; Coromandel, 53f 50c; Levant, 69f. At *Havre*, Coromandel, 52f.

INDIGO.—At *Bordeaux*, sales of Madras and Kurpah, and at *Havre*, of New Granada, have been made, but the prices are not mentioned.

COPPER.—At *Havre*, Chili, good marks, 176f the 100 kilogs.

In 1861, the demand for money was moderate, and an early reduction of the Bank rate was anticipated. The first American War Tariff had just been published.

In 1868, money was still at 2 per cent. and accumulating.

In 1869, money was easy, and there was some surprise that the Bank rate had not been reduced the previous week. The Irish Church Bill had passed through the House of Lords with trifling amendments.

In 1870, the Bank rate was advanced from 3 to 3½ per cent. in consequence of the pressure at the outbreak of war, and money was becoming dearer in the open market. In view of the war a Neutrality Bill was being hastily passed through Parliament, to carry out the recommendations of the Neutrality Laws Commission.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 6,870,556*l*; in 1868, an excess of 5,676,959*l*; in 1869, an excess of 4,518,488*l*; and in 1870, a deficiency of 364,319*l*. In 1871, there is an excess of 8,878,739*l*.

DISCOUNT AND MONEY MARKET.—There is a moderate demand for money this week, and the supply continuing superabundant, the rates in the open market are a shade easier compared with last. The rates for short-dated paper were then 1½ ⅛, but the quotation is now 1½, and there have been a few exceptional transactions at a fraction below the latter figure. The demand at the Bank, as well as in the open market, has been moderate, and there is some difficulty in finding employment for money on the Stock Exchange.

There was some momentary apprehension in the middle of the week, on account of the announced withdrawal of 500,000*l* in gold on German account, the hint being likewise given that similar withdrawals were impending, but the apprehension was only momentary. There is so much money here, and bullion is arriving in such large quantities, that the market could well afford the loss of considerable amounts without any enhancement of the rates. The Bank account shows not the least sign of approaching weakness—the changes for the week being almost nominal or in the direction of increased strength. The total stock of bullion has increased 55,120*l*, and the reserve of notes 279,610*l*; and while Government deposits have increased 720,337*l* private deposits have decreased 821,914*l*. The

private securities have decreased 565,419*l*, and the Government securities have increased 419,229*l*.

The account of the Bank of France likewise shows increased strength. The cash has increased 440,000*l* in the week, and the circulation has diminished by 1,840,000*l*. Altogether the circulation has fallen about 12,000,000*l* since the publication of the accounts was resumed, though the total is still considerably above the amount in the hands of the public before the war.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months	1⅝	per cent.
Do 4 months	2	per cent.
Do 6 —	2⅛	per cent.
Trade bills—2 and 3 months	1¾ 2	per cent.
Do 4 months	2¼ ⅜	per cent.
Do 6 —	2⅝ 3	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	1	per cent.
Discount houses at call	1	per cent.
Do with seven days' notice	1¼	per cent.
Do fourteen days'	1½	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.

St Petersburg	...	6	...	6

The quotations for the week compare against those current during the panic period last year. We are unable to give a full quotation for Paris, as the dealings in the open market are as yet very limited.

THE STOCK MARKETS.—The upward movement which we have had to notice for the last two weeks continued almost unchecked until Tuesday, but since then there has been rather a strong reaction. The general depression appeared to begin simultaneously with a statement as to the withdrawal of half-a-million from the Bank on German account; but in many stocks there were signs of a reaction previously, and it was hardly possible but that a somewhat severe reaction would occur after the rapid rise which had taken place. The depression has been most general, and although in a great many cases there is no decline noticeable for the week, there are comparatively few stocks in which there is not a noticeable fall from the highest point that has been touched. This is especially the case in English railways, in which North-Eastern stock reached the high figure of 165 ½; but the price was not maintained, though the closing figure is still considerably above that of last week, and is much the highest which the ordinary stock of our principal home railways has lately reached. In the miscellaneous market, except as regards telegraph shares, the depression has been less observable, special circumstances still operating to maintain in good favour the various asphalte companies which are now so much dealt in. The feature in the foreign market is the weakness of the new French loan, which has hardly advanced.

As was the case last week, a good many new undertakings are announced, though the generality of the issues, we understand, have met with but a dubious reception.

ENGLISH GOVERNMENT SECURITIES.—There is hardly anything to remark in this department, except that the weakness here is obviously due to the state of dealing in the market, the circumstances tending to support English Government securities being stronger this week than last. Even the large withdrawals commenced on German account do not affect the superabundance of money, and the rapidly dropping price of wheat ensures the continuance of the permanent conditions on which cheapness of money depends. We should anticipate therefore that the reaction in English Government securities is only temporary, and that all the circumstances of the moment point to a steady rise. To-day there has been a slight improvement compared with the lowest point of the week, and the lowest quotation for the August account is 93⅞ ⅛, or ⅛ higher than last week, the money quotation being the same, viz. 93½ ⅝. The quotation for the September account is 93½ ¾.

The Metropolitan Board of Works invite tenders for a loan of 900,000*l*, to be consolidated with the stock now outstanding amounting to 2,593,673*l*. This consolidated stock bears interest at 3½ per cent. per annum, paid quarterly, is secured upon the general rating powers of the Board of Works, and is redeemable at par on the 6th of October, 1929, if not previously cancelled by purchases in the open market—Parliament having directed the establishment of a special fund for paying the dividends and redeeming the principal of the stock, and the Treasury controlling the sum raised by rates. Owing to their novelty, Metropolitan Consols have not yet received sufficient attention from the class of people who invest in English Government securities; but the security is as perfect as it can be, and although we had our doubts, on public grounds, of the propriety of the Treasury taking any charge in the matter, it is certain that the control of the Metropolitan Consolidated Rate by the Treasury is an excellent point for investors in the stock. By an Act of the present Session, trustees and executors who are authorised to invest in Government securities may take Metropolitan stock instead, unless there is a special prohibition. As Consols barely pay 3½ per cent. at present prices, and the present stock at par will pay 3½ per cent., the advantage in point of income as compared with Consols is appreciable, and the security is practically as good. Transfers and stock certificates are likewise free of stamp duty.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	93½	93⅝	93⅝	93½	5s to 10s pm
Monday	93½	93⅝	93⅝	93⅝	7s to 11s pm
Tuesday	93½	93⅝	93⅝	93⅝	7s to 11s pm
Wednesday	93½	93⅝	93⅝	93⅝	7s to 12s pm
Thursday	93½	93⅝	93⅝	93⅝	7s to 12s pm
Friday	93½	93⅝	93⅝	93⅝	7s to 12s pm

FOREIGN GOVERNMENT SECURITIES. — Notwithstanding the recent active dealing the rise in this department, except as respects French securities, was not so marked as elsewhere, and the arrest to the upward movement has given rise to no considerable fall of prices. The fall established in the French loan up to Thursday was only fractional, while Rentes have rather improved, and in other securities the changes for the week are but small. In some classes of securities in fact, particularly Turkish and Spanish, there has been a good deal of buying for the rise, the upward course in Turkish being assisted by a positive statement in the *Times* that Messrs Dent, Palmer, and Co. have positively contracted for a new loan of 5,700,000*l* on the security of the Egyptian tribute. The loan it is believed secures the dividends for a good many months to come, and this is considered a long future with regard to such stocks as Turkish. The rise in Spanish is due to some belief in the probable financial improvement of that country and would doubtless be much stronger but for the checks the Cortes have placed on the financial proposals of the Government. To-day there is no particular feature to record, the market continuing flat, with little business doing. Spanish are again fractionally better; Turkish 5 per Cents. of 1865 are a fraction lower, though they still close at last week's figure; and the scrip of the new French loan is ½ better. Peruvian 6 per Cents. of 1870 have also fallen fractionally. It will be seen that altogether, as we have said, there is hardly any noticeable fall for the week, and it is remarked that there is nothing in the tone of the market to show that there has been anything more than a temporary check, or that prices will not shortly once

more advance. A scarcity of stock similar to what was felt at last settlement is also anticipated at the next.

The following is the statement in the *Times* with respect to the new Turkish loan:—"The new Turkish loan is expected to be introduced next week by Messrs Dent, Palmer, and Co., by whose firm the first loan secured by the Egyptian tribute was negotiated in 1854. The amount will be for 5,700,000*l* nominal, in a 6 per cent. stock, with 1 per cent. sinking fund, secured by the available surplus of the Egyptian tribute, which the Khedive has formally engaged to transmit for the purpose periodically to the Bank of England."

ENGLISH RAILWAYS.—Early in the week the buoyancy in this department continued under the influence of an expectation of good traffic returns, accompanied by reports as to the dividends on particular lines. The rise in North-Eastern was most remarkable, the stock having advanced from 159-60, to which it had previously risen somewhat rapidly, to the high figure of 165½. Other lines however, particularly Caledonian, London and North-Western, and London and South-Western, showed important improvements. Notwithstanding a general depression which set in on Wednesday a large part of the improvement has been retained, and this is obviously the case as compared with last week. On Thursday the event in the market was a heavy sudden decline in Metropolitan District Preference, which have been very weak since the publication of the traffic returns, after the opening of the Mansion House Station. Metropolitan, on the other hand, have been strong, as the abstraction of traffic from it by the District line has been much less than was reckoned on. To-day there has been a continuance of the general depression, though no farther fall of general importance has been established. Metropolitan District Ordinary stock, in sympathy with the fall in Preference, has been particularly heavy, and there is a decline of 3 for the week, notwithstanding that the closing price is better than the lowest of to-day. In both Preference and Ordinary stock sales have been greatly pressed, disappointment in the traffic continuing to have a great effect.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	97½ 98	.....	98½ 9	+ ½

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending July 16 to 821,833*l*, being an increase of 42,580*l* on the corresponding week of last year. The principal increases are—London and North-Western, 9,499*l*; Midland, 7,088*l*; Great Western, 4,540*l*; North-Eastern, 4,275*l*; Lancashire and Yorkshire, 4,273*l*; and Caledonian, 3,509*l*. The following shows the details in each case both for the week and for the aggregate of the half-year to date:—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half year to date. Amount.	Inc. or Dec. on Correspndg. per. in '70.

*North British	36,717	+ 1,726 ...	737,579	+ 38,639
	821,833	+42,580		

* In these cases the aggregate is calculated from the 1st of February.

With regard to the conveyance of coal between the northern collieries and London, it is announced that a company is projected for the conveyance of coal by sea upon an improved principle, at the rate of several shillings per ton less than is now charged either by sea or land. The project is one of some interest to the railways between the north and London, as they are already known to be losing by the present insane competition a great deal of profit which they would otherwise receive. But the new competition threatened, whatever it may come to, appears to be as yet of rather a speculative character, though it is on the whole a matter of astonishment that the competition of railways with water conveyance over so great a distance is so powerful as it is.

FOREIGN AND COLONIAL RAILWAYS.—The following shows the changes for the week in this department:—

Foreign.	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Antwerp and Rotterdam	13¼ ½	.....	13¼ ½	+ ⅛

Tenders are invited for an issue of 100,000*l* 7 per cent. debentures of the Central Argentine Railway Company. The debentures are to run for five years, bearing 7 per cent. interest, payable half-yearly, on the 1st January and the 1st July, at the London and Westminster Bank, and are to be issued in sums of 1,000*l*, 500*l*, and 100*l* each.

AMERICAN SECURITIES.—This department has remained

very firm, it being understood that a vigorous effort will be made to float a considerable portion of the New Funding loan in Europe. Prices continue to creep up, but the movement is very gradual, owing to the belief that the United States Government will pay off the old issues as soon as it is within their power to do so for the purpose of reducing the annual interest charge. It would appear, therefore, unlikely that Five-Twenties will rise much above par. Atlantic and Great Western Consolidated bonds are only fractionally higher, notwithstanding the progress made in the purchase of the various sections of the line by the trustees. We refer to our usual table below :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
United States 6 % 5-20 Bonds, exchg. 4/6	92¼	⅛	92⅝	⅛	+	⅛
[illegible]	92¼	⅛	92⅞	⅛	+	⅛
[illegible]	91	⅛	91¼	⅛	+	⅛
[illegible]	91	⅛	91⅛	⅛	+	⅛
Atlantic and Great Western Consol. Bonds	41	½	42½	⅜	+	1⅛
Erie shares	25¼	¼	25¼	¼	...	...
Illinois Central Shares	110½	11½	107½	½ xd	...	...
[illegible]	93	⅛	93	¼	...	...
Pennsylvania Central Mortgage 7 % Bonds, 1897	81	⅜	79	⅝	−	2
Pennsylvania Cent. Mort. 6 % Bonds, 1910	93½	⅛	93⅜	⅛	+	¼
Virginia 6 % Bonds	54½	½	54½	⅜	...	...

JOINT STOCK BANKS.—Bank shares have continued in fair request, and owing to the favourable manner in which the shareholders' meetings generally have passed off, the quotations have further tended upwards. Egypt, Colonial, and Standard of South Africa have advanced 1 ; London and River Plate, 2 ; Alliance, English, Scottish and Australian, Hong Kong and Shanghai, London and County, London and Westminster, Metropolitan, and Union of Australia, ½ ; Imperial Ottoman, Agra, and Bank of Otago, ¼ ; Anglo-Austrian shares have receded ¼ on the week.

TELEGRAPHS.—A reaction has taken place in the market for cable shares, and Anglo-American and Anglo-Mediterranean have given way 5 and 2 respectively. Falmouth and Gibraltar shares show a decline of ¾ ; French Cables of ½ ; British Indian Submarine, and China Submarine of ¼. On the other hand, Cuba, Great Northern China Extension, and Marseilles have advanced ¼, and Submarine 5.

MINES.—British mines have again had an upward tendency this week, and the market left off with firmness. There is a rise of 10 in South Caradon ; 5 in South Wheal Frances ; 4 in Wheal Buller ; 1 in East Lovell, Margaret, North Roskear, Tankerville, and West Seton. Great Wheal Vor shares are 1 lower. The only changes in the foreign market are an advance of 1 in St John del Rey, and ½ each in Colorado and Don Pedro.

Prospectuses have been issued of the Toiyabe (Nevada) Silver Mining Company, Limited, the capital being 100,000*l*, in 5*l* shares ; also of the Silver Star (Nevada) Mining Company—capital 150,000*l* in 10*l* shares ; and of the Saturn Silver Mining Company—capital 75,000*l* in 25*l* shares.

MISCELLANEOUS.—There is no special feature to notice in this department. The tone has been good, and some important movements have taken place, but the transactions have not been very extensive. London General Omnibus shares show a rise of 3 ; London Tramways a decline of ¼. Financial shares have met with more inquiry, and General Credit are ½ higher ; Canada Rolling Stock, London and Glasgow Shipbuilding, and Raymond Iron have risen 1. North British Australasian, and Royal Mail Steam, 2 ; Port Street Warehouse, ½ ; National Discount and Rio City Improvements, ¼.

Large sales have been made in new undertakings, and prices show a considerable reduction, but in some instances the quotations are rather nominal. Mexican railway debentures are 4 to 3 discount. Hungarian Land Credit shares ½ to 1 premium. Mineral Hill Mining debentures par to 1 premium, Val de Travers Asphalte shares 27½ to 28½, Neuchatel Bitumen shares 36 to 37, Limmer Asphalte ¼ to ½, Anglo-Austrian Bitumen ½ to 1½, Anglo-Hungarian Bitumen 2½ to 3¼, Anglo-German Bitumen 2 to 3, and Belgian Patent Paving 2 to 3 premium. Metropolitan Tramways are quoted nominally ¼ discount to ¼ premium, Edinburgh Tramways par to ¼, and Dublin Tramways par to 1 premium.

The share list of the Faynes, Listowel, and Tralee Tramway Company will close on Tuesday next for London, and on the following Wednesday for the country.

The share lists of the Anglo-American Leather Cloth Company will close on the 1st of next month, on which day the allotment will take place, and the operations of the company will be immediately commenced.

It is announced that the list for applications in the General Tramways Company will close for London in Monday next, and for the country on Tuesday. The shares, in which a considerable business has been transacted to-day, are quoted 1⅞ to 2⅛ prem.

We have received the prospectus of the Beetroot Sugar Company, Limited, the proposed capital being 200,000*l* in 10*l* shares, of which a moiety is at present offered. The object of the company is the development of the manufacture in the United Kingdom, which has been carried on with marked success in France and Belgium.

EXCHANGES.—There is no particular change from last week, except a slight increase in the demand for bills upon Holland.

The tenders for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were,—to Calcutta, 295,000*l* ; to Bombay, 100,000*l* ; and to Madras, 5,000*l*. The minimum price was fixed as before at 1s 10⅛d on all the Presidencies, and tenders on Calcutta and Madras at 1s 10⅜d will receive about 24 per cent., on Bombay at that price about 55 per cent., and those above in full. The results show a slight diminution in the demand for means of remittance to the East.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—The export demand for bar gold has ceased for the present, the amount taken to the Bank of England since our last circular being 917,000*l*. 500,000 sovereigns have been withdrawn for Germany, and 67,000 for Portugal, South America, and India. We have received from New York about 245,000*l* ; West Indies, per Shannon, 24,000 ; Australia, per Poonah, 501,000*l*. The Oneida, from the Brazils, brought 16,745*l* in silver and gold. The Cordillera, for the Brazils, took 5,000*l* ; and the Bangalore, for Bombay, 700*l*.

Silver.—The silver market is firm, and we quote the price this day 60⅜d per oz standard. Some large purchases have been made recently for Spain. The Shannon, from the West Indies, brought 50,000*l* in bars and coin, and the Araucania, from the Pacific, 31,300*l*.

Mexican Dollars.—About 360,000*l* has come to hand this week per West Indian. The price for the new coinage is firm, and the nearest quotation we can give is 59d per oz. The old coinage is lower in price, there being no demand for China.

Exchange on India for Banks' drafts at 60 days' sight is 1s 10⅜d to 1s 10⅝d per rupee. The tenders for the India Council bills were received yesterday ; the amounts allotted were to Calcutta 295,000*l*, to Madras 5,000*l*, and to Bombay 100,000*l*. Applications on Calcutta and Madras at 1s 10⅜d received 24 per cent., and on Bombay at the same rate, 55 per cent. The minimum, as before, was 1s 10⅛d.

Quotations for Bullion.—Gold—Bar gold, 77s 8⅜d to 77s 9d per oz std ; ditto refinable, 77s 11d per oz std ; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0⅝d per oz std ; ditto containing 5 grains gold, 5s 0¾d to 5s 1d per oz std, last price ; Mexican dollars, new coinage, 4s 11d per oz, nearest.

According to the *Gazette* return the import of the precious metals during the week ended July 19, were :—Gold, 1,073,696*l* ; silver, 689,520*l*. The exports were :—Gold, 165,690*l* ; silver, 740,795*l*.

The sum of 146,000*l* in bar gold was sent into the Bank to-day ; 20,000*l* in sovereigns was withdrawn, chiefly for the Cape.

MEETINGS OF COMPANIES NEXT WEEK.

TUESDAY, July 25.

London and St Katherine Docks, general, London Tavern.
Credit Foncier of England, general, City Terminus Hotel.
English and Foreign Credit, general.
National Bank, general, Dublin.

WEDNESDAY, July 26.

London, Brighton, and South Coast, general, London bridge.
London Financial, general, City Terminus Hotel.
Manchester, Sheffield, and Lincoln Railway, general, Manchester.

THURSDAY, July 27.

East and Church Hope Railway, 60 Threadneedle street.
Netherlands Land Enclosure, general, London Tavern.

FRIDAY, July 28.

Westminster Palace Hotel, general.
Midland Banking, general, Lincoln.

SETTLING DAYS.

Ticket Days—July 27th, August 15th and 30th.
Account Days—July 28th, August 16th and 31st.

NOTICES AND REPORTS.

STOCKS.

Roumanian Government Iron Bridges Annuity.—Bonds representing 14,400*l* have been drawn for redemption at par on the 1st October.

RAILWAY COMPANIES.

London, Brighton, and South Coast.—Total capital expenditure to the 30th June, 17,818,504*l*, leaving a balance of 46,634*l* against the company. The Eastbourne spur line has been completed, and no fresh liabilities have been incurred. The main point in connection with the capital account has been the successful issue of 1,000,000*l* of perpetual 4½ per cent. debenture stock in substitution for a like amount of terminable debentures, leaving only about 1,000,000*l* remaining in this form of security. With all known liabilities on capital account closed, and the Parliamentary powers of issuing debenture and preference stock fully exercised, the total fixed preferential charge will be under 570,000*l* a year, while the corresponding charge for the year 1870 was upwards of 580,000*l*. The following is a summary of the half-yearly revenue accounts :—

	1870. £		1871. £
Gross revenue	582,425		617,795
Working expenses	319,981		308,647
Net revenue	262,444		309,148
Balance from previous half-year	1,092		2,176
	263,536		311,324
Preference charges	*259,208		283,627
Available for ordinary dividend	4,328		27,697
—at the rate of "nil"	nil	(¼ p.c. p.a.)	25,649
Surplus	4,328		2,048

* In this half-year 29,435*l* of the preference charges remained unpaid.

The decrease in the working expenditure has been due to the clearing off of the New Cross accident claims. Revenue has borne the introduction of the "block system," and the extra cost of steel rails.

Northampton and Banbury Junction Railway 5 per Cent. A Debenture Stock.—The International Financial Society receive subscriptions for 113,000*l* (balance of 116,987*l*) A Debenture stock, bearing interest on the 1st January and 1st July, at the issue price of 98 per cent., payable by instalments up to the 16th October. The stock forms a first charge upon the line, which extends 15 miles from Blisworth Junction to the Banbury Branch, over which the company has running powers. The distance from Northampton to Banbury is shortened by more than 26 miles. The line passes through a rich agricultural and mineral district. Part of the line is open, and the remainder will be ready by November.

Manchester, Sheffield, and Lincolnshire.—The report states that the net revenue account shows a balance, including the 3,640*l* from the previous half-year, of 229,800*l*. The preference charges amount to 107,371*l*; the South Yorkshire interest and dividends to 10,098*l*—leaving a balance of 42,331*l*, out of which the directors recommend that a dividend be paid at the rate of 1*l* 10s per cent. per annum on the ordinary stock, carrying forward 1,137*l* to the next half-year.

Ottoman.—Vice-Chancellor Malins has decreed the right of the First Debenture holders to the full amount of the guarantee of 112,000*l* per annum until repaid. The amount in Court is to be paid at once over to the Council of Administration.

South-Eastern.—As the accounts for the past "half-year" represent only five months' figures, no detailed comparison can be instituted with the corresponding accounts. The following figures appear in the report recently issued :—

	Five Months ended June 30— 1870. £		1871. £
Gross receipts	584,940		608,261
Working expenses	284,688		290,511
Net receipts	300,252		317,750
Add balances			5,889
			323,639
Deduct preference charges			237,846
Available for dividend			85,793
—On the ordinary stock at the rate of 2½ per cent. per annum (as compared with 2½ per cent.)			*83,525
Surplus			2,268

* Including a preferred stock distribution at the rate of 5½ per cent.

Capital Account.

	Expended. £		Received. £
To January 31, 1871	18,585,347		18,524,563
During five months	105 333	... [deduct	40,102
Total, June 30, 1871	18,690,680		18,484,461

For the future the half-years will terminate at the usual dates—the 30th June and 31st December. The purchase of the Cannon Street Hotel has been effected for 201,500*l*. All descriptions of revenue, except that derived from steamboats, have increased. A provisional agreement with "Chatham and Dover" has been entered into to connect parts of the companies' Metropolitan Extensions. Particulars are given in the report respecting the proposed Euston, St Pancras, and Charing cross line.

BANKS.

Alliance.—The report adopted at the half-yearly meeting showed an available total of 24,110*l*, including the previous balance of 4,078*l*, out of which a dividend at the rate of 5 per cent. per annum was declared, absorbing 19,417*l*, leaving 4,692*l*.

Bank of Egypt.—The sum available for distribution, including 3,029*l* brought forward, is 28,936*l*, out of which the directors recommend a dividend at the rate of 10 per cent. per annum, and a bonus of 15s per share, both free of income tax, leaving 8,936*l*.

Central of London.—The accounts for the half-year showed a balance of 7,144*l*, and a dividend was declared for that period at the rate of 6 per cent. per annum, free of income tax. It was also decided to apply the sum of 2,000*l* in part payment of 4,000*l* voted to the directors, to add 500*l* to the reserve fund, and to carry forward 1,644*l*.

City.—The half-year's gross profits were 48,371*l*, including 1,585*l* brought into the account. After making all deductions, 5,000*l* was added to reserve (now 105,000*l*), an 8 per cent. per annum dividend was declared, and 1,894*l* was carried forward.

Imperial.—The accounts showed a profit of 30,723*l*, or 18,792*l*, deducting rebate and expenses. A dividend for the six months at the rate of 6 per cent. per annum absorbed 13,500*l*, leaving 4,888*l*.

London and Brazilian.—The half-year's report shows a net profit of 13,874*l*, making a total of 35,862*l*, including the amount brought forward. The probable amount of the losses at Rio and elsewhere has now been ascertained, and the directors notify that at the meeting on the 31st instant they will again submit a resolution in favour of the reconstruction of the bank. In order to render this practicable, they have written off the entire losses, and propose that each 100*l* share, with 45*l* paid, shall be converted into three 20*l*, with 10*l* paid.

London Joint Stock.—The net profit for the half-year reached 134,772*l*, out of which a dividend and a bonus were declared, together at the rate of 20 per cent. per annum. The amount left to be carried forward is 14,772*l*. The guarantee fund, with accrued interest, now stands at 441,058*l*. The amount of deposits and acceptances was 14,616,633*l*; and the discounts and loans, 13,696,845*l*.

London and Westminster.—The available profit, including 1,630*l* brought into the account, was 186,460*l*; out of which a half-year's dividend and bonus, together at the rate of 18 per cent. per annum, were declared at the meeting, surplus 6,460*l*. Deposits 22,768,263*l*, and acceptances 919,517*l*.

[CONTINUED FROM PAGE 880.]

Mercantile and Exchange Bank, Limited.—The liquidators have announced a further return of 5s per share.

Metropolitan.—The available profit, including 2,331*l* brought forward, was 7,270*l*; and a dividend at the rate of 5 per cent. per annum was declared, leaving 2,270*l*.

National.—Half-year's dividend announced at the rate of 8 per cent. per annum, free of income tax. 7,500*l* is added to reserve.

Union Bank of Manchester.—A half-yearly dividend at the rate of 8 per cent. per annum, and a bonus of 3s per share has been declared, leaving 1,469*l*.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Credit Foncier of England.—The report states the net profit of the half-year to have been 50,771*l*, and the amount standing to the credit of profit and loss being 101,920*l*, a dividend is recommended of 2s 6d per share, and a bonus of 1s 6d, equal together to a dividend at the rate of 8 per cent. per annum, which will absorb 40,000*l*.

London Financial.—Total liabilities, 157,000*l*, or deducting realised assets about 120,000*l*. At the same time 15,000*l* has been advanced to preserve the securities without sacrifice.

National Discount.—At the half-yearly meeting, a dividend at the rate of 18 per cent. per annum, free of income tax, was declared.

New Zealand Trust and Loan.—A dividend at the rate of 10 per cent. per annum has been resolved upon.

ASSURANCE COMPANIES.

Realm Marine.—The first formal general meeting of the shareholders of the Realm Marine Insurance Company, was held this day at the company's offices, 16 Cornhill. The chairman explained the position and prospects of the company and a vote of thanks to the chairman and directors was carried. It was stated that a satisfactory amount of business had been effected.

Thames and Mersey Marine.—The directors recommend a payment of 8s per share, being 2s per share dividend and 6s bonus, making, with the dividend on account paid in January last, 1os per share, or 25 per cent. per annum for the year.

MISCELLANEOUS COMPANIES.

Alexandra Palace and Museum Hill Estate Tontine.—A "Tontine" trust to raise 850,000 guineas, in A (1 right), B (10 right), C (25 right), D (50 right), and E (100 right) certificates, of 1, 10, 25, 50, and 100 guineas each respectively. The object is to acquire this building and property (198 acres) at Hornsey for the sum of 675,000*l*, and to render it "a grand institution of healthful recreation and elevating instruction." The prospectus states:—

Certificates entitle the bearer:—

1. To participate in the proceeds of sale of the property if the representative life upon which the Tontine privilege depends shall be living on the 31st June, 1880.

2. To the receipt from a life assurance of the sum of 20s in respect of each guinea paid upon any certificate, if the representative life shall die before the said 30th June, 1880.

3. To admission to the Palace and park.

4. To participation in Art Union distributions proposed to be hereafter established.

The whole net income of the undertaking, after defraying interest charges and management expenses, will be devoted to the improvement of the property, and also (when power is obtained) to Art Union distributions.

Australian Agricultural.—The report announces a dividend of 12s 6d per share, making, with a previous distribution, nearly 5*l* per cent. for the year. The net profit for the 12 months was 28,247*l*.

Belgian-Dutch Bituminous Rock Paving, Limited.—Capital, 100,000*l*, in 10*l* shares. In consideration of 5,000 fully paid-up shares the Neuchatel Bituminous Rock Company grants this new undertaking the exclusive rights to the supply and the use of the bituminous rock of the Val de Travers, in Switzerland, for Belgium, Luxembourg, and Holland. 4,000 shares are offered for subscription, 1,000 being reserved for Belgium and Holland. The share list will close to-day for London, and on Monday for the country.

British Indian Extension Telegraph.—An interim dividend at the rate of 6 per cent. per annum has been declared.

City of Exeter Sewage Manure Irrigation and Farming, Limited.—Capital, 40,000*l*, in 5*l* shares, of which 25,700*l* has been applied for locally. A concession of all the sewage of Exeter has been made to the company for 25 years, upon the condition that its utilisation and deodorisation is carried out. Works will be erected for the purpose, the solid matter being converted into a valuable portable manure, and the liquid distributed over land in the neighbourhood.

Metropolitan Board of Works 3½ per Cent. Loan.—A fresh issue of this "Consolidated stock" is announced to produce 900,000*l* sterling, which will rank in every particular with the 2,503,673*l* stock already on the market. The tenders will be received until the 3rd August, and the principal is payable over a period of a year. The dividends are payable quarterly at the Bank of England, and the redemption will be made, if not effected before, in 1929. Transfers are free of stamp duty, and trustees are empowered to invest in Metropolitan stock, the same as in the funds.

Peel River Land and Mineral.—Interim dividend 1 per cent.

Port of London Wharfage and Warehouses, Limited.—Capital, 100,000*l*, in 5*l* shares. To enable the undertaking to commence "lightering, landing, wharfing, bonding, and warehousing of foreign and colonial goods, and the housing and shipping of British goods," extensive waterside premises have been acquired at Blackfriars, and promises of business have been obtained. Advances will be made upon merchandise stored on the premises. It is stated the construction of the Thames Embankment has caused a scarcity of good wharfage accommodation.

Sao Pedro Brazil Gas, Limited.—Capital, 110,000*l*, in 5*l* shares. The purchase of the thirty years' concession for the supply of three important seaports in the province of Sao Pedro—Porto Alegre (the capital), Pelotas, and Rio Grande—has been effected for 6,000*l* in cash and 5,000*l* in shares. The works will be undertaken at once, and profits at the rate of 14 per cent. are calculated upon. The three towns named are stated to be growing steadily, and a first minimum of 1,000 public lights will be taken. At the expiration of the concession, it will be renewed, if the property is not purchased by the Government at a valuation.

Union Cement and Brick, Limited.—Mr J. W. R. Adams has been appointed official liquidator in the room of Mr Addis.

MINING COMPANIES.

Mineral Hill.—A circular has been issued by the managers, Messrs John Taylor and Sons, dated July 19th, 1871, stating that satisfactory information has been received respecting the progress of operations. From 14th June up to 24th the net proceeds were over $40,000 for 13 days, and from 25th to 30th June, six days, $19,000. The two amounts are equal to 12,000*l* sterling.

Pittsburg Gold Mining, Limited.—Capital, 100,000*l*, in 10*l* shares. The "Pittsburg" mine, situated in Nevada county, California, together with its offices, engine, mill, batteries, and appliances will be acquired for the sum of 55,000*l* in cash, and 25,000*l* in fully-paid shares. The property is reported upon by Mr Ross Browne, who has agreed to act as general manager, and large profits are expected. $500,000 have been raised in the mine (a true fissure) during the past four years, and by increasing the stamps to 30 in number a much larger return is looked for.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

The postal services in France, which were interrupted by the war, having now been re-established, the following are the regulations under which correspondence, intended to be forwarded by the several lines of French mail packets, will henceforth be despatched from London:—

DESTINATION.	Port of Departure.	When Letters, &c., will be despatched from London.
Port Said, Ceylon, Singapore, Saigon, China, Japan	Marseilles.	Morning of Friday, July 21, and Morning of every alternate Friday.
Mauritius	Marseilles.	Morning of Friday, August 4, and Morning of every fourth Friday.
Alexandria (direct)	Marseilles.	Morning of every Thursday.
Brazil and River Plate	Bordeaux.	Evening of 22nd of each Month.
West Indies—French Colonies, and French and Dutch Guiana, Curaçoa, St Lucia, St Vincent, Grenada, Trinidad, La Guayra, Puerto Cabello, Santa Martha	St Nazaire	Evening of 6th of each Month.
Mexico, Cuba, &c.—French Colonies in West Indies, St Thomas, Havana, Vera Cruz, Jamaica, Colon	St Nazaire	Evening of 12th of each Month.
Constantinople, Salonica, Varna, Kustendje, Smyrna, Trebizonde, Galatz, Theodosia, Inebolli, Samsoun, Kerasounde, Ordou, Trebizond	Marseilles.	Evening of every Thursday.
Syra and Smyrna (by Constantinople packet)	Marseilles.	Evening of Thursday, July 20, and every alternate Thursday.
Do do (by Syrian packet)	Marseilles.	Morning of Wednesday, July 26, and every alternate Wednesday.
Piræus	Marseilles.	Evening of Thursday, July 27, and every alternate Thursday.
Rhodes, Mersina, Alexandretta, Latakia, Tripoli, Beyrout, and Jaffa (viâ Alexandria)	Marseilles.	Morning of Thursday, July 20, and every alternate Thursday.
Do do (viâ Syra)	Marseilles.	Morning of Wednesday, July 26, and every alternate Wednesday.
Palermo	Marseilles.	— —
Messina (by Syrian packet)	Marseilles.	
Do do (by Alexandria packet)	Marseilles.	Morning of every Thursday.
Do do (by Constantinople packet)	Marseilles.	Evening of every Thursday.

Letters, &c., for the foregoing places will, in each case, be also despatched in supplementary mails to Paris by the following mail (morning or evening), but the French post office has pointed out that, if any interruption should occur, either in the passage of the Channel, or in the railway journey through France, these supplementary mails will run great risk of reaching the port of departure after the packet has sailed.

A contract has been made with the North German Lloyd for the conveyance of mails by the new line of packets which they have established to run once a month from Southampton to Colon and Savanilla, in the United States of Columbia, and to Puerto Cabello and La Guayra, in the Republic of Venezuela. Mails for the above places will be made up in London on the morning of the 10th of August next, and thenceforward on the 10th of each month, excepting when the 10th falls on a Sunday,

when the mails will be made up on the previous evening. All letters, newspapers, book packets, and patterns intended to be forwarded by these vessels must be specially addressed "By North German Lloyd Packet." They will be subject to the same rates of postage as when conveyed by the present lines of British mail packets, viz.:—Letters—Per half-ounce, 1s; newspapers—not exceeding 4 ounces each, 1d; every additional 4 ounces, 1d; book packets and patterns—not exceeding 1 ounce, 1d; above 1 ounce and not exceeding 2 ounces, 2d; above 2 ounces and not exceeding 4 ounces, 3d; every additional 4 ounces, 3d. Such postage must in all cases be paid in advance.

The next mails for Australia will be despatched from London as follows:—Via Southampton, on the morning of Saturday, the 5th of August; via Brindisi, on the evening of Friday, the 11th of August. New Zealand, via San Francisco, on the evening of Thursday, the 27th of July.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Notwithstanding the short supplies of English wheat on offer trade at Mark lane to-day ruled very dull, and the demand was very limited. Monday's reduced prices were with difficulty maintained for both English and foreign wheat, the favourable harvest prospects having caused increased depression in the market. Flour was dull and drooping, but not quotably lower. Maize and oats were 1s cheaper, while spring corn generally tended in favour of buyers. This week's imports of cereal produce into London have amounted to 28,400 quarters of wheat, 840 barley, 81,320 oats, 1,300 peas, 7,300 maize, 1,080 sacks and 1,020 barrels of flour.

At Liverpool and Wakefield this morning the wheat has ruled very dull, and less money was accepted to effect sales.

The Liverpool cotton market opened on Friday last with a good demand, which continued until Monday, when the market became very quiet, and the slight advance in prices was quite lost. Since Monday there was very little demand till yesterday when the tone again improved, and with a good business doing prices on the "spot" became firmer; while to "arrive" stiffer rates were obtainable. At the close there are no alterations in quotations compared with this day week.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended July 20, 1871:—

	Imported.	Exported.
American bales	25,878	4,242
Brazilian	9,695	—
East Indian	18,332	6,778
Egyptian	3,401	144
Miscellaneous	1,457	100
Total	58,763	11,264

At New York, on the 20th inst., middling Upland cotton was quoted at 21c per lb. Telegraphic advices from Bombay, to July 17, quote fair Dhollerah at 232 rupees per candy.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, June 20:—As hitherto arrival cotton has been most in favour, Reuter's telegram of the 17th instant (the last on hand), quoting Dhollerah May-June shipment 7d per lb, against 6¾d for the same description on the spot. The weather latterly has been unusually fine for the season, only a few light showers having fallen during the week, and shipping operations have consequently been carried on without any hindrance. This, in conjunction with the encouraging advices from Liverpool, has led to a large business being done, European buyers being again the principal operators, and dealers have been enabled to establish a further advance of nearly 10 rs per candy all round. The transactions reported aggregate about 8,000 candies, of which 4,000 are Dhollerah, Veerumgaum, &c., and the remainder chiefly Oomrawuttee, Julgaum, and Barsee. Supplies also continue to come forward pretty freely, chiefly of Dhollerah descriptions from Ahmedabad by the Bombay and Baroda line of railway, communication by the coast being of course suspended. From Tinnevelly we have a telegram from Tuticorin dated yesterday, quoting 7d per lb, c. and f.

Export of Cotton from Bombay to June 19.

	1871.	1870.
London bales	18,387	1,420
Liverpool	484,704	587,214
Total, Great Britain	503,091	588,634
Channel for orders	39,436	10,379
Continent	206,321	119,594
China	36,326	31,044
Grand total	785,174	749,651

Actual exports since last mail left, 61,892 bales.

Sugar has sold more freely this week. Nevertheless, prices are about 6d per cwt lower for West India descriptions. The

stocks on hand are about 12,400 tons less than at the corresponding period last year. Good colory coffees have commanded late rates, but inferior sorts have been neglected. The demand for cocoa and rice has been moderately active, and values are unchanged.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, June 16:—The latest advices from the Eastern Bengal districts are to the effect that the fall of rain has been incessant, and, as a natural consequence, the plant is yielding very badly; moreover, in the present swampy condition of the lands, it is no easy task to get the plant brought into the vats. Jessore and Kishnaghur have also had more heavy rain than is beneficial, and a few fine days are much required. In Bhagulpore most factories are now at work, and the plant is giving a fair return. In Malda and Moorshedabad, rain is still wanted in some concerns, whereas others have had as much as they required; manufacturing has commenced in several factories. Tirhoot and Champarun are generally in want of a good heavy fall to enable planters to open vats; here and there rain has fallen, but it has been very partial, in some places only a few tenths, and in others, but a few miles off, as much as three or four inches. A few factories are already at work. Chuprah also stands in need of a good fall. There is no change to report in the advices from the Benares Provinces or the Doab.

Messrs Laurence Brothers report:—Usually the London leather trade exhibits little animation during the latter part of June, but this year a fair general business was transacted at Leadenhall. Thus far in July, sales have been restricted principally through want of adequate supplies. Many tannages of light hides, heads, crops, shoulders, offal, dressing and shaved hides, all varieties of calf skins, and certain kinds of basils, also kips, can be moved with ease; whilst in curried leather, russet butts and middlings, kip butts of bright manufacture, calf skins, light grain, prime Cordovan, and harness appear in considerable request. There is no necessity for tanners to make large contracts for forward delivery in times like the present; it is probably better to sell as the goods come out. The stocks of leather, either upon the market or in tanyards, are generally regarded as very short, and if the trade remains as active as at present, prices should advance. The prospects of the tanning trade might be regarded as decidedly cheering, if one were able to eliminate, from calculations as to future profits, the present high value of the raw material; but however the fact may be disguised or passed over, it must in the long run tell seriously if prices of leather do not steadily advance. For the London supplementary public auction on the first Tuesday in the month, more leather came forward, and was in many instances disposed of with facility. The quantity placed would have been largely increased had the supply been greater. The next sale is on the first Tuesday in August, and we trust to obtain a varied assortment. In a market like the present this mode of offering goods should answer. The Continental hide trade has been very animated, and in French some very large transactions have occurred. Had it not been for the quantity of these goods offering, tanners would have had to pay even higher rates for other kinds.

Messrs Gerlach, M'Culloch, and Co.'s weekly circular, with New York mail dates to July 5, and cable despatches to July 19, says:—Business in all branches is usually dull at this season and the current year presents no exception to this rule. The record of the fiscal year just closed, however, shows that the foreign commerce of the country has materially exceeded all precedent. The value of goods imported into the whole United States is about $435,000,000, while the value of the exports of manufactures and produce may be estimated at $464,000,000 in currency values. The monthly statement of the public debt, just issued, shows a reduction in the net indebtedness of the Government of $23,327,765 during the fiscal year, and a decrease during the past month of $7,103,350. Wall street markets present a firmer tone, though with limited transactions. In the gold market there is a moderate speculative movement induced by free exports of specie. Money still keeps very easy, rates at call being about 3 per cent. Foreign exchange is a shade easier quotations being about ½ lower for prime bills. As usual, after the payment of the July dividends, United States bonds are in very active demand, and have steadily advanced on our last quotations. To-day, upon a rumour that the Government has made arrangements for marketing a considerable amount of the new Five per Cents in Europe, accompanied with a free demand for bonds from German bankers, the market has been especially active, and prices have advanced fully ½ per cent.

THE COTTON TRADE.

LIVERPOOL.—JULY 20.

The cotton market was quiet in the early part of the week, and some decline was submitted to, but yesterday and to-day there has again been a firmer tone, and quotations show little change from the rates of last Thursday. For Sea Island there has been a fair demand, and full prices paid for the better qualities. American was rather dearer on Friday, but subsequently has been freely offered, and barely supports former quotations. New York advices to the 20th instant quote middling Upland 21c, costing to sell in Liverpool 10½d per lb, by steamer. For Brazil the demand has been moderate throughout the week, and prices are in most cases ½d per lb lower. Egyptian has been very freely offered, at last week's quotations. For East Indian the demand continues limited, but with a deficient supply; prices, though easier, are not materially altered.

In cotton "to arrive" the transactions have been chiefly in East Indian, and prices, after some decline, have rallied, and have nearly regained the rates of last week; the latest quotations are—American, basis of middling, delivery, from any port, not below strict ordinary, August-September, 9d; not below good ordinary, August-September, 9d; September, 9¼d; shipment, from any port, new crop, October-November, 9¼d, 9½d; New Orleans, 9½d; bales, not below good ordinary, August-September delivery, 9 1/16d; low middling bales, September delivery, 8½d; Hingunghat, good fair new merchants, ship named, 8½d; Broach, fair new merchants, June sailing, 7½d; Dhollerah, fair new merchants, May sailing, 7½d; June, 7 15/16d; ship named, 7½d; October-November delivery, 7½d; fair merchants, old, due, 7½d; at sea, 7½d; Oomrawuttee, fair new merchants, canal, July shipment, 7⅝d; Cape, at sea, 7½d; Bengal, fully fair new merchants, ship named, 6½d per lb.

The sales of the week, including forwarded, amount to 69,460 bales, of which 15,890 are on speculation, and 9,980 declared for export, leaving 43,690 to the trade.

JULY 21st.—The sales to-day will probably amount to about 15,000 bales, with a strong market.

Monday, 7th August, being a bank holiday, according to the recent Act of Parliament will be a close holiday in the cotton market.

	bales.
An increase of import compared with the same date last year of	717,510
An increase of quantity taken for consumption of	420,520
An increase of actual exports of	297,750
An increase of stock of	43,740

In speculation there is an increase of 169,070 bales. The imports this week have amounted to 53,025 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to July 14) is 80,000 bales, against 62,000 bales last year. The actual exports have been 11,721 bales.

LONDON.—JULY 20.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

The market was very quiet for the first few days of the week, and prices declined about ½d to ¼d per lb; there is now a firmer tone, and the decline on the spot has been recovered. Arrivals are in fair request at about ½d under last Thursday's rates.

NEW YORK.—JULY 7.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, July 7. From the figures thus obtained it appears that the total receipts for the seven days have reached 18,468 bales, against 18,197 bales last week, 22,664 bales the previous week, and 24,046 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,929,160 bales, against 2,835,607 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,093,553 bales. The exports for the week ending this evening reach a total of 7,944 bales, of which 7,800 were to Great Britain, none to France, and 144 to rest of the continent, while the stocks as made up this evening are now 180,514 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 17,181 bales, while the stocks to-night are 26,452 bales *more* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to June 30, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

Ports.	Receipts since Sept. 1. 1870.	Receipts since Sept. 1. 1869.	Exported since September 1 to Great Britain.	France.	Other Foreign.	Total.	Shipments to Northrn. Ports.	Stock.

The business of the week has been interrupted by the holidays, Monday and Tuesday, so that the aggregate sales are small; but there has been a confident feeling throughout among holders, and prices have been well sustained, to-day an advance of ¼c being established. Crop accounts have been more favourable, and the receipts at the ports have continued remarkably free for the lateness of the season, but the diminished stock at Liverpool according to the late count, showing as it does the large increase in the consumption of the year, and the continued free sales and buoyant market there, have counteracted all adverse influences here, and resulted in the advance noted above. Contracts for forward delivery show a considerable advance for the fall and early winter months, but less improvement for the summer months. Low middling closed to-night at 20½c for July, 20¾c for August, 20¼c for September, 19¼c for November, and 19c for December. The total sales of this description for the week are 45,750 bales. For immediate delivery the total sales foot up this week 12,291 bales, including 1,094 for export, 4,206 for consumption, 1,666 for speculation, and 5,325 in transit. Of the above 42 bales were to arrive. The following are the closing quotations :—

Below we give the movements of cotton at the interior ports: receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending July 7, 1871. Receipts	Shipments.	Stock.	Week ending July 7, 1870. Receipts	Shipments.	Stock.
Augusta	380	674	4320	221	1304	6067
Columbus	73	63	1818	75	666	2288
Macon	65	408	1609	52	318	5186
Montgomery	155	196	2171	43	303	3590
Selma	143	150	726	78	91	2087
Memphis	1892	1239	6276	521	940	10498
Nashville	104	194	1034	122	295	4217
	2812	2924	17954	1112	3917	35038

The above totals show that the interior stocks have increased during the week 1,231 bales, and are to-night 17,084 bales *less* than at the same period last year. The receipts, however, have been 1,700 bales in excess of same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 826 bales, against 317 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction

since September 1, 1870; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK July 18.—The receipts of cotton for the last four days have been 6,000 bales. Shipments to England, 3,000 bales, to France, 1,000 bales, and to the continent, 500 bales. Middling Uplands, 9¾d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, July 20.—The past week has been quiet, but a fair amount of business has been transacted though generally at a slight concession on the extreme rates asked. In yarns the demand has been moderate, as prices have checked any large business for forward delivery. The cloth market has been quiet also, owing to the extreme rates asked, and the busy engagements of manufacturers. The market at the close is steady but quiet.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Great dulness has continued to prevail in the corn trade the brilliant change in the weather and the favourable harvest reports having depressed the market. The imports have also been on a most liberal scale, and there are now about forty cargoes offering off the coast. English wheat has been in scanty supply, fresh arrivals having been exceedingly limited; but stocks of foreign have been on the increase. Sales have progressed very slowly, and factors have been compelled to submit to a decline of 1s to 2s per quarter. Flour also has ruled cheaper to sell. The arrivals of maize and oats have been heavy, and a further reduction of 1s per quarter has taken place in the quotations. Barley, beans, and peas are nominally unchanged in value.

IMPORTS of GRAIN, &c. into the UNITED KINGDOM.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 64 grain and seed-laden vessels have arrived at ports-of-call, viz.:—32 wheat, 13 maize, 4 barley, 1 rye, 2 oats, 6 beans, 3 linseed, and 3 cotton-seed. The floating grain trade has been inactive. Wheat has early this week been difficult to sell, even at a decline, but yesterday and to-day the demand increased, and a fair amount of business was done. Maize—Old corn in demand, but inferior slow sale. Barley—Fine cargoes have been inquired after at late prices; inferior are slow to sell. Rye—A fine cargo was sold last Saturday at a full price. The reported sales were as follows:—Wheat—18 arrived cargoes: Marianopoli, 49s to 50s 6d; Ghirka, from Taganrog, 49s 4½d; Ghirka Odessa, 40s to 47s; ditto from Nicolaieff, 46s 6d to 50s 3d; Nicopol Ghirka, from Odessa, 46s 9d to 48s 7½d per 492 lbs; Wallachian, 39s per 480 lbs; No. 1 spring, from New York, 51s to 53s: and spring, from Boston, 52s per 480 lbs. Shipped or to be shipped, 2 cargoes No. 1 spring, from New York or Montreal, 50s 6d to 51s per 480 lbs. Maize—10 arrived cargoes: Odessa, 30s 3d; old Galatz, 31s 6d to 34s 9d; old Roumanian, 34s per 492 lbs; Wallachian, 28s 9d to 30s; new and old Foxanian, from Ibrail, 30s; mixed American, from Baltimore, 32s 1½d to 32s 6d; mixed, from Philadelphia, 32s per 480 lbs. On passage, 1 cargo old Galatz, 33s 6d per 492 lbs.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—Rather lower prices have been established for West India, but there is now a steady demand. The market generally remains unaltered, and the chief feature to notice is some revival of demand for low descriptions, including Manila. A limited quantity has been brought forward in the public sales—most of the Barbadoes was taken in. The sold portion went from 28s to 33s for brown and yellow, and 35s 6d for crystallised. Brown and grey St Vincent's, 26s 6d to 29s per cwt. Total sales to yesterday, including the parcels by auction, 3,484 casks. There was a large quantity of West India landed last week, but a very moderate supply of other kinds. The stock on London has further increased to 76,500 tons. There has been an improvement in the home deliveries of 17,200 tons upon the previous season. The stock in the kingdom is now about 30,000 tons in excess.

Mauritius.—A small parcel of grainy white has sold at 37s 6d to 38s.

Penang.—6,672 bags chiefly sold: soft grey and white, 33s 6d to 36s; brown and yellow, 24s 6d to 30s. Privately, 550 baskets at 21s to 21s 9d.

Manila.—Business has been done this week at 21s for Taal. About 1,000 tons sold, but particulars not reported.

Floating Cargoes.—One of Havana has sold at 32s 3d for a near continental port.

Refined.—The market is without further alteration, and has been steady. Foreign goods are offered at prices calculated to prevent any advance taking place here.

MOLASSES.—A parcel of Berbice, &c., sold at 11s per cwt.

RUM.—The business of the week has been chiefly restricted to Jamaica, in which several sales are reported at 3s 6d to 4s 4d up to 5s 3d per gallon for fine quality. Common kinds are rather quiet, but prices without alteration.

COFFEE.—The total quantity brought upon the market has again been large, and prices have in some instances shown weakness. Of 956 cases 3,563 bags East India a portion sold; pale and grey sorts at lower rates. Wynaad, Coorg, &c., 61s to 68s; native Tellicherry bought in at 57s to 60s; fine Mysore sold at 86s to 91s, being the former value. 489 bales Mocha were taken in, excepting a few lots low quality, which sold at 83s to 86s. The sales of plantation Ceylon have gone at irregular and occasionally at lower prices; pale and grey, 60s to 71s; colory, low middling to middling, 61s 6d to 68s 6d; good middling to fine bold 69s to 80s. Native is nominally unchanged, the stock being small. 78 casks sold by auction were taken in at 59s; 369 bags Singapore were bought in above the value; 2,197 bags Costa Rica obtained last week's rates; pale and mixed, 57s to 61s 6d; 287 bags Guatimala, 55s to 59s. 676 bags Rio part sold at 51s for low quality, but chiefly bought in; 387 bags washed Rio part sold at 56s 6d to 57s per cwt. The deliveries continue very

steady, and recent arrivals have not altered the position of the stock compared with last year. It now shows 4,000 tons decrease.

COCOA.—The deliveries have fallen off, the demand for France being supplied and the manufacturers are not buying much. At the public sales 772 bags Trinidad were about half disposed of at easier rates from 55s to 72s; and good to fine at 73s to 90s. 409 bags Grenada part sold at 45s to 50s; and a few lots good to fine, 52s 6d to 62s. 570 bags foreign barely half-sold; Cuba, 60s to 71s; a few lots Surinam, 53s to 58s per cwt; 5,000 bags Guayaquil are declared for Tuesday next.

TEA.—Business by private contract has again been of very limited extent, pending the arrival of new season's Congous. The public sales comprising 21,434 packages have gone flatly; red leaf siftings sold at 4½d to 6d, fair to good black leaf Congou, 1s 2½d to 1s 4d; fine Moning at a further decline, viz. 1s 7½d to 1s 7¾d. The bulk of the Congou yesterday consisted of common to fair red leaf, which sold at about former prices. Of 21,434 packages printed "without reserve" 13,500 packages found buyers.

RICE.—A few parcels have changed hands on the spot, white Bengal ranging from 9s 9d to 11s 9d; Rangoon, &c., 9s 6d. 5,000 bags Madras, 98 7½lb to 108, 680 bags by auction were bought in at 10s 9d to 12s. Two floating cargoes of Rangoon (about 2,650 tons) sold for the continent at 10s to 10s 1½d per cwt. The market is now quiet, as the weather has become more settled and favourable to the grain crops.

IMPORTS and DELIVERIES of RICE to July 15, with STOCKS on hand.

SAGO.—There were only 400 bags offered yesterday, which sold at 12s 6d to 16s for small grain. There have been arrivals of some extent.

TAPIOCA.—1,442 bags part sold: Singapore and Penang, 2d to 2½d per lb. Pearl tapioca, 1os to 19s 6d per cwt. A good business reported in the former description by private contract.

BLACK PEPPER.—The market has become quiet. Business in Penang alone reported at 5¾d. Sales on the spot are limited at that price, and 6¼d for good Singapore. 970 bags of the former, by auction, were taken in. A few lots sold at 5¾d to 5¾d. The sound portion of 832 bags Singapore was bought in. 114 bags good Malabar sold at 6¾d per lb.

WHITE PEPPER continues firm, as the stock is gradually decreasing. 215 bags partly sold at 9¼d per lb. Privately, 9¾d per lb, short prompt, has been accepted.

OTHER SPICES.—Nutmegs show some further advance. 19 cases Penang by auction part sold, prices, including some parcels privately, being 2s 5½d to 2s 6½d. 98 to 99, 2s 7d to 2s 8d. 87 to 85, 2s 9d to 2s 10d. 26 boxes from Amsterdam was chiefly taken in at 3s 6d for 68's. 18 cases of mace of low quality were bought in. Pimento is rather easier. 2,148 bags by auction partly sold at 1¾d to 2¾d. 297 bags cloves, at 4¼d to 4¾d, and bark at 2¾d. 496 bags Zanzibar cloves sold at 2¾d to 3d per lb. 200 cases Cochin ginger part sold at 57s to 59s, one lot 102 small, 49s to 54s; rough, 43s to 47s. 629 barrels Jamaica ginger found buyers at 80s to 87s per cwt for low to good. 300 bags African were taken on at 30s per cwt.

SALTPETRE.—A considerable quantity has sold for arrival, chiefly at 29s to 29s 6d, usual conditions, and at 25s 9d to 26s 3d for 20 per cent. refraction. Sales about 1,000 tons. Transactions on the spot are of very moderate extent, and recently at rather higher prices. Refraction, 9 to 9½, 27s 6d to 28s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to July 15, with STOCKS on hand.

INDIGO.—The sales of East India were commenced on Monday. Closing prices of Bengal 2d to 3d higher than in the previous sales, and for ordinary and Oude par to 4d advance. Low quality Oude very dull. Kurpah, 2d to 4d dearer, and for ordinary sorts no change. Dry leaf Madras sold irregularly at last sales prices to 3d advance; ordinary par to 2d decline. Of 9,149 chests printed 5,200 chests sold in the room. Many parcels withdrawn, also found buyers. The sales of Guatemala, &c., now in progress have, so far, gone at irregular prices. Desirable qualities sold higher by 6d to 1s per lb cheaper.

OTHER DYE-STUFFS.—Small sales of fine cutch have been made at full prices, but the market is quiet. 2,015 bales cube Gambier by auction part sold at 16s 6d. Block steady at 16s 6d on the spot. Turmeric has been done at 10s 10½d to 10s per cwt, ex ship. No further change in Camwood. Sales of Bengal to arrive at 20s 6d. 150 bales Bengal sold very cheap to arrive. Cochineal in good demand. 32 chests fine grey were bought in.

SUMACH.—The demand has been steady. Fine orange sold at 7l to 7l 2s 6d. At auction 150 chests and 80 bdls. native orange, 6l to 6l 5s; good to fine, 6l 10s to 6l 15s; garnet, 5l 12s 6d to 5l 15s; fine pale quality, 7l 10s per cwt. The very large deliveries have latterly caused a material diminution in the stock.

METALS.—Recent improved quotations are generally maintained. Pig-iron has further advanced upon the announcement of a rise of 2/ upon Scotch. Steels touched 15l. Subsequently the market became rather quiet, and 14l 10s to 14l is the nearest value. The last sales about were at and under 13l. Tin plates in regular demand. English lead has been quiet. The iron trades has not shown that revival of interest anticipated by many. Rails are however steady in price. Scotch pig iron is in steady demand, the last sales being at 57s 3d cash. The deliveries continue large. Copper maintains an upward tendency. Chili bars 79l 10s; Burra and Wallaroo 77l to 77l 10s. A few sales have been made in spelter, at last week's rates. Silesian, 19s to 19l 5s per ton.

SILK.—There is not much demand on the spot, and trade in Dundee has become quiet. A few sales are reported for arrival at about last week's prices, upon 20l per ton. Large supplies are now afloat. The stock in London is now reckoned to 17,500 bales, against 86,470 bales last year, and 62,950 bales in 1869 at the same date.

MANILA HEMP.—The market has been rather quiet. 1,018 bales by auction were chiefly taken in. A few lots sound found buyers at 46/ to 48/ for brown to good, and 49/ for Sorsogon. Sunn hemp part sold at 15/ 10s to 21/; Old Petersburg clean bought in at 33/; new for delivery quoted 31/ 15s per ton.

LINSEED.—The market is firm. Calcutta, 63s 6d to 64s, to arrive 61s 3d to 61s 6d. A cargo of Black Sea off the coast has sold for the continent at 62s 4½d per quarter.

OILS.—A good business has been done in olive, chiefly in the lower qualities. Mogadore and Tunis, 45/ 10s to 46/; Gallipoli has sold at 49/ to 49/ 10s. Fish oils remain dull. Sperm, 82/; pale seal, 34/ per ton. Linseed steady at 32/ 15s to 33/, but there are sellers for the last four months at 32/ 10s. English brown rape dull at 41/ 10s to 41/ 15s on the spot and next month. Last four months, 41/ 15s to 42/; refined, 43/ 10s to 43/ 15s. Ceylon cocoa-nut is dull, and quoted 39/ 10s to 40/. Supplies afloat are large. Cochin obtains the late high quotations for small parcels. As fine qualities of palm continue scarce, 37/ 10s per ton is paid for Lagos.

TURPENTINE.—Sales of some importance have been made. The market was cleared yesterday, and prices rose to 45s, and 44s per cwt. for American and French respectively.

PETROLEUM is quiet. American refined, 1s 6d and 1s 6½d; last four months, 1s 6¼d per gallon.

TALLOW.—During the week the tone of the market has been quiet, with prices of foreign rather weaker. Petersburg, 44s to 44s 3d; old, 43s 6d. October to December, 45s 6d to 45s 9d per cwt. The public sales to-day will again be large.

PARTICULARS OF TALLOW—Monday, July 17, 1871.

POSTSCRIPT. FRIDAY EVENING

SUGAR.—The market is steady, but without animation. 1,190 casks West India sold, including the parcels by auction, making 4,620 casks for the week. 2,611 bags Mauritius were chiefly taken in. 215 bags Natal sold at 24s to 30s 6d for brown and yellow. A cargo of brown Bahia sold at 23s, and one at 22s 4½d for the United Kingdom.

COFFEE.—1,069 casks, 93 barrels, 271 bags plantation Ceylon by auction sold at former prices. 360 cases East India partly found buyers, also on former terms.

SAFFLOWER.—151 bales Bengal were taken in at high prices. 679 bales cubes Gambier sold at 16s 9d per cwt.

SHELLAC.—148 chests part sold at the previous quotations for orange, &c., and at 75s per cwt for dark button.

METALS.—Tin, declined. Straits, 133/ to 133/ 10s. Welaroo copper advanced to 77/ 10s. Scotch pig iron, 59/ 9d per ton, cash.

OILS.—42 casks palm, 132 casks cocoa-nut, &c., and 131 tuns whale oil withdrawn.

TALLOW.—At auction 1,800 casks Australian, about 1,300 sold. Sheep, 37s to 44s, being about last week's rates. Beef, 35s to 42s 6d, a decline of 6d to 9d. 180 casks South American mutton, a few lots sold at 43s per cwt.

ADDITIONAL NOTICES.

ENGLISH WOOL.—The excitement still continues.

COLONIAL WOOL.—The sales have progressed with great spirit during the last week, prices have further advanced since the opening about 1d per lb on washed wool. Greasy remains firm.

FLAX.—Market firm.

HEMP.—Market dull for Russian. Manila very firm and a good business passing, 49/ paid for good fair roping.

SILK.—A large business has been done in China silk to arrive, at advanced prices. All classes of silk are active. Prices firm.

TOBACCO.—There has been rather more inquiry for North American tobacco during the past week, which has resulted in a few sales, but purchasers have confined themselves chiefly to tobacco of old import.

LEATHER.—There has been a good steady demand for most descriptions of leather during the past week, but at Leadenhall on Tuesday there was a limited supply, and the transactions were consequently lessened.

METALS.—There has been a steady business doing all the week. Copper has changed hands to a considerable extent, especially foreign kinds. Iron keeps in fair demand. Tin shows great firmness, with business doing daily. Spelter is quiet. Lead shows a shade more life. Tin plates are in free demand.

METROPOLITAN CATTLE MARKET.

MONDAY, July 17.—The total imports of foreign stock into London last week amounted to 17,497 head. In the corresponding week in 1870, we received 85,850, in 1869, 14,160, in 1868, 19,784; and in 1867, 8,804 head.

In the cattle trade to-day there has been an absence of animation. About an average supply of beasts has been on sale, and the quality of the same stock has somewhat improved. The depression in the dead meat market has exercised an unfavourable influence upon the demand, and prices receded fully 2d per 8 lbs. The best Scots and crosses have been disposed of at from 5s 8d to 5s 10d per 8 lbs. The market has been well supplied with sheep. Business has been only to a moderate extent, and prices have ruled in favour of purchasers. For the best Downs and half-breds 6s 4d to 6s 8d per 8 lbs has been paid. Lambs have changed hands quietly, at from 6s 6d to 7s 6d per 8 lbs. Calves have been dull, and there has been but little inquiry for pigs.

SUPPLIES on SALE.

Lamb, 6s 0d to 7s 0d.

HOP MARKET.

BOROUGH, Friday, July 21.—The bine having showu but little improvement, much firmness has been observable in this market. The business doing has not been extensive, but prices have had a strong upward tendency. Mid and East Kents, 3*l* 0s to 7*l* 7s; Weald of Kents, 3*l* 0s to 5*l* 0s.; Sussex, 3*l* 0s to 4*l* 10s; Farnham and county, 4*l* 0s to 6*l* 0s.; and olds, 1*l* to 1*l* 10s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, July 21.—Full average supplies have been on offer. Sales have progressed slowly, at late rates. English Shaws (old, per ton), 50s to 70s.; Regents, 60s to 80s; kidneys (new, per cwt), 4s 6d to 6s; Jerseys, 4s to 7s.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 21.—Our East India sales, the fourth series of this year, which commenced on the 18th inst., are progressing very satisfactorily, and prices are fully up to the closing rates of the May series. The miscellaneous kinds, to the extent of about 7,600 bales, will be offered on Tuesday and Wednesday next, the 25th and 26th inst.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, July 21.—This market has been quiet to-day, and the attendance moderate. Wheat was in good demand, at 2d reduction. Flour was 1s lower; Indian corn unchanged since Tuesday; beans, 35s; mixed, 33s 3d; peas, 40s 6d; oats, 3s 7d to 3s 10d; oatmeal, 29s 6d to 30s.

WAKEFIELD, Friday, July 21.—Owing to the late fine weather, the crops have materially improved, and this circumstance, combined with the liberal supply from abroad, has caused the wheat trade to remain very dull. Prices must be noted 1s per quarter lower than last Friday, and the business passing in this market is almost exclusively confined to a little choice white wheat. Other articles are dull, and rather lower.

The Gazette.

TUESDAY, July 18.

BANKRUPTS.

William Bleckly Gower and Charles Arnold Bleckly, Little Rush lane, Cannon street, merchants.
Henry Sheffield, Rood lane, City, merchant.
Frederick English, Charlton Kings, Gloucestershire, major-general in the army.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN,

Is extensively used for all kinds of

OUT-DOOR WORK.

It is especially applicable to

WOOD, IRON, BRICK, STONE, AND COMPO.

OFFICES—6 Victoria street, Westminster.

The International Financial Society (Limited) are authorised to receive subscriptions for £[illegible] Five per Cent. A Debenture Stock of the Northampton and Banbury Junction Railway Company.

The Northampton and Banbury Junction Railway Act, 1871, was obtained by the Company, and received the Royal assent on the [illegible] day of [illegible], 1871.

The Act authorises the Company to create and issue £[illegible] Five per Cent. A Debenture Stock, ranking as a first charge on the undertaking of the Company, subject only to the annual payment of £[illegible] per annum, in perpetuity, by way of rent charge.

The Act also authorises the Company to create and issue £[illegible] Five per Cent. B Debenture Stock, forming a second charge.

The whole of the B Debenture Stock has been issued, with the exception of £[illegible] reserved by the Directors for the purchase of certain properties connected with the line.

Of the £[illegible] A Debenture Stock, £[illegible] has, in pursuance of the Act, been reserved by resolution passed by the Board, and the balance of £[illegible] (after a deduction on the same undertaking at the Company's option) now to the amount of £[illegible] has been issued. Of this £[illegible] has been taken by contractors for [illegible], works they have undertaken for the Company, and £[illegible] has been offered for subscription.

The Northampton and Banbury Railway is a line of [illegible] miles in length, starting from Blisworth (where it joins the main line of the London and North-Western Railway) and joining the Banbury Extension of the London and North-Western Railway, over which the Northampton and Banbury Junction Railway Company have running powers for about 5½ miles to Banbury.

The line therefore forms a direct connection between the important towns of Northampton and Banbury, and effects a saving in distance of over 20 miles as compared with the existing route between those two places, the distance by the Company's line being a little over 30 miles, against [illegible] miles by the present route, viâ Towcester and Bletchley.

The country traversed is fertile and populous, and in many cases will be valuable for the [illegible] which it will afford to the Railway Company. The traffic of the East and West Junction Railway from Towcester will also pass over the N.B. Line [illegible] miles of the Company, and to that extent they have running powers.

The line thus forms part of a system, expected shortly to be completed into South Wales and of enormous importance to the prosperity of the Northamptonshire and other districts.

Assuming the traffic to remain at first only, the [illegible] estimate of £[illegible] per mile per week and allowing for the working expenses (the low amount of [illegible] per mile per week) there would remain a net revenue of about £[illegible] a year, which would be sufficient to pay the interest on the A Debenture stock, and [illegible] per cent. upon the B Debenture Stock. It is of course anticipated that [illegible] the traffic will be developed, but the estimate will [illegible] £[illegible] per week, and very large [illegible] the extension into South Wales to be effected [illegible].

The [illegible] from Towcester to Towcester [illegible] miles, is expected [illegible] passenger traffic, and [illegible] from other [illegible]. From these [illegible] the Company [illegible] of the [illegible] a very favourable [illegible] from which [illegible] can be expected for [illegible] traffic, and the whole line will be completed by the [illegible] Act.

The [illegible] of the present issue a sum of [illegible] will, after paying for the [illegible] remain in the hands of the Company. For the twelve months' interest on the A and B Debentures, in the event of the [illegible] during the first opening months, not only pay the [illegible].

The stock will bear interest at 5 per cent. per annum from 1st July, 1871, payable half-yearly, on 1st January and 1st July.

The price of issue will be £95 per cent. payable as follows:—

£		
5	per cent. on application.	
15	—	on allotment.
25	—	15th August, 1871.
25	—	15th September, 1871.
25	—	16th October 1871.
95		

Subscribers paying up their stock in full on allotment or on any of the days fixed for payment of the instalments will be allowed discount at the rate of 5 per cent. per annum.

Failing all payments after the interest accrued and the allowance for payment in advance, the power of the Company to declare the whole £95 to be due.

The Terms of Debenture Stock that the Act authorises may be inspected at the Offices of the Company, No. 6 Victoria street, Westminster, or at the Solicitors, Messrs Rickham and Co. 7 Parliament street.

Scrip certificates will be issued on account to the 20 per cent. payable on allotment when have been paid, and when paid up in full the holder will be entitled on surrendering his scrip certificates, to receive the definitive certificates.

Where no allotment is made the deposit will be returned in full.

In case a less amount of stock is allotted than is applied for, the surplus of the deposit will be applied in whole or in part, as the case may be, to the payment of the amount due on allotment.

Applications on the enclosed form, and accompanied by the necessary deposit of 5 per cent. on the amount of stock applied for, will be received by the Bankers, Messrs Glyn, Mills, Currie, and Co. Failure to pay any of the future instalments according to the prospectus will render the allotment and all previous payments liable to forfeiture.

Prospectuses may be obtained of the International Financial Society (Limited), No. 69 Threadneedle street; of the Brokers, Messrs P. Cazenove and Co., 42 Threadneedle street; or at the Offices of the Company, 6 Victoria street, Westminster.

London, July 19 1871.

TEMPORARY OFFICES—47 Finsbury circus, E.C.

ABRIDGED PROSPECTUS.

This Company has been formed for the purpose of acquiring and working a valuable auriferous property, under exceptionally favourable circumstances and with an assurance of the best attendant upon most assured enterprises. The mine in question is well known as the "Pittsburg Gold Mine," situated in Nevia a County, State of California, about seven-and-a-half from Nevada City and two-and-a-half miles from the town of Grass Valley. It is, and has been for some years past, in active operation, and is furnished with a well-appointed plant, with engine, batteries, amalgamating, &c., a [illegible] vat, &c., complete brick building, used as superintendents office, stores, and miners' houses; steam hoisting engine, engine-house, and [illegible] apparatus all necessary tools and supplies for mining and working, and there are good roads, tramways, and other improvements upon the property. The value of the ground from the mine for the past [illegible] years, as nearly as can be ascertained, is about [illegible] per ton. The present owners on the 4th April last crushed the average quantity of 70 tons [illegible] tons), [illegible] per day.

This [illegible] an average yield of [illegible] per ton of ore; but taking a lower average, upon the hypothesis that the [illegible] of gold amounted to £2 per ton only, and calculating the expenditure of the existing batteries to crush and treat 10 tons of ore per day, the daily production would be equal to £[illegible], and the monthly product (taking the number of days operated on at 26), and the number of working days at 25, £1,950.

	£
In 12 months this would amount to [illegible]	58,500
From which deduct costs and charges, say £3 per ton	14,600
Leaving as the net product	24,000

Equal to a dividend of 24 per cent. upon the capital of the Company.

It is, however, proposed to make additions to the machinery and increase the number of stamps to 20, so as to consist of the crushing and treatment of [illegible] tons of ore per day, and by this means the receipts could be [illegible] as follows, counting [illegible] working days per annum:—

	£
45 tons per day, say 12,000 tons per annum, at £2 per ton, equal to [illegible]	[illegible]
Less cost of [illegible] than at £3 per ton [illegible]	[illegible]
Net profit [illegible]	[illegible]

Equal to 60 per cent. upon the Company's capital.

The [illegible] consists of [illegible] four [illegible] claims along the [illegible]. It embraces the [illegible] being [illegible] of this [illegible] amounting to 20 acres and is held under a patent from the Government of the United States. The width of the lode varies from 18 inches to 2½ feet; and in the 6th and 6th levels maintains an average width of about 2 feet. The vein is a true fissure, and has been opened to a depth of about 100 fathoms. The amount of valuable ore in the lode to a depth of 100 fathoms would probably exceed 500,000 tons, and at the above low average of £2 per ton, the gross yield would amount to a sum of £1,000,000 sterling; but even this would not exhaust the mine, as an immense depth of ledge would remain to be worked.

Reports have been furnished by those eminent mining authorities, the Hon. J. Ross Browne late special agent of the United states Treasury department for the Pacific Coast, United States Commissioner of Mining Statistics, &c., &c., by Mr R. W. Raymond, the present United States Commissioner of Mining Statistics; and by Mr William Ashburner of the State Geological Survey; and it is proposed by the Directors to employ Mr James D. Hague, Geologist and Mining Engineer (author of "The Official Report on the Mining Industry of the Pacific Coast," published by order of Congress), to examine the property, and to make a further report.

The price to be paid for the property, including the stamp mill, buildings, engines, tramways, tools, and mining implements, gear, and plant of every description, is £[illegible] in cash, and £[illegible],000 in fully paid-up shares; and £20,000, the balance of money subscribed, will be reserved as capital to be expended in increasing the capacity of the mill to 30 stamps, and for other improvements.

The preliminary expenses will be paid by the vendors. Before any payment is made on account of purchase-money, it is stipulated that the title shall be approved, and the statements, as above set forth, be verified to the satisfaction of the Directors.

The Directors congratulate themselves upon having made arrangements with Mr Browne to act as general manager for the Company in California, who has agreed to give his personal attention for a term of two years to the proposed improvements, and to the current operations at the mine; and has also agreed that his remuneration shall consist of a percentage upon the net profits—thus furnishing the strongest possible guarantee of his confidence in the soundness and stability of the enterprise.

A provisional agreement for the purchase of the property dated 18th July, 1871, and the Articles of Association have been deposited with Messrs Hayward, Keele, and Swann, the solicitors of the Company, at whose Offices, No. 5, Frederick's place, Old Jewry, these documents may be inspected.

A copy of the United States patent, with plans and sections of the workings, can be seen at the Office of the Company, where full copies of the above-mentioned reports may be had, and every information will be afforded by the Secretary.

Applications for shares, in the form herewith, should be sent at the Company's Bankers, the Union Bank of London. Prospectuses and forms of application may be had from the Secretary, at the Offices of the Company.

FORM OF APPLICATION FOR SHARES.

The Pittsburg Gold Mining Company (Limited).

No.——

Gentlemen,—Having paid to your Bankers the sum of £ , as deposit of £1 per share, on shares in the Pittsburg Gold Mining Company (Limited), I hereby request that you will allot to me shares in the said Company; and I agree to accept such shares, or any less number you may allot me subject to the provisions of the Memorandum and Articles of Association of the said Company; and I hereby authorise my name to be entered on the register of members of such Company for the shares so allotted.

THE PITTSBURG GOLD MINING COMPANY (Limited).

The SUBSCRIPTION LISTS for the SHARES in the Company will CLOSE THIS DAY, for London, and on MONDAY, the 24th, for the Country.—By order of the Board. G. S. M'KAY, Secretary.

No. 47 Finsbury circus, July 22, 1871.

CENTRAL ARGENTINE RAILWAY COMPANY (Limited).

ISSUE OF £100,000 SEVEN PER CENT. DEBENTURES.

In pursuance of a Special Resolution of the Company of the 30th March, 1871, the Directors are prepared to receive Tenders for £[illegible],000 debentures, to run for five years, bearing 7 per cent. interest, payable half yearly, on the 1st January and 1st July. Such debentures to be issued in sums of £1,000, £500, and £100 each.

The payments are to be made as follows:—£5 per cent. on application, £20 per cent. on allotment, and the remainder in three instalments of £25 per cent. at intervals of three months from the date of allotment. The debenture may be paid in full at any time and £5 per cent. interest will be allowed on such prepayment.

Where the amount allotted is less than that applied for, the balance of the deposit will be applied towards payment of the subsequent instalments. Where no allotment is made the whole of the deposit will be returned without delay. Tenders stating the amount debenture are to be sent in sealed envelopes marked "Tender for Debentures," to the Secretary at the Company's Office, No. 82 Palmerston buildings, Bishopsgate street, E.C. enclosing Bankers receipt for the deposit of 5 per cent. on or before the first day of July instant. The Tenders will be opened by the Directors on the 1st of August, when the debentures will be allotted to the highest tenders, provided the prices offered are not below the minimum price to be fixed by the Board previous to the opening of the Tenders.

The form of the proposed debentures may be inspected by intending subscribers at the Company's Office, where printed forms of Tender may be obtained.—By order of the Board.

GEORGE WOOLCOTT, Secretary.

82 Palmerston buildings, Bishopsgate street
21st July 1871

THE ALEXANDRA PALACE AND MUSWELL HILL ESTATE TONTINE.

(To terminate on the 30th June, 1886.)

This being a "Trust" subscribers incur no liability.

Certificates representing 850,000 guineas (of which 1s of each guinea is to be appropriated to insurance of subscribers) will be issued at the following rates:—

	£	s	d	
A (or single right) certificates...each	1	1	0	Payable on Application.
B (or 10 right) — —	10	10	0	
C (or 25 right) — —	26	5	0	
D (or 50 right) — —	52	10	0	
E (or 100 right) — —	105	0	0	

Certificates pass to and entitle the bearer:—

1. To participation in the proceeds of sale of the property if the representative life upon which the Tontine privilege depends shall be living on the 30th June, 1886.
2. To the receipt from a life assurance of the sum of 20s in respect of each guinea paid upon any certificate, if the representative life shall die before the said 30th June, 1886.
3. To admissions to the Palace and park.
4. To participation in Art Union distributions proposed to be hereafter established.

(As explained in detail in the body of the prospectus.)

The acceptance of a certificate involves no liability.

The rights and privileges of certificate-holders are governed by the trust deed.

The whole net income of the undertaking, after defraying interest charges and management expenses, will be devoted to the improvement of the property, and also (when power is obtained) to Art Union distributions.

PROSPECTUS.

CONTRACT FOR PURCHASE OF PROPERTY.

An advantageous contract has been concluded for the purchase, free from incumbrance, of the Alexandra Palace, park, and lands adjoining, situate at Muswell hill, Hornsey, in the county of Middlesex (comprising about 470 acres of freehold and 28 acres of lease old land), and the contents of the Palace, for the sum of £675,000. Of this amount £450,000 may remain on security of the property for 5 years, represented by mortgage and debentures. Power is taken to raise further capital not exceeding £150,000, if deemed desirable, for the improvement or enlargement of the property and for the benefit of the Tontine.

OBJECT OF TONTINE—THE INSTITUTION.

The object of the Tontine is to complete the purchase and improve the property, and thus to provide for all classes of the inhabitants of the Metropolis, and especially of its northern and eastern portions and suburbs, and for the many thousands of country excursionists, a grand institution of healthful recreation and elevating instruction, which will combine the solid advantages of the South Kensington Museum and Schools of Art, with the lighter pleasures and pastimes of the Crystal Palace at Sydenham, thus giving effect to the large and enlightened views of the late Prince Consort.

ART UNIONS.

In furtherance of this design it is proposed to inaugurate a series of Exhibitions, Art Unions, and distributions, to the support of which, and as soon as the necessary power can be obtained for the purpose it is proposed that the chief portion of the profits of the park and Palace, after making proper provision for management, improvement, and other charges, should be applied.

PALACE AND GROUNDS.

Under "the Muswell Hill Estate and Railway Act, 1856," the Palace and about 200 acres (which then constituted the grounds) are to continue a place for public resort and recreation, subject to the observance of such rules and regulations as may be prescribed by the owners, and to the payment of such reasonable sums as may be fixed for admission to the grounds and Palace, or to any exhibition or sights therein.

ENLARGEMENT.—BUILDING LAND.

It is now intended to enlarge the park, and to lay out the whole of the lands as pleasure grounds, with the exception of about 80 acres of beautiful freehold land on the border, which will be reserved for building purposes, so that there will be a park surrounding the Palace, and within a ring fence, of about 400 acres in extent. But power is taken with the consent of the Trustees to sell or lease for building purposes any part of this land not subject to the provisions of the Act of 1856, should such a course appear desirable in the interest of the Tontineers or subscribers.

DESCRIPTION OF PALACE AND GROUNDS.

The Palace is a splendid, capacious, and substantial structure, requiring but a comparatively small outlay to keep it in repair, admirably adapted for Exhibitions, Museums, and Lectures, and for Musical Festivals and Concerts, as well as for festive and social gatherings of the greatest magnitude.

A grand organ, which is reputed to be one of the largest and most perfect in the world, has been erected in the Palace by Mr Willis, under the direction of Sir Michael Costa.

Archery, cricket, and croquet lawns, turfed rides, a race course with grand stand, well-levelled carriage drives, groves, and gardens, will be found in the park, which is nobly timbered, and commands extensive and magnificent views into several counties. This institution, therefore, which can be opened to the public in a very short space of time, will combine the advantages afforded by Museums, Exhibitions, and Schools of Art, with scenery of the utmost beauty, and pure air, thus contributing alike to the instruction, amusement, and health of the visitor.

ACCESS TO PALACE.

There will be easy access to the Palace by railway communications in connection with the Great Northern and Metropolitan lines, and a Bill is awaiting the Royal Assent for authorising the construction of a short line to connect the park with the Midland and Great Eastern systems. The Committee will have power to aid these enterprises, which are of great importance to the success of this undertaking.

FINE ARTS.

The Exhibitions and Art Unions distributions will constitute a distinctive feature of the general plan, and will comprise every characteristic of the fine arts. An inaugural Exhibition will be held as soon as the requisite powers are obtained.

It is intended to apply to Parliament for power to devote part or the whole of the surplus income to Art Union distributions, to be held every third year during the term of the Tontine, and to appropriate a number or chance in each distribution to every certificate in respect of every 21s paid thereon. It is estimated that the fund for distribution will amount triennially to £100,000, and the prizes will range from £500 to £2.

The following table indicates what any certificate holder may derive from this source:—

ANALYSIS OF THE PROBABLE ART UNION PRIZES AT EACH OF SAY FIVE TRIENNIAL EXHIBITIONS.

ART UNION PRIZES.

			£
25	Prizes of	£500 each	12.500
30	—	400 —	12,000
40	—	300 —	12,000
50	—	200 —	10.000

3.000	—	3 —	9,000
5,350	—	2 —	10.700
10,895			100,000

SINGLE CERTIFICATES MAY OBTAIN PRIZES OF £500 EACH FOR 21s.

The value represented by the prize tickets is to be applied wholly in the selection of articles contained in the Alexandra Art Union Exhibitions, and it will be seen that it is possible for the holder of a single right certificate to receive five prizes of £500 each for his investment of 21s.

CERTIFICATES TRUST DEEDS.

The certificates will be issued under the powers of the trust deed, which will define and regulate the rights and privileges of the certificate-holders, and a covenant will be contained therein on their part to observe the provisions of the deed.

SURPLUS INCOME.

The whole of the net income of the Tontine during its existence will be applied, as above explained, to the improvement of the property and to Art Union distributions.

INSURANCE OF CERTIFICATE-HOLDERS.

An established insurance company has agreed, in consideration of the payment to them of a premium of one shilling for every A (or single right) certificate, and so on in proportion for any plural rights certificate (i.e., one shilling for each right) to pay to the holder £1 for each guinea paid on such certificate upon the death of the representative life in respect of which the Tontine privileges depend, if such death happens before the 30th June, 1886, provided such certificate shall not have been previously surrendered, or the bearer of such certificate for the time being shall not have drawn a prize in an Art Union distribution in respect of the right representing such guinea. Such premium will be paid out of the Tontine funds. The agreement is subject to 20,000 representative lives being nominated.

For the purposes of the insurance and Tontine, every applicant for a certificate must, when requested, nominate some life (which may be his own) between the ages of ten and twenty years; such lives should not be those of prominent individuals, but, if possible, of members of the applicant's family, or friends. Applicants may nominate a life for each right the certificate they apply for represents. If the applicant chooses to waive the insurance he may nominate any life.

To meet the case of any selected life having been previously nominated and assured to the amount of £500, an applicant may be required to furnish some other life or lives in substitution for that first nominated.

TONTINE WILL CEASE JUNE 30, 1886. PROPERTY THEN TO BE DISTRIBUTED.

Upon the 30th June, 1886, the Tontine will absolutely cease; and as soon as may be after that date the whole of the property will be realised, and the net proceeds will be distributed amongst the Tontineers or certificate-holders.

PRIVILEGES OF CERTIFICATE HOLDERS.

The holder of an A, or single right certificate, in addition to his other privileges, will be entitled to free admission to the park, (and also to the Palace, if open), upon every Sunday during the existence of the Tontine.

The holder of a B, or 10 right certificate, will, in addition, be entitled to free admission on two days (not being fete days), to be fixed by the Committee, in each week.

The holder of a C, or 25 right certificate, will be entitled to similar privileges for himself and another on foot or on horseback.

The holder of a D, or 50 right certificate, will be entitled to free admission on four days in each week (not being fete days), to be fixed by the Committee, for himself and two others, either on foot, horseback, or with a single horse carriage.

The holder of an E, or 100 right certificate, will be entitled to free admission for himself and four other persons at all times, either on foot, horseback, or with any carriage.

The Tontine rights and privileges attaching to certain certificates may, at the option of the holder, be surrendered for the right of admission on other days, according to a plan or scale to be published by the Executive Committee. The surrender will involve the loss of every right and privilege offered in this prospectus to the holders of certificates, except so far as the same are reserved as part of the consideration for the surrender.

The holder of a certificate which shall not have been surrendered, will be entitled to participate in the proceeds of the property, at the end of the Tontine, in respect of every right depending on a representative life which shall be living on the 30th June, 1886.

CONTRIBUTORS INCUR NO LIABILITY, AND BENEFIT.

Thus every subscriber of 21s and upwards to the Tontine, or the holder for the time being of his certificate (the same not having been previously surrendered) will, in addition to the privileges of entry to the park and Palace, as above enumerated, obtain the repayment, in case of the death of the representative life or lives, of 20s in respect of every 21s paid by such subscriber, or will have previously drawn a prize of at least £2 on the Art Union distribution in respect of such 21s subscription, and will, when the Tontine ceases, have in respect of each of his rights of which the representative life shall be then in existence the right to a share in the proceeds of the Tontine property. Looking at the rapidly-increasing value of building land near London there can be no doubt that at the expiration of the Tontine in 15 years, the property to be then distributed amongst the holders of certificates entitled to participate will be of enormous value.

MANAGEMENT.

For the convenience of management of the Tontine and property, and with that object only, a Company (limited by guarantee) has been incorporated by the title of "The Alexandra Palace and Muswell Hill Estate Management Company (Limited)." The Executive Committee of the Tontine are the Directors of that Company. The certificate-holders will not be members or contributories of such Company.

PROPERTY VESTED IN TRUSTEES.

All the landed property to be acquired for the purposes of the Tontine will be vested in the Trustees upon trust, to permit the Management Company to manage the same, and with the consent of the Trustees, so far as required by the trust deed, to grant leases, and deal therewith for the benefit of the general undertaking, and raise further capital, not exceeding £150,000, if required, for the undertaking by mortgage or debentures (in addition to the working capital provided by the Tontine), and upon the termination of the Tontine (the 30th of June, 1886), or as soon after as may be convenient, to sell the Tontine property and distribute the proceeds.

DEEDS.

By the terms of the trust deed all questions (if any) which may arise relating to the Tontine, during its existence or on its termination, stand referred to such counsel as the Attorney-General for the time being may appoint.

The Purchase Contract, the Trust Deed, the Insurance Contract, and the Memorandum and Articles of Association of the Management Company may be perused at the Offices of the Solicitors.

If no issue is made the subscriptions will be returned in full.

The following documents have been executed:—

(1) An Agreement, dated 13th July, 1871, between the Muswell Hill Estate Company (Limited) and the Alexandra Palace Company (Limited) of the one part, and the Alexandra Palace and Muswell Hill Estate Management Company (Limited) of the other part.

(2) A Deed of Trust, dated 13th July, 1871, between the Alexandra Palace and Muswell Hill Estate Management Company (Limited) of the one part, and Henry Markby of the other part.

(3) A Deed of Covenant, dated 13th July, 1871, between the London and Lancashire Life Assurance Company of the one part, and the Alexandra Palace and Muswell Hill Estate Management Company (Limited) of the other part.

PROSPECTUS.

Prospectuses (with an outline sketch of the Palace) and forms of application for certificates may be obtained of the Secretary at the Offices of the Tontine, and of the Brokers.

Other agencies for the receipt of applications will be shortly advertised.

APPLICATION FOR CERTIFICATES.

Applications for certificates must be left with the Bankers at the time of payment of the deposit, and no application will be noticed unless the sum of 21s in respect of each single right, or the amounts specified for plural rights applied for as above stated, shall have been paid.

CREDIT LYONNAIS.

(Limited).

Capital, entirely paid up, 50,000,000 francs (£2,000,000).

London Bank Committee in London.

A further Half-Yearly Dividend of 2½ per cent. for the year 1871 has been declared, in addition to the 2½ per cent. paid on account of the Dividend for the year, making a Dividend for the year of 5 per cent., payable on and after the 1st August next, at the Company's offices in London, 10, Clement's lane, Lombard street, E.C., and also at the London Agency, No. 4 Adelaide place, E.C.

The General Meeting, convened on account of the previous meeting not having been held for want of a quorum, will be held at the Palais du Commerce, Lyons, on the 31st of July, 1871, at 2 o'clock.

NEW WHEAL SPEEDWELL TIN MINE.

Now that the price of tin has been raised so as to render the working of the mines once more hopeful, one of the most profitable investments in which capital can be employed is the acquirement of the valuable properties lying unworked and waste for the want of sufficient capital to work them to the best and most economical advantage. The experience gained of mining enterprise and speculation in the mining districts of West Cornwall, has given rise to the policy of shares in Companies like the one now in question, which have been subscribed for and partly developed, but have failed from want of sufficient working capital. For example, both these shares, which a year ago were quoted and sold at a price of about £10 per share, cannot now be bought under £40, and other instances could be given with which the public are familiar. Indeed, it is the opinion of competent judges that now the mines have begun to pay, nothing will realise anything like their value so much as Messrs. LEWIS MAY and Co.'s £5 deposit Cards (shares), Liverpool, which therefore gives the intention of their friends and the public to the New Wheal Speedwell Mine, one of the most promising ones in a district which is recognised and famed for the value of its mines, having legacies, and which is corroborated by private advice, which shows a yearly increase in the value of the property. It is therefore evident that at the same price as the £5 deposit Cards of New Wheal Speedwell Mine, which has a small sum of capital, and a number of shares with which to work it, there are other mines with shares in large numbers, which, with capital, and the commencement of the real working, would be found to be of much greater value. Messrs. LEWIS MAY and Co. have been requested by the best practical and first mining authorities to recommend the New Wheal Speedwell Mine, as the great returns of this district is now realising 4l per ton from the poorest ore. The New Wheal Speedwell Mine is recommended by all the most practical mining authorities as one which will be even now in a position to realise a large property of the before the great deposits of ore are exposed. Messrs. LEWIS MAY and Co. have had to refuse many applications, as very few shares are in hand, and they may reasonably be expected to go at a great premium.

THE WHITEHAVEN IRON MINES

(Limited).

Incorporated under "The Companies Acts, 1862 and 1867," by which the liability of every shareholder is limited to the amount of his shares.

Capital, £95,000, in 9,500 Shares of £10 each.

For 4,450 of which applications will be received by the Directors.

Deposit—On application £1 per share; on allotment £3 per share. The balance payable as follows:—£2 on 1st September, 1871; £2 on 1st November, 1871; £2 on 1st January, 1872. With the option to subscribers of paying the whole amount or the shares on allotment, in which case dividends will be reckoned from the date of payment thereof.

BOARD OF DIRECTORS.

ABRIDGED PROSPECTUS.

1. The object of this Company is to acquire and develop two very extensive hematite iron ore properties in the county of Cumberland, covering an area of upwards of 1,000 acres and containing veins of hematite and kidney and Whitehaven iron ores, yielding, according to analyses, 65 per cent. of metallic iron, and it is the opinion of practical men that when these mines are fully laid open the returns of ore will not be less than 200,000 tons per annum, at an average cost under existing arrangements of 10s per ton, but this cost will be reduced 3s to 4s per ton on the completion of the tramways it is proposed to construct. The present price of this class of ore, both at the Cumberland ports, is from 18s to 19s and 20s per ton, which on the estimated out-put would give the Company a profit of from £70,000 to £100,000 a year.

2. The iron mines of Cumberland, and particularly those in the Whitehaven district, are well known for the richness of their produce and the yearly increase in their returns of ore, which has risen from 225,220 tons in 1854 to 1,467,810 tons in 1870, and is believed to have been still greater in 1870. The proprietors of many of these mines have acquired immense fortunes, and are now receiving large annual profits as much. It is confidently stated, in some instances as £150,000 to £200,000 per annum.

3. The mines to which reference are thus made are situated in the celebrated "Cleator Moor," "Frizington," and "Egremont" district, where the ore exists in the coal-bearing limestone formation, and is found in beds or deposits varying from a few feet to more than twenty yards in thickness, containing almost inexhaustible masses of ore of the richest description. An instance may be quoted of the productive character of these deposits where at the Hodbarrow iron mines the returns of ore exceeded 100,000 tons in 1868, and which it is stated, by shafts increased to 250,000 tons. The owners pay a certain fixed rent of £15,000 a year for the mines.

4. The properties to be acquired and developed by this Company are of the mountain vein formation and, as will be ascertained on a careful perusal of the report accompanying the prospectus, possess these natural facilities for open and extensive working. The properties referred to are 1—The Lowside and Mitredale Iron Mines; 2—The Bowthorn Farm, Starling Dodd, and Red Pike Mines. The ore mines named—the Lowside—is situated between Lowside and Mitredale, and is about seven miles from the shipping port of Ravenglass, and covers an area of about three acres. It is held on lease at the moderate rental of £20 per annum, and a royalty of 7d per ton on all iron ore raised. The property known as the Bowthorn Farm, Starling Dodd, and Red Pike mines is situated on the east basin slopes of those mountains, and about midway between Ennerdale and Buttermere lakes, and covers an area of upwards of 1,000 acres. It is held on lease at a nominal dead rent of £10 per annum, and a royalty of 1s per ton on all iron ore raised.

5. In comparing these extensive and valuable properties with the iron mines of Cumberland now being wrought, and returning such enormous profits to the proprietors, it may be useful to call attention to the following facts:—

First. The mines to be worked by the Company cover an area of upwards of 2,000 acres, are in extensive main veins, 7 feet wide, which are considered practically inexhaustible, and they are held on nominal terms, the total annual rental for the whole being but £50 per annum, excepting one mine on royalty of 7d and 1s per ton respectively, on the ore raised, which is

Second. The existing iron mines now being worked vary in extent, being from 10 to 150 acres, each mine requiring a large outlay in the first instance, and expensive engines necessarily and expensive machinery to enable them to work, and are subject to heavy land rents and royalties amounting in one case to £11,000 a year, and one mine as high as 2s per ton on the ore raised, with additional items of heavy burdens, profits of from £30,000 to £40,000 per annum are obtained from them.

6. An agreement has been entered into, dated the 15th day of February, 1871, under which the Company obtains possession of the mines, in consideration of an allotment of five thousand fully paid-up shares in the Company, and a payment of fifteen thousand pounds in money. This agreement has been carried into effect, so far that a deed of trust has been executed in favour of the Company, under which possession of the mines has been obtained, an allotment of the shares made by the Company on the 19th day of May, 1871, and preliminary operations commenced; these documents, together with the memorandum and articles of association, may be inspected at the Company's Office.

7. A careful perusal of the accompanying reports by intending investors is invited. Prospectuses and forms of application for shares may be obtained from the Bankers, and at the Offices of the Company, where fair samples and analyses of the iron ore may be inspected, and every information respecting the Company obtained.

London, 17 Gracechurch street, E.C., July 12, 1871.

ABRIDGED PROSPECTUS.

The vast increase of population at the east end of London, and the total inadequacy of the present accommodation for burials in the neighbourhood of its densely-peopled parts, and the pressing need of many of the persons with in this area, have induced the formation of the Company.

A most eligible site, containing 43 acres, in a central position of the parish of West Ham, near to the Plaistow Station of the London, Tilbury, and Southend Railway, has been secured upon favourable terms, and having been inspected by the Government officer, the Secretary of State for the Home Department has certified his approval of it as a cemetery for the eastern parts of the Metropolis.

The population of the immediately surrounding neighbourhood, and within a radius of 2½ miles is 120,000, and the death returns for the year 1869 (the last compiled by Government) was over 3,000.

It is confidently expected that the largest proportion of the burials for these populous and rapidly-growing districts will take place at the proposed cemetery, and having regard to the satisfactory terms on which the land has been obtained and its local position, there is every reason to believe that a large income will accrue, yielding a profit fully equal to, if not beyond, that made by the most favourite of the Metropolitan cemeteries.

The value of cemetery property as an investment is so fully understood that it is needless to dilate upon the subject. No promotion money has been or will be paid out of the funds of the Company.

To meet a want often expressed, it will be stipulated by the Articles of Association that the holders of any paid-up share or shares of stock in the Company may exchange the same for burial spaces or vaults in the cemetery of the Company.

Full prospectuses and forms of application for shares can be obtained at the Temporary Offices of the Company, where the contract for purchase, and the Memorandum and Articles of Association can be inspected.

THE EAST LONDON CEMETERY

COMPANY (Limited).

Notice is hereby given that the LIST of APPLICATIONS for SHARES in this Company will be CLOSED for London, on WEDNESDAY, the 26th instant, and for the Country, on THURSDAY the 27th instant.—By order.

Money received on deposit in sums of £10 and upwards at current rates, or for fixed periods, subject to arrangement.

The agency of country and foreign banks undertaken, and every other description of banking business transacted. ALFRED BROWN, Manager.

London, July, 1871.

LONDON CHARTERED BANK OF AUSTRALIA.

(Incorporated by Royal Charter.)

Paid-up capital, One Million.

Reserve fund, £120,000.

Offices—88 Cannon street, E.C.

This Bank conducts banking business of every description with the Australian Colonies upon current terms. Bills are sent for collection, and letters of credit granted upon the Bank's branches in Victoria and New South Wales.

WILLIAM MARTIN YOUNG, Secretary.

THIRTY-FIRST REPORT OF

THE CITY BANK, LONDON.

At a General Meeting of the Shareholders, held at the London Tavern, on Tuesday, 18th July, 1871.

DIRECTORS.

John Jones, Esq., Chairman.

Henry Vigurs East, Esq.	William Macnaughton, Esq.
John Hackblock, Esq.	Joaquin de Mancha, Esq.
Andrew Lawrie, Esq.	William Simpson, Esq.
Robert Lloyd, Esq.,	Jonathan Thorp, Esq.
William McArthur, Esq., M.P.	James E. Vanner, Esq.
	George Young, Esq.

MANAGER—Alfred George Kennedy.

BRANCH MANAGERS.

Edward G. Mullins, No. 34 Old Bond street.

Alfred Gliddon, Nos. 159 and 160 Tottenham Court road.

William Herbage, No. 25 Ludgate hill.

The "Register of Shareholders" and "Register of Transfers" having been duly authenticated the following report was read, viz.:—

"The statements of 'liabilities and assets' and of 'profit and loss' for the half-year ending 30th June, presented herewith, show that—after providing for interest on current and deposit accounts and for bad and doubtful debts—the gross profits, including £1,585 14s 8d brought from the previous half-year, amount to £48,370 17s 5d.

"The Directors having made provision for current expense and rebate on discounted bills, not due, declare a dividend at the rate of £8 per cent. per annum, free of income tax; add £5,000 to the reserved fund, which now amounts to £105,000; and carry forward £1,994 8s 7d to the new account.

"The dividend will be payable on and after the 25th inst.

"In pursuance of the power vested by the Deed of Settlement in the Directors, they have elected to a seat at the Board—subject to confirmation by the shareholders—Mr Joaquin de Mancha of the firm of Messrs Mancha and Co., a duly qualified shareholder.

"The Directors retiring upon this occasion are—Mr John Hackblock, Mr Andrew Lawrie, Mr William Simpson, and, being eligible, they offer themselves for re-election.

"The Auditors, Mr Owen Lewis and Mr John Curry, again tender their services for the ensuing year.

"The Directors have to announce that Mr John Woolmore Duncan retired from the joint management of the Bank on 31st March last, and that, in recognition of his services, they have granted him a retiring allowance, which they feel sure will have the approval of the shareholders. The sole management of the Bank has devolved upon Mr Alfred George Kennedy."

The dividend was then declared for the half-year ending the 30th June last, at and after the rate of £8 per cent. per annum on the paid-up capital, free of income tax.

It was resolved unanimously:

That the Report now read be received and adopted.

The election of Mr Joaquin de Mancha was then confirmed.

The following Directors, having retired by rotation, were unanimously re-elected, viz.:—Mr John Hackblock, Mr Andrew Lawrie, and Mr William Simpson.

Mr Owen Lewis and Mr John Curry were re-elected Auditors of the Bank, with the usual remuneration.

Resolved unanimously:

That the thanks of the shareholders be given to the Directors of the Bank for their able and zealous services, and to the Managers, the Secretary, and the other officers of the Bank.

(Signed) JOHN JONES, Chairman.

Subscribed capital (50,000 shares of £20 each)	1,000,000
Paid-up capital.....	500,000
Reserved fund	105,000

CURRENT ACCOUNTS are made up to the 30th of June and 31st of December, in each year; and if the credit balance shall not, at any time during the half-year, have been below £500, interest at the rate of 2 per cent. per annum is allowed on the minimum monthly balances. If not below £200, interest at the rate of 1 per cent. per annum is allowed on the minimum monthly balances; but if under £200 no interest is allowed; in cases where a remunerative balance is not maintained a small charge for commission is made. Parties keeping current accounts have the privilege of drawing cheques, of having approved bills discounted, of obtaining loans upon negotiable securities, of depositing bills, coupons, &c., for collection; and of lodging with the Bank, deeds and other valuable property in the fireproof strong rooms for safe custody.

DEPOSIT ACCOUNTS.—Money, in amounts of £10 and upwards, is received from the public generally—subject to seven days' notice of withdrawal, and interest is allowed thereon at the current rate of the day; the Bank notifying any change in the rate of interest by advertisement in one or more of the leading London newspapers. If the money be withdrawn within a fortnight no interest is allowed. Persons having current accounts can transfer any portion of their credit balance to deposit account.

The AGENCY of COUNTRY and FOREIGN BANKS, whether joint stock or private, is undertaken by the Bank.

LETTERS of CREDIT, payable at any of the chief commercial towns and cities of the world, are granted. Mercantile and Marginal Credits are also granted by the Bank.

CIRCULAR NOTES are issued by the Bank, addressed to all, and payable at any of the places on the continent where the Bank has an agent.

DIVIDENDS, &c., on Government and other stocks, annuities, pensions, &c., are received for customers of the Bank without charge; the purchase and sale of stocks, shares, and securities are also undertaken; and every description of banking business is transacted.

The officers and clerks of the Bank are pledged not to disclose the transactions of any of its customers.

London, July 18, 1871.

FIRST REPORT OF THE

ALLIANCE BANK

(Limited).

Capital, £2,000,000. Paid-up capital, £776,700.

Reserve fund £80,000.

DIRECTORS.

Matthew Hutton Chaytor, Esq., Chairman.

John Elm, Esq.	James McMaster, Esq.
Joseph Foljes, Esq.	Robert Rumney, Esq.
Henry Gruning, Esq.	John Torrance, Esq.
Daniel Mackenzie, Esq.	Charles J. Venables, Esq.

MANAGERS IN LONDON.

R. O. Yeats and William Hancock.

MANAGER IN MANCHESTER—John Mills.

SECRETARY—W. H. Ransford.

At a General Meeting of the Shareholders, held at the City Terminus Hotel, Cannon street, on Thursday, July 20, 1871, the following report and balance sheet was presented —

The Directors have pleasure in meeting the shareholders for the first time since the reconstruction of the Bank in accordance with the resolution so unanimously passed. It is of course too early yet to speak with absolute certainty of the permanent effects of that measure, but the opening of new accounts and the enhanced value of the shares in the market have so far confirmed the favourable expectation formed of it.

After making the necessary provisions for current expenses, rebate on bills not yet due, also interest to customers on deposit and current accounts, there is on the accounts of the old and reconstituted Companies, a balance of profit for the half-year of £20,011 5s 8d, which, with £4,078 16s 1d brought forward on the 31st December last, makes a total of £24,110 1s 9d now to be disposed of.

Out of this the Directors recommend that a dividend of 5s per share, or at the rate of £5 per cent per annum on the new capital, be now declared, which will absorb £19,417 10s, and that the remainder, £4,692 11s 9d, be carried to profit and loss new account.

The balance of £5 per share on the 38,826 (issued) shares of the Old Bank, amounting to £194,130, has been transferred, as was proposed, to a contingent fund, "to be set off against the excessive rent of the London Offices, and against any deficiencies which may appear on liquidation of the business of the Old Bank." This has been applied, with £4,257 10s for buildings and furniture in London and Manchester, so finally closing those accounts and leaving £4,872 10s to the old reserved fund, making it now £101,481, which will be increased from time to time as the assets then held against old outstanding debts are realised. By the closing of the previous years' accounts for the half-year were made up, and by dividends on forced estates declared and to be received during the current half-year substantial progress will be made in this respect before the next meeting.

The Directors think it right to place their seats at the disposal of the shareholders at this first meeting of the Company, but will readily submit to re-election.

—By order of the Board,

W. H. RANSFORD, Secretary.

Bartholomew Lane, E.C., July 14, 1871.

N.B.—It is proposed to forward the dividend warrants to the shareholders on the 24th instant.

(For London) QUILTER, BALL, and CO., (For Manchester) HARMOOD W. BANNER, } Auditors.

The Secretary read the advertisement convening the meeting.

The report and accounts having been taken as read,

It was proposed by the Chairman, seconded by Mr Mackenzie, and resolved unanimously —

"That the report and accounts be received and adopted."

The Chairman then declared a dividend (free of income tax) of 5s per share, or at the rate of £5 per cent. per annum.

It was resolved unanimously — "That Matthew Hutton Chaytor, John Elm, Joseph Foljes, Henry Gruning, Daniel Mackenzie, James McMaster, Robert Rumney, John Torrance, and Charles John Venables, Executives, be, and they are hereby, re-elected Directors of the Company."

"That the remuneration to the Directors for the ensuing year be £4,000."

It was proposed by Mr A. D. De Pass, seconded by Mr A. C. Maclaren, and resolved unanimously —

"That, in recognition of the valuable services rendered by M. H. Chaytor, Esq., Chairman, in the reconstruction of the Alliance Bank, the shareholders hereby vote the sum of five hundred pounds be paid to him from the assets of the said bank, as a testimonial."

It was resolved unanimously — "That the hearty thanks of the Meeting be given to the Directors generally, for the able manner in which they have effected the reconstruction of the bank."

"That the thanks of the Meeting be given to the Managers, the Secretary, and staff, for the efficient manner in which they have performed their duties."

(Signed) M. H. CHAYTOR, Chairman.

(Extracted from the Minutes)

W. H. RANSFORD, Secretary.

THE IMPERIAL OTTOMAN BANK,

PROSPECTUS.

This Company is formed to light with gas the following important maritime cities, in the province of Sao Pedro, in the Empire of Brazil:—Porto Alegre (the capital), Pelotas, and Rio Grande, containing together a population of 56,000.

The above cities are steadily increasing in population and wealth, and contain 8,000 houses, five theatres, nine ball or concert halls, and about 100 other public buildings; as they are seaports, the land carriage of coals, which usually forms a very large item of expenditure in foreign inland cities, will be entirely saved.

The Provincial Government being desirous of superseding oil by gas, has granted an exclusive concession, dated the 4th December, 1867, to Baron Noel Paul Baptiste d'Ornano, whose interest therein has been acquired by this Company for the sum of £6,000 cash and 1,000 fully paid-up shares of the Company, which he is under obligation not to dispose of within six months after the allotment of shares.

The concession is for a term of thirty years. Preparations have already been made by the contractors for the immediate commencement of the works, and an order for their execution will be given on the allotment of shares being made. The concessionaire, having provided the security with the Government for £4,500, has agreed that it shall continue until the works are completed. The Company, therefore, will not be called upon to provide any caution money.

The concession comprises, amongst others, the following terms:—

1st. A guarantee by Government to take 1,000 lamps for the streets and squares, at the rate of 21½ reis per hour for gas equal to nine candles for an average night of eleven hours, equal at the present rate of exchange of 25d to £8 19s 10d per lamp per annum. The number of lamps is to be increased within two years from this date to 1,250. The Government engineer has reported that to light only the streets of the towns effectually 2,873 lamps will be required.

2nd. Authority to charge for lighting public and private buildings at the rate of 6½ reis per cubic foot, equal, at the above rate of exchange, to 13s 6½d per 1,000 cubic feet.

3rd. That payments by the Government treasurer shall be made monthly.

At the end of the term for which the concession is granted the Government will have the option of purchasing the works at a valuation, to be determined by arbitration, or of renewing the concession.

An approximate estimate has been made by Mr Upward, the Company's Consulting Engineer, of the annual receipts and expenditure for three years, showing a profit of 14 per cent. per annum, which has been based on the use of English coal; but there are coal mines in the neighbourhood of two of the cities, and it is anticipated that the coal may prove suitable for the manufacture of gas. The directors call attention to the subjoined letter from Mr Upward to them.

An application is being made to the Provincial Assembly for a modification of the concession, so as to admit of the payment in gold of all moneys to be received monthly from the Provincial Treasury for the expense of public lighting, and the Directors have been assured that the application has been favourably entertained by the President, and will be attended with success. In that case the anticipated dividends of the Company will be increased.

The shares in the Rio de Janeiro Gas Company (Limited), whose works have been in operation for some years, stand in the market at above 50 per cent. premium, and their last report shows a net profit of more than 15 per cent. per annum on their capital of £600,000.

A copy of the Memorandum and Articles of Association, the original Concession, with a translation, and the documents mentioned below, may be seen at the Offices of the Solicitors of the Company, No. 75 Cornhill.

Applications for shares, addressed to the Directors in the accompanying form, may be made to the Bankers, Brokers, and to the Secretary at the Offices of the Company. No application will be considered unless a deposit of £1 for each share applied for shall have been previously made with the Bankers of the Company. Should a smaller number of shares than those applied for be allowed, the balance of the sum deposited with the Bankers will be appropriated towards the payment of £1 per share on allotment.

Statement of Agreements entered into previous to issuing this prospectus:—

Agreement and Supplemental Agreement, dated respectively 25th November, 1870, and 11th July, 1871, and respectively made between Baron Noel Paul Baptiste d'Arnano, of the one part, and Mr Edward Pugh Rowsell, on behalf of the Sao Pedro Brazil Gas Company (Limited), of the other part; and between the said Baron d'Arnano, of the one part, and the said Company, of the other part; and a Contract, dated 11th July, 1871, made between the said Company, on the one part, and W. C. Holmes, of Huddersfield, contractor, of the other part.

Letter from Mr Upward, above referred to.

Chartered Gas Company's Office, Goswell street,
30th June, 1871.

Gentlemen,—Having made a very careful estimate of the cost of carrying out the works intended by your Company, and required by the Concession from the Government of the province of Sao Pedro, Brazil, including the land for the buildings, and having made a very liberal allowance for contingencies, I am of opinion that a profit of 14 per cent. on the capital of the Company will be realised when the works contemplated are in full operation. The sum of £110,000 includes an ample allowance for working capital, in addition to the cost of works and land.—I am, Gentlemen, your obedient servant,

A. UPWARD, M.I.C.E.

To the Directors of the Sao Pedro Brazil Gas Company, Limited.

THE SAO PEDRO BRAZIL GAS COMPANY, LIMITED.

FORM OF APPLICATION FOR SHARES.

To the Directors of the Sao Pedro Brazil Gas Company, Limited.

Gentlemen,—Having paid £ to your Bankers, I request you will allot to me shares in the Sao Pedro Brazil Gas Company, Limited, and I hereby agree to accept the same, or any less number that may be allotted to me, and to pay the Calls thereon and I authorise you to insert my name in the register of the members of the Company.—I am, Gentlemen, your obedient servant,

Name .....
Address .....
Occupation (if any) .....
Usual signature .....
Date .....

The above form, when filled up, is to be left with the Bankers on payment of the deposit.

DUNVILLE'S OLD IRISH WHISKY,
BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

DINNEFORD'S FLUID MAGNESIA.—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.
DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

KINAHAN'S LL WHISKY.
This celebrated and most delicious old mellow spirit is the very
CREAM OF IRISH WHISKIES,
in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.
Note the words—
"KINAHAN'S LL WHISKY,"
on seal, label, and cork.
Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

OXYGENATED WATER HOLDS IN Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.
Laboratory, 36 Long Acre, and all Druggists.

JOSEPH GILLOTT'S
STEEL PENS.
SOLD BY ALL DEALERS THROUGHOUT THE WORLD.

ROYAL POLYTECHNIC.—Professor Pepper's "Trip to the Western Highlands of Ireland;" grand Scenery, and Irish Songs by Miss Barth.—Engagement of George Buckland, Esq., and Great Revival of Henry Russell's Songs, under his personal kind superintendence, with grand Scenic and Optical Effects.—"Paris, as it Was and Is." Illustrated with a beautiful series of Pictures of the Public Buildings and scenes; by J. L. King, Esq.—Re-engagement of E. D. Davies, the Premier Ventriloquist.—The Ghost and other Entertainments as usual.—Admission One Shilling. Open from 12 to 5, and 7 to 10.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for July, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month, New Capital Created and Called, Table of Railway Traffic Receipts; Notices and Reports of Stocks, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to July 26.

Advertisements for the next Number, to be published on August 26, must be sent to insure insertion on or before August 24.

OFFICE—340 Strand.

A NOVEMBER SESSION.

It may be absolutely needful for anything we can say, to hold an autumn Session in order to pass the Ballot; but we do not think Mr Whitbread and the other advocates of that scheme have considered its effects with quite sufficient care. To those who look upon such arrangements as something more than temporary expedients they are not altogether pleasing. The time allowed to a British Ministry to frame its legislative measures is already very short. All men need occasional holidays, and British Ministers who for seven consecutive months are worked up to the limit of human powers, who are for the most part men advanced in years and who are expected to assume positions involving great mental labour, certainly need them as much as many others. Short holidays are not of much use, and if they take the usual period of two months, but three remain to them for maturing measures of vast importance, involving great complexities of detail, and liable to be submitted to criticism at once very acute and very hostile. No one perhaps who has not drawn a big Bill is ever fully aware of the mass of interests affected by any large measure, of the quantity of information it is necessary to secure, of the number of persons it is necessary to consult, of the immense care, patience, and experience, which the preparation of any large measure must perforce involve. This is more true perhaps of the present than of any preceding time, the country being urgent in several departments for measures—such as a new Rating Law—which, whatever their ultimate form, must be of the most comprehensive character, and being disposed though not eager to urge other measures—such as a new Licensing Law—which are dangerous not only for party but for other reasons. Serious blunders in a Bill of that kind might produce serious resistance. There are moreover subjects of immense practical moment—such as the Merchant Shipping Code—which demand weeks of patient investigation merely to prevent the number of details from stopping legislation altogether, and others—like the Sanitary Law—which to be perfect, or even useful, should embody the experience of the highest minds in at least three professions—the lawyers, the doctors, and the engineers. Three months is a short time for all this, but if out of these three months we take six weeks for a November Session, Ministers must either surrender their holiday, which would kill them, or abandon necessary measures, which the country will not permit, or "scamp" those measures, which is precisely what they will in the long run be compelled to do. This seems to us an extremely undesirable result, not only because it ignores legislation itself, but because it throws upon Parliament the embarrassing duty of "licking Bills into "shape," which have in reality been prepared by irresponsible officials, who are doubtless able and conscientious, but who have no instinct as to what the House of Commons will and will not bear.

Again, a November Session is a great impediment to the education of English Ministers in their first work—that of administering the departments. Allowing for their holidays, they have but three months in each year for quiet, unembarrassed administration; for testing the efficiency of their subordinates; for mastering those details, a knowledge of which gives such immense power to permanent officials. These duties are of the very highest importance, often of more importance than legislation, and they cannot be fittingly performed while Parliament is sitting. A Minister must have some domestic life, however little; and if he is up till two o'clock he will scarcely be in office before noon. That leaves him just four hours for real administrative work, during which he may be pestered by deputations, worried by Members of Parliament, and troubled by considerations about the explanations he may have to offer in Parliament. Except to a calm man like the late Sir Cornewall Lewis, with a talent for throwing work on subordinates, quiet work, especially quiet initiative work, becomes almost impossible; and everything is postponed to the less embarrassed months, which Mr Whitbread proposes to reduce. These months are therefore crowded with business almost beyond the working capacity even of men who, like most British Ministers, can labour steadily. Take, for instance, the position of Mr Cardwell during the next recess. He will have to consider, under-

stand, and sanction plans of the most important and difficult kind, all tending towards the organisation of the army upon a new and scarcely-tried basis, to listen to most serious demands for compensation, and to prepare a whole battery of Parliamentary explanations of the most difficult and sometimes of the most delicate kind. Any reduction of the time allowed him for this work must be a deduction from his efficiency, and therefore from the efficiency of the army. It is true he will have an unusually extensive and competent staff to help him; but the Parliamentary theory is that he must be responsible, and he cannot be responsible, except in form, for orders he has had no sufficient time to consider, far less correct. It is even worse with some other departments—such as the Admiralty—in which nothing but study can give a civilian First Lord any hold on his subordinates at all, and in which a week of real experience may save the country experiments costing millions. Ministers require the education of practice and habit like other men, and they get far too little of it even under the present system, which Mr Whitbread proposes in this respect still farther to deteriorate. There may of course be cases in which no option is left to Government, but we would rather see the Parliamentary system a little trained than the administrative system paralysed by want of time to get through any but the most emergent work. No great firm we feel confident would ever begin a new enterprise if worked in the way in which many influences are beginning to combine to work our Ministerial departments.

THE OBSTRUCTION OF LEGAL EDUCATION.

The speech of Mr Jessel, who on Tuesday night led the Opposition to Sir Roundell Palmer's proposed General School of Law, indicates clearly enough that the time is coming when the Inns of Court will have to surrender the monopoly they have so long enjoyed, and so grievously abused. They are never likely to have an abler champion than Mr Jessel, who endeavoured to work himself into a sort of enthusiasm on behalf of the Benchers, in which he did not induce his hearers to participate. Yet his speech, which is a mere string of excuses for duties neglected, and urgent reforms delayed, concedes what is really at the root of the difficulty about legal education. We have always insisted that there should be a thorough training for the practice of the Law, provided by some body, and enforced by the only effective test we know of—a stringent system of examinations. Any permissive scheme, such as that superintended at present by the Council of Legal Education, is not only worthless as a means of teaching what we want to get taught, but stands in the way of any real improvement. We have no special preference for Sir R. Palmer's proposed School of Law, but it appeared to promise the one all-important advantage of a certain and universally recognised standard of legal education, to which all persons desiring to practice either at or below the bar, or as attorneys and solicitors, should be compelled to conform. Considering that we have waited for so many years upon the convenience of the Inns of Court for some system of regulation for the legal training of students, it is quite reasonable that Sir R. Palmer should set his scheme on foot without giving the Benchers the control of it. We regard the exclusion of these obstructions of legal education an essential element in the success of any new plan; and Mr Jessel's attractive picture of the good they have intended to do, and will do hereafter if their slowly-matured designs are not rashly interfered with, does not beguile us. He tells us that the Inns of Court have been long agreed as to the principle of examination, but that somehow they have never been able to communicate their agreement to each other opportunely. When Lincoln's Inn made a proposition the other Inns demurred; when the Inner Temple took the initiative Lincoln's Inn stood on its dignity, and declined to follow. So the wretched system of a permissive examination, with the alternatives of attendance on lectures, or a certificate of twelve months' study in Chambers, has been allowed to continue. It has stunted the examinational standard, and it has contributed to make the lecture system a farce, in which hardly the readers themselves profess to believe.

But Mr Jessel tells us that the Inns of Court are ready now to do what they have so long delayed doing—that they are prepared to improve their lecture system, and to make the final examination compulsory. Now supposing these two points to be effectively carried out, the Inns of Court would be doing just what the proposed School of Law offers to do. "Why then," asks Mr Jessel, "should their action be superseded by an unknown and untried body?" Simply because the Inns of Court are known and tried, and have been found shamefully wanting. After the report of the Commission of 1854, they started with a very fair and practicable plan, which they might have saved public scandal and much trouble by honestly carrying out; but in defiance of the leading principles of the Commissioners' recommendations—that examinations should be made compulsory—they proceeded at once to mutilate and deface the scheme. By introducing the permissive system they have weakened every part of it, so that the legal education they profess to give is now a sham, not a real education. After sixteen years' torpor, they wake up terrified at the aspect of a practical plan, which would shut them out from all power over the training for the legal profession. If they were to be so shut out, they rightly judge that men would begin to ask what was the reason of their existence. And so they entrust a brief to Mr Jessel, who complains that his clients, the neglectful trustees of a great public trust, are to be supplanted by "unknown and untried" successors.

Mr Jessel affirms that the Inns of Court represent the legal profession most admirably and completely, and that therefore they are best fitted to regulate the conditions on which new members should be admitted. We are not prepared to allow that the interests of the profession, as distinguished from those of the general community, ought to be alone represented, or to enjoy unlimited authority. But setting aside this point, we deny that the Benchers of the Inns of Court, as at present chosen, do fairly represent the legal profession. Mr Jessel says that as the Benchers are nearly all Judges or Q.C's., they are presumably the best, because the most successful men at the bar; but he must surely be aware that there are plenty of mediocrities—even in the lowest professional sense—in silk gowns, and that it is the mediocrities who really govern the Inns. The ablest men, who are necessarily the busiest, find little time in the multiplicity of professional and Parliamentary duties, to devote to the administration of the Inns, and this important work is left mainly to men who have as little business as brains. It must be remembered too that a man seldom dons "silk" until his hair is grey, and his zeal for reform very sensibly cooled. The younger members of the profession are not represented at all among the Benchers, and their wishes, on more points than one, are systematically set at nought.

Much has been made by the opponents of Sir R. Palmer's scheme of the so-called monopoly which would be created for the New School of Law. Mr Jessel, Mr Gregory, and Sir Francis Goldsmid united in condemning the plan on this score. But let us see in what the monopoly consists. The School of Law is to have an exclusive control over examinations of candidates for admission either to the bar or to the lower branch of the profession. No friend to legal education could wish it to be otherwise. Competition between licensing bodies is purely mischievous, as the medical profession has begun to feel bitterly. It serves no useful purpose, and inevitably drags down the standard of fitness. The tone of the profession is in a great degree regulated by the lowest test of admission, and if competition of licensing bodies is allowed there will be very large variations in the test. In the ascertainment of intellectual qualifications competition is no more desirable or necessary than it is in the ascertainment of the amount of gold in a sovereign. But competition among educating bodies is quite a different thing. If the examination be the single, certain, and inevitable way of entering the profession, the competition of professors and colleges in the preparation for that test will tend to keep up and even to raise the standard. It is partly due to competition of this kind that the University of London has been able to maintain a severe and steady system of testing. Considering, however, the decrepitude into which the Inns of Court have allowed the legal education provided under their supervision to fall, we are not surprised that Sir R. Palmer has been prompted to supplement the examining powers of his School of Law by a well-organised training staff and all the academic appliances of study. We agree, however, with Mr Jessel that it would be hard to compel every candidate for admission to the examination to take this particular way of obtaining the necessary knowledge. It would be unwise to force

young men who might get better and more cheaply taught elsewhere into the lecture halls of the School of Law—to bring them, for example, from a clever legal professor in Manchester to perhaps an inferior teacher in London. But then this objection cannot be urged with a very good grace by the Inns of Court, who have exercised the same compulsion themselves without offering any educational advantage in return.

THE FINANCIAL CONDITION OF THE SUEZ CANAL.

The present state of the Suez Canal amply confirms the anticipations respecting its traffic which we formed on the eve of its inauguration. In two articles we pointed out the extremely hypothetical character of the data upon which the expectations of an enormous traffic were based, and described with some minuteness the magnitude of the trade of which the Canal could only at first obtain a share. For the Canal to obtain more, we said, would require the creation of a large fleet of screw steamers, and such a fleet was not to be created in a day. The enterprise would do very well, we concluded, if the shipping passing through amounted at starting to a million tons per annum. For this language we were taken pretty severely to task by the promoters of the Canal, who had been indulging in expectations of a traffic at starting of 3,000,000 tons, rising rapidly to double that figure, and more. But now that the first year's report is before us, our calculation is found to have been rather over-sanguine than otherwise. Between the inauguration and the 31st of May last—a period of sixteen months—the total number of ships which passed through the Canal was 813, weighing 745,837 tons, the number of passengers being 46,374. This is very far short of the maximum of 1,000,000 tons which we allowed for. And though the traffic has increased from the commencement, the average receipts of the present year still indicate a traffic considerably less than 1,000,000 tons per annum. After these figures we cannot wonder at the fact, that for the last year the company has been unable to pay the interest on its mortgages. These involve an annual payment of 400,000*l* for interest, besides sinking fund; and even 1,000,000 tons would only yield a gross receipt of 400,000*l*, from which a large deduction would have to be made for working expenses. Of course the managers of the company have plenty of explanations—the principal being that the war had prevented traffic; but anyone who has watched the movement knows that the Canal has really done a large business, and that no business the war could have checked can make much difference. We should like to see it explained how the war, whose principal maritime effect was the blockade of North German ports, could have altered so much as the theory supposes the demand for the exchange of goods between Europe and the East. Has any other trade, say that between Europe and America, been so checked? The conclusion is, that however beneficial the Canal will be to the world, the data by which the shareholders were persuaded to find the money were delusive. But for the accident that a superior species of screw steamers was invented between the commencement and the close of the works, the Canal would have been a monstrous financial failure; and as things go, it has been very far indeed from the success that was promised.

Still it is a secondary matter how far the shareholders are affected, and the main questions for the public are the means of turning the enterprise to account now that the Canal is finished, and has the prospect of a traffic which will at least maintain it in working order. We are glad to see that the Suez Canal is quite sure of paying its way. According to the calculations put forward by the promoters beforehand, the working expenses were calculated at 400,000*l*, which it would have taken a very large gross traffic to pay, but actual experience, it appears, gives a much more moderate sum. The annual maintenance of the canal is now reckoned at 60,000*l*, and the expenses of general administration at 117,000*l*—total, 180,000*l*. An annual tonnage of 1,500,000 would cover this, and the present traffic is more. There will at any rate be a surplus of some sort for the debenture-holders; and although at the present high rate of interest, viz., 10 per cent., it would take 1,000,000 more tonnage to cover the charge, it should be possible somehow to get rid of the burden by borrowing at a lower rate of interest. Perhaps a million tons would be enough to clear working expenses, and a moderate charge for loans—say at 5 per cent. interest. If the debenture-holders should foreclose, there would at any rate be a real property to dispose of to a new company, which would start with a capital proportioned to the business.

We cannot say however that the plan which is likely to be taken is very promising. The directors of the company propose to borrow about 800,000*l* to clear off incumbrances and pay their way to the end of this year, after which they hope that the increase of traffic will pull them through. We need not describe the financial arrangement minutely, but it confessedly depends on the traffic, and of this we have our doubts. The starting point is a business which will yield 400,000*l* per annum, implying about 1,000,000 tons of shipping; and an increase of 80,000*l*, or about 200,000 tons, per annum is looked forward to. All such calculations are necessarily speculative; while if there is any serious deficiency the new borrowings necessary to cover successive deficits will involve a very heavy annual charge. It would be much better at once to attempt a conversion of the present mortgage debt, and a reduction of the various other capitals of the undertaking, so as to correspond more nearly with the reality. It ought not to be impossible to induce the debenture-holders to accept a smaller interest, and compromise their claim for the remainder by a share in the surplus profits. The matter is primarily for the shareholders and creditors concerned; but the matter is also of public interest, as it is never for the general welfare to leave an important enterprise in the hands of those who have only a remote and contingent interest. Perhaps as the Viceroy of Egypt is the principal shareholder, the wisest plan in practice would be for him to put an end to the form of a company, assume all the debts directly, and manage the enterprise as exclusively a Government affair. In any event, a good deal of confidence may now be felt in the perpetual maintenance of the work, which at the worst it would be the interest of the various commercial countries of Europe to keep up, even at some slight cost to themselves.

BUSINESS NOTES.

The Financial Report on the Telegraphs.—Mr Scudamore's supplementary report on the telegraphs, giving an account of the financial results, is a very satisfactory one. The figures are not what he expected either as regards receipts, working expenses, or construction—the entire undertaking having grown with every new step; but the main point is that the *net* receipts already more than cover the interest on the capital borrowed to enable the Government to take up the business, and this is very good for a beginning. The capital expenditure may be put at 7,500,000*l*, including 800,000*l* yet to be paid, and at 3¼ per cent., at which Government borrows, added an annual charge of 243,750*l* to the debt; but the account of the first fourteen months' working stands thus:—

	£
Earnings	798,580
Working expenses	470,000
Net receipts for 14 months	328,580
= net receipt of 281,640*l* for 12 months.	

The interest, as above shown, being 243,750*l*, the net annual surplus is 37,890*l*, or in round figures 40,000*l*, which the State receives, after conferring on the community all the advantages of a cheap and uniform tariff and more extended service, which were the principal objects desired by the acquisition of this property. Mr Scudamore thinks that about half-a-million more capital may be necessary for extensions; but he has obviously a considerable margin out of which to pay more interest. And the point to be remembered is, that all this is only a beginning, and that the business is growing rapidly, the messages being about 20 or 25 per cent. more this year than last. As the working expenses do not increase in proportion, it appears certain that there will in a year or two be a large surplus for the extinction of the capital borrowed to begin the business and swell the current revenue of the country.

East India Finance.—The Select Committee on India Finance has made one or two most important recommendations, although they are only of an interim character. One is that the practice of "perpetual settlements" should be discontinued, pending the completion of their inquiry. This is an admission on the part of the Committee that the opponents

of "perpetual settlements" have made out a *prima facie* case; and if that case is made good will lead to a very great alteration in the practice of Indian finance. The calculation, in fact, is that the State burden or rent-charge upon land is naturally the principal elastic source of revenue in India, and that we have been making good finance impossible by commuting the rent-charge in perpetuity instead of for limited periods. The whole question must now be argued out, and the defenders of perpetual settlements will have to show that any advantages their system has are such as to counterbalance its acknowledged financial evils. The second recommendation is quite as important. It is that profit and loss accounts should be made up and brought before the Committee, showing the loss or gain to the Government by embarking in harbours, railways, irrigation, and other public works. Such accounts we have often called for ourselves, and it is quite apparent that no real knowledge of Indian finance can be obtained unless the common allegation that public works are profitable is accurately examined into. It may be that in spite of direct loss they ought to be continued on account of the general good they confer; but we should at least be quite sure of our ground, and continue the works or discontinue them for true reasons. The supplement to the recommendation is also very important—that "the officer by whom the preparation of the desired state-"ments of accounts is supervised should personally bring "them before the Committee, to give whatever explanation "may be required." We do not envy the officers of a department which has always declined to give such accounts the task which lies before them, but in any event a great deal of additional knowledge of Indian finance will be put before the public.

THE REPAYMENT OF THE GERMAN LOANS.—As we anticipated, one of the first uses which the German Government has made of the French indemnity is to repay the loans it contracted during the war. The London Joint Stock Bank has now given notice that both series of the issues in London, amounting to 3,000,000*l* each, are to be paid off—the one on the 1st of January, and the other on the 1st of February next,—and the whole of the issues, both in Germany and London, amounting to 15,000,000*l*, are to be redeemed at the same time. There is no similar announcement yet with regard to the first war loan, which was negotiated only in Germany, or with regard to the loans of the various smaller States; but the repayment of 15,000,000*l* by a great State will be a novel event at least in Europe, and we doubt if so much was redeemed even in America in two payments separated only by the interval of a month. The effect, we need hardly say, will be to increase the abundance of capital both in Germany and London, and it will perhaps be the more effective here from its occurring at our usual dividend times, when there is usually a great deal of money seeking investment.

THE INCOME FROM INVESTMENTS.—So far as we can ascertain, the disposition in the City is not to accept very readily the numerous invitations to subscribe to new undertakings which are now pressed on the public. New ventures have sometimes a success, and occasionally there is a run upon submarine telegraphs, or tramways, or asphalte companies, but after all there is not much money absorbed in this way. People who have made savings are rather inclined towards known investments. It becomes an interesting question therefore whether the effect of the present accumulation of money seeking investment will not be to lower the average rate of profit upon capital thus employed, preliminary at least to a change in the public mind by which new investments will be more favoured. Compared with similar periods of abundant money, there is at any rate a considerable margin to which prices may rise so as to yield such a diminished return to the investor as he will still accept, though it may not be for a very long time. In 1852 Consols were at 102, and again in July, 1856, just after the Crimean War, they were about 96, though the Bank rate was then 4½ per cent., and it is now 2 per cent. Consols have never been higher since, and generally the level of price has been considerably lower. In the same way, if we look at the prices of foreign securities, we find that the average return yielded to the investor was much less than it is now. Comparison is somewhat difficult, as the foreign list is so much extended, but look only at the following:—

	Price in July, 1856.		Price in July, 1870.
Brazilian 5 per cent.	102½	.....	94½
Portuguese 3 per cent. (4 per cent. in 1856 at 50 = 37½ for 3 per cent.)	37½	.....	35½
Spanish 3 per cent.	47½	.....	32
Turkish 6 per cent.	105	.....	56
Italian 5 per cent.	92½	.....	57
French 3 per cent.	71½	.....	55½
Russian 5 per cent.	112	.....	86
United States 6 per cent.	97	.....	92½

Of course any such comparison is open to the observation that the credit of particular States changes, and that almost every country named has been a more frequent borrower since 1856; but the change of price is uniform, and the urgency of the demands by so many foreign States is itself one of the reasons why investors have been able to receive a larger return on their capital. Practically, those who are familiar with the foreign market reckon that whereas first-class foreign States could borrow until about 14 years ago at 5 per cent. or less, and second and third-rate States at between 6 and 7 per cent., the current rate is now about 6 per cent. for good borrowers, and 8 and 9 per cent. for those in inferior credit. There is thus a considerable margin in foreign securities as well as Consols for a change in the level of price in the absence of any great new demands. Investors must be fain to put up with a less return for their money, similar remarks of course applying to other leading investments, though the change in some cases, as in the case of leading railways, may be greatly obscured by real changes in the returns of the property concerned and merely speculative dealings. How long the upward movement which is thus probable will continue depends of course on the rapidity with which a readiness to embark in new schemes may lay hold of the public mind.

THE METROPOLITAN DISTRICT RAILWAY.—It is nearly a month since Mr Gladstone made a speech in praise of the Metropolitan District Railway, and expressing sanguine hopes of the prospects of the shareholders. Already however, according to the view of the Stock Exchange, the business of the company is disappointing, and from the time Mr Gladstone spoke the shares have fallen as follows:—

	Price, June 30.		Price, July 30.		Fall.
Preference stocks	76 8	.....	62 4	.....	14
Ordinary stocks	39½ ¾	.....	32 ½	.....	7¼

These quotations are a curious commentary upon the speech of the Premier, and investors who became or continued shareholders by his advice will have little cause to thank him. No doubt stocks are often unduly depreciated by unscrupulous speculation, but in the present instance we think it perfectly obvious that there was no warrant for the expectations of increased traffic to follow the opening of the Mansion House Station which had been indulged in. A large increase of traffic, equal to what was expected at the beginning—viz., sufficient to pay about 3 per cent. to the preference shareholders—will, in our opinion, come by degrees, perhaps in another year or two; but a sudden increase such as was expected, to be followed by rapid additions to the traffic and a payment to the ordinary shareholder, could hardly be considered a reasonable anticipation. Mr Gladstone having puffed the line, and given a kind of sanction to these exaggerated expectations, must share the discredit of their failure.—While writing we may again point out the inconsistency between the quotations of the debenture stock and other stocks of this line, and what appears to us the rather singular circumstance that the debenture stocks have fallen in sympathy with the depreciation of the ordinary shares, viz., from 125 7 to 121 3. If the preference shares are worth 62 4, or anything approaching these figures, it is plain that the debenture interest must be covered by a very large margin, in which case a quotation at which the investor would obtain 5 per cent. must be a good deal under the average price of similar stocks in the market. In fact the debenture interest of the Metropolitan District line may be considered most amply covered. It amounts to 75,000*l* per annum, which with 45 per cent. working expenses would be amply met by a gross traffic of 140,000*l*, or 2,700*l* per week, and the present traffic is at least 500*l* per week more. Besides meeting the debentures the company will at least have a net revenue of 15,000*l* over to pay the preference shareholder, with every prospect of a steady increase. The circumstances are at least as favourable for the debenture-holders as those of the London, Chatham, and

Dover Railway, whose 4½ per cent. debentures are now at 96, the equivalent price of Metropolitan District 6 per cent. debentures being 128. In reality the circumstances are *more* favourable as there is a larger proportionate surplus than in the case of the Chatham and Dover line; but what we have said is enough to show that Metropolitan District Debenture Stock at the price to which it has just been depreciated affords a good opportunity for investors.

LIQUIDATION BY ARRANGEMENT.—One of the most important questions which have yet arisen under the new bankruptcy law came before the Lord Chancellor and the Lords Justices this week. It concerned the interpretation of the clauses as to liquidation by arrangement, a dispute having arisen as to whether the title of a trustee under liquidation related back to the presentation of the petition as an act of bankruptcy. A creditor in this case had issued an execution between the presentation of the petition and the trustee's appointment, and he claimed the goods on the ground that the trustee's title dated only from his appointment. There was some little doubt in the matter owing to one of the clauses running that "all such property of the debtor as would, if he were made "bankrupt, be divisible among his creditors, shall, from and "after the appointment of a trustee, rest in such trustee;" but the Court held that the object of the Act was quite clear—to make a liquidation by arrangement have the same effect upon property as a bankruptcy, and only provide a different machinery for distributing the property. In consequence, as a petition for liquidation by arrangement was an act of bankruptcy, the title of the trustee related back to the date of the petition. The Judges, in giving their decision, remarked that liquidation by arrangement could not proceed with any other rule. If the estate was not to be protected between the petition and the trustee's appointment, creditors would always take care to protect themselves by a bankruptcy.

THE STATUTES OF LIMITATION.—The Lords Justices in Chancery have decided—*re* the River Steamer Company, Mitchell's claim—that a claim of debt was not taken out of the Statute of Limitations by a correspondence in which the defendants had steadily denied the debt while expressing their willingness to refer matters in dispute to arbitration. To take a case out of the Statutes it was laid down that there must be either (1) An acknowledgment in making of the debt; (2) An absolute promise to pay; or (3) A conditional promise in writing to pay, with evidence that the condition had been performed. The correspondence here did not contain such a promise or acknowledgment, and although there was a conditional promise, yet the condition—viz., arbitration—had not been performed. As the point is of considerable business interest, we subjoin a copy of the chief letter written by the defendants relied on to take the case out of the Statute, but which did not have that effect:—

> A paper has been received at this office, without letter or explanation of any kind, purporting to be a memorandum of account between you and this company, which is altogether incorrect both in principle and detail, omitting all deductions and credits to which this company are entitled, and which would leave the balance considerably in their favour. I am therefore authorised to say that this company are still willing, as they have all along been, to have all accounts and questions between you and them decided by arbitration according to your contract, and they again call upon you to concur with them in the necessary steps for that purpose. They long since named an arbitrator on their part, but they could not get you to do what was necessary on yours, and the reference was never therefore proceeded with. This of course is wholly without prejudice.

THE EUROPEAN ASSURANCE SOCIETY.—The present management of this society is to be commended for the step taken on Tuesday—not to resist the proceedings for the winding-up, but by what was equivalent to an admission of insolvency, remit the affairs of the society to the Vice-Chancellor for reconstruction, or such other proceeding as may be found advisable. The *primâ facie* case brought before the Vice-Chancellor was in truth such as to leave little doubt of its being fully supported, or even a stronger case proved, when inquiry came to be made. The facts disclosed show the great harm which is done by continuing such companies when once their reputation is seriously shaken, and consequently the mischief of the course which was followed by the management two years ago, when the first petitions to wind-up were presented. To avoid hardship, the Vice-Chancellor, pending the consideration of his final course, has been obliged to direct the payment of small debts falling due, including annuities under 50*l*. "There was one case," said the Judge, "which had been "brought before him, and there were no doubt others, in "which a small annuity payable by this company was all "that a widow lady had to depend upon." By postponing a winding-up, the danger of loss to poor annuitants and policy-holders has been increased, yet such a postponement, it will be recollected, was most strenuously fought for by the then management, upon the vain plea that a winding-up might be averted altogether.

A WARNING TO TRUSTEES.—The case of Sutton *v.* Wilders, which has recently been decided by the Master of the Rolls, is a very serious warning as to the consequences to trustees of a very moderate amount of negligence, or even of the loss of the trust property through pure misfortune. The suit was to make the trustees personally liable for a loss of 3,000*l*, which had been sustained upon a trust fund of 5,500*l*, through the fraud of the solicitor whom the trustees had employed. The solicitor in 1842, when the transaction by which the loss occurred was entered into, was a gentleman of high reputation at Derby, and he found for them what he represented to be an unexceptionable security at 4½ per cent. A mortgage was accordingly executed, and the solicitor paid the interest, saying that he had bought the equity of redemption. When he died in 1853, however, it appeared that he had suppressed a settlement of the mortgaged property so that loss occurred, for which the *cestuique trust* now sought to make the trustees liable. And the Master of the Rolls has held them liable, not only upon the special facts of the case, such as that the trustees had employed the solicitors of the mortgagor, or that they had suspected something wrong, but upon more general grounds, which appear most alarming. The solicitor, he said, was the agent of the trustees for whom they were responsible; and though an exception was made in the case of a banker with whom trustees kept money for a reasonable time, yet "if a trustee intrust the money to a "servant who robs him, the trustee is liable. If he employs "a solicitor who neglects his duty, the trustee is liable." The common sense rule in such matters ought to be that a trustee who displays the reasonable vigilance of people in their private business should be exempt from any personal consequences; but by this rule trustees will be responsible for losses which not even the most vigilant can avoid in their own affairs. This is not very encouraging to trustees. We doubt even if one of the special circumstances referred to by the Master of the Rolls ought to make any difference, since it would not occur to the ordinary man to distrust his own solicitor because he was the solicitor for the other side; but in the absence of other circumstances, to make a trustee personally liable for the neglect of a solicitor whom he has been careful to select, is in fact most gross injustice. Another declaration of the Master of the Rolls is equally alarming:—"If it be said that the loss was occasioned by forgery, and "that no precaution could have prevented it, I have already "held (Eaves *v.* Hickson, 30 Beav. 136) that when a forgery "is committed upon any person the loss must fall on him, "whether he be the principal or the trustee." The trustee might with as much justice be made liable for loss by an earthquake. He acts purely for the benefit of the *cestuique trust* as their agent, and to make an unavoidable loss fall upon him personally is simply to impose heavy fines upon those who accept so thankless an office.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending July 22:—

	Receipts of Week Ending July 22.
	£
Customs	415,000
Excise	457,000
Stamps	160,000
Taxes	13,000
Income tax	31,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	203,381
Total	1,279,381

The total receipts of the previous week were 1,101,378*l*.

The Exchequer issues of the week on account of expenditure were 851,248*l*, viz. :—

	£
Interest of debt	199,999
Other charges on Consolidated fund	191,249
Supply services	46,000
Telegraph services	nil.
	851,248

During the week the cash balances have decreased in the Bank of England and increased in the Bank of Ireland as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on July 15	883,125	944,797	1,827,922
— July 22	751,028	1,002,086	1,753,114
Increase	...	57,289	...
Decrease	132,097	...	74,808

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, July 27.

Although the Bank of France returns are now only published on Fridays instead of as previously on Thursdays—a circumstance which has prevented them from being known in detail in London so early as is desirable—I am, by the kindness of the Bank, enabled to forward you that which has been made up to this morning, the 27th, and which will be printed in the *Journal Officiel* of to-morrow. It is as follows, with the return of the 20th and 13th for comparison :—

DEBTOR.

	July 27, 1871.	July 20, 1871.	July 13, 1871.
	f c	f c	f c
Capital of the bank	182,500,000 0	182,500,000 0	182,500,000 0
Profits in addition to capital (Art. 8, Law of June 9, '57)	7,290,480 27	7,281,578 72	7,267,179 37
Reserve of the bank and its branches	22,105,750 14	22,105,750 14	22,105,750 14
Reserve of landed property	4,000,000 0	4,000,000 0	4,000,000 0
Notes in circulation	1,963,403,320 0	1,968,073,505 0	2,014,309,635 0
Bank-notes to order, receipts payable at sight	20,196,149 38	21,691,707 94	25,779,063 5
Treasury account current creditor	398,347,425 83	378,015,811 39	408,709,611 83

Ditto branches	63,000
Treasury bills	50,000
Deposits, Paris and branches	25,378,000
Coin and bullion	24,749,000
Notes	4,670,000

M. Thiers has endeavoured to induce the Committee on the Budget to retract its vote against the taxing of raw materials 20 per cent.—in other words, against the re-establishment of Protectionism as it existed previous to the Treaty of Commerce. But the Committee thus far has stood firm, and let us hope that it will remain firm to the end. To yield to a vain, shallow, incompetent, ignorant old man, in a matter in which he is manifestly and absurdly wrong, would be treason to the country.

Not only is the Thiers' project condemned in the Parliament, but the outcry against it in the country is becoming louder and more general every day. It is too assailed vigourously by the enlightened part of the press. In a luminous article in the *Journal des Debats*, M. Michel Chevalier shows the way to extricate a nation from financial embarrassments is to augment its productive powers, and that is done by freeing it from the taxes that weigh on industry, and especially from those on raw materials, also by exciting its people to energy by means of foreign competition. He shows the great results this system has produced in England, and how even a partial application of it has been beneficial to France. In other articles, M. Chevalier advocates an income tax with, however, modifications on the English system of applying it. He also suggests an augmentation of the salt tax as preferable to one on raw materials; and points out that the revision of the land tax, of the mortgage dues, and of other taxes might be made to produce many millions.

The idea of an income tax, in spite of the opposition of M. Thiers, is gaining favour in the Parliament, and even among the public. The impost is in truth the only one that can do what ought to have been done years ago, make the rich contribute according to their means to the public expenses, and prevent the poor from paying more than their fair share. If this had been done 25 or 30 years ago, Socialism would not have spread, and in all probability there would have been no revolution in 1848, and certainly there would have been no Commune in 1871. But, unfortunately, France has always been in the hands of statesmen of the Thiers stamp.

In a short time the discussion of the Budget will commence in the Assembly. It will, there seems no doubt, demonstrate that M. Pouyer-Quertier has grievously miscalculated the amount of new taxes that will be necessary—that is, has put it from 120,000,000f to 150,000,000f less than it will be. He has, in fact, assumed that the old taxes will at the least be as productive as in prosperous days, overlooking the fact that the war has reduced almost everybody's means of expenditure; and he has estimated the yield of the new imposts at a higher figure than it is likely to attain. On the other hand, it is extremely doubtful that the reductions he promised in expenses will be effected.

In presenting its strange scheme of Customs' duties, the Government represented that it was in accordance with that of the United States, and it has since dwelt strongly on that fact in answering the objections made. Within the last few days it has brought out a translation of a report in favour of Protection of Mr Wells, the United States Revenue Commissioner written, some years ago, and expects that the document will produce great effect. It takes good care not to state that Mr Wells has since become completely converted to Free-trade, and that he has just published (*vide* the last advices from America) a statement, showing from the experience of the States themselves that Protectionism is pernicious.

The Bill, mentioned last week, for admitting foreign flags to take part in coasting to the 31st October next, has passed the Assembly, and is now law. It appears that in the departments of the Pyrenees-Orientales, Aude, Herault, and the Gard, which are bathed by the Mediterranean, there are 800,000 tons of wine, over and above what the railways can possibly carry away, and that if they be not removed, the next vintage, which is fast approaching, cannot be stored, so that there will be a loss of several millions sterling. French shipping is utterly unable to convey such a mass, and so the foreign flag is called on. Thus then the Protectionist system, which was rigorously preserved in coasting, has completely broken down under a temporary pressure. The fact is significant, and should be taken into serious consideration in presence of the attempt to revive extravagant Protectionism in other matters.

A report presented to the Assembly by a committee reveals sad scandals in contracts accepted by the Government for the approvisioning of Paris during the siege. The total of these contracts was 86,561,827f, but nine were annulled and twelve reduced, so that in definition there remained only 18,530,678f—a proof of the extreme *legéreté* with which they were entered into. In those executed incredible abuses were committed; for example, in a purchase of potatoes at London the Government had to pay 2,925,000f, and the profit realised was 1,125,000f; in another potato affair in France, amounting to 1,300,000f, the Government sustained a dead loss of 1,196,200f

that being the difference between the price it paid and that at which it sold. An American got, through a female, a contract for the large sum of 35,488,750f, and engaged to pay her and "her friends" 3 per cent. commission. The affair was given up and replaced by one of 5,718,000f, and then the lady and the American quarrelled about the sum to which she was entitled.

Surprise is expressed that the Board of Customs has not yet recommenced the publication of the monthly returns of imports and exports, also that the Ministry of Finance has not yet presented the quarterly returns of direct and indirect taxes, such documents being of great public importance. The board of indirect taxes on its part has given a table of the manufacture, consumption, export, &c., of beetroot sugar, but as it only comes down to the end of August, 1870, it is of no value.

The Marquis de Plœuc, sub-governor of the Bank of France, has been raised to the dignity of Commander in the Legion of Honour for "exceptional services." These services consisted in preserving the Bank from the Commune, and the discharge of them must have occasioned great anxiety, and have required a rare combination of tact and firmness. If the Communists had got possession of the Bank, not only would its reserve of gold and silver have quickly disappeared, but its notes would have become as valueless as the *assignats* of old. In protecting it, in the midst of unexampled difficulties, M. de Plœuc saved France from a great disaster, and it is not too much to say prevented all Europe from being plunged into financial commotion. The honour done him is amply merited.

The City of Paris has had to borrow 25,000,000f and negotiated from a group of bankers. The interest and commission to be paid, it is said, make 8 per cent.

Complaints are made that the loan raised last year by the delegation of Tours at London, generally called here the Morgan from the name of the contractors, has not yet been admitted to quotation in the official list of the Bourse; also that financial circles as have in France not yet been in possession of provisional scrips, though the exchange has been effected in London. French subjects have to the Bourse complain that they are not exempted from the payment of interest on calls in arrear.

The following are the quotations of the Bourse:—

The interest on Treasury bills is fixed from this day at 3 per cent. for those of a month, 3½ for two months, 4 for three, and five months, 4½ for six to eleven months, and 4 for a year. This is the first time it has been reduced since the siege, and the lowest rate has heretofore been 5, the highest 6.

A group of financiers rather more than two years ago formed, under the name of Bompard & Co., a joint stock company with a nominal capital of 25,000,000f in shares of 1000f. In the importance of the shares, and in the fact that the subscription of them was confined to a few persons, this establishment differed from all others of a like kind. Only a small call on the shares was made, but the business done has been considerable. A few days back a meeting of the shareholders was held to receive an account of the operations of 1870. No written report was presented, another point in which the bank differs from others, but the explanations were verbal. The balance sheet presented was satisfactory to the shareholders. It stated that "commission and interest, and other profits," amounted to 2,091,336f 10c; that the outgoings were 795,003f 31c, and that the net profits were 1,342,032f 79c. Of the latter sum the 90f 0c were added to the premium fund, 148,200f 0c to the regular reserve fund, and 700,000f were left for distribution among the shareholders at the rate of 300f per share. The items composing the outlay were—management, 189,723f 32c; expenses of installation, 153,617f 4c; subscriptions occasioned by war, 32,183f 92c; decline in the estimated value of securities held, 197,318f 63c, and remuneration to the directors at the rate of 9 per cent. on the net profits, 132,791f 10. This new establishment, which has gained such success, has paid special attention to Spanish affairs.

The annual meeting of the shareholders of the Suez Canal was held a few days ago. The report presented by M. de Lesseps repeated what was said last year—that there is no question of widening the canal, it being sufficient for the traffic, with a width at the surface of from 60 to 100 metres (the mètre is 3ft 3¼in), and a depth of more than 8 metres. It also reported with respect to the reported sale of the canal, that "there is only one way of private persons getting associated in the enterprise, and that is by buying shares at the Bourse. It stated that the vessels that passed through from the opening to the 31st May was 813, of 745,837 tons, and of passengers 46,374. In 1870, at the beginning of the year, the cash in hand was 20,836,000f, the receipts were 6,400,000f, making a total of 27,236,000f; but the expenses for completing the canal, for interest and redemption of obligation, and for management were 33,000,000f, so that there was a deficit of 6,000,000f. In 1871, the expenses might be estimated at 18,500,000f, the receipts at 10,000,000f, and consequently there would be a deficit of 8,500,000f. The report announced the necessity of raising a loan, proposed to fix it at 20,000,000f; but it affirmed that the receipts from the transit alone would rise to 12,000,000f in 1872, and 14,000,000f in 1873, and that 1874 would begin with a surplus of 300,000f, so that from 1874 shareholders might count on being remunerated for their capital. The report was not well received, and was followed by a stormy discussion. Eventually, the meeting adjourned for a month, without coming to a decision on the loan. It is right to remark that the number of shares represented being less than 40,000, the loan could not have been regularly voted.

In the meeting of the Western Railway, mentioned in a previous letter, the receipts of 1870 were stated to be for the old network, 51,278,902f; and the expenses, 24,914,106f; balance, 26,364,796f; but this was reduced to 6,501,677f by deductions for the charges of loans and of the contribution to the new network. A dividend of 20f per share was distributed, absorbing 6,000,000f, and leaving the balance to be carried forward. The dividend however cannot be distributed until the Government has paid what it owes for carrying, and for guarantee of interest on the new network. The company has suffered greatly from the destruction in the war of buildings, bridges, and rolling-stock; and its receipts from the old and new network united were about 8,000,000f less than in 1869.

The Company of the Glacières (ice-houses) of Paris realised in 1870 profits of 107,000f, though on account of the siege it sold 1,905 tons less than in the year preceding. The profits give a dividend of 12f per share.

The dividend for 1870 of the Messageries Maritimes (Imperiales to be proposed by the directors in the approaching annual meeting of shareholders is 27f 50c, of which 12f 50c have been paid.

The Société Nouvelle des Forges et Chantiers de la Méditerranée (Shipbuilding) is paying 50f as balance of dividend of 1870.

The Company of the Coal Pits, Salt Works, &c., of Gouhenans, is now paying 32f 50c for last year.

The Company of the Union des Gaz is from 1st August to pay a coupon of 1of 25c on the 250f shares, and 32f 50c on those of 500f.

The Lake to Vincennes Railway Company is from 1st August to pay 7f 50c as interest on obligations.

The Company of the Docks of Havre is paying 15f as interest and dividend of 1870.

The following are the latest quotations from the markets per 50 kilogs duty paid:—

Cotton.—At *Havre*, New Orleans, very ordinary 108f to 109f; Ordinary to good ordinary, 90f. Sales limited. The sales of last week were 7,000 bales, and the prices fixed by the brokers on Friday were New Orleans very ordinary, 109f; Ordinary to good ordinary, 90f; Tinnevelly, 85f; Bengal ditto, 79f.

Coffee.—At *Havre*, Rio 78f and 76f in bond; Capitania 127f 50c duty paid; Maracaibo, 87f in bond; Ordinary, 116f to 120f, duty paid. Sales of other sorts were made but the prices are not given. At *Bordeaux*, La Guayra garbled, 145f 50c; Maracaibo 145f. Rio not wanted, 74f. At *Nantes*, Brazilian quarta 130f. At *Marseilles*, Rio 67f in bond and 120f and 126f duty paid.

Sugar.—At *Havre*, French West India nains, 66f 50c to 73f. At Nantes, Martinique, 64f home quarantine.

Cocoa.—At *Bordeaux*, Guayaquil, 116f; Caracas, 155f; Martinique, 110f.

Wool.—At *Havre*, Buenos Ayres lamb unwashed, 150f the 100 kilogs; white sheep ditto, 170f to 180f.

Tobacco.—At *Havre*, 60f to 140f the 100 kilogs.

Hides.—At *Havre*, Monte Video cured matadero ox and cow, 66f

ditto saladeros cow, 72f 50c; Lima salted, 66f; Rio Janeiro salted ox and cow, 61f 50c.

TALLOW.—At *Havre*, Monte Video saladeros ox, 57f 25c; New York, 55f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The expertations of sherry from Cadiz in the past half-year amounted to 39,673 butts, against 36,765 in the corresponding six months of 1870. The principal exporters from Jerez were Gonzales and Byass, 3,070; M. Misa, 2,887; P. Garvey, 2,086; F. W. Cozens and Co., 1,662; P. Domecq, 1,637; J. Pemartin, 1,305; Mackenzie and Co., 1,223; Wisdom and Water, 1,177; and from Port St Mary's, Widow Harmony, 1,301; F. Tosar, 1,299; Duff Gordon, 1,281; Mora, 1,227.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 26th day of July, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued.....	41,655,105	Government debt.....	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	26,655,105
		Silver bullion	...

Tuesday	13,363,000	.....	17,362,000	.....	11,190,000
Wednesday	15,038,000	.....	14,324,000	.....	9,668,000
Total.....	83,256,000	.....	122,823,000	.....	65,473,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, July 27th, 1871.

The total since the 4th of January, 1871, is 2,516,068,000*l*, compared with 2,255,868,000*l* for the corresponding period last year, showing an increase of 260,200,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week.	July 31, 1861.	July 29, 1868.	July 28, 1869.	July 27, 1870.	July 26, 1871.
Circulation, including	£	£	£	£	£
bank post bills.....	20,998,122	24,827,273	24,016,783	24,746,503	25,784,487

— Hamburg (3months)	13 10½ 10½	13 9½ 10	13 11 11½	13 11 13	13 9 9½
Clearing-house return..	...	53.785.000	57.236.000	65.473.000	83.256.000

In 1861, as had been anticipated, the Bank rate was reduced from 6 to 5 per cent. There was still a small supply of money, but the terms continued moderate, owing to the great restriction of business. Owing however to the expected demands on account of the American war, the partial failure of the harvest, and other causes, the money market was considered to be very delicate.

In 1868, money continued at 2 per cent. The chief tendency on the Stock Exchange was towards investment in foreign loans. The French Government had just effected a settlement with the holders of bonds of the Mexican Empire issued under the patronage of the French administration.

In 1869, the supply of money was on the increase, and rates more easy. The Government of India had just determined to make all future railways itself, and have no more guarantees. Reform in the Board of Trade Returns was being loudly called for.

In 1870, the Bank rate was advanced to 4 per cent. on Saturday and on Thursday to 5 per cent., the demands consequent on the war having caused great pressure. There was also a renewed panic on the Stock Exchange. The new Foreign Enlistment Bill was being rapidly passed. A great sensation had been produced by the Prussian Foreign Office publishing a Draft Treaty in the handwriting of M. Benedetti for the annexation of Belgium to France.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 6,353,061*l*; in 1868, an excess of 5,383,750*l*; in 1869, an excess of 4,413,162*l*; and in 1870, a deficiency of 1,816,118*l*. In 1871, there is an excess of 8,930,747*l*.

DISCOUNT AND MONEY MARKET.—The money market has continued in almost precisely the condition we described when we last wrote. There has been only a moderate demand, both at the Bank and in the open market, and the rate charged by the bill-brokers for short-dated paper is still 1¾. To-day there has been rather more activity than in the earlier part of the week, but the demand is chiefly on account of the Stock Exchange settlement, which closes to-day, and which has been rather a heavy one, though far from being on the same scale as the last.

It is now announced that the 500,000*l* which was withdrawn from the Bank last week on German account will be shipped to-morrow, but the changes in the Bank return this week would by themselves be more than sufficient to make up for the withdrawal. The public deposits have decreased 218,000*l*, the private deposits 334,000*l*, the public securities 653,000*l*, and the private securities 380,000*l*. On the other hand, the notes unemployed have increased half-a-million, and the stock of bullion in both departments 473,000*l*. The Bank is thus stronger than it was last week, and the proportion of reserve to the banking liabilities is 54 per cent. The Bank of France however is rather weaker this week, the bullion having diminished about 1,000,000*l*, and the circulation for the first time since the publication of the accounts was resumed not having decreased.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—3 months	.....	1⅞	per cent.
Do 4 months	... .	2	per cent.
Do 6 —	.....	2⅛	per cent.
Trade bills—3 months	.....	1¾ 2	per cent.
Do 4 months	.....	2¼	per cent.
Do 6 —	.....	2¼ 3	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	1 per cent.
Discount houses at call	1 per cent.
Do with seven days' notice	1¼ per cent.
Do fourteen days'	1¼ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	4	5	4	...
Vienna	6	5	nom.	5
Berlin	8	4	8	3½
Frankfort	...	3½	nom.	3½
Amsterdam	5½	3	5½	3½
Brussels	5	4	nom.	3½ ½
Hamburg	...	...	7	3¼ ½
St Petersburg	...	6	...	6

The Stock Markets.—The feature in the markets this week has been constant fluctuation, and in most departments there is a flat tendency. As compared with a fortnight since purchasing has been less active, while sales have been a little pressed with a view to realisation of profits after the great advance which has lately taken place. The upward movement lately manifest has thus received a severe check, but the bull account is still a strong one, and in the delicate condition of the market fluctuations have been greatly influenced by the daily changes in the weather, and the consequent speculation as to the harvest. It is felt that the continuance of cheap money and the prosperity of the country upon which a general rise of prices is anticipated, both depend to a large extent upon the abundance of the present harvest, and the uncertainty of the weather accordingly produces a great deal of speculation. In almost all departments there has been weakness, but in English and Foreign Government securities, which move most readily in sympathy with general causes affecting the money market, there is after all comparatively little change for the week. This is the more remarkable as an indication of the strength of the causes which maintain prices at a high level, because both French and Spanish stocks have been acted on specially by unfavourable causes—the former by the financial reports from Paris, which show that the deficit is greater than M. Thiers expected, and that the new taxes cannot be easily settled; and the latter by the accession to power of a new Ministry which is all but pledged to the taxation of both the external and internal debt. In English railways, though there are marked exceptions from special causes the general result of the week is a considerable improvement, the traffic returns having been favourable, and the Lancashire and Yorkshire dividend also producing a good effect. The greatest weakness has been displayed in the new undertakings in the miscellaneous department, which have, as a rule, been received with no great favour, the public disposition being rather towards old investments instead of new ventures. Probably the season of the year is not quite favourable, operators being averse to putting new things on their list on the eve of the holidays. In one or two cases however, such as the Nantyglo and Blaina Company, the success of the promoters has been most ample.

The approach of the fortnightly settlement which was commenced to-day also contributed at first to the depression; but the outstandings were very light, and as the settlement progressed a scarcity of stock became apparent, and the tendency upwards was renewed. As was the case at last settlement, there has been a very large absorption of all classes of securities by the public, though the purchasing by comparison has been on a smaller scale.

Foreign Government Securities.—The prices in this department have fluctuated from day to day in sympathy with the changes in the corn market. Early in the week with a falling corn market the tendency was upwards, but the broken weather late in the week raised the price of corn, and the price of consols was accordingly a shade lower. The fluctuations however have been within very narrow limits. To-day, owing to the appearance of the weather being again more favourable, the quotations have been once more rather higher, and on balance for the week there is an advance. The closing price to-day for the account is 93¾ ⅞, or an advance of ⅛ for the week.

With regard to the future of this market, it would appear that the present apprehensiveness on the Stock Exchange is excessive. In the face of the present accumulation of money, it would certainly take an enormous import of corn beyond our usual supply to cause any material enhancement in the rates. No doubt there is already a rise in the continental exchanges, partly resulting, we may assume, from the process of paying the French indemnity; but the accumulation of gold in the Bank is unprecedented, and it continues to come in large quantities from America and elsewhere. Against these withdrawals too must be set the promised repayment of the German loans next January and February. Any early rise in the value of money is thus exceedingly improbable.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	93¾	93¾	93¾	93¾	5s to 10s pm
Monday	93¾	93¾	93¾	93¾	5s to 10s pm
Tuesday	93¾	93¾	93¾	93¾	5s to 10s pm

Victoria 6 %	112 13	112 13	... ...
Ditto New 5 %	104 5	104 5	... ...

Foreign Government Securities.—As we have intimated the feature in this department has been fluctuation and depression, but the changes are insignificant. The chief movement has been in French and Spanish, but the specially adverse influences of increasing financial difficulty in the former case, and of the accession of an unsound Ministry in financial matters in the latter case, have had comparatively little effect against the general causes tending to an advance in these securities. In Turkish there has also been some dealing in anticipation of the new loan, which was to have been brought out this week, but is not yet announced. To-day as in most other departments, there has been a reaction against the depression in the middle of the week, and prices are again better, though they do not quite leave off at the best point of the day. The French 5 per Cent. Scrip after all fluctuations remains at 5¼ ⅛ pm., 3 per Cent. Rentes at 55⅜ ⅜, and the National Defence loan at 98½ ¼. In Spanish, notwithstanding the causes of depression to which we have referred, the closing quotation is 31⅞ 32⅛, or 1/16 higher than last week. Turkish are a good deal higher for the week, the closing quotation for the 5 per Cents. of 1865 being 46¼ ½, against 45½ ¾ for last week.

With regard to French finance the statements from Paris are certainly most unsatisfactory, as regards the immediate prospects of the Treasury. The deficit of the present year in the first place instead of being 18,000,000*l*, according to M. Thiers's calculation, will be 24,000,000*l*. It has not been possible to reduce any part of the expenditure so much as was expected; and while the suppression of the Paris insurrection has turned out most costly for the military budget, the suppression of the Algerian insurrection has involved unexpected charges for the navy. None of the new taxes moreover have been imposed so soon as was expected. The chief difficulty however is the delay about the proposed taxes on raw material, from which upwards of 4,000,000*l* was expected, and the refusal to grant which has quite upset the budget. As usual, too, when one gloomy view is taken there are abundant rumours to strengthen it, and a great deal is once more being said of the political difficulties in France, particularly of an alleged conspiracy of M. Gambetta to seize the dictatorship. The financial situation however is no worse than what most business people expected, and it is in reality rather a matter for congratulation that it is not being aggravated by bad taxes. It was antecedently probable that the current expenditure of the year would not be covered by current revenue, and perhaps for a year or two there will be deficits, as under the Empire, without French credit being much the worse. The political

dangers are more serious, little as we are disposed to credit the kind of conspiracy attributed to Gambetta.

The financial news from Spain is undoubtedly important. The present Finance Minister, Ruiz Gomez, has certainly spoken in favour of taxing the debt, and of making the taxation apply to the external as well as the internal debt. In the peculiar circumstances of Spain however it does not follow that the attempt will be made. The Government is immediately dependent on foreign loans, and must soon find out how dangerous would be the experiment of tampering with the interest of the foreign creditor. Of course there is no saying what folly may be committed, but it is at least fortunate that a repudiating Ministry in Spain will find serious impediments in its way.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

ENGLISH RAILWAYS.—As we have intimated, notwithstanding the great fluctuations which have occurred and the depression early in the week, there is on the whole a considerable improvement in this department. Lancashire and Yorkshire have specially advanced upon the announcement of a 7¼ per cent. dividend; but Caledonian, Brighton, London and North-Western, Great Northern, and other stocks have all more or less improved, especially as compared with the lowest price of the week. The marked exception to the general tone has been in Metropolitan District stocks of all kinds—debenture, preference, and ordinary—which have all been pressed for sale. The traffic return of the week was again most disappointing, and in addition yesterday the most alarming rumours as to the state of the line were circulated, indicating the working of a "ring" of operators, who have evidently made a set at this company's stocks. Their opportunity is no doubt most favourable; but as we point out elsewhere, it is the nature of such operations to be carried too far, and although the high prices of a month since were hardly justified, the expectation as to the development of the line is really very good. As regards debenture stocks in particular, investors should remember that they are on a different footing from the preference and ordinary shares, and that the current traffic, even before the opening of the Mansion House station, was sufficient to pay the debenture interest. To-day the improved tone in the market has continued, and prices are generally better than at the opening, though the best price of the day has not been maintained. Metropolitan District has recovered a little from the depression of yesterday.

We have received a telegram this afternoon to the effect that the directors of the North-Eastern Railway Company recommend a dividend of 8¼ per cent. per annum for the last half-year. This is not quite so good as was generally estimated, but is an improvement of 1 per cent. upon the corresponding period of last year. The stock has however been firm upon the announcement.

We have also received this afternoon a communication from the Metropolitan Railway Company to the effect that the accounts will admit of a dividend at the rate of 3¾ per cent. per annum for the past half-year. This is apparently rather better than the mere increase of traffic would permit, and confirms the statement made some time since that the company is at length getting rid of its surplus lands, and so diminishing its locked-up capital.

The North Staffordshire dividend is announced to be 3 per cent. per annum, against 2½ per cent. per annum for the corresponding half-year of 1870.

A prospectus is issued of the Merionethshire Railway Company, of which we give an account below in our Notices and Reports.

The traffics of the week have again been very good, with the above exception of the Metropolitan District, and also excepting the Great Western, in which there is a falling off of upwards of 5,000*l*. As regards the latter however it is noticed that the comparison is with a week of last year in which there was the Royal Agricultural Society's Show at Wolverhampton. The return was all but quite up to the average of recent weeks, which show an increase upon last year.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	98⅜ 9	.....	100½ ⅜	+ 1⅜

Metropolitan District 6 %	123 5	.....	123 5	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending July 22 to 828,834*l*, being an increase of 39,892*l* on the corresponding week of last year. The principal increases for the week are —North-Eastern, 8,058*l*; Midland, 7,226*l*; Lancashire and Yorkshire, 5,789*l*; London and North-Western, 3,554*l*; and Caledonian, 3,623*l*. Great Western has decreased 5,393*l*, the comparison being with the Wolverhampton Show week of last year. The following shows the details of the increase or decrease in each case :—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half year to date. Amount.	Inc. or Dec. on Correspndg. per. in '70.
	£	£	£	£

AMERICAN SECURITIES.—United States Government bonds have again been in steady request for investment, and leave off at an advance of ¼ on the week. Very little progress appears to have been made with the New Funding loan, and we are still without a quotation. Atlantic and Great Western bonds are better, on account of the satisfactory carrying out of the reconstruction scheme. With regard to the Erie litigation, the following telegram has been received from New York under date July 27.—Judge Blatchford has decided that Messrs Jay and Gould must within sixty days restore for registration the 30,000 Erie shares belonging to English shareholders, but refuses to grant an injunction to restrain the company from issuing and registering new shares for that purpose. This decision is far from being wholly satisfactory, as it affords no guarantee against the future "watering" of the share capital. We annex our usual table showing the variations in the prices of the leading stocks and shares on the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]

[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]

JOINT STOCK BANKS.—We note very little change in the quotations for Joint Stock Bank shares. The tone of the market has been firm throughout the week, and most of the leading banks are now quoted ex dividend. Transactions have not been very numerous but there is reason to believe that the dividends recently paid will be re-invested in the securities. The only variations of importance are an advance of ¼ in Agra, and 1 in Australasian.

TELEGRAPHS.—The reactionary movement in this department has made steady progress, and the general tone has been flat. Anglo-American and Anglo-Mediterranean have been particularly heavy, and have given way 1 and 5 respectively. French Cable shares are ½ lower; Cuba and Hunter's ¼; British American, French India Submarine, China Submarine, Cuba, and Falmouth and Gibraltar ½. On the other hand Submarine stock has improved 5. Telegraph Construction shares were in request to-day and closed 1½ higher on the week. Hooper's Telegraph works show a rise of ½, and Silver's India Rubber shares are 1 lower.

MINES.—The market for British mining shares has ruled steady, and the changes in prices have been for the most part in favour of holders. South Wheal Frances are nominally quoted 1s higher. Van shares have improved 5. East Lovell 1¼, Prince of Wales and Wheal Seton 1, Great Wheal Vor ½, Asheton and Tankerville are each ½ lower. In the foreign market we note an advance of 2 in Rhodesia, and ¼ in Colorado. Cape Copper shares have given way ½.

The applications for shares in the Peruvian Silver Mining Company, Limited, will close on Tuesday, 1st August, for London, and on Wednesday, 2nd August, for the country.

MISCELLANEOUS.—A fair business has been transacted in miscellaneous securities, and the market closes to-night with a firm appearance. The principal changes for the week are—An advance of 1 in Darjeeling and Rhymney Iron, 2 in London General Omnibus, ½ to Hydraulic Power. On the other hand, there is a decline of 1 in General Steam Navigation, and ½ in Rio City Improvements.

The share list of the Sao Pedro Brazil Gas Company will close for London on Monday, the 31st inst., and for the country on Tuesday, the 1st August.

The list of applications for the 5,000 perpetual eight per cent. preference shares of 100*l* each of the Nantyglo and Blaina Ironworks Company, Limited, which we notice below, will be closed on Tuesday, 1st August, for London, and on Wednesday, 2nd August, for country applications.

In the new undertakings, the following are the current quotations, but in some cases they are quite nominal :—Nantyglo and Blaina Ironworks, 4¼ to 5¼; Anglo-Hungarian Bitumen, 1⅛ to 2⅛; Anglo-Austrian Bitumen, par to 1; Belgian-Dutch Paving, ½ to ¾; Limmer Asphalte, ¼ ½; and Neuchatel Bitumen, 34 to 35 premium. Val de Travers Asphalte shares are firm at 32 to 33, and Mineral Hill Mining debentures, the special settling of which is fixed for Tuesday, the 1st August, are quoted 99 to 101.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—Withdrawals of sovereigns from the Bank continue on a limited scale, about 162,000*l* having been taken away; there is, however no demand for bar gold for export, and 515,000*l* has been sent in since our circular of the 20th inst. We have received during the week about 255,000*l* from New York, and 47,500*l*, per Queen Bee, from New Zealand. The sovereigns, mentioned above, have been sent to the Cape, Brazils, and to Spain.

Silver remains firm, and the market is fractionally better. We have received 48s at 170,000*l* from New York. The present demand is chiefly for Holland.

Mexican Dollars.—The old coinage has declined in value to 59⅜d per oz, there being no demand for China at present. The new coinage has slightly increased in price, corresponding to the rise in bar silver. The receipts during the week amount to about 80,000*l*, and the P. and O. steamer took 248,000*l* to China and the Straits.

Exchange on India for Banks' drafts at 60 days' sight is 1s 10⅞d to 1s 10¾d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 8½d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 59 0⅜d per oz std, firm: ditto containing 5 grains gold, 5s 1d to 5s 1⅛d per oz std.; Mexican dollars, 4s 11⅛d to 4s 11⅜d per oz.

The *Gazette* returns show that the imports of the precious metals into the United Kingdom during the week ended July 26, were—Gold, 516,282*l*; silver, 200,712*l*. The exports were—Gold, 81,421*l*; silver, 602,400*l*.

The sum of 10,000*l* was sent into the Bank of England to-day.

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, July 31.

Australian Mining, general, London Tavern.
London and Brazilian Bank, general, City Terminus Hotel.

TUESDAY, August 1.

Great Northern and Western Ireland Railway, general, 15 Park street.

WEDNESDAY, August 2.

Manchester, Buxton, &c., Railway, general, Derby.
Rhymney Iron, general, 26 St Martin's lane.

THURSDAY, August 3.

Metropolitan Street Tramways, general, Westminster Palace Hotel.
London and County Bank, general, City Terminus Hotel.
West India and Pacific Steam Ship, general.
Royston and Hitchin Railway, general, King's cross.

FRIDAY, August 4.

Frontino and Bolivia Gold Mining, general, London Tavern.
Metropolitan District Railway, general, Westminster Palace Hotel.
Millwall Dock, general, City Terminus Hotel.

SETTLING DAYS.

Settling Days—Wednesday, August 16, and Thursday, August 31.
Ticket Days—Tuesday, August 15, and Wednesday, August 30.
Consols—Thursday, August 3.

NOTICES AND REPORTS.

STOCKS.

Buenos Ayres 6 per Cent Loan, 1870.—Bonds representing 10,300*l* have been drawn for redemption at par on the 1st October.

Massachusetts State 5 per Cent. Sterling Loan.—Messrs M'Calmont Brothers and Co. are authorised to receive subscriptions for 300,000*l* 5 per cent. sterling bonds, in sums of 500*l* each, bearing interest at 5 per cent. per annum from the 1st July, 1871, payable half-yearly, on 1st January and 1st July in each year. The principal is payable on the 1st July, 1891. Both principal and interest are payable in sterling money in London, at the offices of Messrs M'Calmont Brothers and Co. The issue price is 91*l* per cent., or 90½*l*, allowing for the deferred payment of instalments.

North German 5 per Cent. Loan.—The second issue of this loan will be paid off on the 1st February, 1872.

RAILWAY COMPANIES.

Colchester and Stour Valley.—A dividend at the rate of 3*l* 6s per cent. per annum has been declared.

East London Railway—6 per Cent. Debenture Stock.—The directors are receiving subscriptions for 200,000*l* in stock at par, the money being required to complete the section North of the Thames. The interest to July, 1874, will be provided by an investment in Consols.

Great Northern and Western of Ireland.—Half-year's dividend notified at the rate of 4¾ per cent. per annum; surplus, 1,481*l*.

Lancashire and Yorkshire.—Dividend recommended 7¾ per cent. per annum, as compared with 7 per cent. at this time last year.

London, Brighton, and South Coast.—At the meeting a dividend of 7s 6d per cent. was declared.

Londonderry and Enniskillen.—The rent for the half-year, 13,000*l*, has been received and 13,029*l* is divisible. Interest on mortgages and land payments amounts to 4,014*l*, leaving 9,015*l*. The usual dividends have been declared on the A and B stocks, together with 1¼ per cent. on account of arrears on the B stock, leaving 91*l*. The arrears on the B stock have been reduced to 5*l* 19s 6d per cent. The extra rent from the Irish North-Western for the year 1870 amounted to 2,902*l*. This, added to balance due on accounts previously agreed, gives a total of 5,585*l* owing from that company.

Manchester, Sheffield, and Lincolnshire.—The last half-year's revenue account contrasted with that of the corresponding period of 1870:—

	1870. £		1871. £
Gross revenue	602,513		644,346
Working expenses	290,389		305,308
Net	314,174		339,038
Previous surplus	13,110		3,640
	325,284		342,678
Deduct preference charges	295,605		300,347
Available for dividend	29,679		42,331
—On the ordinary stock at the rate of 1 per cent. per annum	26,000	(1¼p.c.p.a.)	41,194
Surplus	3,679		1,137

Capital Account.

	Expended. £		Received. £
To 31st December, 1870	12,782,814		12,344,872
During the half-year	171,660		1,369,058
Total, 30th June, 1871	12,954,474		13,712,930

The directors do not appear well satisfied with the present position of the coal disputes. The Act just obtained extends the time for the completion of the Cheshire lines. The works between Manchester and Liverpool are making satisfactory progress, and it is expected the line will be ready next spring. The Macclesfield, Bollington, and Marple line is to be doubled, and a central station will be erected at Macclesfield, in conjunction with the North Staffordshire. Estimated capital outlay during the current six months, 186,000*l*.

Merionethshire Railway.—Capital, 80,000*l*, in 10*l* shares. The prospectus states—This company is formed for the purpose of constructing a railway about 10 miles in length, forming a junction between the Cambrian and the Festiniog and Blaenau Railways, thereby affording direct through communication between the well-known Festiniog Slate Quaries and the general railway system of the kingdom, also increased means of access to the place of shipment at Portmadoc. The railway will be constructed on the standard 4ft 8½in gauge; the Festiniog and Blaenau Railway (now a 2ft gauge) will be altered to form a through line, to be worked by the Merionethshire Company. The estimated cost of the line is only 8,000*l* per mile; the average cost of English railways being about 34,000*l* a mile. The average earnings of English lines for the week ending 8th July last was 68*l* 2s per mile. To pay 10 per cent. on its capital, the Merionethshire Railway requires less than half that rate, or only 32*l* per mile per week. The existing two feet gauge line on the north side of valley, unconnected as it is with the railways of the country, earns about 37*l* a mile per week.

Metropolitan.—Dividend at the rate of 3¾ per cent. announced.

North-Eastern.—Dividend proposed, 8¼, against 7¼ per cent. for 1870.

North Staffordshire.—Dividend proposed, 3 per cent., against 2½ last year.

Toronto, Grey, and Bruce of Canada.—An issue at par of 80,000*l* sterling 8 per cent. first mortgage bonds, having five years to run, is announced by Messrs Mullens, Marshall, and Daniell. The instalments extend to January, 1872. The bonds now offered, together with those issued in Canada (say 134,000*l*), form a final charge upon the whole undertaking.

BANKS.

Birmingham Joint Stock.—Dividend recommended at the rate of 20 per cent. per annum, free of income tax.

English, Scottish, and Australian Chartered.—The accounts show a balance of 29,782*l*, out of which it is proposed to pay a dividend for the half-year at the rate of 7 per cent. per annum. The ascertained deficiency on the realisation of the station securities held at the branches is 27,226*l*, which the directors propose to meet by transferring 20,000*l* from the reserved fund and 7,226*l* from the above balance.

London and County.—A dividend at the rate of 18 per cent. per annum has been announced; surplus, 4,400*l*.

National.—A dividend at the rate of 8 per cent. per annum has been declared.

National of Liverpool.—A net profit of 11,426*l* has been made during the half-year, and a dividend at the rate of 5 per cent. per annum is recommended.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

English and Foreign Credit.—The report stated that the gross profits for the half-year had been 6,886*l*, including 415*l* brought forward. From this amount, after deducting current expenses, rebate, &c., the directors declared a dividend of 5s 6d per share, equal to 6*l* 17s 6d per cent. per annum. The business was stated to be progressing.

New Zealand Trust and Loan.—The net profits for the year, including 168*l* brought forward, amounted to 15,545*l*, and a dividend of 5s per share, free of income tax, was declared, making, with the previous distribution, a total of 10 per cent. for the twelve months. After the addition of 5,000*l* to the reserve, increasing it to 35,500*l*. there remains 545*l*

ASSURANCE COMPANIES.

Albert Life.—Lord Cairns decided last week that no reconstruction should be attempted.

Edinburgh Life.—A special meeting has been held to consider and dispose of the Sixth Septennial Report, when the scheme of division of profit was finally ratified. The total cash profit realised during the seven years was 143,045*l*, of which the assured receive nine-tenths (128,741*l*) and the proprietors one-tenth (14,304*l*). A dividend was declared on the company's stock of 10 per cent. (equal to 15 per cent. on the original amount paid), and an extra dividend of 10s per share was also declared.

Home and Colonial Marine Insurance Company, Limited.—Mr William Scott, of the firm of Messrs Binny and Co. (London and Madras), has joined the board.

Thames and Mersey Marine.—The balance carried forward on the 30th of June, deducting all claims and expenses, as well as 40,000*l* paid to the shareholders, amounts, including the reserve fund of 150,000*l*, to 563,034*l*. This is exclusive of the paid-up capital. The underwriting accounts for 1869, now closed, have resulted in a profit of 40,000*l*. This, together with the undivided balance of profit, enables the directors to carry 50,000*l* to the reserve fund, which will then amount to 200,000*l*, and to recommend the payment, free of income tax,

[CONTINUED FROM PAGE 912.]

of a dividend of 2s, and a bonus of 6s per share, making, with the dividend on account, paid in January last, 10s per share, or 25 per cent. on the paid-up capital for the year.

MISCELLANEOUS COMPANIES.

Beetroot Sugar, Limited.—Capital, 200,000*l*, in 10*l* shares; first issue one-half. The proposal is to develop the production of sugar from beet grown in England, which will be purchased from the farmers for ready money, while the pulp will be re-sold to them for feeding cattle.

British Indian Extension Telegraph.—Dividend declared at the rate of 6 per cent. per annum.

British Indian Tea.—The year's profit has been 2,255*l*.

International Contract, Limited.—A further dividend of 1s in the pound, making 6s altogether, is payable to the creditors.

Linoleum Manufacturing.—Interim dividend declared at the rate of 10 per cent. per annum.

London and St Katharine Docks.—The adopted report stated that the earnings for the six months had been 459,598*l*, the expenditure, 294,174*l*, and the balance for the half-year 165,424*l*. From this was deducted for dividends on the debenture and preferential stocks 63,011*l*, leaving a profit for the half-year of 102,413*l*. The directors recommended a dividend of 1½ per cent., free of income tax, on the ordinary stock, amounting to 86,350*l*, leaving a surplus of 16,063*l*. After payment of the dividend there would be a rest of 180,297*l*.

Merchant Shipping.—At the meeting no dividend was declared, the profit being carried to insurance and depreciation.

Nantyglo and Blaina Ironworks, Limited.—Capital, 250,000*l*, in 100*l* ordinary shares (all taken by the vendors), and 500,000*l*, in 8 per cent. participating preference shares of 100*l*, now offered for public subscription. The property and business of Messrs Joseph and Crawshay Bailey, at Nantyglo and Beaufort, as well as those of the Blaina Iron and Coal Works Company, Limited, will be acquired by this new company for 250,000*l*, in ordinary shares of 400,000*l* in cash, a 5 per cent. mortgage for 200,000*l* being also taken over. These properties are stated to cover an area of 5,000 acres in Monmouthshire and Breconshire, and contain inexhaustible supplies of coal and ironstone, with limestone and fireclay. An encouraging report of Messrs William Bird and Co. is appended. They value the properties at 1,670,108*l*, including the extensive machinery and plant thereon, and the profits at 100,000*l* a year, besides 32,000*l* from rents. It is also stated that the railway and canal communications are excellent, and that Messrs Bailey, having amassed large fortunes, are desirous of retiring.

North Metropolitan Tramways.—A dividend is announced at the rate of 12 per cent. per annum on the old capital, from November 9, 1870, to February 28, 1871; and at the rate of 10 per cent. per annum on the whole paid-up capital, from February 28 to June 30.

Phospho-Guano.—At the meeting the adopted report for the first ten months, to 30th June last, stated that the expectations held out at the commencement have been realised, the profit being 29,095*l*, out of which dividends were declared of 10 per cent. per annum on the A or preference stock, and 5 per cent. per annum on the B stock, while 7,500*l* was placed to the redemption fund, leaving 5,499*l*.

Queenborough Chemical, Limited.—Capital, 25,000*l*, in 5,000 shares of 5*l* each. This company is formed for the purpose of carrying out on an extended scale the business of the chemical works for a long time conducted at Queenborough, in Kent, and comprising the manufacture of green copperas, sulphate of ammonia, sulphuric acid, oxide of iron, chemical manures, &c., and also for developing a London trade in guanos, manures, &c. The premises, which are freehold, consist of about two acres of land, with needful appliances, buildings, &c.

St James's Hotel.—Dividend announced at the rate of 7½ per cent. per annum.

Wood Street Warehouse.—Dividend declared at the rate of 10

West Surrey Water.—Prospectus has been issued, the proposed capital being 25,000*l*, in 10*l* shares, with borrowing powers to the extent of 6,000*l*. The present issue is limited to 1,250 shares. The Act secures to the company the exclusive right of supplying Chertsey, Walton, Shepperton, and the neighbourhood with water.

per cent. per annum.

MINING COMPANIES.

Clifton Silver Mining, Limited.—Capital, 35,000*l*, in 5*l* shares. The purchase of 4,200 feet of a valuable lode in Colorado is to be effected, and it is stated to be "one of the largest continuous fissure veins ever offered to the public." Reports are favourable. The purchase price is 17,000*l*, of which 10,000*l* will be in cash. The lode has been probed along its whole length, and the working capital is considered sufficient to produce 26,000*l* a-year profit.

Saturn Silver Mining of Utah, Limited.—Capital, 75,000*l*, in 3,000 shares of 25*l* each. The company is started to acquire for the sum of 40,000*l* in cash and 1,000 paid-up shares, the "Idaho" claim on the "Great Saturn" lode, about 27 miles south-west of Salt Lake City; but none of the purchase money will be paid until the vendors statements have been verified by independent testimony at the vendors' expense. There are good road and railway communications at the mine, and the prospectus states:—"The 'Idaho' claim lies in the central portion of the 'Great Saturn' lode—so called—and contains 600 lineal feet measurement. A shaft has been sunk near the middle of the claim to the depth of 67 feet, directly upon the lode, developing a mineral vein of 4 feet on the foot wall and 7 feet on the hanging wall (eleven feet), of solid silver and lead-bearing ore. The ore on the surface assays 20 dollars in silver and 50 per cent. in lead to the ton, and the average, to the present depth of the shaft, is upwards of 50 dollars in silver and 60 per cent. in lead per ton."

Silver Star Mining, Limited.—Capital, 150,000*l*, in 10*l* shares. The vendors' transfer for the sum of 125,000*l* (only 15,000*l* in cash) a series of properties in Nevada, containing 21 proved lodes.

Taquaril Gold.—A call of 1s per share is payable on the 14th August.

Toiyabe Silver Mining, Limited.—Capital, 100,000*l*, in 20,000 shares of 5*l* each. The purchase of an extensive mining claim in Nevada is the object of the new company. The prospectus states:—"In all, about 3,325 feet are held by direct patent from the Government, besides a ledge of about 1,200 feet held by right of discovery. The mine has been opened and developed by a shaft of about 320 feet deep, having 900 feet of drifts and levels run to expose the ore. Mr Charles W. Calvert, C.E., of Philadelphia, reports that there are 25,000 tons of ore now in sight. There is a good house, and a very superior set of hoisting machinery, with 30-horse power engine, and every requisite for working the shaft to a depth (if needful) of 700 feet, together with all appliances for the successful working of the mine. The ore yields some 278 dollars, or 55*l* 10s per ton, not assay, but actual yield. Some other ledges, not fully developed as yet, have given from 160*l* to 320*l* per ton." The purchase price is 15,000*l* in cash, and 70,000*l* in shares. Reports are favourable.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was rather more firmness in the grain trade to-day owing to the unsettled weather, and more business was effected. Monday's currencies were well maintained for both English and foreign wheat. Flour sold slowly on former terms. Spring corn of all kinds was very quiet. Maize was again cheaper, but oats met with rather more inquiry. Barley, beans, and peas were unaltered in value. This week's imports of foreign and colonial produce into London have amounted to 66,420 qrs of wheat; 9,720 barley; 55,160 oats; 430 beans; 2,510 peas, 15,060 maize, 1,930 sacks and 7,560 barrels of flour.

Demand for wheat at Liverpool and Wakefield this morning ruled quiet, but values were supported.

The Liverpool cotton market was very firm during Friday and Saturday last, and in some cases a slight advance was obtained. On Monday the tone became quieter, and prices rather easier, but on Wednesday the demand improved, and at the close quotations are about the same as on Friday last. The total sales for the week are 77,650 bales, of which **the trade have taken 54,330 bales; speculators and exporters,** 23,320 bales. The imports are 35,887 bales, the actual exports 6,277 bales, and to-day's stock is 699,190 bales. Quotations **for American descriptions have advanced $\frac{1}{16}$d per lb, while** East Indian have receded $\frac{1}{16}$d per lb, and Bengals remain unchanged **since last Friday. To-day the market closes dull.** Sales 8,000 bales, at rather easier prices.

At New York, on July 27, middling Upland cotton was quoted at 20¼ cents per lb.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended July 27, 1871 :—

	Imported.		Exported.
American.....bales	29,889	.....	2,439
Brazilian	12,619	.....	1,213
East Indian	56,051	.....	5,769
Egyptian	912	.....	168
Miscellaneous	3,969	.....	174
Total.....	103,730	.....	9,735

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, June 27 :—The advices which reached us from the Liverpool market continued very encouraging for some days after last mail left, a large business being reported with increasing prices, and on the 20th the quotation for fair Dhollerah was advanced to 7d per lb on the spot, and 7$\frac{1}{16}$d May-June shipment. This news caused considerable excitement here, and as a good demand set in, chiefly on the part of continental shippers, prices were rapidly run up about 10 rs per candy, the quotation for Dhollerah on the 22nd being 225 rs, while one purchase was made by a local spinning and weaving company as high as 228 rs. The advance was however very short-lived, as subsequent telegrams from Liverpool read less favourably, and on the 22nd the quotation was again d.d., with a quiet market. This checked the demand here altogether and during the past few days there has been hardly anything doing while prices have steadily receded to about the level of last mail's quotations. The sales reported during the week aggregate about 6,000 candies of which 3,200 are Dhollerah, Verungaum, &c., 820 sawginned Dharwar, and the remainder Oomrawuttee and Broach descriptions. During the early part of the week the weather continued fine, but for the past three or four days there has been a strong monsoon, with heavy falls of rain, and shipping operations have in consequence been almost suspended. Only a few local showers have yet been reported from the districts, but we hope to hear that the late fall has extended above Ghaut. Arrivals are now steadily falling off, and consist entirely of Dhollerah and Ahmedabad descriptions, which come forward by the Bombay, Baroda, and Central India Railway. From Tinnevelly we have a telegram dated 26th instant, quoting 6$\frac{1}{2}$d per lb, with a good demand.

Export of Cotton from Bombay to June 26.

Actual exports since last mail left, 54,211 bales.

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, July 14 :—Transactions very limited, owing to want of supplies; and only a few hundred cantars have changed hands, chiefly in low cotton and fair quality—the latter to fill engagements. Holders ask equal to 9$\frac{3}{4}$d to 9$\frac{7}{8}$d, c. and f., for fair to fully fair; 10$\frac{1}{8}$d to 10$\frac{1}{4}$d, ditto, good fair. Contracts have been in animated demand, and were pushed up to 10$\frac{1}{4}$d, but receded again to 9$\frac{7}{8}$d to 9$\frac{7}{8}$d. To-day they have again rallied, and there are buyers at 9$\frac{7}{8}$d to 10d. Shipments from June 30th to July 14th—England, 4,959; Italy, 120; Austria, 668—total, 5,747 bales.

Only a limited business has been passing in colonial produce, but we note no important change in value. Sugar has sold slowly, on former terms, the inquiry having been chiefly for British West India. Coffee has changed hands to a limited extent, on rather easier currencies. Rice and cocoa have been neglected.

The annexed is dated Havana, July 6th :—During the whole of the past month the sugar market has remained quiet, owing to rather unfavourable advices from abroad as well as to the extreme firmness of planters, who continued to be reluctant sellers. Shippers have been acting with caution: there being, however, comparatively little offering in the market, they have been compelled, in order to fill their wants, to submit to the pretensions of holders, and prices have thus been firmly sustained at the high figure of 11rs and 11$\frac{1}{2}$rs for No. 12, according to quality. The better descriptions, Nos. 13 and 14, and bright yellows Nos. 15 and 18, of common train, are scarce, commanding $\frac{1}{2}$ rl to $\frac{3}{4}$ rl above our quotations. Good strong sugars of the lowest grades, Nos. 8 and 10, are also getting scarce, and, being at the same time in moderate demand for shipment to the United States, obtain full prices. We place our general quotations as follows :—Nos. 7 to 10, 25s 9d to 27s 11d; 11 to 12, 29s to 30s 1d; 13 to 14, 30s 8d to 31s 2½d; 15 to 17, 32s 4d to 33s 5d; 18 to 20, 33s 5d to 35s 7½d; whites, inferior to superior, 37s 10d to 39s 11d. The stock here and at Matanzas amounts to 412,672 boxes, against 405,248 boxes in 1870. Muscovado sugars—The transactions in this staple have been of little importance here as well as at outports, owing to the reduced stocks, and prices have been ruling firm, say at from 9$\frac{1}{2}$rs to 10$\frac{1}{2}$rs for fair to good refining grades, equal to 23s 11d to 25s 6d. There is now hardly any stock left in first hands at outports. The exports from here, Matanzas, Cardenas, and Sagua la Grande, during the last month, were distributed as follows :—To the United States, 28,787 boxes 24,456 hhds; Great Britain and a market, 38,874 boxes 448 hhds; Bremen, 77 boxes 5 hhds; Copenhagen, 1,057 boxes; Helsingfors, 1,955 boxes; Belgium and Holland, 4,343 boxes; France, 19,645 boxes; Spain, 23,719 boxes; South and Central America and other parts, 822 boxes 62 hhds—total, 119,279 boxes 24,971 hhds, against 229,438 boxes 50,006 hhds same month last year; and the aggregate of exports from the above mentioned ports sum up 685,992 boxes 219,376 hhds, against 1,154,152 boxes 300,614 hhds in 1870.

The following report, dated June 24, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo :—Shipping operations since the date of our last have been restricted by broken weather, the south-west monsoon having now fairly set in, and to date the clearances outwards show a continued decline in exports of plantation coffee, native descriptions being at the same time slightly in excess of last year. The distribution of them are shown beneath :—

Our coffee market has continued bare of supplies, and we have only a very small business to report for the fortnight just elapsed, both as regards parchment and native coffee, without

any change in the value of either. Arrivals from the interiors are still of the most trifling extent, except from Ouvah, whence the receipts are liberal.

Messrs Southey, Balme, and Co. report:—The third series of wool sales of the year opened on the 22nd ult., and has been brought to a close. The arrivals declared available for sale amounted to:—Sydney, 58,024 bales; Port Phillip, 67,942; Adelaide, 9,053; Swan River, 2,632; Van Diemen's Land, 11,772; New Zealand, 45,805; Cape, 26,409—total, 221,637 bales; while the quantities actually catalogued were:—Sydney, 56,689 bales; Port Phillip, 65,748; Adelaide, 8,375; Swan River, 2,596; Van Diemen's Land, 11,712; New Zealand, 45,808; Cape, 23,257—total, 214,185 bales, the difference being explained by private sales and direct consignment to the country. Of the above total it is estimated that not less than 130,000 bales have been taken for the United States and Continent of Europe, the English trade having again refused to meet the advance in the market with any degree of freedom. The recovery in wool, which the earlier sales of the year had already materially established, has made still more decided progress during the series just terminated, and the contrast of the present condition of the market with that which it occupied only some twelve months since, after the outbreak of the late war, affords an example of one of the most rapid and striking fluctuations on record. The steady expansion in consumption which marked the earlier months of the year gave fair promise of the probability of firm markets during the remainder of the season; but although much of the recent improvement may no doubt be ascribed to this cause, the unexpected activity of the foreign, and particularly the French, demand, the unexpected deficiency in the production of the raw material, both in America, at home, and in France, and the discovery of a very small increase in the colonial shipments, have very materially contributed to the establishment of an advance considerably in excess of all anticipations. The course of the series has been a gradual and steady increase in value from the opening rates—which ruled in all cases, except fine wools, at an advance of from 1d to 1½d per lb—to a final improvement during the last ten days varying from 2½d to 3d per lb in excess of the rates of May. Unwashed wools showed in the first instance the principal advance under the influence of a keen American and French competition, and indeed still stand relatively dearer than washed or scoured descriptions. This disproportion, however, became, as the sales progressed, less and less apparent, with a steadily-increasing advance in the latter, which was well maintained to the close. During the final fortnight, moreover, even fine wools participated in a sensible degree in the general improvement. Half-bred colonials, in sympathy with the English market, show an average advance of 2d per lb, while lambs' wool—now in much more plentiful supply than earlier in the year—holds the exceptional position of barely, if at all, exceeding the value current during the previous sales.

The following report of the Cape wool trade is taken from Messrs A. C. Stewart and Co.'s produce circular, dated Port Elizabeth, June 16:—Since the date of our last report the arrivals of wool have been very moderate. A large quantity has accumulated in the country towns; but the continued scarcity of transport prevents it being forwarded here with the usual dispatch. The s.s. Warrior arrived in Table Bay on the 3rd instant, bringing news of a further advance at the London sales. This immediately caused great activity in our market, and some large transactions were entered into. The supply of superior Uitenhage scoured is very limited this year, owing to the American buyers taking nearly all the good long stapled grease wools. What few parcels have come in have been cleared off at an advance of ½d to ¾d on former rates. The ordinary qualities have advanced ½d to ½d per lb. Of country scoured, the supply has been limited; choice parcels have realised ½d to ½d advance. The principal transactions have been in fleecewashed wools. The whole of the old stock has been cleared off at fully former rates, and for late arrivals holders are asking an advance. There is considerable inquiry for long-stapled, shafty descriptions, the supply of which so far has been limited. The market is entirely bare of long grease wools. As loads arrive they are sold at once at 6d to 6½d for good, and even 6¾d for extra choice lots. Late advices from America are very encouraging for Cape wools, as they seem in much greater favour with manufacturers than formerly. Wools for washing have improved in price.

The annexed is dated New York, July 14.—The general markets are, for the most part, very quiet, as is usual at this period of the year, when large numbers of active business men are away on their annual vacation. The export trade, however, holds the even tenor of its way, though margins are extremely slender, as the slight shading in prices of the leading agricultural staples is met by a corresponding tone in the leading markets abroad. The money market continues easy, and rates, as for several months past, extremely low. The new winter wheat crop is thus early finding its way to market in considerable quantities, and as the movement of agricultural produce becomes active, the western drain of currency will, of course, increase. But the resources of our eastern financial centres are so abundant that no great stringency is expected at any time during the remainder of the year. The current rates are 2 to 4 per cent. on call, and 4½ to 7 per cent. discount of approved mercantile notes.

THE COTTON TRADE.

LIVERPOOL.—July 27.

The cotton market opened this week with a large inquiry, the sales on Friday amounting to fully 20,000 bales, and on Saturday an advance of fully ⅛d per lb was established. On Monday the demand fell off, and as it has since been on only a moderate scale, the quotations are but little altered from last Thursday. For Sea Island there is still a good demand, at full rates for all qualities, except common, for which there has been no inquiry. American has been in good request; but prices, after advancing ⅛d to ¼d per lb, became irregular, and the better qualities only are dearer than last week. New York advices to the 27th instant quote middling Upland 20¾ cents, costing to sell at Liverpool 10⅛d per lb, by steamer. Brazil continues in moderate demand, and quotations are without change. Egyptian has been in moderate request, and the qualities below good fair are comparatively neglected. For East Indian the demand continues on a reduced scale, and, with a considerable import, prices close about ⅛d per lb lower.

In cotton to arrive the transactions have been considerable, but, after some fluctuations, prices show little change from last week. The latest quotations are—American, basis of middling, New Orleans, new crop, October-November shipment, 9½d; not below low middling, September delivery, $9\frac{5}{16}$d; bales, August delivery, not below low middling, $9\frac{1}{16}$d; Dhollerah, fair new merchants, June shipment, 7½d; Oomrawuttee, fair new merchants, June shipment, 7⅞d; Comptah, fully fair new merchants, ship named, 7d per lb.

The sales of the week, including forwarded, amount to 77,650 bales, of which 15,500 are on speculation, and 7,820 declared for export, leaving 54,330 bales to the trade.

July 28.—The sales to-day will probably amount to about 10,000 bales, with a quiet market.

Monday, 7th August, being a bank holiday, according to the recent Act of Parliament, will be a close holiday in the cotton market.

	bales.
An increase of import compared with the same date last year of	775,920
An increase of quantity taken for consumption of	424,650
An increase of actual exports of	307,500
An increase of stock of	116,190

In speculation there is an increase of 183,140 bales. The imports this week have amounted to 95,887 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to July 21) is 59,000 bales, against a similar quantity last year. The actual exports have been 6,277 bales this week.

LONDON.—JULY 27.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The improvement noticed in our last circular was maintained on Friday and Saturday, but the market has since become quiet, and for some descriptions we reduce quotations ⅛d per lb.

Monday the 7th August, being a bank holiday according to Act of Parliament, the cotton market will be closed on that day.

NEW YORK.—JULY 14.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, July 14. From the figures thus obtained it appears that the total receipts for the seven days have reached 74,500 bales against 74,403 bales last week, 74,197 bales the previous week and 52,054 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,045,532 bales, against 2,854,081 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,091,751 bales. The exports for the week ending this evening reach a total of 7,083 bales, of which 7,083 were to Great Britain, none to France, and none to rest of the continent, while the stocks as made up this evening are now 176,199 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending July 14.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	57	...	57	8317	62432	57754

Total since Sept. 1	2902341	774709	3676942	2147187	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 12,540 bales, while the stocks to-night are 35,453 bales *more* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to July 7, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1 1870.	Receipts since Sept. 1 1869.	Exported since September 1 to Great Britain.	France.	Other Foreign.	Total.	Shipments to Northern Ports.	Stock.

The market the past week has been variable. At the opening the feeling was buoyant, but the inquiry soon fell off under more liberal offerings, and prices gradually declined until Wednesday, when middling Uplands touched 20⅝c, against 21⅛c last Friday. Thursday there was but little doing, quotations remaining stationary. To-day there has been a better demand, and the market closed firm at ⅛c advance, with middling Uplands again at 21⅛c. These fluctuations in price have been mainly due to the changes in the Liverpool market, which was active and higher the first half of the week, falling off to 9d on Thursday, but returning to 9⅛d to-day. Holders here have, we think, shown all the week more disposition to meet buyers, and yet manifesting great confidence, notwithstanding our crop reports have been more favourable. For forward delivery the market has been active, and at the close prices are about ⅛c to ¼ higher for the winter months, with a slight decline for July and August. Low middling closed to-night at 20⅛c for July, 20⅛c for August, 20⅛c for September, 19⅛c for November, 19⅛c for December, and 19c for January. The total sales of this description for the week are 72,150 bales. For immediate delivery the total sales foot up this week 14,104 bales, including 1,847 for export, 3,711 for consumption, 524 speculation, and 8,022 in transit. Of the above 258 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c	c	c	c
Ordinary	19½ @ ...	19½ @ ...	19½ @ ...	18 @ ...
Good ordinary	19	19	19	19
Low middling	20	20	20	20
Middling	21	21	21	21
Good middling	22	22	22	22

Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending July 14 1871. Receipts	Shipments	Stock	Week ending July 14 1870. Receipts	Shipments	Stock
Augusta	371	565	6[illegible]	180	1127	5[illegible]
Columbus	156	47	1[illegible]	60	379	1[illegible]
Macon	114	193	3[illegible]	101	765	3[illegible]
Montgomery	139	200	3[illegible]	60	701	3[illegible]
Selma	71	146	6[illegible]	61	598	1[illegible]
Memphis	1[illegible]	21[illegible]	2[illegible]	5[illegible]	2[illegible]	6[illegible]
Nashville	1[illegible]	132	1[illegible]	139	357	9[illegible]
[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]

The above totals show that the interior stocks have decreased during the week 847 bales, and are to-night 13,579 bales *less*

than at the same period last year. The receipts have also been 1,341 bales in excess of same week last year.

The exports of cotton this week from New York show a decrease since last week, the total reaching 216 bales, against 826 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

EXPORTS of COTTON (bales) from NEW YORK since Sept. 1, 1870.

—*New York Commercial and Financial Chronicle.*

NEW YORK, July 25.—The receipts of cotton for the last four days have been 5,000 bales. Shipments to England, 9,000 bales. Middling Upland, 9¼d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, July 27.—Our market has continued barely steady throughout the week, but quite devoid of animation in any department of business. The engagements of spinners and manufacturers are still very large, which causes them to adhere firmly to their quotations, and to be indifferent about selling, though cotton is rather lower in value again. Buyers on the other hand are by no means anxious to make further purchases to a large extent at present prices. Yarns are in quiet demand, but to sell quantities a slight concession would have to be made. For shipping qualities there is very slight inquiry. The cloth market is dull generally, and prices of nearly all descriptions relatively lower than yarn in price—hence manufacturers are working to little or no profit. Our large India and China buyers continue to make some offers, but they do not lead to much business. The home trade demand is dull.

Messrs Alex. Collie and Co. received the following telegram from Manchester yesterday:—The market is quiet, with prices tending slightly in favour of buyers.

BRADFORD.—The wool market again shows great firmness. Some spinners, who have been out of stock, have come into the market and have purchased for their immediate requirements. A fair consumptive demand is going forward, and staplers, seeing the continual upward tendency of country rates, are in all cases holding out for higher prices. There is a very buoyant tone in the yarn market, and an active inquiry in most classes of yarns. There is a steady business doing in the piece-market, and prices are stiff.

LEEDS.—There have been only some local and a few shipping house buyers in the woollen market. In the coloured cloth hall stocks were small and prices high. Manufacturers who have no more wool, which was bought before the advances in price, are diminishing their production. White cloths and Victorias sold at rather better prices.

ROCHDALE.—There was a good attendance, and there were both home and foreign buyers at work, to whom the higher prices now prevailing were no obstacle. The value of wool is still increasing.

DUNDEE.—Although our flax market has continued inactive, and the business doing in goods on the spot during the week has been of a very limited character, the downward tendency appears to be arrested for the present. Medium qualities of tows continue in fair request at about former prices, but the finer sorts are still rather dull of sale. The jute market keeps very firm, notwithstanding the prospect of liberal supplies. The yarn market has been quiet, and prices of some descriptions of flax yarns are rather weaker. Tow yarns are in comparatively better demand at steady prices, while for jute yarns the demand continues active at full prices The demand for linens and jute goods is still good, and manufacturers continue to be well supplied with orders.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—JULY 14.

Prices for breadstuffs have during the week generally been weak, and flour, wheat, and corn show some decline, with an unsettled feeling at the close. The receipts of flour have not been excessive, but there has been a great pressure to sell old flours from winter wheat. To close out these in large lines, prices have been greatly reduced, and this has somewhat increased the export movement. On Wednesday 3,000 bbls prime western from white wheat were sold at $6.65, and quantities of "seconds" from winter wheat, branded extra, have been sold at $5.50 to $5.75. Extras from spring have ranged from $5.75 to $6.10, but have been quite neglected. Southern flours have been more freely offered, and close lower. Rye flour has been drooping, and corn meal is lower. 1,000 bbls brandy wine sold yesterday at $4.05. To-day there was but little doing, and prices without essential change; a line of prime extra State sold at $5.90. Wheat has been depressed under the liberal receipts of new winter wheat, both here and at the West, dull accounts from abroad, favourable reports from the young wheat crop, and a general desire to close out stocks on hand. The movement, under the influence of lower prices, and lower ocean freights, and a speculation in corn which has prevented the free export of that staple, has been quite brisk, and in the face of increased receipts at the western ports, a considerable reduction of the visible supply has been effected. To-day the market was a little firmer, at $1.40 to $1.43 for soft to prime No. 2 spring, with a liberal export movement. Corn has been the object of considerable speculation, in spite of the unfavourable weather and the large receipts here and at the West. But the demand is very large, and it is thought receipts will soon fall off. Liverpool declined to 29s 9d, and recovered to-day to 31s 6d, but these fluctuations seem to have had little influence on the export movement. To-day the market has been rather stronger, at 72c for prime mixed; other descriptions being nearly nominal. The movement in breadstuffs at this market has been as follows:—

RECEIPTS AT NEW YORK.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade has ruled dull and depressed throughout the week, and the tendency of prices, until to-day, has been downwards. The return of unsettled weather and frequent reports of lodging which have been received from the agricultural districts, enabled factors to demand extreme quotations for English wheat to-day. The actual quantity of produce that changed hands, however, was very limited. Foreign wheat has come to hand freely, and there is a considerable increase in the stocks in granary, the imports of Russian and American descriptions having been very liberal. Those qualities are accordingly depressed in value. It is believed that cutting will commence in the early districts next week, but some little while must elapse before the harvest can become general. Flour has ruled dull in sympathy with the wheat market.

The spring corn trade has been inactive. Oats have sold more freely at the late decline, but maize, owing to liberal arrivals, is again 1s cheaper. Barley, beans, and peas are nominally unaltered in value.

Mr George Dornbusch thus reports the state of the floating grain and seed trade.—During the last eight days 64 grain and seed-laden vessels have arrived at ports-of-call, viz.:—21 wheat, 7 maize, 7 barley, 2 rye, 3 beans, 1 millet-seed, 2 linseed, 1 cotton-seed, 2 valonea, 1 maize and barley. The floating grain trade has been steady in tone, but wanting in animation. Wheat—Early this week an advance of 6d to 1s upon last week's prices was paid, and since maintained, but with little business doing. Maize—For fine old corn last week's prices have been obtainable—new corn rather cheaper. Barley has been slow to sell. Several cargoes have arrived, more or less in imperfect condition. The reported sales are as follows:—Wheat—27 arrived cargoes: Berdianski, 48s 9d to 49s 6d; soft, from Marianapoli, 49s 6d; New Coast Ghirka, 49s; Rostoff Ghirka, from Taganrog, 49s 6d to 47s; hard Taganrog, 45s; Nicopol Ghirka, 47s 6d to 47s 7½d; Ghirka from Odessa, 48s; ditto, from Yeisk, 45s 6d, and from Nicolaieff, 46s per 492 lbs; Wallachian, 40s and 41s 9d; Danubian, 41s and 41s 3d per 480 lbs; No 1 spring from New York, 52s and 52s 6d; prime white Canadian, 56s per 480 lbs; Californian, 56s per 500 lbs. Shipping, 1 cargo Odessa, 48s. To be shipped about 18,000qrs No. 1 spring New York, 47s 6d to 50s per 480 lbs. Maize—6 arrived cargoes: Odessa, 29s to 30s per 492 lbs; mixed, from Montreal and New York, 32s; ditto, from Baltimore, 32s and 33s per 480 lbs. To be shipped 4 cargoes, mixed American to New York and Montreal, 29s to 29s 3d per 480 lbs. Barley—1 arrived cargo from Kustendji, 25s per 400 lbs. Rye—1 cargo arrived at Rotterdam, 21s 6d per 480 lbs. Linseed quiet, and prices tending downwards. Arrived, 3,150 qrs Berdianski, at 60s per 424 lbs, and 200 tons East India, from Calcutta, 63s and 63s 3d. Shipped or to be shipped, 8,200 qrs Azow, at 59s and 59s 9d per 424 lbs. Rapeseed slow, and cheaper to sell. Arrived in London, 1,000 bags inferior yellow mixed, 70s 6d. On passage, 250 tons ordinary brown Calcutta, 66s 6d. To be shipped, 3,000 qrs cultivated Danubian, at 65s per 424 lbs, A T. Cotton-seed steady, at late prices. 500 tons Egyptian, Alexandria, 9l per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a good demand for West India by the trade at the decline last quoted, and rather a large business reported in floating cargoes for the out ports. The market generally remains without animation. Most of the Barbadoes by auction was taken in. A few lots sold: soft at 28s to 32s 6d; fine crystallised, 35s 6d; Jamaica, 26s 6d to 30s 6d; crystallised Demerara, 35s 6d to 37s. The total sales of West India to yesterday were 2,827 casks. Low brown sorts are dull, excepting Jaggery which meets with some inquiry. Refined has slightly declined in value, and the market remains rather quiet. Arrivals have been moderate in extent. The statistical position of sugar remains much as before. There was a very large delivery last week, viz., 5,190 tons, nearly all for home use, and the decrease in stock, when compared with the previous season, amounts to 27,450 tons.

Mauritius.—Business has been done in grainy kinds at 35s 6d to 37s 6d for yellow and white.

Bengal.—1,303 bags Gurpatta were taken in or withdrawn.

Penang.—3,046 bags were partly sold. Soft brown, 25s to 27s 6d; soft pale yellow and white, 34s to 35s.

Manila.—11,069 bags Zebu was bought in at 22s to 22s 6d.

Other Foreign.—At auction 344 casks 47 barrels Porto Rico partly sold at 31s 6d to 35s for low to good yellow, and 29s 6d to 30s 6d for brown. Privately 100 baskets fine Java are reported at 38s 3d.

Floating Cargoes.—Two of Porto Rico for the United Kingdom at 26s 9d to 27s 1½d; one for the Continent, no price given. For the United Kingdom two of Havana at 28s 6d and 28s 9d No. 11; one Cuba Muscovado at 26s. One brown Bahia at 23s, one low ditto at 21s 6d. One of Grenada, price not given.

Refined.—There is a good supply, and prices have given way slightly for common qualities of lumps and titlers. A parcel of Dutch loaves by auction sold at 41s 6d to 42s, and the lowest quotation for common goods here is 40s 6d to 41s per cwt.

MOLASSES.—180 puncheons St Kitts sold, no particulars given.

RUM.—The market is steady, with continued good deliveries for home use. Several sales of Demerara have been effected at 1s 8½d to 2s 2d, according to quality and packages; also some common leewards at 1s 7d, and 225 packages (chiefly casks) Mauritius at 1s 4d proof. Jamaica is moderate in demand. The sales effected this week have been chiefly at 3s 5d to 4s 7d per proof gallon.

COFFEE.—Some further large arrivals have taken place, and the market is unsettled. At the public sales, 526 casks 3,375 bags East India were partly sold, including greyish Coorg at 61s 6d to 63s. Native Mysore kind, 58s 6d. Several parcels were withdrawn. 200 bags palish Java were bought in above the value. 1,967 bags native Ceylon part sold at 1s to 1s 6d decline: good ordinary, 53s 6d to 54s; the remainder taken in. Privately, a limited business up to 54s 6d, and 1,300 bags native Malabar at 50s. The public sales of plantation Ceylon have been 702 casks 274 barrels and bags, which chiefly sold at irregular prices: pale and grey, 58s to 62s 6d; colory, 62s to 63s; good to fine, including bold, at 70s to 76s. 53 bags African at 50s 6d for small brown berry. Arrivals include Costa Rica, Ceylon, and East India. The export deliveries at length show some decrease. These for home use are steadily improving, and the stock is about 4,700 tons less than in the previous season.

COCOA.—The market is quiet. 5,000 bags Guayaquil are advertised for sale on the 1st inst. The public sales have chiefly consisted of Grenada. 914 bags partly sold upon former terms, low to ordinary qualities, 47s to 51s 6d, good to fine, 53s to 61s. 176 bags Trinidad found buyers at 64s to 67s 6d for middling to fine, and 52s 6d to 58s for very low and ordinary grey. 146 bags Surinam part sold at 50s to 62s per cwt. The total stock is now 31,600 packages, against 34,000 packages last year and 42,000 packages in 1869 at the same date.

TEA.—Supplies of the new crop per steamer Australia are duly expected, and the market remains in the same state of quietude as last reported. Common kinds of congou remain very dull. A moderate business has been transacted in Indian teas, notwithstanding the low range of prices. At the public sales this week 4,178 packages were offered, a considerable portion being of Darjeeling growth. Prior to auction, about 800 packages were realised at about former rates, while under the hammer barely 500 packages found buyers, the sales passing with extreme flatness. Subsequently several hundred packages have changed hands, weak and inferior qualities, are almost unsaleable.

RICE.—Arrivals at ports-of-call have been remarkably large. From these cargoes five of Rangoon have sold for the continent at 9s 9d to 9s 10½d. One of Necrancie Arracan at 9s 7½d for London, being some decline on last week's rates. Yesterday a cargo of the latter sold at 9s 6d for export. Transactions on the spot are limited, including low yellow Bengal at 8s 6d, and good middling to fine white, at 10s 6d to 12s 3d, and Madras, at 9s 3d to 9s 7½d per cwt.

IMPORTS and DELIVERIES of RICE to July 22, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ..... tons	36760 ...	28430 ...	50180 ..	34900
Deliveries	66250 ...	38550 ...	32690 ..	31530
Stock	23630 ...	36660 ...	50030 ...	19050

SAGO.—At the public sales, 957 bags chiefly sold at 15s 6d to 16s for middling small, and 17s per cwt for rather bold rough, being the previous value for the former, while the latter description went rather cheaper. 527 bags Singapore sago flour were taken in at 15s 6d per cwt. Privately, a good business at about 6d per cwt less.

PEARL TAPIOCA.—213 bags Singapore sold at 20s to 21s for medium, and 19s per cwt for extra bold grain. Business has been done in rough Penang tapioca at last week's quotations.

BLACK PEPPER.—Transactions privately on the spot have been limited, but lower prices accepted for arrival, the sales including Penang at 5¾d to 5⅞d. 50 tons Singapore now landing at 5 11/16d without guarantee of quality, and 70 tons to arrive at 5¾d. The sound portion of 2,622 bags Singapore by auction was bought in or withdrawn.

WHITE PEPPER.—The market is again rather higher. 250 bags Singapore part sold at 9¾d. During the week business has been done at 9⅝d to 9¾d, and 25 tons to arrive at 9¾d per lb.

OTHER SPICES.—Nutmegs are again rather dearer: 51 cases Penang partly sold: 119's 2s 6d, 79's 2s 11d, 68's 3s 6d, 63's 3s 10d. Low shrivelled taken in at 1s 9d. 3 cases low small limed from Amsterdam sold at 2s to 2s 1d. Mace continues in demand: 3 cases fine Penang by auction sold at 4s to 4s 1d; 5 cases bought in above the value; 12 cases low quality Java sold at 3s 6d. 5 cases Penang cloves were bought in above the value: 2 boxes Penang kind sold at 1s 1½d; and the chief part of 488 packages Zanzibar at steady prices, from 2⅞d to 3d. 543 bags pimento were bought in at 2d to 2¼d. 1,067 bags cinnamon chips chiefly sold at 3⅛d to 4¼d per lb. 851 barrels Jamaica ginger were all sold at steady prices: low to good ordinary, 39s to 48s; middling to fine, 50s to 106s; a few lots extra bold up to 8l 12s 6d. 518 cases Cochin ginger sold as follows: part scraped, small to middling, 51s to 58s; rough low to bold, 42s to 46s; very bold, 65s per cwt.

SALTPETRE.—The market continues firm, but transactions this week have been upon rather a limited scale, including 1,000 bags Bengal, refraction 10½ to 7¼, 27s 6d to 28s per cwt. No sales reported for for arrival.

IMPORTS and DELIVERIES of SALTPETRE to July 22, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	6340 ...	5940 ...	6920 ...	3710
Total delivered	6590 ...	8860 ...	4960 ...	5920
Stock	2470 ...	1900 ...	5240 ...	5930

COCHINEAL.—There has been a large quantity of Teneriffe brought forward, viz., 1,311 bags, which met a good demand at firmer rates: silver, 2s 3½d to 2s 5d; black, 2s 4d to 3s. 237 bags Honduras also went without material alteration: silver, 2s 2d to 2s 8d; black, 2s 5d to 2s 8d. 50 bags Mexican chiefly silvers at 3s 2d to 3s 3½d showed a slight decline. A few packages of Lima silvers obtained 2s 2d to 2s 4d per lb

INDIGO.—The sales of Guatimala, &c., which concluded on Monday, contained 3,557 serons, &c., and went flatly, the prices ranging from par to 4d discount for current qualities, but for parcels in second hands, which were very difficult to sell, the decline occasionally amounted to as much as 9d per lb. More than half the above quantity was withdrawn. New Grenada, owing to the scarcity of desirable qualities of East India, went at 4d to 9d advance up to 9s 9d. The prices for Guatimala were as follows: Sobres, 5s 6d to 7s 7d per lb; Cortes, 5s to 7s; low and ordinary, 2s to 4s 9d per lb.

OTHER DRYSALTERY GOODS.—Sales have been made in Bengal turmeric to arrive at 19s 1½d to 19s 6d. Transactions on the spot are limited. Fine Cutch supports its previous value, but the market is quiet. 472 boxes by auction were taken in at 21s 6d to 22s. Gambier is less in demand. 2,954 packages were chiefly taken in at 16s 6d for block, and 18s 6d to 19s for cubes. A few lots sold at 18s. Privately, the sales have been for arrival at 15s 9d to 15s 10½d, ex ship. 46 bales low broken Bengal safflower were bought in at 45s per cwt.

SHELLAC.—The market continues steady. 538 cases by auction part sold at 6l 5s to 6l 12s 6d for native orange; garnet, 110s to 115s; fine orange now quoted 7l 5s. About 200 chests garnet sold to arrive during the week.

METALS.—The markets have generally shown a fair degree of activity. Copper continues in steady demand. Chili bars, &c., 67l 10s to 69l; Walaroo and Burra, 77l 10s to 78l, being rather higher. English remains much as before, the business being of very moderate extent. English lead is quiet at last week's quotations. Foreign tin was weaker in price at one time, but in the middle of the week speculative operations caused a firmer tone. Straits after touching 133l rose to 134l and 135l afloat. Yesterday the market was quiet, price on the spot 133l to 134l. There has been considerable animation in the market for Scotch pig iron, with advancing prices. The last sales for cash were at 61s to 61s 3d. Manufactured iron is steady in price. A moderate business has been reported in spelter. Silesian has sold at 18l 2s 6d to 18l 6s 3d per ton.

JUTE.—The quantity afloat is large, and the imports at Dundee have been liberal. Desirable qualities, however, maintain their former position as the consumption progresses favourably. A good business has been done for arrival chiefly at 21l 5s to 25l 10s. 9,477 bales by auction went flatly, and the greater part was taken in, only reduced offers being made for common qualities. Others went steady at 22l to 26l 5s. Low and ordinary part sold at 18l 15s to 21l; rejections, 18l to 18l 10s per ton.

HIDES.—At the public sales of East India kips held yesterday, 130,500 kips chiefly sold at previous rates to ¼d per lb advance, and 16,230 tanned hides nearly all found buyers at full prices. 3,885 buffalo were only partly disposed of on former terms.

OILS.—There is still a good demand for olive. Two cargoes of Greek have sold at 45l 10s to 45l 15s for the United Kingdom. On the spot Mogadore quoted 46l to 46l 10s. Gallipoli about 50l. Sperm has been neglected. Present quotations, 81l to 81l 10s. Pale seal, 33l 10s per tun. Cocoa-nut dull. Ceylon, 39l 10s to 40l, and business for arrival at 39l. Cochin is nominally unaltered. Palm maintains the late advance. Fine Lagos, 37l 10s, the lower qualities in proportion, but the market is quiet. Linseed oil remains inactive at 32l 10s on the spot; 32l for the last four months. English brown rape has further declined to 40l 10s, but is now firmer at 41l on the spot and for the last four months. Refined, 42l 10s to 43l, and foreign, 46l to 47l per ton.

TURPENTINE.—American, 43s. For delivery in July to August 36s 6d per cwt.

PETROLEUM inactive. American refined, 1s 6d to 1s 6½d per gallon, according to date of delivery.

TALLOW.—There is not any new feature in this market, which has been steady, but a quiet tone now prevails. About 2,900 casks, chiefly Australian, are advertised for public sale this day. Petersburg new, 44s; October to December, 45s 3d per cwt.

PARTICULARS of TALLOW—Monday, July 24 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is without farther alteration, and rather quiet at the close. Sales of West India 1,539 casks, making 4,370 casks for the week. The parcels by auction to-day went without change in value. 4,360 bags Mauritius partly sold: soft brown and grey, 24s 6d to 31s 6d; grainy, 33s 6d to 35s 6d. A floating cargo of Havana for the United Kingdom, No. 11⅛ to 12, at 29s.

COFFEE.—At auction 92 half-frazils Mocha part sold at 84s to 89s 6d for low and common mixed small berry. 85 bags washed and 302 bags common Rio were bought in. 533 bags Guatimala part sold at 57s to 59s 6d per cwt.

RICE.—A floating cargo of Necrancie Arracan sold at 9s 7½d per cwt.

SAFFLOWER.—161 bales Bengal chiefly sold at 5l to 11l 7s 6d.

LAC DYE.—160 chests were bought in.

METALS.—Business in Straits for arrival at 133l 10s to 134l. Scotch pig iron declined to 60s 3d per ton cash.

TALLOW.—2,800 casks Australian by auction about half-sold at 6d to 1s decline. Mutton, 36s to 43s 6d; beef, 35s 6d to 41s. 161 casks American withdrawn. No change in town tallow.

OILS.—20 tuns colonial sperm by auction part sold at 81l 10s. 30 tuns whale bought in. 170 casks, &c., cocoa-nut, chiefly Sydney, were bought in.

ADDITIONAL NOTICES.

ENGLISH WOOL.—Prices still keep steady, and a large trade done.

FLAX.—Market steady.

HEMP.—Market very quiet for Russian. Manila firm, and a steady business passing at late rates.

SILK.—Market firm, but less business doing; no change in prices.

SEEDS.—No alteration in the seed trade.

TOBACCO.—The inquiry for North American has been very trifling, and the sales effected during the week have only comprised small selections for the immediate requirements of the trade. For exportation there has been more demand; but transactions have been limited in consequence of the small supply in the market. In other growths there has been a moderate business done. For useful growths prices are firm.

LEATHER.—The leather market continues active, particularly for sole leather, shoulders, calfskins, and kips. There was a small supply of leather at Leadenhall on Tuesday, and nearly all good English butts commanded slightly higher prices. Foreign butts of good tannage also realised ¼d advance. Good crop hides, prime light English shoulders, calfskins of all weights, kips, and English horse hides were much wanted, and realised extreme quotations.

METALS.—A fair business has been doing all the week. Copper has found buyers of foreign kinds to a good extent, and although English is a little quiet, there is no giving way in quotations. Iron is rather firmer in price. Tin has fluctuated a little, but closes at last week's prices. Lead is a little more inquired for. Spelter is quiet. Tin plates continue in active demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	1
Yellow Russian ditto	45	6
Melted stuff	33	6
Rough stuff	17	0
Greaves	21	0
Good dregs	6	0

Imports for the week, 4,754 casks.

METROPOLITAN CATTLE MARKET.

MONDAY, July 24.—The total imports of foreign stock into London last week amounted to 16,532 head. In the corresponding week in 1870, we received 10,171; in 1869, 10,828; in 1868, 10,728; and in 1867, 10,353 head.

Considerable firmness has been noticed in the cattle trade to-day. The supplies of stock have been short, and this circumstance in conjunction with the cooler weather has contributed in imparting an improved tendency to prices. The supply of beasts from our own grazing districts has been short, and with but few exceptions the quality has

been indifferent. As regards foreign stock, the supply has not been extensive, but there have been more fair-conditioned beasts on sale from Spain. In all breeds a good business has been doing, and prices show an advance of from 2d to 4d per 8 lbs compared with Monday last, the best Scots and crosses selling at 6s to 6s 2d per 8 lbs. With sheep the market has been scantily supplied. The trade has been firm, and prices have risen 4d per 8 lbs. For the best Downs and half-breds 6s 8d to 6s 10d per 8 lbs has been paid. Lambs have been steady at from 7s 6d to 8s per 8 lbs. Calves have been firm, and pigs have realised full prices.

SUPPLIES ON SALE.

	July 25, 1870.	July 24, 1871.
Beasts	4000	3140
Sheep and lambs	28,000	21,525
Calves	440	466
Pigs	190	190

METROPOLITAN MEAT MARKET.

Per 8 lbs by the carcase.

	s d	s d		s d	s d
Inferior beef	3 8	to 4 6	Inferior mutton	4 0	to 5 0
Middling ditto	4 6	5 0	Middling ditto	5 0	6 0
Prime large ditto	5 0	5 4	Prime ditto	6 0	6 4
Prime small ditto	5 4	5 6	Large pork	3 8	4 0
Veal	5 0	5 4	Small pork	4 0	4 8

Lamb, 6s 0d to 6s 6d.

HOP MARKET.

BOROUGH, Friday, July 28.—Only a limited inquiry has prevailed for all home growths of hops. Nevertheless prices have been well supported. Mid and East Kents, 8l to 7l 7s; Weald of Kents, 5l to 5l; Sussex, 4l to 4l 10s. Farnham and country, 4l to 6l; and olds, 1l to 1l 10s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, July 28.—The supplies have been moderately good. The demand has been quiet, at late rates. English realise 4s to 6s; regents, 60s to 80s; kidneys, 80s to 6l; and Jersey, 90s to 110s per ton.

LIVERPOOL MARKETS.

WOOL.

FROM OUR OWN CORRESPONDENT.

FRIDAY, July 28.—The weekly low wool sales were held here on the 25th, 26th, and 27th inst., a fair catalogue comprising 9,000 bales, chiefly Turkey Germany, Egyptian, Peruvian, &c., and of which a larger proportion than usual was the growth of an somewhat coloured nature, except for Turkey wools, of the quantity offered of these was quite satisfactory, and prices generally in many parcels, have come quietly slightly given way.

CORN.

FROM OUR OWN CORRESPONDENT.

FRIDAY, July 28.—There has been a moderate attendance at this morning's market, and wheat was 1d per cent in the advance on red and white of last week's quotations. There is no improvement in the general demand for flour. Flour unchanged with a better business. Indian corn in good request at 31s 3d. Beans Sard., 32s 6d; mixed, 31s 3d. Oatmeal 25s 6d to 26s.

WAKEFIELD, Friday, July 28.—The unsettled weather has given a firmer tone to the wheat trade at this market-day. The demand is not extensive, but in some instances an advance of 1s has been obtained for fine fresh parcels. Spring corn is generally lower.

The Gazette.

TUESDAY, July 25.

BANKRUPTS.

William Field, Dean street, New North road, cowkeeper.

George [illegible], Duncan square, Broadway, London fields, pianoforte manufacturer.

George Robert Warner Dugmore, market gardener.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For painting pictures and all works executed by children there will now be no excuse for using poisonous paints. Parents have remarked that their children are returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN.

Is extensively used for all kinds of

OUT-DOOR WORK.

Is especially applicable to

WOOD, IRON, BRICK, STONE, AND COMPO.

A proportion of profits will be given, and a minimum of £400 per annum guaranteed.—Apply, by letter, to B., care of Messrs Pottle and Son, Royal Exchange.

THE ALEXANDRA PALACE AND

MUSWELL HILL ESTATE TONTINE.

(To terminate on the 30th June, 1886.)

This being a "Trust" subscribers incur no liability.

Certificates representing 850,000 guineas (of which 1s of each guinea is to be appropriated to insurance of subscribers) will be issued at the following rates:—

	£	s	d	
A (or single right) certificates...each	1	1	0	Payable on Application.
B (or 10 right) — —	10	10	0	
C (or 25 right) — —	26	5	0	
D (or 50 right) — —	52	10	0	
E (or 100 right) — —	105	0	0	

Certificates pass to and entitle the bearer:—

1. To participation in the proceeds of sale of the property if the representative life upon which the Tontine privilege depends shall be living on the 30th June, 1886.
2. To the receipt from a life assurance of the sum of 20s in respect of each guinea paid upon any certificate if the representative life shall die before the said 30th June, 1886.
3. To admissions to the Palace and park, according to the number of rights.
4. To participation in Art Union distributions proposed to be hereafter established.

As explained in detail in the full prospectus.

The acceptance of a certificate involves no liability. The rights and privileges of certificate-holders are governed by the trust deed.

The whole net income of the undertaking, after defraying interest charges and management expenses, will be devoted to the improvement of the property, and also (when power is obtained) to Art Union distributions.

ABRIDGED PROSPECTUS.

CONTRACT FOR PURCHASE OF PROPERTY.

An advantageous contract has been concluded for the purchase, free from incumbrance, of the Alexandra Palace, park, and lands adjoining, situate at Muswell hill, Hornsey, in the county of Middlesex (comprising about 470 acres of freehold and 28 acres of lease old land), and the contents of the Palace, for the sum of £675,000.

OBJECT OF TONTINE—THE INSTITUTION.

The object of the Tontine is to complete the purchase and improve the property, and thus to provide for all classes of the inhabitants of the Metropolis, and especially of its northern and eastern portions and suburbs, and for the many thousands of country excursionists, a grand institution of healthful recreation and elevating instruction, which will combine the solid advantages of the South Kensington Museum and Schools of Art, with the lighter pleasures and pastimes of the Crystal Palace at Sydenham, thus giving effect to the large and enlightened views of the late Prince Consort.

If no issue is made the subscriptions will be returned in full.

For full particulars see detailed prospectuses, which, with the forms of application for certificates can be obtained of the Bankers and their branches, the Solicitors and Brokers, and at the Offices of the Tontine as above.

WORKS—Queenborough, Kent.

TEMPORARY OFFICES—23 Billiter street, London, E.C.

ABRIDGED PROSPECTUS.

This Company is formed for the purpose of carrying out on an extended scale the business of the chemical works for a long time successfully conducted at Queenborough, in the county of Kent, and comprising the manufacture of green copperas, sulphate of ammonia, sulphuric acid, oxide of iron, chemical manures, &c., and also for developing a London trade in guanos, manures, &c.

The premises, which are freehold, consist of about two acres of land, with all needful appliances, buildings, &c., conveniently situate, commanding both railway and water conveyance, and admirably adapted for carrying on the business. The present plant is in good working order, and will enable the Company to commence operations immediately, while the erection of additional machinery and plant as contemplated, with the introduction of increased capital, will largely develop the business.

Favourable arrangements for the purchase of the premises, machinery, plant, and goodwill have been made with Mr Josiah Hall, who has for several years past successfully carried on the business and who binds himself to take a large interest in the Company, and likewise to give his personal superintendence at the works as heretofore.

The demand for chemical manures of guaranteed good quality increases yearly. A satisfactory business has already been done in Kent, where the manures manufactured at these works have been introduced, and the quality highly approved; and it is anticipated that, as the Company will be in a position to compete favourably with other manufacturers, they will also be able materially to increase this branch of the business, not only in Kent, but also in the neighbouring counties.

The satisfactory returns of the business as hitherto conducted by Mr Hall, leave no doubt for assuming that certain success will attend the Company's operations when extended, as proposed, under the thorough practical and able management that has been secured, while it is confidently expected the opening up of the London trade will in itself prove a valuable addition, and one likely to realize large profits. Every established chemical and manure company has proved a highly remunerative investment; and it is anticipated that the Queenborough works, being already in full and profitable operation, will show results equal to any other in existence. The undertaking, therefore, can be recommended to the capitalist as a really safe and remunerative investment. Half the capital is already subscribed, the Directors and their friends having taken a large number of shares.

Applications for shares to be addressed in the form accompanying the prospectus; but no application will be considered unless a deposit of £1 per each share applied for shall have been previously made with the Bankers of the Company; and in the event of no allotment being made the whole of the deposit will be returned.

ICE SAFES AND WENHAM LAKE

ICE.—The Wenham Lake Ice Company's celebrated Prize Medal REFRIGERATORS, and new Duplex REFRIGERATOR, Registered 1869, fitted with water tanks and filters, combine every real improvement and are unequalled for simplicity, efficiency, durability, and economy. The New Double Wall Ice Water Pitchers, American Ice Butter Dishes, Ice Cream Machines, Seltzogenes, Champagne Frappé Pails, for use with the Improved Freezing Powders, and everything connected with freezing of the best, cheapest, most modern, and reliable character. Wenham Lake Ice delivered in town for less than 1d per lb; or packages of 2s 6d, 5s, 10s, and upwards, forwarded into the country by "goods train" without perceptible waste. Illustrated price list free at the sole office, WENHAM LAKE ICE COMPANY, 125 Strand, London, W.C. (Corner of Savoy street.)

MILNERS' STRONG HOLDFAST

AND FIRE-RESISTING SAFES (of Six Progressive Qualities and Prices, suitable for all amounts of risk), CHESTS, STRONG ROOMS AND DOORS with all the Latest Improvements. Effectually guarding against the novel modes of attack, as used by the Caseley gang in the Cornhill and other robberies (against which, no safe made before 1865 is secure), but which addition to Milners' succession of improvements during the last half-century constitutes their safes the strongest, and (quality considered) the cheapest safe-guard against fire and the modern burglar. Milners' Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots, Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post.

BANKERS—The London Joint Stock Bank, Princes street, E.C.

OFFICES—24 Gresham street.

PROSPECTUS.

This Company is formed to take over the works of an established business for the manufacture of American leather cloth at North Woolwich.

The buildings and machinery are completely furnished with all the best and most modern appliances, and the works are ready for full and immediate operations.

The machinery is capable of turning out from 70,000 to 80,000 pieces per annum, and this can be doubled at a trifling expenditure; but taking the annual produce of 80,000 pieces at the moderate profit of 2s per piece, a net income of £8,000 can be realised. It will thus be seen that a net return of at least 16 per cent. will arise, even supposing that the whole capital be paid up; whilst on half the nominal capital (which will probably be sufficient for permanent operations) 32 per cent. would result.

For full prospectuses and forms of application, apply at the Offices of the Company, 24 Gresham street.

THE ANGLO-AMERICAN

LEATHER CLOTH COMPANY (Limited).

NOTICE.—No APPLICATION for SHARES will be received after the 1st of August next, on which day the Allotment will be made.

THE ANGLO-AMERICAN

LEATHER CLOTH COMPANY (Limited).

NOTICE.—The Company is now prepared to execute orders, and to contract for the delivery of every description of Leather Cloth.

Orders and inquiries addressed to the Manager of the Works, 24 Gresham street, will receive immediate attention.

NEW WHEAL SPEEDWELL TIN

MINE (Limited).

Now that the price of tin has been raised so as to render the working of tin mines once more about one of the most profitable businesses in which capital can be invested, the attention of the outside public is being strongly directed to the oldest and what may be really termed the legitimate field of mining enterprise and speculation, the tin mining districts of West Cornwall. The advance in the price of shares in Cornish tin mines during the past month has been astonishing, and many investors have more than doubled their money during that time. For example, Carn Brea shares, which a very short time ago were unheeded at a price of about £20 per share, cannot now be bought under £100, and will doubtless soon go higher still. Indeed, it is the opinion of competent judges that now tin mines have begun to go up they will continue doing so for some time to come. Messrs LISCOMBE and CO., of 39 South Castle street, Liverpool, would therefore draw the attention of their clients and the public to the New Wheal Speedwell Mine, one of the most promising setts in a district which is unsurpassed for the value of its metalliferous deposits, and which is surrounded by mines which either are paying or have paid enormous profits. It immediately adjoins and is on the same lodes as Old Wheal Speedwell Mine, which on a small outlay returned upwards of £160,000 to its fortunate proprietors. Among other rich neighbours may be mentioned the Marazion Mines, which returned over £100,000; Great Wheal Fortune, nearly £600,000; Great Work, £700,000; Wheal Neptune (which is almost immediately contiguous to New Wheal Speedwell), £400,000; and a score of others with nearly as large returns. Indeed, such examples as these might be referred to without number, but the enumeration of all such would occupy too much space. Messrs Liscombe will only remind their clients that it has been computed by the best authorities that the gross returns of this district may safely be estimated at not less than six millions sterling. The New Wheal Speedwell sett is traversed by all the most productive lodes of the neighbouring mines, and is even now in a position to return a large quantity of tin before the great deposits of ore are reached. Messrs Liscombe beg that no time may be lost in applying for shares, as very few remain on hand, and they may speedily be expected to go to a good premium.

OXYGENATED WATER HOLDS IN

Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.

Laboratory, 36 Long Acre, and all Druggists.

HOLLOWAY'S PILLS.—

Thousands of instances might be cited in which general debility, low spirits, and nervous irritations, the consequences of dyspepsia or indigestion, have yielded to a short course of this alterative medicine. These pills soon give tone to the stomach, renovate the digestive powers, purify the blood, and give strength to the whole system. Sluggishness of the body and depression of the mind, are succeeded by a cheerful activity of the physical and mental functions. Indigestion is the parent of so many evils, and is so common, so universal a complaint, that it is a great blessing that such a remedy as this invaluable medicine should have been discovered. No one need long suffer from indigestion with these pills at hand.

PROSPECTUS.

The West Surrey Water Act, 1871, secures to the Incorporated Company the exclusive right of supplying the parishes and built-up districts of Chertsey, Walton-on-Thames, Thorpe, Ham, and Petersham with water.

These parishes are almost entirely dependent upon wells for their water supply, which in times of drought is liable to be entirely exhausted. In consequence of defective sewerage and other causes this well water is sometimes impure, and is always hard, rendering it unfit for domestic purposes, and defective in supply. It has the further disadvantage of being attended with great expense, especially in cases where the water is required to be raised to the upper stories of dwelling-houses.

The objects of the undertaking may be briefly stated as follows:—

1. To supply the district with water taken from the River Thames near Walton bridge, where it will be filtered through sand beds pumped into the works, and conveyed to a reservoir on the commanding site on Chertsey hill, near the parish park, at an additional elevation of 200 feet above the level of the river.

2. To give a constant supply, the works being so arranged that the service pipes and reservoir will always be charged by constantly supplying the service pipes when the pumps are not at work.

3. The supply to be governed so that the water will pass through sand and be thoroughly free from lime or other hard matter delivered to the consumers.

A provisional agreement has been entered into with the said Local Board of Messrs. Bowers and Simpson to purchase their works for the sum of £23,000, and the Act empowers the Company to obtained upon favourable terms.

The Company will have the benefit of an annual value exceeding £10,000, immediately upon purchasing the undertaking. There are in addition numerous new dwelling-houses, and other large metal channels at present unsupplied with water, all of which will become immediately available, with great advantage to themselves and profit to the Company.

One-half of the subscribed share capital has already been subscribed. The present £12,500 is now offered for subscription.

The Act of Incorporation limits the liability of shareholders to the amount of their shares.

The undertakings of existing Water Companies afford the best evidence of the remunerative character which may be anticipated upon the capital invested in such undertakings, and they have been started with perfect prosperity of various kinds.

The following is the present market price of the shares and loans of the existing Water Companies (as the latest which has just been paid):—

	Amount paid per share.	Market Price.
	£	£
Chelsea	100	132
East London	100	122
Grand Junction	50	95
Kent	100	120
Lambeth	100	122
New River	Not obtainable	
Southwark and Vauxhall	100	120
West Middlesex	65	111

Applications for shares to be made on the annexed form to the Secretary, at Chertsey, or at the Offices of the Company, No. 5 Westminster chambers, Victoria street, Westminster, S.W., accompanied by a payment of one pound per share upon the number of shares applied for.

Prospectuses and Forms of application for shares may be obtained at the Offices of the Company, and are Bankers.

May, 1871.

THE WEST SURREY WATER COMPANY.
FORM OF APPLICATION FOR SHARES.
To be retained by the Banker.

No.——

To the Directors of the West Surrey Water Company.

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of £1 per share, I request that you will allot me shares of £10 each in your Company, and I hereby agree to accept the said shares, or any smaller number you may allot to me; and I request you to place my name on the register of shareholders in respect of the shares which may be allotted to me.—I am, Gentlemen, your obedient servant,

Usual signature .....
Name in full.....
Residence .....
Profession .....
Date .....

TORONTO, GREY, AND BRUCE RAILWAY COMPANY OF CANADA.

Chartered under Acts of the Legislature of the Province of Ontario.

Issue of £800,000 Sterling 8 per Cent. First Mortgage Bonds, in set Bonds of £100 each to bearer; having five years to run from 1st January 1872. Principal and interest payable at the Bank of Montreal, 27 Lombard street, London, or at Toronto, Province of Ontario.

Messrs. Mullens, Marshall, and Daniell, of 4 Lombard street, are authorised by the above Company to receive subscriptions for £800,000 of their first Mortgage bonds of £100 sterling each, being the residue of, say, £1,344,000 sterling issued in respect of the section of the above Railway (from Toronto to Mount Forrest, a distance of 99 miles) being the authorised issue on the capital expended of £134,821.

The price of the issue of the bonds will be par, the instalments being payable as follows:—

£10 on Application,
£20 on Allotment,
£20 on 2nd October,
£20 on 15th November,
£20 (less £1 15s. for interest on payments to this date) on 1st January, 1872.

Interest at the rate of 8 per cent. per annum will be allowed on prepayment of any of the instalments at the above dates.

All applications for paid-up bonds will have a preferential claim in the allotment, and these bonds will carry interest from the 1st of July last and receive the full half-year's interest (£4) on 1st January next—thus reducing the net price to £98 10s.

Scrip certificates will be issued on production of banker's receipts, which will be exchanged for bonds, upon payment in full. These bonds bear interest at the rate of 8 per cent. per annum from 1st January, 1872, payable half-yearly on the 1st July and 1st January and will be paid off at par on the 1st January, 1877, at the Bank of Montreal, 27 Lombard street, London, and Toronto Ontario.

Applications accompanied by the payment of 10 per cent. will be received on the enclosed form, which should be filled up and forwarded to the Bank of Montreal, 27 Lombard street, or to Messrs Mullens, Marshall, and Daniell, of Lombard street, from whom prospectuses &c., may be obtained.

The Act of Incorporation may be seen at the Offices of J. Bland Batten, Esq., Solicitor, 32 Great George street, Westminster, S.W.

Default in payment of the instalments at the dates fixed will render all previous payments liable to forfeiture.

In the event of no allotment being made, the deposit will be returned in full.

Honourable John Hillyard Cameron, Q.C., Toronto.

SOLICITOR—W. H. Beatty, Esq., Toronto.

CHIEF ENGINEER.

Edmund Wragge, Esq., C.E., Toronto.

SECRETARY—W. S. Taylor, Esq.

OFFICES—Front street, Toronto.

This Company was formed for the purpose of constructing a railway, upon the narrow gauge system of 3 feet 6 inches, from the City of Toronto by means of the Grand Trunk Railway to near Weston), thence passing through or near Burwick, Bolton, Caledon, Charleston, and Orangeville to Mount Forrest, with branches to Owen Sound on the Georgian Bay, and to Kincardine on Lake Huron making a total length of about 200 miles. In regard to the important extension to Owen Sound known as the best harbour on Lake Huron and Georgian Bay, it may be mentioned that the County Council of Grey have granted a bonus of £80,000 in aid towards this extension that the line has been already surveyed and that the contracts for the work will be let in the course of next month.

The first section (Toronto to Mount Forrest) of this railway passes for the most part through a rich and well-settled country which it will open in direct communication with the City of Toronto the capital of the province of Ontario, and also with the railways which centre in that city, and with the commerce of Lake Ontario.

The bulk of the products of the important counties of Bruce and West Grey is at present shipped by water at the ports on the shores of Lake Huron and the Georgian Bay, on account of the distance of the Grand Trunk Railway. There are sometimes stored at these ports upwards of half-a-million of bushels of breadstuffs, all of which, with the facilities which will be afforded by the Toronto, Grey, and Bruce Railway, will be carried to Toronto, the best distributing point for the products of Ontario, both as regards shipments to Europe, and the United States.

The total area between the Grand Trunk and the Northern Railway of Canada is about 6,800 square miles, and is of the richest soil in the whole Dominion of Canada. This Railway intersects this district, and it is believed that the traffic it will carry to Toronto will be equal (exclusive of the through traffic) to the aggregate amount brought by the other railways to that city.

In the prospectus of this undertaking issued in Canada, the following is given as the estimate of the probable traffic upon the first section, viz., Toronto to Mount Forrest. "It is based upon calculations on the returns made by the municipalities, and on an intimate acquaintance with their trade and resources:—

	dols.
Passengers (140,000).....	140,000
Cereals (2,000,000 bushels).....	100,000
Flour (50,000 barrels)	15,000
General Goods (50,000 tons)	150,000
Square Timber (1,000,000 cubic ft...	30,000
Staves, Lumber, Bark, Posts, &c....	10,000
Cordwood (20,000 cords).....	25,000
Mails and Expresses.....	20,000
	490,000

"Allowing 60 per cent. for working expenses, the net earnings would amount to 196,000 dollars (£40,000 sterling), equal to a dividend of 18 per cent. on a cost of 15,000 dollars (£3,000) per mile.

"Allowing reasonable margin for increased cost or less traffic, the moderate estimate of which will be undisputed, there remains the strongest reason for anticipating a dividend of 10 per cent. per annum."

From the foregoing it will be seen that the net revenue of the Railway, after paying the interest on its bonded capital, will leave a balance more than sufficient to pay, at the lowest estimate, a dividend of 10 per cent. upon the ordinary share capital of the Company.

As an evidence of the extraordinary growth in the population of Ontario, it may be mentioned that, whilst according to the census taken in 1830, the numbers were only 210,437, the population had in 1861 increased to 1,396,091, and it is estimated that in the present year it does not fall far short of 2,200,000 souls.

The trade and commerce of the province have kept pace with the marvellous growth of its population. According to the latest return published, it appears that the total value of the exports and imports of Ontario for the year ending June 1870, was over £10,000,000 sterling, and that in the same period the number of arrivals of vessels engaged in the Lake trade between the United States and the provinces of Ontario and Quebec (principally the former) was 17,806, carrying a total freight of 3,180,000 tons, the departures being 18,804, with a freight or 3,143,391 tons.

The City of Toronto has shown its appreciation of the importance of this railway by voting the sum of 250,000 dols as a bonus or free gift, and also of according to it many other advantages within the city. The municipalities through which the line runs have practically proved their sense of the great value of this railway by voting, by way of bonus, a sum equal to 5,180 dols a mile, equal to one-third of the total cost on nearly the whole length of this first section.

The section from Toronto to Mount Forrest is so far completed that the first fifty-four miles will be opened on the 1st of September, and the remaining thirty-six miles by the 1st of October, or thereabouts, fully equipped with all the required rolling-stock, plant, &c. The line from Toronto to Bolton, a distance of 25 miles, is now in active operation, and the results are exceedingly satisfactory.

The Bonds now offered with those already issued in Canada (together, say, £1,344,000), form the first charge upon the whole undertaking from Toronto to Mount Forrest, a distance of 99 miles, or a sum equivalent to a charge of only £1,350 per mile, and, therefore, the security of the bonds is placed beyond all doubt.

KINAHAN'S LL WHISKY.

This celebrated and most delicious old mellow spirit is the very
CREAM OF IRISH WHISKIES,
in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.

(Signé) CH. HERPIN.

ITALIAN COMPANY OF THE MERIDIONAL RAILWAYS.

REPORT presented by the BOARD of DIRECTORS to the GENERAL MEETING of SHAREHOLDERS, held at Florence, the 10th June, 1871.

The meeting of this year has a double object in view, to give you information on the state of our undertaking, and to submit for your approval the accounts for the year, in conformity with Art. 18 of the Statutes.

We have next to ask you for the necessary powers to obtain from the Government the authorisation to increase the capital, in order to procure funds to extend our works. We give further on more complete details of our project, but we may say at once that our financial situation is good, and that the outlay made is completely justified by the extension given to our undertaking.

The constructions have been carried on during the last year with great activity. Anticipating a delay in the completion of the Christina tunnel, we have constructed a provisional section to join the two parts of the Foggia to Naples line.

This junction line, executed at little expense, has lasted from the 27th May, 1870, to the 11th March, 1871, and has rendered excellent services by developing our traffic in a large proportion.

	lire.
The cost of construction and plant amounted to	20,184,560 69
The estimates had been for	14,500,000 0
The surplus of	5,684,560 69

proves that a larger quantity of work was executed.

The working receipts show an increase of 1,464,520.78 lire, equal to an augmentation of eleven-fifteenths per cent. per kilometre on the preceding year. This result shows that the reductions of tariffs made in April, 1870, were necessary, and required by the conditions of the localities served by our lines.

The profit and loss account shows a balance of 3,022,596.56 lire, after deducting 675,000 lire, representing the interest of the dividends assigned in the previous years, but not distributed.

After this summary statement we will now enter into details of the results of the last year.

I.
FINANCIAL SITUATION.

The sums realised by the Company down to the 31st December, 1870, were as follows:—

		lire.
1. Share capital		99,965,000 0
2. Subvention, in works		10,000,000 0
— in Crown lands		7,772,316 49
3. Loans—518,093 of the Company's bonds	lire. 112,934,865	
Bonds of Bayard, Rothschild. and De Gaz	3,072,250	
131,457 thirty-years' bonds	50,000,000	
		166,007.115 0
4. Divers loans		1,626,431 49
5. Statute reserve		30,893,251 95
6. Dividends reserved, and interest thereon		16,875,000 0
7. Extraordinary reserve		14,696,354 0
8. Reserve for indemnities to the contractors of the abandoned lines		3,084,694 48
9. Divers funds (1)		8,173,530 29
10. Due to various creditors		27,925,049 26
11. General balance		3,022,596 56
		386,720,579 09
Less the cost of works, plant, and rolling stock	lire. 360,253,589 46	
Due from various debtors	18,482,483 73	
		378,736,073 19
Balance of cash and securities on the 1st January, 1871		7,984.505 90

	lire.
(1) Pension fund	156,161 52
Relief fund	216,886 59
Fire insurance fund	67,399 46
Maintenance and renewal of plant	891,530 21
Agio on thirty-years' bonds	1,540,271 51
Agio on different loans	301,481 0

Brought forward ..... lire		7,984,505 90
To which must be added:—	lire.	
Arrears due on shares	35,000 0	
Balance of Crown lands account	2,227,683 51	
State subvention	23,430,450 0	
Net working receipts	3,800,000 0	
		29,493,133 51
Total assets for 1871		37,477,639 41

The estimated expenditure for 1871 is as follows:—

	lire.	
Taxes	1,000,000	
Interests and amortisation	26,000,000	
Works and stores	10,000,000	
Divers credits	36,000,000	
		73,000,000 0
Excess of liabilities		35,522,360 59

—which will be provided for by financial combinations on conditions the most favourable to the Company.

In our report of last year we announced to you that the Company had formally assented to the Government the convention of the 14th October, 1868. In consequence of that step the resumption of the works on the Campobasso and Aquila lines having become obligatory, we have allowed a sum in our estimates for the works of the first section, Pescara-Popoli, the plans of which have been approved of by the Government. We are at the same time proceeding to commence the works of the last section of the Adriatic line between Maglie and Otranto, which had been suspended by order of the Government, and with that object we have set down a sum in the budget.

The new sections will be completed in 1872, and will increase by 79 kilometres (49½ miles) the length of the network open, and subventioned by the State.

II.

CONSTRUCTIONS.

In the Bologna station we have purchased a belt of land for widening the line.

At Ancona we have laid down a new line and two turn-tables.

At Ravenna we have built a retaining wall to the wet-dock, and a landing quay to the goods.

At Rimini the goods station has been enlarged, a covered shed has been built, and a new turn-table for the engines has been laid down.

At Pescara one for trucks and passenger carriages has been constructed.

At Castellamare a reservoir, with water in the neighbourhood, has been built.

At Castell' a waiting-rooms for passengers.

At San Severo the provisional wooden building for the rapid goods service has been reconstructed.

At Foggia the goods warehouse has been repaired, and the permanent passenger station has been commenced.

At the same time, buildings for the central offices of the works department have been erected.

At Bari, opposite the passenger station, has been erected the enclosing wall of the new appurtenances, and a shed for carriages, with an iron turn-table and pulley-carriage.

The building of the Gas Establishment and the great Hotel des Indes Orientales on the quay has been completed at Brindisi.

A landing quay and a service line have been constructed at Pescara.

At Naples the works for the central passenger station, and sheds for carriages and engines, have been carried on with the greatest activity.

The goods station is also terminated, and has been open since the month of November.

Repairs and additional works have been executed at the bridges over the torrents of Sangro, San Lorenzo, Rubrano, Lauro, Isarito, Rionegro, Fiumarella, Mingardo, Bergeo, Ghiomerio, Barbara, San Lorenzo, Stella, and Trionto.

The bridges over the torrents of Pantaspora and Fosso Rio have been rebuilt, and those over the Nina and Massignano have been strengthened.

The bays have been raised and the bridges over the Versanchio and Cavaso repaired, in order to repair them thoroughly.

All the iron bridges on the Ancona and Foggia line have been repaired and repainted.

Two new watchmen's houses have been built—one at Rimini, the other near Cattolica.

The mound at Pescara has been lengthened by fifteen metres.

Important masonry works have been executed to render permanent the provisional line between Sangro and Ortona, between Pescara and Castellamare buildings have been repaired, drains have been opened, embankments have been strengthened, revetments and ditches have been lined with masonry, and the seawall has been protected with stone.

Lines in Course of Construction.

Foggia to Naples—Bifurcations.

On the 1st January, 1871, there only remained for this line to be open for working for its entire length, to terminate the earthings of the Ofanto and the Cervaro, already presented rather serious difficulties.

The cutting at the Ofanto was terminated on the 20th May, 1870, and by means of a provisional deviation around the Christina Pass, the entire line between Foggia and Naples was open on the 20th May following.

By carrying forward very actively the works of the Christina cutting, we were at the commencement of March last in a position to abandon the provisional line, and to transfer the traffic to the permanent one.

The works on this line are not yet entirely terminated.

During the year 1870 several works, embankments, and piers were executed to protect the line along the Cervaro, Gesso, Miseano, and Calore torrents; defensive works were also executed at the rather numerous bridges which cross the Cervaro.

Other supplementary works are going on this year, and will be continued next year, especially on the portion comprised between Bovino and Dugenta, in order to assure to the Foggia to Naples line the conditions of strength and security necessary for a regular service.

The junction between the old Castellamare line and the new central station at Naples is entirely terminated; the goods trains from Ebon and Castellamare already run to that station, and we shall soon use it also for passenger trains.

In view of the salt works, which extend from Trinitapoli to Barletta, we have constructed a branch running from the point of the principal line where it meets the Ofantino reservoir to the beds of salt, of which large quantities are conveyed to all the provinces of the kingdom.

At Brindisi another embankment has been constructed a kilometre and a-half long, to connect the station with the port, for the service of travellers and the Indian mail, and the consent of the municipal authorities is now only required to extend the line to the Hotel des Indes Orientales, where a special station for travellers will be constructed.

Projected Lines.

Maglie to Otranto, Benevento to Termoli, Pescara to Rieti.

After the cancelling of the convention of the 14th October, 1868, the Company resumed the surveys for the lines from Benevento to Termoli, and Pescara to Rieti. The projected section from Pescara to Popoli has been approved of, and the works will be given out by tender during the month. At the same time will be commenced the last section of the Adriatic line from Maglie to Otranto, of which the plans have been approved of by the Ministry of Public Works.

Cost of Construction and Material.

Divers debtor accounts	21,284,476 57	

III.

Working.

The general working receipts, a deduction being made for the tax of one-tenth, amounted in 1870, on the 1,297·41 kilometres open to 18,875,078·45 lire, or 19,094·44 lire per kilometre. In 1869, the 1,289·873 kilometres open had produced 12,410,557·67 lire, or 9,621·54 lire per kilometre; increase in 1870, 1,464,520·78 lire, or 1,072·91 lire per kilometre, equal to 11·80 per cent. on the total receipts, or 11·15 per cent. on the receipts per kilometre in the preceding year.

The State subventions amounted in 1870 to 25,132,018.38 lire, and in 1869 to 25,555,740·61 lire; decrease in 1870, 423,722.28 lire. The receipts being added to the subventions, the resources will be found to amount in 1870 to 59,007,096.78 lire, and in 1869 to 37,965,298.28 lire; or an increase in favour of 1870 of 1,041,798.50 lire.

You will observe that the receipts per kilometre in 1870 exceeded by 11·15 per cent. those of the preceding year, which had shown an increase of 9·25 per cent. on 1868, and this year had in its turn exceeded by 9·70 per cent. the receipts of 1867.

This regular progression is a proof of the continued development of our traffic.

You will also have remarked a decrease in the State subventions. This arises from the larger participation of the State in the receipts, to which it has a right according to our charter, to the amount of one-half for the sums exceeding 7,000 lire per kilometre. The State received on the receipts in 1870 2,878,507·87 lire, and in 1869 1,665,298.37 lire, or an increase in 1870 of 1,040,809.50 lire.

Since we have spoken of the increasing participation of the State in our receipts, we may mention the total amount of the sums received by the Government in 1870.—

	lire.
Share of receipts, as above	2,878,107 87
Taxes on real property, transfers &c.	2,104,087 04
Tax of three centimes, and one-tenth of receipts on express trains	3,921,516 84
Total	8,903,711 75

This result shows that the sacrifices the State has accepted to

create the Meridional network are now compensated for by the direct profits it obtains. If to those profits is added the indirect advantages it derives from the increase in the public wealth, there is reason to conclude that, independently of political reasons, the Government and the Parliament wisely considered economical interests when they endowed the southern provinces with a network which in so short a time has given results so satisfactory.

The receipts being classified according to the different services, present the following results:—

	1870.	1869.	Increase.	Decrease.
	lire.	lire.	lire.	lire.
Passengers & troops	8,427,036 39	7,578,799 20	848,237 19	...
Goods by fast trains	1,551,680 17	1,318,131 47	233,548 70	...
Goods by slow trains	3,834,545 13	3,461,812 93	372,732 20	...
Divers receipts	61,816 76	51,814 07	10,002 69	...
Increase in 1870			1,464,520 78	...

The passenger receipts will be found to have increased by 11·19 per cent., and the goods receipts, by fast and slow trains, by 12·32 per cent.

The following table shows the returns by each of the different lines:—

Lines.	Kilometres worked.		Receipts per kilometre.		Increase.	Decrease.
	1870.	1869.	1870.	1869.		
			lire.	lire.	lire.	lire.
Naples-Eboli-Castellammare	86	86	21,440	20,573	867	...
Bologne-Ancone	204	204	16,242	18,685	...	2,443
Foggia-Naples	197.20	190.20	14,871	10,932	3,939	...
Ancone-Foggia	322	322	8,490	7,009	1,481	...
Castelbolognes-Ravenne	42	42	8,041	7,841	200	...
Foggia-Otrante	301.21	300.67	7,164	5,883	1,281	...
Bari-Tarante	115	115	4,307	3,048	1,259	...
Foggia-Candela	39	39	1,526	1,139	387	...

It will be seen that there has been an increase on every line, with the exception of that from Bologna to Ancona.

Note must, however, be taken of the fact that notwithstanding the abolition of the supplementary tax of 20 per cent. on express trains, the diminution is in part only apparent, and arises from the new system of keeping accounts, according to which the receipts are calculated on the distance really travelled on each line, instead of on the receipts at each station, as formerly. The result is that the Bologna to Ancona line, on which the receipts at the stations show an increase in the traffic of the branch, have diminished, whilst on the Ancona to Foggia, and Foggia to Otranto lines, which show a considerable augmentation, the contrary has been the case.

		lire.
The number of passengers of all classes was in 1870		4,442,428
And in 1869		4,140,449
Or an increase in 1870 of		301,979
	lire.	lire.
The passenger receipts amounted in 1870 to	8,427,036 39	
Or an average per passenger of		1·90
They amounted in 1869 to	7,578,799 20	
Or per passenger		1·83
Or an increase in 1870 of	848,237 19	0·07

—which is an increase of 11·19 per cent. on the total receipts, and of 3·82 per cent. on the average per passenger.

	kilom.	kilom.
The total distance travelled by the passengers was in 1870	267,934,097	
Or per passenger		60·31
And in 1869	174,630,287	
Or per passenger		42·22
Increase in 1870	93,303,810	18·09

—or 53·43 per cent. on the total distance, and 42·84 per cent. on the average per passenger.

We have consequently obtained an increase of 7·29 per cent. on the number, of 11·19 on the receipts, and of 53·43 per cent. on the total distance; of 3·82 per cent. on the average receipts, and of 42·84 on the average distance travelled by each passenger.

Those general results comprise the conveyance of passengers at full and reduced prices, and of troops and other travellers on account of the State.

In April of last year commenced the application of the new tariffs, which comprised the abolition of the supplementary tax of 20 per cent., on transports by express trains on the Bologna-Ancona line, and a reduction in the rates for the three classes of ordinary passengers on the Adriatic network. The new tariff adopted for this network is the same as that already applied on the Tyrrhenean network.

The following table shows the exact results produced by the adoption of those tariffs:—

TRAVELLERS.

	At Full Prices.			
	1st Class.	2nd Class.	3rd Class.	4th Class.
Number of passengers 1870	73,209	397,594	1,858,845	886,409

Average per passenger 1870	10·22	4·46	1·34	0·44
Average per passenger 1869	7·97	4·14	1·60	0·44
Increase	2·25	0·32	...	...
Decrease	...	...	0·26	...

	At Reduced Prices.			Troops, and for the State.
	1st Class.	2nd Class.	3rd Class.	
Number of passengers 1870	34,182	202,769	566,149	423,181
Number of passengers 1869	12,494	115,409	248,553	261,186
Increase	14,688	87,360	317,596	161,995
Decrease	...	...	...	...
Passenger receipts 1870	151,928 88	582,546 51	660,655 36	1,623,327 25
Passenger receipts 1869	82,317 31	392,678 44	381,404 56	670,440 73
Increase	69,611 57	189,868 07	279,250 80	952,886 52
Decrease	...	...	...	...
Average per passenger 1870	4·44	2·87	1·17	3·84
Average per passenger 1869	4·22	3·40	1·53	2·60
Increase	0·22	...	...	1·24
Decrease	...	0·53	0·36	...

The results are—

1. That the number of first-class passengers has decreased at full prices, and increased at reduced prices; but the general and average receipts have each increased both for full and reduced prices. This shows that a large number of passengers who paid the full price have taken advantage of the reduction, while the receipts have increased, notwithstanding the diminution of the tariff by the increased distances travelled by passengers of both categories.

2. That many second-class passengers have passed from full price to reduced price, and others from the second class to the third in consequence of the low rates of the latter. The increase in the receipts at reduced prices has not been sufficient to compensate for the decrease in those at full rates. This shows that the reduction of tariffs has not produced the same increase of passenger traffic for the second-class as for the first.

3. The third-class having been the most favoured by the new tariffs, has drawn a number of passengers from the second. Many fourth-class passengers have also preferred to pay third-class in order to profit by the return tickets, which have been maintained. The third-class receipts, notwithstanding the large reduction in the rates, have given an increase in the first year of the experiment.

4. The fourth-class presents a diminution both in numbers and in receipts. This is explained by the fact mentioned above, of fourth-class passengers passing to the third to profit by the return tickets.

5. Lastly, the troops and other persons travelling on account of the State show an extraordinary increase in numbers, as well as in general and average receipts, in consequence of the concentration of troops effected last year in the Romana Cmpagna.

These results have in no way surprised us as they were expected. The considerable reduction in our passenger tariffs naturally produced a temporary diminution in the receipts. We remark, however, with satisfaction that the receipts of the first class led to, in the first year of the experiment, a quite unforeseen increase.

This result leads us to hope with confidence that the other classes will soon follow that example, and that we shall obtain a compensation for the advantages offered to the public.

That confidence is justified by the results of the working in the first four months of 1871. We have obtained an increase of 246,000 lire in the passenger receipts, of 128,000 lire in the receipts for luggage and goods by passenger trains, and of 316,000 lire in the ordinary goods traffic; this represents a total increase of 690,000 lire on the corresponding period of last year.

We shall carefully examine the results of these new tariffs, and shall endeavour to introduce into them the modifications that

shall be found necessary to favour the development of the traffic and the receipts.

Before completing our account of the passenger traffic, we wish to exhibit to you the first results obtained by the passing of the Indian mail by way of Brindisi.

In the month of October, 1869, the English Government decided that a supplementary mail should be sent through Italy. This supplementary mail was to join the principal one at Alexandria, in Egypt, and the carriage by sea was effected by the Adriatico-Orientale Company, which conveyed in one year —that is, between the months of October, 1869 and 1870—1,264 passengers, principally to or from Egypt. In the month of October last political circumstances compelled England to discontinue the Marseilles route, and the principal mail was sent to Brindisi through Germany. This route is still employed. The Indian travellers have accompanied the mail, so that the total number of passengers who embarked or landed at Brindisi between the 24th October, 1870—the date of the first principal mail—and the end of April, 1871, that is to say, about six months, was 1,505.

This number tends to increase. Thus in the first fortnight of the month of May the number was 216.

The passengers are not all conveyed by the mail train. Many remain for some time in Italy, going out or coming home, and increase the number of foreigners who visit our beautiful country as tourists.

The mail service on our line is effected eight times a month, with special trains between Brindisi and Bologna, over a distance of 760 kilometres, and we are doing our best for that service to respond to the just requirements of the Government and the country.

We will now give some details of the traffic, and receipts for luggage and goods conveyed by fast trains. The receipts under that head amounted—

	lire.
In 1870 to	1,551,680 17
In 1869 to	1,318,131 47
Increase in 1870	233,548 70

—or 1·771 per cent.

The nature, weight, and receipts were as follows :—

Nature of Goods.	Quantity.	Receipts.	Increase in 1870.	Decrease in 1870.
		lire.	lire.	lire.
Luggage..... *quintals	76,297	312,797 23	27,506 95	...

State transports ..quintals	29,167	133,796 67	42,640 57	...

* Quintal, about two cwts.

It will be seen that there is an increase in every class, excepting in dogs. The receipts for the conveyance of cattle have more than doubled, having increased from 89,890 lire to 215,659 lire, and those for luggage and goods sent by fast trains have been augmented. The greatest luggage traffic is at the stations of Naples, Bologna, Ancona, and Bari, and that of merchandise by fast trains at Naples, Bologna (transit), Ancona, Torre Annunziata (Bologna station), Foggia, Salerno, Eboli, Castellamare, Bari, and Benevento.

The stations at which there was the greatest movement of food supplies were from Benevento, Taranto, Rimini, Ortona, Pesaro, and Castellamare, and to Naples, Bologna (transit and station), Ancona, and Bari.

Among the reductions of tariff brought into operation in April, 1870, an especial mention must be made of those concerning the transport of luggage and merchandise by fast trains.

The former was reduced by 25 per cent., and the latter by 50 per cent. Our object was to increase the traffic by fast trains, and to obtain the transfer from the slow to the rapid traffic of certain goods which require to be promptly delivered. The results of the last year and those obtained in the present period are of a nature to lead us to hope for more and more satisfactory results.

The carriage of goods by slow train (excepting cattle) reached—

	quintals.
In 1870 a total of	4,384,814
And in 1869	4,063,017
Increase in 1870	321,897

—or 7·92 per cent.

The receipts were—

	lire.	lire.
In 1870	3,834,543 13	
And per quintal		0·874
In 1869 they had amounted to ...	3,461,812 93	
And per quintal to		0·852
An increase in 1870 of	372,730 20	0·022

—or 10·76 on the general receipts, and 2·58 on the receipts per quintal.

The different articles conveyed, excepting cattle, which wil be referred to separately, were as follows :—

		439,582	
Net increase in 1870		321,897	

There has been a considerable increase in the transports of corn, mineral productions (sulphur), articles of food, and potable liquors; the carriage of building materials has diminished.

In the general movement of merchandise, the share of Naples has been 91,000 tons; Bologna (transit), 74,000; Foggia, 46,000; Barletta, 43,000; Bologna (local), 31,000; Cesena and Falconara, 25,000; Castelamara, 23,000; Torre Annunziata, 21,000; Bari and Imola, 19,000.

The principal traffic in the different articles at the various stations was as follows :—

Corn.—From Foggia, San Severo, Carignola, and stations of the Marches, to Bologna (in transit for Upper Italy), Barletta, Naples, Castelamara, and Torre Annunziata.

Wines and Spirits.—From Barletta and stations of Apulia and the Ravenna line, to Bologna (local and transit), Naples, Caserte, and Taranta.

Articles of Food.—From Bari, Bologna (transit), Castellamare, Ancona, Salerno, Rimini, and Pontuagnano, to Castellamare, Naples, Bari, Bologna (transit), and Ancona.

Yarns and Tissues.—From Bologna (transit), Salerno, Naples, and Ancona, to Naples, Ancona, Bari, and Ravenna.

Raw Textile Substances.—From Naples, Bologna (transit), and the stations of the Romagna, to Salerno and Bologna (transit).

Wood and Fuel.—From Eboli, Ravenna, Naples, and Ancona, to Naples, Bologna, Castellamare, Brindisi, Cesena, Imola, and Forli.

Mineral Productions.—From Cesena, Sinigaglia, Bologna (transit), Rimini, Benevento, and Pesaro, to Bologna (transit and local), Falconara, and Naples.

Marine Salt.—From Barletta, Ravenna, Capua, Trinitapoli, to Bologna, Sinigaglia, Pescara, and Foggia.

We will now pass to the examination of the cattle traffic.

The transports effected both by fast and slow trains were as follow :—

	1870.	1869.
Large animals, such as oxen, horses, mules, colts, cows, asses, and full grown pigs—By fast trains were	22,343	19,319
By slow trains	24,307	25,411
Small animals, such as calves, pigs, sheep, lambs, and goats—By fast trains.....	55,468	27,908
By slow trains	105,606	76,291
	207,724	148,929

We remark in 1870 an increase of 58,795 head on the number conveyed in 1869, or 39·50 per cent.; the receipts had risen from 198,212 lire in 1869, to 335,170 lire in 1870, or 69·09 per cent. The greatest quantity of large cattle was sent from the stations of the Romagna, the Marches, and the province of Ravenna; of small cattle from Eboli, the stations in the provinces of the Abruzzi, the Capitanate, and Benevento.

Two-fifths of the quantity were sent to Naples, Caserta, and their environs, comprised in a zone extending from Eboli to Maddaloni.

One-eighth was sent by Bologna (transit), and the rest was distributed among the other stations for local consumption.

The junction of the Adriatic Slope and the Pyrrhenean networks was effected, as you are aware, in May of last year, by means of a provisional section, which has contributed largely to develop the receipts.

By this means the returns of the Foggia to Naples line have increased by 17·54 per cent. for passengers, 11·92 per cent. for

goods by fast trains, and by 120·48 per cent. for transports by slow trains.

The conveyance of corn and cattle have especially profited by this new line.

Thus the arrival of grain at the stations on the Tyrrhnean coast comprised between Maddaloin, Eboli, and Castellamare, which had in 1869 amounted to 2,800 tons, reached in 1870 65,000 tons, or the half of the total merchandise that arrived at those stations. The cattle at the same stations increased from 21,500 head in 1869 to 79,000 in 1870.

From those figures it is easy to appreciate the importance of the new line, and the more and more increasing share it will take in the development of the traffic of the entire network. The victualling of Naples and its environs will be effected from Apulia for corn, and from the Romagna, the Marches, and the Abruzzi for cattle.

We have so far only referred to the interior traffic of our network. We shall now complete this account of the transports by slow trains, with some details of the goods in transit.

The carriage of goods under that head during the year 1870 were as follows:—

Nature of the Goods.	Transit to or from Upper Italy.		Transit to or from the Roman States.		Transit to or from Germany.	
	Imports	Exports	Imprts	Exports	Imprts	Exprts

The carriage of goods in transit therefore amounted to 72,000 tons of exports, and 27,000 tons of imports.

The traffic with Upper Italy remained almost stationary. That with the Roman railways decreased considerably by way of Bologna, but increased by way of Falconara.

The movement with Germany and Austria has scarcely commenced, but there is reason to hope for a development of it, as soon as the German rolling-stock, which is at present employed for the military transports, shall be restored to commercial uses.

In consequence of political circumstances the traffic with France has almost ceased.

Lastly, the movement with the East has been quite insignificant for the exports, and entirely null for the imports. This negative result is in no way surprising for those who form a just idea of the future of the port of Brindisi, the traffic through which consists almost entirely of passengers (the number of whom is regularly increasing, as already stated), and valuable merchandise by fast trains.

The slow goods traffic, which does not yet exist at Brindisi, will become created by merchandise in transit for France as soon as the Mont-Cenis line shall be completed. This will be a new source of traffic for our line, and we shall do our best to turn it to the greatest advantage in the interest of our Company.

WORKING EXPENSES.

	lire.	lire.
The working expenses on the 1,297·41 kilometres open amounted in 1870 to	10,889,544 21	
Or per kilometre		8,393 29
It was in 1869 on 1,289·87 kilometres	10,281,144 88	
Or per kilometre		7,970 66
Increase in 1870	608,399 33	422 63
We have already shown that the receipts per kilometre had increased by		1,072 91
The additional expense being deducted, the net increase will be found to amount to		650 28

—of which, in consequence of the sliding scale, 536·45 goes to the State, and 113·83 belongs to the Company. This proves that the Company while giving to the State the half of its gross increase of receipts, nevertheless finds in the remainder of the net produce a sufficient compensation to encourage it to develop its traffic.

The subjoined table gives the proportion of outlay for each branch of the service:—

Chapter of Expenditure.	Per Kilometre of Line.		Per Kilometre Travelled.	
	1870.	1869.	1870.	1869.
General expenses and central administration	424 21	98 08	0,138	0,033
General working expenses	427 70	314 03	0,139	0,107
Movement and traffic	2,060 51	1,956 45	0,661	0,669
Traction and rolling-stock	3,066 01	2,584 08	0,984	0,900
Maintenance and inspection	2,043 62	2,339 79	0,655	0,809
General cost of warehouses	193 45	175 01	0,062	0,059
Cost of passage of the Appenines	177 79	503 22	0,057	0,172
Spread over the different lines in working	8,393 29	7,970 66	2,696	2,749

You will remark that the outlay per kilometre of line has increased, while the cost per kilometre travelled has diminished.

The increase under the former head is justified by the development of the traffic, which requires a larger number of trains. The opening of the line from Foggia to Naples, and the transit of the principal and supplementary India mails, which service has always been performed by special trains, has been the principal cause of the increase.

The expense per kilometre travelled is that to which your attention should be directed, and the diminution in it shows an improvement in the service.

Net Receipts.	lire.
Amount of the receipts	13,875,078 45
Less expenses	10,889,544 21
Net receipts	2,985,534 24
Which we carry to the assets of the general balance sheet.	
In 1869 the net receipts were	2,271,178 22
Increase in 1870	714,356 02

—or 31·89 per cent.

IV.

GENERAL BALANCE SHEET.

(Profit and Loss Account.)

	lire.
The profit and loss account for the year 1869, and which you approved of in the last meeting, carried over a sum of	2,062,597 64
At the moment of closing the accounts of 1869 there remained due the taxes for the year which were paid in 1870, as in 1869 had been paid those of the previous year.	
The sum paid in 1870 for arrears of taxes, &c., amounted to	1,016,048 63

		lire.
But in 1870, also, the taxes of the year have to be paid, so that without altering the workings which you have passed, but only to introduce greater exactitude in our accounts, we may deduct the arrears of taxes from the sum carried afresh to 1870, and which will thus be found reduced to		1,046,549 01
Adding to that sum :—		
1. The State subvention		25,182,018 38
2. The net working profits		2,985,534 24
3. Divers receipts		138,372 37
4. Interest at 6 per cent. on the amount of the statutory reserve fund to the 31st December, 1869 (1,678,705.95 lire)		100,722 35
Total assets		29,403,196 30
From the above has to be deducted:—		
1. The portion of the working receipts in the payment of the interests and amortisation of the shares and loans	19,116,286 03	
2. Interest of Roman bonds	3,557,758 64	
3. Tax on personal property	662,324 58	
4. Loss on exchange	165,899 66	
5. Foundation expenses	12,728 73	
6. Insufficiency of fund per kilometre	633,706 50	
7. Extraordinary reserve fund for the repair and renewal of the plant (1,200 lire per kilometre)	1,556,895 60	
8. Interest at five per cent. on the dividends of 1866, 67, '68, and '69	675,000 00	
		26,380,599 74
Net balance of profits		3,022,596 56
Consisting of the profits of 1869	2,062,597 64	
Those of 1870	959,998 92	
Deducting from this latter sum—		
1. Six per cent. for the statutory reserve	57,599 93	
2. Five per cent. for the board of directors and check of services	47,999 95	
		105,599 88
There remains		2,916,996 68

—which we propose to carry on afresh.

V.

Increase of Capital.

Before inviting you to deliberate on the definitive accounts of the last year and the provisions for the current period, in conformity with the Statutes, we submit your approbation of the combinations we are about to propose to you, and which we trust will also be approved of by the Government.

The convention of the 14th October, 1868, having been denounced, as we informed you by our report of last year, we are about to undertake the construction of the Aquila and Campobasso lines.

You are aware that there remains an extraordinary reserve for the purposes of constructing new lines. We propose to employ that reserve and the dividends not distributed, with the interests on them, in a financial combination, which will furnish us with the ways and means necessary for the execution of our works.

The reserves and dividends amounted on the 31st December, 1869, to the sum of 30,995,648.53 lire.

A subvention of six millions-and-a-half is assured for the new lines. Adding to that sum a half-million of surplus of the general average profits of the working expenses, the subvention will amount to seven millions.

This subvention will be paid in proportion to the number of kilometres that shall be successively open for working.

To execute the new lines it is necessary to increase the capital and maintain intact the proportion of one-third to two, which the act of concession prescribes, between the capital and the bonds.

This increase of capital will be made in the following manner:—From the amount of the reserves and dividends will be taken a sum of 30 millions, with which will be created 60,000 paid-up shares of 500 lire each, and the rest will be carried to the account of the "extraordinary reserve."

This new capital of 30 millions represented by the new shares is the property of the shareholders. Those shares will be divided among the holders of the 200,000 original parts, the approbation of the Government being obtained, in conformity with Art. 32, par. 2 of the Statutes.

With the funds we shall procure by the combination which is about to be submitted for your approval, we shall construct the new lines to complete the network conceded to our Company.

GENTLEMEN,—We have the honour—

1. To present for your approval the accounts for 1870, and the provisions for 1871.

2. To invite you to elect, in conformity with Art. 41 of the Statutes, seven directors to replace Count Pierre Bastogi, François Oneto (late Joseph), Commander Dominique Baldnino, Pierre Brambilla, Commander the Advocate Fete Orsini, Commander Jacques Lacaita, Commander Antoine Allieri.

3. To invite you to choose two auditors, and two substitutes, according to the prescriptions of Art. 32 of the Statutes.

4. The Statutes authorise us to receive as deposits only the shares of the Company. With the view of acceding to several applications made to us, we ask you to accord to us the right of receiving as deposits the other securities of the Company, on conditions to be established by the board of directors.

5. We now ask you to approve of the increase of our capital by a sum of 30 millions. Those 30 millions derived from the profits represented, the dividends not distributed, and the interests on them, and by the funds of the extraordinary reserve will be converted into 60,000 paid-up shares of 500 lire each. The 60,000 new shares will belong to the holders of the 200,000 old ones, provided the authorisation shall be obtained, in conformity with Art. 32, par. 2 of the Statutes. We also ask you to authorise the emission of as many bonds as shall be necessary to obtain the double of the capital represented by the new shares.

6. Whereas since the year 1867 the board of directors, in accordance with Art. 52, par. 4, letter B, of the Statutes, had the right to take for themselves five per cent. of the profits;

And the board has abandoned their claims on what was due to them on the sum of 14,695,648 lire, representing the extraordinary reserve;

Whereas it is fitting that the board should have a determined minimum stipend;

We propose to you to decide that the provisions of Art. 53 of the Statutes should be maintained intact, and that the sum allowed to the board from the year 1870, should in no case be less than 150,000 lire annually, as had been fixed for the first board in the Provisional Statutes.

FINE FLAVOURED STRONG BEEF.—The Annual Sale of 2,000 Tons of the Australian Meat Company (Limited) is now proceeding. Each Case bears the Company's Signature on every Tin, being the only guarantee of genuineness. Prospectuses and Testimonials from the eminent Analysts, &c.

ROYAL PRINCESS'S THEATRE. Sole Lessee—Mr. Benjamin Webster. Manager—Mr. Henry B. Webster and F. B. Chatterton. Great success of EILEEN OGE. New Drama—New Dress. On Monday and during the week at 7.45, EILEEN OGE; OR, BARON TRIS, HER FRIENDS AND FOES. By Edmund Falconer. With new and beautiful scenery by F. Lloyds, James Lee, and W. Cuthbert. Music composed and arranged by Mr. W. C. Levey. The whole production under the management of Mr. B. Webster. Characters by Mr. Emmanuel, Fawcett, Messrs. George Vincent, J. G. Shore, Barnby, Leonard Russell, F. Mervin, C. Vernon, H. Cuffnell, R. Roberts, Gardner, Mowbray, Lawrence, Morris, Moore, H. Deering, E. Stuart, Mr. Lewis, and Mrs. E. Fowler. Preceded by a new piece by F. Hadaway, entitled A PECUNIARY DIFFICULTY. Messrs. Barrett, C. Vernon, Cuffnell, and Miss Leonard. To conclude with a Dramatic Episode, in which Mr. Benjamin Webster, F. Mervin, J. Clarence, Messrs. H. Deering, E. Stuart, Lewis, and Seymour, Miss Leyton, and Mrs. E. Fowler will appear. Boxes and Stalls can be taken from 10 to 5. Doors open at 7. Commence at half-past 7.

ROYAL POLYTECHNIC.—Professor Pepper's Lecture on the Wonders of Light, at 3 and 9; grand Secondary and Dr. Bachhoffner's New Entertainment of George Buck and Engagement Revival of Henry Russell's Songs, assisted by Mr. Stanley Smith. Open from 12 to 5, and 7 to 10.

FOR GENTLEMEN.—H. J. NICOLL'S light half-guinea LLAMA DUST-COATS, Indian Silk, 25s; Poplin Coats, 32s 6d; Waterproof Tweed Overcoats, 28s; do. with silk lapels, 31s; Waterproof Melton Overcoats, 42s; Waterproof Cheviot do, with silk facings, 52s 6d.

H. J. NICOLL'S SUMMER CHEVIOT TROUSERS, 16s; do. Negligé Suits, 42s.

FOR BOYS.—H. J. NICOLL'S KNICKERBOCKER SUITS, from 21s; Morning Suits from 25s; Evening Dress Suits from 35s; Highland Suits, from 21s; Summer Overcoats in tweed cloths, from 16s; in Melton cloths, from 21s.

FOR LADIES.—H. J. NICOLL'S RIDING HABITS, in various rainproof tweed, melton, and superfine cloths, from £3 3s to £8 8s; Paletots, from 21s; hats with lace falls, 21s; Waterproof Tweed Cloaks, from 21s; do Costumes, from 63s.

SERVANTS' LIVERIES—THE best, at moderate prices.

H. J. NICOLL, MERCHANT Clothier to the Queen, the Royal Family, and the Courts of Europe, Army, Navy, and Civil Outfitter, 114 to 120 Regent street, and 22 Cornhill, London; 10 Mosley street, Manchester; 20 Bold street, Liverpool; and 10 New street, Birmingham.

DINNEFORD'S FLUID MAGNESIA.—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

MR WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 6d. Umbilical ditto, 42s and 52s 6d; postage 1s 6d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 5s 6d, 10s, and 15s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

ISSUE OF 5,000 PERPETUAL EIGHT PER CENT. PREFERENCE SHARES OF £100 EACH
(WITH RIGHT TO FURTHER DIVIDENDS AS HEREINAFTER REFERRED TO) OF THE

NANTYGLO AND BLAINA IRONWORKS COMPANY, LIMITED.

PRICE OF ISSUE—PAR, or £100 for each Preference Share.

Payable as follows:—

£10	on each Preference Share,	payable	on	application.
£15	—	—	—	allotment.
£25	—	—	—	1st October, 1871.
£25	—	—	—	1st December, 1871.
£25	—	—	—	1st February, 1872.
£100				

Or, at the option of the subscribers, the whole amount can be paid up on allotment.

DIRECTORS.

The Right Honourable W. N. MASSEY, London, Chairman.

James Carlton, Esq., Manchester, Deputy-Chairman (Messrs Carlton, Walker, Watson, and Co.). Chairman of the Blaina Iron and Coal Company (Limited).
Lieut-Col. P. T. French, Chairman of the Bombay, Baroda, and Central India Railway Company, London.
John Grave, Esq., the Mayor of Manchester, Mount House, Cheetham hill, Manchester.
Sir Joseph Heron, Higher Broughton, Manchester.
Lord Henry G. Lennox, M.P., London.
John Richardson, Esq., Manchester and London (Messrs Richardsons and Trevor), Director of the Blaina Iron and Coal Company (Limited).
E. J. Reed, Esq., C.B. (late Chief Constructor of Her Majesty's Navy), London.

BANKERS.

The London and County Bank, 20 Lombard street, E.C., London: the National Provincial Bank of England, 112 Bishopsgate street Within, E.C., London, and their branches; the Bank of Scotland, Edinburgh, and its branches.

SOLICITORS—Messrs Bischoff, Bompas, and Bischoff, 4 Great Winchester street buildings, E.C., London.

SECRETARY—John Roberts, Esq.

OFFICES—84 King William street, E.C., London.

The Directors of the Nantyglo and Blaina Ironworks Company (Limited) are prepared to receive applications for 5,000 Perpetual Eight per Cent. Preference shares of £100 each, which are entitled to dividend in preference and priority to any dividend on the ordinary share capital of the Company, with a further right to participate in surplus profits, after eight per cent. per annum has been paid on the ordinary share capital.

The price of issue of the preference shares—now offered for subscription—is par, namely £100 for each preference share, payable at the dates before mentioned, or, at the option of subscribers, the whole amount may be paid up on allotment.

Until the preference shares are fully paid up, dividend will accrue on each instalment, from the date of payment of the same; or, if they are fully paid up on allotment, the preferential dividend at eight per cent. per annum will accrue on the full £100, payable half-yearly.

The above 5,000 preference shares constitute the whole of the preference share capital of the Company, and no dividend can be paid on the ordinary share capital, until eight per cent. has in each year been duly paid upon the preference shares.

When the ordinary shares have received eight per cent., all surplus profits will be divisible rateably among the preference and ordinary shareholders, which, upon the capital of the Company, as hereinafter referred to, will give two-thirds to the preference shareholders, and one-third to the ordinary shareholders.

This valuable condition will, it is expected, materially add to the revenue of the preference shareholders, as according to the estimate given below, the net earnings of the Company would admit of a considerable further dividend to them over and above the eight per cent. preferential dividend.

Scrip certificates will be issued on allotment, exchangeable for share certificates when fully paid-up.

The allotment of the preference shares will take place in the following order:—

First.—To persons who desire to pay up in full on allotment for investment.

Second.—The applications of persons who desire to pay up by instalments will be next considered.

Should the whole amount of the preference shares be applied for by persons desiring to pay up in full on allotment, no issue will be made to applicants wishing to pay up by instalments.

If no allotment be made the deposit will be returned in full, forthwith, without deduction.

The report and valuation of Messrs William Bird and Co., on the properties of the Company; the agreements for purchase, plans, &c. of the estates, and also the Articles of Association, can be seen at the Offices of the Solicitors.

Applications must be made in the annexed form, and be accompanied by a remittance of £10 for each preference share applied for, and can be forwarded to either of the Bankers of the Company, or to the Secretary, John Roberts, Esq., at the Company's Offices.

Prospectuses may be obtained of the Secretary of the Company, at the Offices, 84 King William street, E.C., London, and of all stockbrokers.

Offices, 84 King William street, E.C., London, 25th July, 1871.

This Company is formed to purchase the whole of the celebrated works known as the Nantyglo and Beaufort Iron and Coal Works, lately the property of Messrs Joseph and Crawshay Bailey, and also the entire properties owned by the Blaina Iron and Coal Works Company (Limited), and known as Blaina, Cwm Celyn, and Trostrae, all situate in Monmouthshire and Glamorganshire, with a view to amalgamate the whole, and work the same under the management of one Company.

With properties of such reputation it is not necessary to enlarge upon their merits. Messrs Bailey, who have owned the first-mentioned properties for about half a century, having realised from them an ample fortune, while the Blaina Company is in full tide of prosperity.

Messrs Bailey having decided to retire from active business, the opportunity has been afforded of acquiring properties which otherwise would be unattainable, while the proximity of the Blaina Company's works, which immediately adjoin the former, will by the union of both properties, enable them to be advantageously developed and rendered more productive, with important economy and saving in the working of each, which will result greatly to the benefit of the new Company.

James Carlton, Esq., the Chairman of the Blaina Company, and John Richardson, Esq., a Director of the same Company, have consented to join the Board of the new Company, thus securing the valuable connections and experience of the Blaina Company to the new undertaking with the transfer of their entire property and assets.

The report accompanying the prospectus, by Messrs William Bird and Co., will give some idea of the magnitude of the properties, and furnishes the following facts:—

The estates contain about 2,000 acres of freehold land, and about 3,000 acres leasehold, making a total estimated acreage of about 5,000 acres.

Communication by means of the Great Western, London and North-Western, Rhymney, Monmouthshire, and other railways, as well as canal accommodation, is afforded with every principal port and station in the kingdom.

The properties produce coal, ironstone, limestone, fireclay, and all material necessary for the manufacture of pig iron, castings, and wrought iron.

The quantity of coal and ironstone obtainable on the estate may be deemed inexhaustible; the quantity of coal is estimated at above 170 million tons, and ironstone 50 million tons.

At Blaina the production of pig iron has averaged over 600 tons per week, and at Nantyglo and Beaufort it is stated to be about 1,000 tons per week.

About 650 tons of finished iron per week is produced at Nantyglo, and the machinery and plant, as will be seen by the report, are extensive enough to increase largely this make of pig and wrought iron, as the existing puddling and heating furnaces suffice to turn out 900 tons of finished iron per week.

At Blaina the existing forge and mill power is capable of producing 700 tons of finished iron weekly, and by merely increasing the supply of puddled iron, the mills will be able to roll more than 800 tons per week.

The number of puddling furnaces upon the estate is 126, and all other machinery and plant in similar proportions, in good working order, the whole forming perhaps the most extensive and complete ironworks in England. Some idea may be formed of the extent, when it is mentioned that the locomotive permanent way lines, and sidings, with underground tramways, are estimated at about 300 miles in length.

A distinct feature of these properties are the extensive collieries, in active work, which, in addition to supplying the requirements of the works, could, with a moderate expenditure for the necessary plant—the whole of the pumping and other engines and machinery being in working order, and sufficiently powerful for all requirements—be put in a position to sell many thousands of tons of coal per month, and still leave a large area for sub-letting, and so secure a most important and certain income in royalties.

The limestone quarries, forming part of the estates, are very conveniently situate, and yield an ample supply at a very low rate. Fireclay for furnace bricks and ordinary clay for brickmaking are also obtained from the estates at a low cost.

The capital of the Company consists of £500,000 perpetual 8 per cent. preference shares, in 5,000 shares of £100 each—now offered for subscription—and £250,000 ordinary shares, in 2,500 shares of £100 each.

The terms upon which the whole of the properties, plant, machinery, stock, &c., have been agreed to be acquired by this Company are £650,000 (subject to £200,000 mortgage at 5 per cent. per annum), the vendors agreeing to accept £400,000 in cash and £250,000 in ordinary shares—being the whole of the ordinary share capital above mentioned. The vendors have agreed to pay all expenses incidental to the establishment of the Company.

After thus paying for the properties there will remain the sum of £100,000 available in cash for the working capital of the Company.

It will be seen by the report and valuation of Messrs William Bird and Co., that they estimate the value of the respective properties in the aggregate at £1,670,108, from which it will appear that the terms of purchase by this Company are exceedingly favourable.

An approximate idea of the value of the property may be arrived at by the statement in the report, that the rental from surface and land, ground-rents, rents of cottages, royalties (including those payable on the Company's own consumption), with shops, managers' houses, &c. (in all upwards of 1,500 in number), is estimated at upwards of £32,000 per annum, exclusive of profits from the works proper.

From the same document it appears that, on the basis of the profit earned last year by the smaller of the two Ironworks, and the calculated profit of the probable increased get and sale of coal, and of the sub-letting portions of the freehold, a total net profit, after paying all ground-rents on leases, may be anticipated of £100,000 per annum, making a total of upwards of £130,000 per annum, which, after paying interest (£10,000) on the mortgage, would leave a net income of £120,000 per annum, equal to three times the amount required for the payment of the dividend on the preference shares.

After the payment of such dividend there would remain a balance of (say) £80,000, out of which 8 per cent. per annum would be payable to the ordinary shareholders, absorbing £20,000, and leaving a surplus of £60,000 available for further division among the preference and ordinary shareholders, which would admit of a material addition to the fixed preferential dividend, thus affording a home investment, well secured, and yielding the prospect of an unusually remunerative return to the shareholders.—By order of the Board, JOHN ROBERTS, Secretary.

No. 84 King William street, E.C., London, 25th July, 1871.

ISSUE of 5,000 PERPETUAL 8 PER CENT. PREFERENCE SHARES of £100 EACH of the NANTYGLO AND BLAINA IRONWORKS COMPANY (Limited). Price of issue, par, or £100 per Preference Share.

FORM OF APPLICATION (to be retained by the Bankers).

To the Directors of the Nantyglo and Blaina Ironworks Company (Limited).

GENTLEMEN,—Having paid to your credit at your Bankers the sum of £ being £10 per share on my application for preference shares of £100 each bearing 8 per cent. preferential dividend of the Nantyglo and Blaina Ironworks Company (Limited), I request you to allot to me that or any less number of the said preference shares, and I hereby agree to accept the same, and to pay the balance in respect of such preference shares, in terms of the prospectus, dated the 25th day of July, 1871.

Name (in full).....
Address.....
Profession (if any).....
Date.....1871.
Signature .....

(Addition to be signed by applicant desiring to pay up all the instalments on allotment.)

I desire to pay up my subscription in full on allotment, thereby entitling me to preferential dividend at 8 per cent. per annum on the full £100 per share, and a priority in the allotment. Signature.....

ISSUE OF 5,000 PERPETUAL EIGHT PER CENT. PREFERENCE SHARES OF £100 EACH OF THE

NANTYGLO AND BLAINA IRONWORKS COMPANY, LIMITED.

Notice is hereby given, that the LISTS of APPLICATIONS for the above will be CLOSED on TUESDAY, 1st August, for London, and on WEDNESDAY, 2d August, for country applications.

By order of the Board,

84 King William street, E.C., London, 27th July, 1871.

JOHN ROBERTS, Secretary.

THE CONSTITUTIONAL RELATIONS OF THE LORDS AND THE COMMONS

THE debate on the vote of censure in the Lords was a great improvement on the debate on the Army Bill. That Lord Salisbury should be really political on a political point is perhaps not possible, but we believe that it is time he tried to be so, and was so as far as he could. Lord Derby and Lord Carnarvon stated their side of the case as forcibly and with as little exaggeration as it could be stated. Nevertheless we cannot but retain the opinion we formerly expressed, that the existence of a prerogative which could overrule the House of Lords has been a happy accident in this instance, and that it is much to be wished that there was some palpable and general power which could overrule it in all similar cases.

As we before said, it never has been in any good Constitution, and it never can be in any permanent Constitution, that the assent of two radically dissimilar bodies should be requisite for all legislation. No doubt in form such has been the immemorial characteristic of the English Constitution. But it is in form only. The Houses of Lords and Commons were until 1867 largely composed of the same elements, and ruled by the same spirit. Before 1832 the identity was palpable. The Lords had a direct share in appointing the House of Commons; some of them were large constituencies, for each of them appointed some ten or twelve members. The greater part of the rest of the House of Commons was elected by persons who shared in the characteristic thoughts, feelings, and prejudices of the House of Lords. Before 1832 the strictly popular element was in a minority in the people's own House, and there was no fear of dangerous conflict between the two branches of the Legislature, because in both the aristocratic element was preponderant. By the Reform Act of 1832 this similarity of feeling and structure between the Lords and the Commons was weakened. But it was not destroyed. There was much difference of sentiment and opinion, but no dangerous difference. But the Reform Act of 1867 has finished the work which that of 1832 began. It has placed side by side, for the first time in England, two utterly unlike legislative bodies, and has required (at least the Constitution requires) the consent of both to every law. The animating spirit of the two assemblies is uncongenial. The most powerful and effective members of the present House of Commons are the members of the large towns and cities, mostly north of the Trent, who have all the energy, all the vigour, and, we concede, many of the defects of the English middle-class. Most of the ablest are self-made men, and all of them have the maxims, the feelings, and the prejudices of a self-made class. Nothing more opposite to an ancient assembly of hereditary peers can be imagined. Exactly what the one prefers the other will detest. To expect the two to govern the country on equal terms together is like trying to govern a university by two concurrent assemblies, one of under-graduates, and the other of heads of houses. The younger and more energetic body will speedily and inevitably be at fatal issue with the old and graver one.

In part this seems to be conceded, for it is allowed that a Cabinet must resign on an adverse vote of the Commons, but need not resign after the severest censure of the Lords. And in practice this is essential, as the majority of the two Houses being of different parties the country would be otherwise in chronic anarchy. But if it be admitted it draws a material consequence along with it. No Cabinet can carry on a consistent policy, no Cabinet can effectually govern the country, unless it has a free command of necessary legislation. This is the "exact" excellence of the English Constitution as opposed to the American. In the latter the Executive and legislative authorities being differently chosen always may be, and in Mr Johnson's time actually were, violently opposed. But in the English Constitution the real Executive—the Prime Minister and the Cabinet—is really chosen by Parliament, and as Parliament is the legislative power, England ought never to see that impotent species of defective government in which the Executive cannot act as it wishes and as the people wish because some old law stops the way, and in which many laws are not fully enforced because the Executive dis-

approves, though it cannot repeal them. But England will see a very near approximation to that bad Government, if Parliament should be always divided against itself—if one House always appoints the Executive and the other always thwarts the Executive—if one House votes for a Bill because the Government proposes it, and the other votes against it also because that same Government proposes it. We shall then have to suffer all the evils and defects of a Parliamentary Government, but shall not obtain its principal excellence—that the laws of the country and its policy are at one.

The more considerate of the Peers are plainly alive to this danger. "I quite admit," said Lord Carnarvon, "that an "hereditary Chamber must discharge the duties which "devolve upon it with great care. There are some public "questions on which the country decides, and the House of "Commons, as the organ of the country, expresses and repre-"sents that decision. But these questions are few. On the "other hand, there were questions upon which the country "has no opinion at all, and upon which the House of Com-"mons cannot possibly express the views of the country. On "the first class of questions I cheerfully admit that it is the "duty of this House to bow to the decision of the country "when it has been once spoken. But with regard to the "larger class of questions, I say that this House is entitled, "and that it is its duty, to claim the right of suspension of "certain Bills and of the revision of others. I venture to "say we have done no more than this."

But we doubt if the majority of the Peers would assent to so small a view of their duties. Nor can we allow to the Lords nowadays so much. We must exempt from the power of "suspension" all such laws as vitally affect present administration. If a Cabinet is to be responsible for the peace and welfare of the country it must have the help of the Legislature in providing all first-class laws which in the Cabinet's judgment are necessary for that peace and welfare. This is especially the case with an "Army Organisation Bill." How is an administration to be responsible for the defence of the country when the Upper House of Parliament refuses it the army which it says is necessary? And if a disaster is caused who is to be hung? Not the Ministry, for they proposed an army which might have won; not the Lords, though they, with the best intentions, and "in the strict exercise of clear right," retained the army which did not win, for they did not administer it.

The Marquis of Salisbury suggested that the decisions of the Commons were to be less regarded, because they were dictated not by the whole Liberal party, but by the more extreme wing of that party. But if this means, as we suppose it does, that moderate Liberals have sent up to the Lords measures which they did not themselves approve, in order to obtain the aid of extreme Radicals, and that the Government has compelled them to do so, we reply that if this policy has been pursued, it has certainly been unsuccessful, for the extreme Radicals are undeniably dissatisfied and insubordinate. And we do not see the signs of the policy in this year's measures. The increase of the Army estimates was odious to the Radicals, and they do not much care for the abolition of purchase. The "Ballot" has again been accepted by the whole Liberal party, since the extension of the suffrage and the rise of Trades' Unions changed the old conditions of the problem. Many moderate Liberals like ourselves, formerly opposed to it, are now among its warmest supporters. But several of the extremest Liberals care very little for it, even if they are not at heart opposed to it. Lord Salisbury could not show that the principal measures of this Government have, on the whole, not been liked by the main body of Liberal members—still less, which under the Reform Act of 1867 is as essential, that they have been disapproved by Liberal constituencies.

Some Peers also said that the Warrant ought to have been issued last February, and no Bill introduced either in the Lords or Commons. But this goes on the assumption that the Warrant is really the act of the Crown. It is in fact the act of the House of Commons through its appointed Minister. If Mr Gladstone had recommended the Crown to use old powers for an object unsanctioned by the popular Chamber, which is our real sovereign, he must have resigned. The only justification for the issue of the Warrant is that it is an easy way of making the Lords in this case yield to the Commons. It would have been vitally different to compel the Commons to yield to the Crown.

It may be thought that we are unreasonably opposed to the Lords; but it is not so. But we think it essential to write plainly, because the situation is new; because it is, as we think, imperfectly apprehended; because the present discussion has been much obscured by old language; because we must clearly perceive that now for the first time we have two essentially antagonistic bodies in our Constitution, and that we require for all laws the consent of them both, before we shall comprehend how serious this evil is, or be willing to consider the various modes by which it can be rectified.

THE CONDITION OF FRANCE.

THERE is a feeling abroad in the City this week that things are not quite right at Versailles, that there is less cohesion in the Government than was believed, that M. Thiers is losing ground, that there may very speedily be a period of administrative confusion. It is not a very deep or a very decided feeling, but it has its effect, and as we believe it to be unwarranted, it may be expedient for a moment to examine its causes. They are, we believe,—first, the news of a somewhat Red election to the municipality of Paris; secondly, the report of an open quarrel between M. Thiers and the majority of the Assembly; and thirdly, a fear lest M. Gambetta should do something which would seriously disturb public order. There can be no more causes than these, for the Germans are neither moving nor intending to move in any threatening manner; there are no symptoms of insurrection anywhere; and no one is even demanding any sudden change in the situation.

1. The first idea has in support of it the undoubted facts that the new municipality of Paris contains a majority of Liberals, a few men of the Red type, and four who are supposed to be Communists, but who are really Jacobins of the most antique kind—that is to say, persons who will tolerate no Government not Republican in form, and who are actively hostile to Christianity, but who—those two points conceded—are in favour of strong government, of centralisation, and, apart from certain theories about taxation, of individual property. It does not appear, however, that this municipality is in any respect Communist, or that if it were, it has any means of disturbing public order. It cannot act, be it ever so ill-inclined, for it is not an executive body; its executive President, M. Léon Say, is a nominee of M. Thiers, and would be called in this country a determined Whig of the Sir William Molesworth sort, while all physical power is in the hands of M. Thiers himself. The Communists are defeated, disarmed, and dispirited; the garrison is numerous and determined, and the body of gendarmes, which may be implicitly relied on, if only because it is so hated by the masses, has been more than doubled. A rising in Paris, without support from the army, is nearly impossible, and there is no proof whatever that it would be fostered by the new Council, which will be much more intent on securing to Paris some relief from her pecuniary liabilities than on recommencing the war just ended with Versailles. The majority in it will, if allowed any power, act as moderate Republicans, and seek above all things to obtain grants from the Assembly, to maintain external order, and to induce the Assembly to take up its residence in Paris. The presence of M. Mottu forebodes nothing except some violent verbal attacks upon the priests, and that of M. Rane less than nothing, for he is not the friend of the Commune but of M. Gambetta, who is not, as far as can be ascertained, seeking to revive civil war, but to consolidate the Republican form of administration. At all events power belongs in France always to the Executive, and the Executive in Paris is at this moment trustworthy, vigilant, and strong, quite able to put down an *emeute*, and only too willing to resort to force.

2nd. The quarrel between M. Thiers and the majority of the Assembly. There would appear to be no doubt of the existence of such a quarrel, but we suspect that, deceived by our Parliamentary traditions, we exaggerate its importance. According to the telegrams, M. Thiers has twice this week given in his resignation, but M. Reuter has since been accused, probably unjustly, of exaggeration, and the quarrels have, in some way or other, been composed. The first one was about Decentralisation. The majority in the Assembly are anxious to make the County Councils of France a reality, and have passed a Bill giving them certain powers of control over the Prefects, which M. Thiers, as a Centralist, opposes. He asked them to stultify themselves by making the Prefects *ex officio*

Chairmen of the Councils, a measure which in France would have destroyed their independence, and on their refusal threatened resignation, but subsequently retreated, and suggested, as a compromise, that the Prefects, though not Presidents, should be Members of the Councils and this was accepted. On the question of the duties on raw materials, M. Thiers is more imperative, threatening, it is said, to resign rather than give way; but on this the Assembly, there is little doubt, will be compelled to yield, and allow pressure of another kind to influence M. Thiers. Questions of taxation are not, however, thought so important in France as they are in England, and the Assembly will not lose its **one hold on the Executive power for the sake** of a tax on wood; for it must not be forgotten it has no alternative to propose to M. Thiers, no rival to set up, and is not certain in its own mind that the Chief of the Executive power has not the right of dissolving it. Resistance to the Executive is rare in France, and it is extremely doubtful, if M. Thiers appealed to the Chamber to dissolve itself, and was supported, as he would be, by M. Gambetta, by Paris, by **the Army, by the officials, and by the electors, whether it would venture to refuse. Sooner than run any such risk it** will certainly make great sacrifices, and M. Thiers is probably for the present quite as secure of power as Mr Gladstone. Indeed it is believed that if he cared to exert his influence in that direction he might be nominated President for three years, with definite right of dissolution, and therefore practically of veto. We do not deem these quarrels therefore anything more than outbreaks of temper, cultivated by the **consciousness of the Monarchists that they are being defeated,** and by the irritability natural to a very old, very proud, and very much overworked man. There are certainly no grounds for thinking that the present *regime* is coming to a speedy **end, or that the Assembly will be driven, by want of a head, to any violent course like the proclamation of the Bourbon or Orleanist dynasties. French Assemblies are very emotional in debate, but they speak rashly much more often than they act.**

3rd. Some possible action by M. Gambetta. There is no doubt that M. Gambetta is very powerful, that he desires to **rule, and that he prefers constitutionally to rule without too many obstacles in his way. By-and-bye he may even by** possibility attempt a *coup d'état*. But politicians have little to do with the distant future, and for the present—that is, for the **next three years—any violent action by M. Gambetta would** put the German armies in motion to restore order in France, **and secure their indemnity. The Germans look upon him as pledged either to a war policy or a Republican policy,** and they constantly double the possibility of either being successful. With Prince Frederick Charles encamped at Rheims, the Germans in St Denis with the key of Paris in their hands, the country smarting from wounds and the army unreformed, any such attempt would be madness, and M. Gambetta, though excitable, is rather of the Italian type of politician, who waits a favourable opportunity, than of the French, who cannot endure the immediate grievance. No one who knows France will ever venture to predict for a month the course of a people dominated **by ideas and incapable of believing in misfortune,** but on a reasonable calculation of probabilities, such as business men ought to make, there will be no outbreak in France until the Germans have been paid off and the army reorganised from the ground.

We suspect a good deal of the existing disquiet arises from the provisional character of the French Government, but for forty years every Government in France has been more or less provisional. Under Louis Philippe and Louis Napoleon both, the thought of the people was always that the *regime* would pass away, that it could not outlast at longest the life of the ruler, and that then some violent change would occur. As we know, the change did occur, but France had to wait for it many years. Provisional Governments suited to the circumstances sometimes last a long while. The *intermedial* lasted two years in Spain, and M. Thiers has an advantage which Marshal Prim did not, that events have fixed a date for the termination of the interregnum, namely, the departure of the German troops. No party will, if it can help it, assume the responsibility of events which might delay the consummation, nor will any individual be especially anxious to be the agent in exacting great sums to be paid over to the foreigner. The majority of the people wish only for order, and as the interregnum secures order they will allow it, and help it to continue. The recent elections show that there is in the country no animosity to the Government, and if it is still felt in some quarters of Paris, Paris has been too recently defeated to make its hatred operative. As we judge on a calm review of all the facts, France prefers for a time to wait and be tranquil, and every day of tranquillity strengthens the hands of the Government which is in possession. The very misfortunes of France, the non-appearance of great personages in her army or her Assembly, tend to the same result—to tempt her to remain, if not approving, at all events acquiescent. Revolutions are frequent in France no doubt, but as a rule considerable intervals of time elapse between them, and the present form of Government, with its elasticity and indistinctness, allows of great modifications and concessions to personal claims without any *coup d'état*. We do not see why it should be immediately overset, or why when overset it should not be overset without any very frightful cataclysm. A new Assembly might be very different in tone and partialities, and yet be equally ready to maintain order.

THE LONDON JOINT STOCK BANK RETURNS FOR HALF-YEAR ENDED 30 JUNE, 1871.

THE remarkable feature in these returns is the increase in the Cash Deposits as compared with the corresponding date (30 June) of 1870. The figures of the London and Westminster Bank are 3 millions more, of the Union 2¾ millions more, and the smaller Banks in even larger proportions. The persistence, surely not a wise persistence, of the London Joint Stock Bank in refusing to separate its Cash Deposits from its Acceptances, renders it impossible to state with accuracy the figures of the *Cash* Deposits of the London Joint Stock Banks. Taking, however, the whole of the 11 Banks included in the following table, the increase at 30 June, '71, on same date in '70 would seem to be 9 millions sterling:—

(A) LONDON JOINT STOCK BANKS.—June, 1871, and three preceding Half-years—Deposits and Capital.—(0,000's omitted—thus 22,77 = 22,770,000*l.* and 44 = 440,000*l.*)

* The *London Joint Stock Bank* has not, like all the other Banks, separated Acceptances from Cash Deposits. Hence the 14,610,000*l.* above must be largely reduced. In December, 1867, the Acceptances were given at 2,584,000*l.*

As shown by the following Table, the Cash and Government Securities are generally higher than last year,—an indication

of the ease of the money market,—and the Dividends, except in one or two cases, are not materially different :—

The Acceptances, as shown by the next Table, are generally less than 30 June, 1870—in the cases of the Union and City very much less. Now that a period of speculative excitement is upon us the public will do well to watch carefully these figures of Bank Acceptances. An excessive volume of Acceptances means liability to all the tremors and cautions of the money market, and to the reaction of these tremors and cautions upon the Stock Exchange quotations of the Shares.

Looking at the slow progress of the six smaller Banks included in the above Table, and considering the further London facilities afforded of late years by the opening of London offices by certain of the Scotch Banks, and by the active entrance into the Metropolitan circle of the National Provincial Bank of England, the National Bank, and some others, it is tolerably clear that whatever direction the new speculative fever may take there is no scope for it in starting more Joint Stock Banks in London.

THE GROWTH OF POPULATION IN THE UNITED KINGDOM IN THE LAST CENSUS PERIOD.

The facts shown by the preliminary reports on the Census, which have lately been issued, are a striking commentary on the agitation for a revival of British industry, of which we heard, so much two or three years ago. The burden of the revivers it will be remembered, was the decay of the country and the sufferings of the masses. Free-trade, it was repeated, had been all very well, but unless something was done foreign competition would ruin us: capital and population would alike be driven from our shores. Much in the same strain another school argued that the old country, so far from being able to maintain an increasing population, required to have its numbers diminished—that to take away the unemployed workmen, a bounty on emigration to the colonies should be provided by the State. Now the Census returns are published, and so far from indicating a decaying country they exhibit one of the most remarkable records of prosperity in the history of any people. The old country has grown more in population than in any decade of the century, and at a greater rate than in the previous years, while the growth of dwellings has at least been in proportion to the increasing population. And as if to put utterly out of question any supposition that England is a country from which capital and population are fleeing, the Census furnishes proof that while less than the natural increase of population goes away by emigration, there is a return wave of immigrants forming a material set-off to the outward drain. The agitations we have referred to were always hollow, as the masses were too sensible of their own clear interest to be misled; but it is interesting nevertheless to see how completely the facts contradict the rash inferences of a few philanthropists or partisans from some casual checks to the general current of prosperity.

We may state very briefly the principal facts of the Census in this view. The *first* point of all is of course the actual increase of population. Including an estimate for the army, navy, and merchant services, and reckoning the population of islands in British seas, the total number counted on the 3rd of April last was 31,817,108. For registration purposes it is usual to estimate the population at the middle of the Census year, and this figure gives 31,883,564 as the total of the population for 1871. As the population in 1861 was 29,358,927 the increase is 2,524,637, or 8·60 per cent.—the population of 1861 having increased over that of 1851 by 1,594 893, or 5·74 per cent. The increase in the decade 1861-71 has therefore been greater, both absolutely and relatively, than in the decade 1851-61. We subjoin these figures in a tabular form :—

Population.

Middle of Years.	Persons.
1851	27,764,034
1861	29,358,927
1871	31,883,564

Decennial Increase.

	Persons.	Per cent.
1851-61	1,594,893	5·74
1861-71	2,524,637	8·60

Striking as these facts are they are rendered still more so when we consider that the increase is principally in one out of the three constituent parts of the United Kingdom. To take the population actually enumerated—that is, excluding the islands in the British seas, and the army, navy, and merchant services, also making no estimate for the middle of the year—we get the following comparison :—

	Population.		Increase.	
	1861.	1871.	Amount.	%
England and Wales ...	20,066,224 ...	22,704,108 ...	2,637,884 ...	13
Scotland	3,062,294 ...	3,358,613 ...	296,319 ...	10
Ireland	5,798,967 ...	5,402,759 (—)	396,208 (—)	7
	28,927,485	31,465,480	2,537,995	8.6

But for the exceptional condition of Ireland, therefore, the United Kingdom would appear much more progressive than it does. No doubt a large part of the diminution of Irish population has gone to increase that of England and Scotland, but still it is only a part which has done so. The progressive part of the United Kingdom grows at the rate of about 13 per cent. in ten years, and if the relative weight of Ireland continues to diminish, other circumstances being the same, the growth of population all over the kingdom will be larger in the next Census than it is now. While the increase of England was 13 per cent. in 1861-71, it was only 12 per cent. in 1851-61, so that the growth of the last decade has been most remarkable.

The *second* fact to be noticed is the increase of houses in proportion to the population. The increase of the latter, it will be said, proves nothing; it rather shows the probability of increasing pressure on the means of subsistence, which would justify the cry for emigration. But apart from other testimony—of which abundance might be given—the increase of houses helps to show that the additional population is not

crowded into the old houses, but is lodged at least as comfortably. The facts as to England are:—

	Number. 1861.		1871.		Increase. Amount.		%
Houses	3,739,505	...	4,259,032	...	519,527	...	14
Population	20,066,224	...	22,704,108	...	2,637,884	...	13

The houses have thus increased rather more than the population. As we know from the returns of the inhabited house-duty that the average house is now more valuable than it was formerly, we have thus tolerably good evidence of an improvement in the lodging of an increasing population.

The *third* fact is the return of immigrants, and it is shown by a comparison of the population in 1871 as estimated from the excess of births over deaths in the ten preceding years less recorded emigration, with the actual enumerated population. The estimate ought to be nearly accurate, if these were all the facts to be considered, the only known cause of error, which cannot however be serious in England or Scotland, being the deficient registration of births; but in reality the estimate is under the mark, and the inference is that the difference is caused by immigration, which had been left out of the account. The comparison is as follows:—

	Estimated Population in 1871.		Enumerated Population in 1871.		Difference between Enumeration and Estimate.
England and Wales ...	22,121,295	...	22,704,108	...	+582,813
Scotland	3,319,859	...	3,238,613	...	+ 38,754
Ireland	5,481,311	...	5,402,759	...	− 78,552
The United Kingdom	30,922,465	...	31,465,480	...	+543,015

Between 1861 and 1871, therefore, the United Kingdom received about half-a-million of people, either fresh immigrants, or people who had returned. As the total emigration was 1,674,594, it may be considered that about a third came back, or had their places supplied. The old country, therefore, cannot be so destitute of new openings for industry as is sometimes supposed. The real explanation is, that while it is suitable for some to emigrate we have ample room for others. The causes of emigration would also appear to be diminishing in intensity. The emigration of 1851-61 was 2,054,578, while in 1861-71, as we have seen, it was 1,674 594.

Such are the most general facts shown by the Census, and we think they furnish cause for almost unmingled congratulation. No doubt it is much to be desired that the improvement in quality should be as striking as the increase in quantity; but the quantity, so long as there is no deterioration, and perhaps a slight improvement, is, on the whole, a good. In these days of immense Empires, the increase of quantity is a means to enable England to hold a high place in the world; and however much we may depreciate ourselves, there are yet some things for which, on the very highest grounds, we should not wish England to go down. Potentially, with our unequalled position and resources, we are, as a people of 32,000,000, a more formidable unit of force than any other single power. It depends only upon ourselves to convert that potential force into an actual one, and we cannot at least complain of want of means. Another reason for congratulation is the proof afforded of the wisdom of our Free-trade policy. The benefits of that policy have been cumulative, being more conspicuous in the later period than in the first; and this should have been expected beforehand. Relatively the first removal of multiplied checks to industry should have caused the greatest improvement, but absolutely the increase of capital consequent on the first burst of prosperity prepares the way for a constantly-increasing harvest. Other causes have of course co-operated, especially the wonderful growth of steam-power and invention, but Free-trade permitted the growth, and we are, at any rate, indebted to Free-trade for one thing which is a known cause of prosperity, and was more felt in 1861-71, Free-trade having been more fully in operation, than in the earlier decade. We refer to cheap corn, and the comparative absence of great fluctuations in the price—the two decades contrasting as follows:—

Average Price of Wheat

	1851-60.		1861-70.
1st year	38·6	.....	55·4
2nd year	49·9	.....	55·5
3rd year	53·3	.....	44·9
4th year	72·1	.....	40·2
5th year	74·4	.....	41·10
6th year	69·2	.....	49·11
7th year	56·4	.....	64·5
8th year	44·3	.....	55·9
9th year	43·9	.....	48·2
10th year	53·3	.....	46·11
Average	54,7	.....	51·1

Thus corn was on the average 3s 6d a quarter cheaper in the second decade than in the first, while the extremes were much less—the highest price of 1861-70 being 64s 5d, while there were three years in 1851-60 when the averages were 72s 5d, 74s 8d, and 69s 2d. Perhaps the first decade would have been as prosperous as the second but for the Crimean war, which interrupted the course of Free-trade, and caused these high prices. Otherwise the circumstances of 1861-70 have not been exceptionally favourable. The cotton famine and the extraordinary panic of 1866 were in themselves as calamitous external incidents as those of any decade of the century, but the country has grown in spite of them.

BUSINESS NOTES.

The Prussian Government and Roumania.—The holders of the Roumania State Railway bonds have reason to congratulate themselves, if it is true that Bismarck is going to interfere on behalf of the Germans interested, and compel the Roumanian Government to pay. The telegram is not altogether incredible, as not only is the present Roumanian sovereign patronised by Germany, but the bonds in question were issued with the name of an official of the Prussian financial administration in the prospectus. Although the case is not so strong, there are still some features in it resembling the patronage extended by the Government of France to the loans of the Emperor Maximilian, which formed a sufficient ground for the French Government offering a compromise when the Mexican Government collapsed. There is no doubt that but for more serious difficulties the French Government would have compelled Mexico to pay rather than pay itself. Still, however beneficial for the shareholders the course proposed by Bismarck may be, we fear it is a very bad precedent in every way, and that it may be dangerous for the peace of Europe. It is no part of the business of a Government to collect the debts due to its subjects by a foreign State. They had their free choice to lend or not, and should start with the knowledge that they would not be able to issue a writ against their borrower. We fear that if Bismarck carries out his alleged intention and is consistent, the Prussian Government will soon have more than sufficient scope for its military energies. When there is a difficulty about a foreign loan, the creditors will always have the alternative of selling it to the subjects of Germany for collection, and we doubt if Germany will find the business very profitable. The immediate danger to the peace of Europe in the present case is obvious. If Roumania resists, as is not improbable with the view taken there that the bonds were issued without authority, and are not really the bonds of the Roumanian State at all, the Eastern question will be up at once. Roumania must be "taken in execution" by some one, and whether it is Turkey, Austria, Germany, or Russia which acts as bailiff, the whole of Europe will be moved. We doubt if Bismarck will push things to extremities before he is out of the wood of French difficulties, but the danger is evident and serious—always supposing that the telegram has any foundation at all.

The Metropolitan District Railway.—We have received the following communication:—

To the Editor of the Economist.

Sir,—I fear that your estimate of the financial position of this line, gloomy as it is, is yet over-sanguine.

1st. The traffic receipts will not continue so high as 3,200*l* per week when the London "season" is over, and the International Exhibition closed.

2nd. With this amount of traffic the line cannot probably be worked at 45 or even 50 per cent. (The Metropolitan Extensions of the Chatham and Dover cost for years as high as 70 to 75 per cent. to work.)

3rd. You omit all allowance for hire of 100,000*l* of rolling-stock,—probably 10,000*l* a year.

4th. You have not allowed for the interest on 40,000*l* temporary loans and 75,000*l* Lloyd's bonds, as stated in the accounts; for 247,000*l* which must be provided this half-year, not to mention 270,000*l* to be provided later. *(See the accounts.)*

Taking these into consideration, the results of the working will probably be as follows:—

	£
Gross traffic, average 3,000*l* per week	156,000
Working expenses, at least 50 per cent.	*78,000
Net revenue	78,000

* The Metropolitan working expenses, over a not much greater mileage, are 160,000*l* a year.

	£	£
Prior charges—		
Hire of rolling-stock	10,000	
Interest on temporary loans—about 350,000*l*, at 6 per cent.	21,000	
Debentures, 1,250,000*l*, at 6 per cent.	75,000	
		106,000
Deficiency		28,000

Thus leaving preference and ordinary stocks without dividends.

Of course, we must look for some addition to the traffic with the further development of the system, and the continuous increase of the population of London; but I estimate that it will require 212,000*l* a year, or rather over 4,000*l* a week, worked at 50 per cent., to meet the debentures and other prior charges, without leaving anything for the preferences or ordinary.—Yours, H.

We print the above for the information of those who have been indulging in exaggerated expectations as to the traffic of the line. It will be useful to know what is urged for as extreme a view on the other side. But for ourselves, we do not see any cause for correcting the opinion we expressed last week. We do not think there can be much real doubt that the traffic of the District line will exceed on the average 3,200*l* a week. It is quite true that the present figure is that of the busy season, but *per contra* it must be remembered that the line is yet undeveloped, that it has not yet got all the regular local traffic which naturally belongs to it, and that there will be a "season" every year, so that for six months at least the present figure is likely enough to rule. We may fairly assume that at the worst, even out of the season, the business will not fall below 3,000*l* a week, while in the season the 3,200*l* will be exceeded. No doubt it may be said that the present has been an unusually busy season owing to the International Exhibition; but this objection is of little value as the International Exhibitions are to be annual. As regards what our correspondent says of working expenses, the broad facts are that the line has till now been worked by the Metropolitan for 45 per cent., exclusive of general charges, and that the agreement was expressly put an end to to substitute a more economical working. We still think it most unlikely that the figure will be much exceeded. Our correspondent's remarks as to the additional capital being spent are better founded, but most of the charges referred to are not preferential to the debenture stock, which we had in view when we wrote. They are besides over-stated, the rolling-stock, for instance, being bought at a cost of 100,000*l*, for which, with the company's present credit, not more than 5,000*l* per annum need be paid, the expense of maintenance being included in the working expenses. And while they form a much less charge at present than our correspondent estimates, the future increase of charge will be more than covered by the growth of the line. We still think that after all charges there will be a surplus, however small, for the preference shareholders, and that the increase of traffic for a year or two, at least, is likely to be very rapid.

THE BANKRUPTCY COURT AND DEEDS OF COMPOSITION.—The Lords Justices of Appeal (*ex parte* Rumboll, *re* Taylor) have just had before them a question as to whether the Court of Bankruptcy has any control over proceedings under deeds of composition executed before the Act of 1869 came into operation and registered under the Act of 1861. The general words of the 1869 Act are, that the Court is to determine all questions which it "may deem it expedient or "necessary to decide for the purpose of doing complete "justice, or making a complete distribution of the property" in "any case of bankruptcy." It was decided last year that these powers apply in the case of a bankruptcy commenced under the Act of 1861, and in the present case the Chief Judge had decided that the same powers applied in the case of a composition deed registered under that Act. This view the Lords Justices now affirmed on appeal. Lord Justice James intimated that he had some doubt, but he had come to the conclusion that the jurisdiction extended to every case which could fairly be considered a case of bankruptcy, and that he ought not to overrule the decision of the Chief Judge that a deed of composition made such a case. His Lordship added that "his decision, if opposed to that of "the Chief Judge, would be far less convenient in its results;" and it was certainly the intention of the Act of 1869 to bring all bankruptcy matters before one Judge. It would have been a pity if on any technical ground what are really bankruptcy matters should not be so dealt with.

EMIGRATION.—The increase of *English* emigration is the most noticeable fact in the report of the Emigration Commissioners for 1870, which has just been issued. The total emigration from the United Kingdom in that year was 256,940, a decrease of 1,087 as compared with 1869; but the decrease was exclusively in foreigners, the emigration of natives of the United Kingdom, and especially of England, having increased. The comparison of the two years is as follows:—

	1869.	1870.	Increase.
Emigrants from England	90,416	105,293	14,877
— Scotland	22,559	22,935	376
— Ireland	73,325	74,283	958
— the United Kingdom	186,300	202,511	16,211

Thus out of a total increase of 16,211 England counts for 14,877, and Scotland and Ireland for the remainder. England besides appears to be contributing an increasing share of the whole emigration from the United Kingdom. In 1854, say the Commissioners, its share was 28 per cent.; in 1869, 35 per cent.; and in 1870, nearly 41 per cent. And taking the figures of the last seven years only, we get the following curious contrast of the emigration from England and Ireland:

	English Emigration.	Irish Emigration.
1864	56,618	115,428
1865	61,345	100,676
1866	58,856	98,890
1867	55,494	88,622
1868	58,268	64,965
1869	90,416	73,325
1870	105,293	74,283

The English figure is very nearly what the Irish was in 1864, and the Irish figure, after nearly descending to the English level in 1868, has not since gone up so rapidly. Of course the reason partly is that in England there is a constantly increasing quantity to be drawn from, while the emigration from Ireland has been carried to such a point that the present emigration may be relatively almost as severe as it was, though in absolute amount it is less. But the emigration from England has increased to a larger extent than this explanation would account for, and the Commissioners find a reason for it in the agency of benevolent societies, which have stimulated emigration in the last two years. This agency will no doubt have helped, but the last two years were years in which a large emigration from England might have been looked for. They were the first good years after a time of depression, and emigration is always larger then than during the depression itself. At such a time the emigrating class are too poor to get away; but a certain number of them use the first profits of reviving industry to go away, while the recollection of their sufferings is recent. Afterwards, when there is greater prosperity, the temptations to remain counterbalance the temptations to emigrate. We suspect too that there is not only now a larger return of successful emigrants than was formerly the case, as the last census report shows, but there is also a great deal of tentative emigration—people going out to some colony to see if they can find an opening, and then returning when they see they could do as well or better at home. The Emigration Commissioners should take some steps to count those who come back, as well as those who go away.

"TREBLE PROOF" OF A DEBT.—A rather important question as to proof in a bankruptcy came before the Chief Judge in Bankruptcy this week, in connection with the case of Jeffery and Co., Liverpool. The executors of a Mr Hancock, of Sheffield, claimed to prove not only against the joint estate, but against the estates of the two partners, under the following promissory note, which was signed by the partners and the firm, as well as by others:—

(Date.)

One day after demand in writing we jointly and severally, or any two, three, or more of us, promise to pay Mr Joseph Hancock or order the sum of 12,150*l*, with interest for the same from the date hereof at 5 per cent. per annum, value received.

JAS. R. JEFFERY.	J. P. HARRIS.
WM. S. JEFFERY.	A. C. STEWART.
J. & W. JEFFERY & Co.	S. H. DAY.

The decision of the Court was in favour of the claim of the executors, who are thus entitled to a treble proof, and on the same principle, we imagine, will have a claim against the other signataries of the note until they are fully paid.

BANKERS AND CUSTOMERS.—Vice-Chancellor Bacon, *in re* "Thakenham sequestration moneys," lately gave a decision

against a banker for taking notice of a trust as regards certain money at the credit of an account separated by a customer from his ordinary drawing account—a decision the very opposite, it will be remembered, of that given in a recent case where a banker was made to lose by his being affected with notice of a trust. The difference of the decisions is instructive. In the former case a customer had separated his accounts, retaining full power over the separate parts; but though this was the case the Court held that when the customer failed the banker could not put all the accounts together, but that one of them, on which there was a large balance due to the customer, must be treated as a trust account of a certain County fund. In the present case the fund in question was the surplus of a sequestrated living which the Bishop of Chichester had paid into a separate account, which he had intended to hold in trust for the benefit of the schools of the parish, and he had actually entered into negotiations for the disposal of it for that purpose. Yet the banker, when he takes notice of the trust and pays the money into Court for the benefit of all concerned, is severely censured by the Judge for bringing an absurd suit, because there was no doubt that the money was the private property of the Bishop, and that his representatives were entitled to it. We must say that bankers appear to be hardly treated in these cases. Where they attempt to apply the theory that accounts in the name of one customer only, and over which he has complete power, are only parts of one account, they find that a large balance at the customer's credit in one of them is treated as trust money, and that they lose heavily by the operation. In the contrary case, where they have reason to believe that the money at the credit of a particular account is not treated by the customer as his own, but is regarded as trust money, they are charged with bringing an absurd suit when they pay the money into Court, and call all the various persons claiming upon the fund. The tendency of such cases cannot but be to diminish the facilities for separating their drawing account, which are now given by bankers to customers, or to lead them to adopt some plan by which any question of trust affecting some particular part of the customer's balance will be avoided. The nuisance and risk of loss in such cases, as the law is now interpreted, are unendurable by business men.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and July 29, 1871:—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts To July 29, 1871.		Same time last year.	
	£	£	£	£	£
Balances on 1st April 1871—					
Bank of England	...	5,678,015		7,603,761	
Bank of Ireland	...	1,344,520		972,887	
			7,021,435		8,576,648
REVENUE					
Customs	20,500,000	6,162,000		6,190,000	
Excise	[illegible]	7,400,000		6,900,000	
Stamps	[illegible]	[illegible]		1,700,000	
Taxes	[illegible]	[illegible]		700,000	
Income Tax	[illegible]	1,171,000		1,137,000	
Post Office	[illegible]	1,125,000		1,250,000	
Telegraph Service	[illegible]	175,000		145,000	
Crown Lands	[illegible]	[illegible]		15,000	
Miscellaneous	[illegible]	[illegible]		[illegible]	
Revenue	[illegible]		21,203,906		20,652,822
OTHER RECEIPTS.					
Advances under various Acts to repaid		735,280		777,789	
Money received for [illegible]		...		...	
Money received for Exchequer bonds		...		...

Expenses of [illegible]		...		...	
Exchequer Bonds and Bills, &c. paid off		125,800		200,000	
Surplus income, to reduce Debt		737,000		600,000	
			1,507,595		971,924
Balances on July 29th, 1871—					
Bank of England	[illegible]	656,692		3,728,177	
Bank of Ireland		949,369		1,572,114	
			1,586,061		1,250,291
Totals			[illegible]		[illegible]

The following are the Receipts on account of Revenue during the week ending July 29:—

	Receipts of Week Ending July 29.
	£
Customs	266,000
Excise	470,000
Stamps	192,000
Taxes	nil.
Income Tax	23,000
Post Office	nil.
Telegraph	nil.
Crown lands	(2),000
Miscellaneous	53,[illegible]
Total	1,[illegible]

The total receipts of the previous week were 1,279,381*l.*

The Exchequer issues of the week on account of expenditure were 1,000,471*l.*, viz.:—

	£
Interest of debt	100,000
Other charges on Consolidated fund	5,000
Supply services	895,471
Telegraph services	nil.
	1,000,471

During the week the cash balances have decreased as follows:—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on July 22	751,028	1,002,086	1,753,114
— July 29	656,692	949,369	1,606,061
Decrease	114,336	52,717	167,053

Agriculture.

INTELLIGENT LANDLORDISM.

No one can doubt that the time has come when it behoves the proprietors of the great estates of England to deal with their property in an intelligent and business-like way. A somewhat searching examination is being made into the origin of individual property in land, and the distinctions, moral and economical, which must always exist between property in land which scientifically belongs to the community and property which has been the absolute creation (through labour and abstinence) of the possessor or his predecessors. We do not concur in the proposal of Mr. Mill put forth through the Land Tenure Reform Association, that ultimately the landed property shall be bought up by the Government, and granted out on leases to those who wish to use it for purposes of pleasure or profit. But it is certain that the existing mismanagement of large portions of the English landed estates is such that unless some change takes place the acceptance of such views will become so wide and general as to produce large and perhaps ill-considered changes in the law of real property. Now, anyone acquainted with the right mode of management of land can see in every part of the country evidences of the fact that while occupying tenants are carrying on their business at great disadvantage the owners are not deriving from their property the benefit which under better systems should be within their reach. Yet it is not an easy matter to persuade [illegible] of the necessity of [illegible]. As existing systems [illegible] generally [illegible]. The practical interest [illegible]

do not improve, and the occupiers do not cultivate as much or as well as they ought for their own good respectively. The prejudices of both owners and occupiers, if not wholly enlisted in favour of the existing system, are at least to be overcome before a really improved system can be introduced. Where land belonging to one man is to be let, at a rent, to another man to be cultivated for his own profit, the problem is so to frame the contract between them as, while giving the landlord the fair market value (in the form of rent) for his land, there shall be no more burdens and no more restrictions thrown upon the occupier than are necessary for securing the stipulated rent, and leaving the occupier the fullest opportunity of employing all his resources and all his energies in carrying on his own proper business.

The following circular, lately addressed by the agent of Lord Leigh to the tenants on his lordship's estates, appears to have been dictated by a due consideration of the right system of management, and an appreciation of the difficulties sure to arise when a routine is interrupted. In some respects Lord Leigh enters on the career of improvement with some advantages. He has never been a game-preserver, and he has of late absolutely abandoned all claim to the hares and rabbits. He has never interfered with the political action of his tenants. He has put the buildings and permanent works of his farms into good order. So far he is greatly in advance of the majority of English landowners.

The following is the circular:—

"Estate Office, Stoneleigh Abbey, Kenilworth,
20th June, 1871.

"Dear Sir,—I am directed by Lord Leigh to inform you that having gone over nearly the whole of his estates with draining, buildings, and other permanent improvements, effected at a large outlay, his lordship is of opinion (and is confirmed in that opinion by the advice of persons of experience) that a more satisfactory system for the management of his estates, both for his tenants and himself, can be arranged, the main features of which are—

"1st. That all permanent improvements shall be effected by and at the sole expense of his lordship; a settled rate of interest on the outlay being charged.

"2nd. That all repairs shall be done by Lord Leigh.

'These very important changes, you will see, necessitates a re-valuation of your farm; and this his lordship has no doubt will be effected in such a manner as to give you satisfaction, and increase that confidence which has always existed between you, his lordship, and the late Lord Leigh.

"This change will relieve you from finding and locking-up in improvements that capital which will enable you more profitably to cultivate your farm, and give you more freedom to advantage yourself, by removing your capital and energies to a more beneficial occupation, without the possibility of leaving any of your money on his land.

"The subject of leases has engaged his lordship's attention and he is not indisposed to consider any application for one' There are tenants to whom he would not grant one, and also farms so situated that he would decline to lease them; but these tenants have his engagements to value and pay for their unexhausted improvements on quitting."

That all the tenants of a large estate will not be such as are fit, from the possession of competent capital and skill, to receive leases is constantly urged against proposals for the adoption of a system of leases; and the immediate removal of the inferior tenants is assumed to be a necessary result of the change from yearly tenancies to leases. Against such a result Lord Leigh provides by conceding to all tenants who may not be deemed strong enough to receive leases engagements to pay them for all unexhausted improvements on quitting their farms.

That the more competent tenants will soon require and receive leases we have no doubt. And we fully believe that under the influence of such examples, and with the protection of tenant-rights, the smaller tenants, not now deemed to be entitled to leases, will so far exert themselves to improve their cultivation and their position as ere long to be readily entrusted with leases of their farms. Doubtless a few tenants who have lived at easy rents may for a moment shrink from a revaluation, but no man of business with sufficient means and skill will hesitate in the result to approve of a better system in which the tenants are quite as much interested as the proprietor. In one particular Lord Leigh's plan is new. He proposes (as we understand the circular) to do all the permanent improvements and repairs, even when the farms are let on lease, and the plan will probably be found to answer. Even when the farm is put to rights at the commencement of a lease there is a constant outlay for repairs required to be made by the tenant, which is sometimes neglected, and when otherwise, abstracts to some extent his capital from its proper province of cultivation. When a landlord undertakes the repairs, it must be his own fault if there is any serious deterioration in the buildings and permanent improvements of his farms.

Literature.

JOURNALS KEPT IN FRANCE AND ITALY, 1848-52. By the late NASSAU W. SENIOR. Edited by his Daughter, M. C. M. Simpson. London: Henry S. King and Co.

THIS present portion of Mr Senior's journals has been issued very opportunely. France is once more passing through a political crisis very like that which succeeded the experiment of 1848, and it is interesting to look at such a photograph as Mr Senior gives us of the views and feelings about their country's future, and the modes of government, of many of the leading politicians of the time. The old problems have again turned up, and much that is puzzling in the present conduct of French parties is explained by the sense of blunders formerly committed, and the anxiety, especially of those who see no hope for France but in a Republic, however little they may be Republicans themselves, not to let things drift as they did before. We find for instance that M. Thiers' opinion about a Republic, it they divided Monarchists the least, is a very old one. We need not say that, apart from this special feature of interest, Mr Senior's conversations are, as usual, most interesting. A spectator who contrives to get so near as he does to the heart of a political movement, and reproduces so vividly the thoughts and opinions of many of the chief actors at a critical period, cannot but produce a book that will amply reward perusal. One could hardly believe, without such evidence as is here furnished, the general tendency among French statesmen in 1849 and 1850 to anticipate an imminent financial collapse, but the fact is most essential for the history of the time. The Italian part of the present conversations will have less immediate interest compared with the French part, but historically and to the student of politics they will be almost equally full of instruction, conveyed in an agreeable form. We are glad to see that Mr Senior's conversations with De Tocqueville, omitted from the present volume, are reserved for separate publication.

CRACROFT'S TRUSTEES' LIST OF STOCKS AND SHARES. B. CRACROFT, 4 Austin friars.

MR CRACROFT has had the happy idea of separating from the miscellaneous securities dealt in on the Stock Exchange those which trustees are permitted to deal in by various Acts of Parliament, and making up a monthly list of them, showing the changes in price during the month, and the interest which an investor would receive. The utility of such a list commends itself at first sight, and we need not add that, in the hands of Mr Cracroft, whose publications are now well known, the compilation is likely to be accurate. As a preface to the list, Mr Cracroft inserts a careful analysis of the legislation and legal rules on the subject, showing what is the law as to the liability of trustees and the limits of their powers, whether under express statute, or according to Chancery rule, or otherwise. The list will be very serviceable to those concerned.

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, July 8, 1871:—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	35,879 7 4	104,073 15 8
To transfer certificates from Post Office Savings' Banks to Savings' Banks	404 8 10	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	2,064 1 10
Total	36,283 16 2	106,137 17 6
POST OFFICE SAVINGS' BANKS:—		
In money and interest credited	28,063 19 8	25,220 1 0
To transfer certificates from Savings' Banks to Post Office Savings' Banks	2,064 1 10	...
By transfer certificates from Post Office Savings' Banks to Savings' Banks	...	404 8 10
Total	30,128 1 6	25,624 9 10

	£ s d
Total amount on July 8, 1871, at the credit of—	
The fund for the Banks for Savings	37,553,887 15 10
Add six months' interest credited to the trustees of Savings' Banks, in the books of the National Debt Office	606,788 13 4
	38,162,676 9 2
The Post Office Savings' Banks fund	15,983,135 6 6
Total	54,145,811 15 8
Ditto—by last monthly account	53,602,373 13 0

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, August 3.

The return of the Bank of France for the week ended this day, the preceding week, and for the corresponding week of last year, are as follow :—

	Aug. 3, 1871.		July 27, 1871.		Sept. 8, 1870.

In comparing this week with last, these results are presented :—

INCREASE.	francs.
Capital at bank	18,201,000
Notes in circulation	7,007,000
Bills accounted at branches	9,809,000
Treasury balance	56,741,000
DECREASE.	
Bills discounted, Paris	6,643,000
Bills purchased	40,620,000
Treasury bills	62,000
Deposits	2,146,000

The most remarkable of these figures are those representing the reduction of prolonged bills, a result obtained without the exercise of much pressure. The decline in the discounts of Paris, though inconsiderable is not satisfactory, but is more than compensated by the augmentation in the branches.

In an article in the *Journal des Débats*, M. Michel Chevalier draws attention to the disproportion that exists between the capital of the Bank and the mass of notes now in circulation, and expresses opinions at first sight startling, but which would not have been approved by Baron Louis, the eminent Statesman of the Restoration, who is considered a great authority in these parts, and whom M. Thiers in particular holds in high veneration. M. Michel Chevalier thinks that the Government would have done well to increase its last loan by 500 millions, in order to reduce the paper circulation by that amount, and declares that "it is important that this fault should be repaired with brief delay." He adds :—"From accidental circumstances, on the indefinite prolongation of which it would be imprudent to count, the banknote up to this moment has suffered no depreciation and it would be wise to profit by that piece of good luck." He thinks, moreover, that it would be opportune to borrow from a law of 1814 in the preparation of which Baron Louis took part, but which has been superseded, certain clauses that would "preserve the Bank of France from being at the mercy of the temerities of Governments." This article has excited much attention, and in truth it is calculated to give rise to serious reflections.

The taxation scheme of the Government is not to be dealt with by the Assembly as a whole, but in fragments. The Government itself, as is known, took from it the part augmenting duties on coffee, sugar, tea, and some other articles of general consumption, and had it passed by surprise, and that relative to the imposition of 20 per cent. on the raw materials of textile industries is in suspense. The Committee of the Budget, charged with the examination of the project, has divided the remainder into several portions, and is presenting a separate report on each, instead of a general report on the entirety. This will simplify and accelerate the matter. Several reports have been submitted to the Assembly within the last few days. One on the proposed increase of postage accepts for a simple letter in the country, instead of 20c, as heretofore, the 25c proposed by the Government; but it only raises the postage in Paris for Paris from 10c to 15c, instead of to 25c, and makes sundry modifications in the project as regards printed papers, samples, unpaid letters, &c. In definitive, the Committee think that with its changes 22 000,000f additional from the Post Office may be counted on, as calculated by M. Pouyer-Quertier; but to prevent disappointment it puts the amount at 20,000 000f, "a sum which it is assured'y permitted to expect." In another report the Committee deals with the proposed augmentation of registration dues, stamps, game licenses, bills of exchange, foreign securities left by Frenchmen deceased or by foreigners dying in France, on assurances, registration of leases, receipts for money, railway tickets, amongst other things, being considered. It makes various alterations in the details of the Government scheme, and in so doing leaves out of account 8,500,000f of stamp duty on newspapers on which it counted, and cuts down its estimate of assurances from 15,000,000f to 7,000,000f. On the whole, however, it arrives at a total of 96 500,000f, instead of the 96,000,000f of M. Pouyer-Quertier. Another report treats of the proposed augmented or new taxes on wines, alcohols, beer, public houses, playing cards, tobacco, chemical matches, paper, and chicory, and proposes some slight modifications of detail. It does not, however, estimate what the total yield will be. It treats at some length lucifer matches, and states the annual production to be from 60 to 80 *milliards* (thousands of millions). To this impost strong objections, which, says the Committee, "were for the most part the same as those produced in England against the tax proposed by Mr Lowe," were presented by manufacturers, but were not admitted.

Although M. Thiers will not hear speak of an income tax, a series of Bills for taxing 5 per cent. the interest and dividends of bonds and shares of all companies, the interest of mortgages, the salaries of certain classes of Government functionaries, and the profits of traders, and 2½ per cent. the emoluments above 1,000f of all other professions, has been presented to the Assembly by M. P. Lefranc. In avoiding the use of the term income tax, whilst establishing the tax itself, the author of the Bills seems to hope to conciliate the susceptibilities of M. Thiers and financial justice. In another Bill M. Lefranc prop se to put a tax of 62½c the 1,000f on every sale of any sort of security. Other propositions about new taxes are made by other deputies, and of these the most serious is one of M. Wolowski, for imposing invoices (*factures*) in a different manner to any heretofore recommended. On account of his great scientific eminence his project has been received with marked interest by the deputies of the Assembly who understand such matters, and when the details of it are known the public will no doubt accept it also. How much it is to be regretted that M. Thiers, instead of declaring for Protection as it existed in the dark age that preceded the Treaty of Commerce, did not charge a commission of economists, headed by such *sui generis* as M. Wolowski, M. de Lavergne, M. Passy, and M. Michel Chevalier, to prepare the new plan of taxation circumstances call for. Such a commission would have done what the economists of England did years back for their country—have filled the treasury, have increased the public wealth, have set industry free, and by shifting the burden of taxation from those who cannot to those who can and ought to bear it,—would have destroyed one of the great causes of insurrections and revolutions.

The war and the insurrection having occasioned the theft or destruction of a considerable number of shares, bonds, and other securities "to bearer," the Government has presented a Bill to the Assembly for simplifying the formalities to be observed by the legitimate proprietors there of to obtain reparation, and for reducing from five to three years the period in which actions for payment of interest and dividends can be brought against the companies issuing them. In a report accompanying the Bill, the value in France of such bills to bearer is estimated at not less than 10 *milliards* (10,000,000,000f.).

In addition to the 500,000,000f already paid to Prussia, a milliard will be paid in two months, or perhaps even less. This statement is made by a member of the Assembly on

authority of M. Thiers. The 1,500,000,000f (60 millions sterling) make the sum which the Treaty of Peace requires to be paid in 1871. In it, however, is included the 325 millions which Prussia is to give for the railways taken from the Eastern Company.

In last letter it was stated that the City of Paris had "borrowed 30,000,000f and 40,000,000f." The word "between" should have been inserted before the first figures.

The liquidation on the Bourse of the end of the month was looked forward to with some anxiety, it comprising for the first time the new 5 per Cent. stock, in which transactions have been considerable; but it was got through on the whole satisfactorily, speculators for a rise who needed assistance to carry over their operations having obtained it. In consequence prices of the 5 have improved, and a better tone has been imparted to the market. It has been noticed that the Italian and the Turkish stock have been firmly supported by influential capitalists during the week. The following are the quotations:—

	July 27.		August 3.

The Comptoir d'Escompte has held its meeting As its year terminates on the 30th June, it saw both the beginning and the ending of the war, the siege of Paris, and the Commune; and in consequence the totality of its operations were 1,075 millions less than those of the preceding year. Nevertheless it realised net profits of 5,526,000f. From that sum it puts aside 1,100,000f to cover any losses that may arise on prolonged bills, and distributes 27f 50c per share, equal to 5½ per cent. of the nominal capital. Of the dividend 10f have been paid, and the rest is in payment since the 1st.

The annual meeting of the Credit Foncier, which has just been held, was waited for with much interest in order to see what effect the extraordinary and appalling events we have passed through had had on it. The war and revolution caused the withdrawal of deposits on an extensive scale, so that they fell to 19,201,134f on the 31st October, after having begun the year at 71,096,767f; but on the 31st December they had risen to 20,564,669f. In the course of 1870 (in reality it consisted of eight months only, operations having been almost entirely suspended during the last four), new mortgages were made to the amount of 51,757,524f, and new advances to communes of 18,588,717f, making the total due on 31st December on the former, 849,298,267f, and on the latter 471,716,677f. At the same date the company had out 846,755,355f of mortgage, and 442,959,007f of the communal debentures. The mortgages in Paris and the immediate vicinity being very large—some 600,000,000f—it was feared that the bombardment and incendiarism would have reduced the value of them greatly; but the maximum of destruction is, it appears, 415,000f, and an important part of it will be compensated by the solvency of the borrowers. In the payment of the annuities due from loans made there was of course heavy arrears; on the 31st December they amounted to 11,700,059f, but on the day on which the meeting was held had fallen to 9,752,535f. In definitive, the net profits of 1870 were 7,157,495f, and from them 12f 50c per share were ordered to be distributed, being simple interest of 5 per cent., and leaving 490,749f to be added to the reserve, which now amounts to 18,290,323f.

The annual meeting of the shareholders of the Credit Lyonnais, M. Germain in the chair, was held at Lyons on the 31st ult. The report on the operations of 1870, which was presented, stated that the deposits and current accounts, which on 30th June amounted to 60,231,982f, fell to 21,549,634f on 30th November, but on 31st December were 22,134,235f. The greater part of the withdrawals were effected at Lyons, and in addition to providing for them the bank had, on the outbreak of the war, to meet its acceptances, the greater part of which were payable at Paris. "This double situation," says the report, "presented some difficulties, but, thanks to the abundance of the bank's resources, there was in both places and always a considerable excess. The net profits were 1,457,220f, and a dividend of 5f per cent., being 25f per share, was declared from them, leaving 457,220f to be added to the reserve, which now amounts to 2,768,661f. Half of the dividend was paid in January, and the rest is now in course of payment.

The Bank of Senegal has declared a dividend of 77f 80c for 1870, making 15½ per cent. The bank was established sixteen years ago, and at first it had difficulties to encounter, and its shares of 500f fell to 375f, but latterly it has been prosperous, and the shares are now at a good premium.

The Austrian Credit Foncier, formed on the model of the French establishment, and which has an office at Paris, reports net profits for 1870 of 5,259,607f sufficient to give 30f per share in addition to the interest of 5 per cent. already paid.

The railway companies have recommenced the publication of their weekly receipts, suspended by the war; but the dates they begin with are not so recent as could be wished. From 2nd to 8th July the Northern received 195,645f more on the old network than in the corresponding week of the year preceding: and 24,235f more on the new network. The increase of the Western was 48,616f old, and 37,751f new; Orleans, 287,739f and 231,141f; Southern, 25,791f and 25,254f; Lyons-Mediterranean, 278,441f and 19,149f; the Eastern gives the total receipts, old and new, at 1,907,838f, without comparison with those of last year.

The Orleans Railway Company is paying from to-day 23f on account of dividend of 1870, and will hereafter be able to give 7f additional.

The meeting of the Lyons-Mediterranean Company has been held to-day, The dividend of 1870 is 40f.

The Western Railway Company announces that the coupon of shares due 1st October last, amounting to 17f 50c, and that of the 1st April, 1871, of 2f 50c, will be paid from 16th August.

The Austrian Railways Company is issuing 150,000 new shares of 500f, of which 100,000 are reserved for shareholders, at the rate of one for every four they possess. The price is to be paid in five equal instalments between 15th August next and 10th July, 1873.

The Company des Danubes, and of the South-East Railways, is paying at Lyons 6f 25c per share.

The Coalpit and Ironworks Company of Commentry, Fourchambault, &c., announces the payment from 15th October of 17f 50c, balance of dividend of 1868-9; and that the dividend of 1869-70 has been fixed at 25f, half payable the 15th April, half the 15th October.

The Company of the Chantiers et Ateliers de l'Ocean (shipbuilding) reports that the past year was a very unfavourable one, and that in consequence it has resolved to suppress the central administration at Paris, and to have its establishments of Bordeaux and Havre worked seperately. It is even trying to sell those in the latter port.

The Cab Company (Voitures) of Paris realized in 1870 profits of 1,208,765f, but a considerable part of them came from the sale of horses, partly for the army, partly for food. A dividend of 12f 85c might have been given, but only 10f are to be distributed.

The quotations, per 50 kilogs, duty paid, from the markets of the last three days, are as follow:—

COTTON.—At *Havre*, New Orleans very ordinary Oomrawuttee fair, 85f 50c, for delivery.

COFFEE.—At *Havre*, Rio, 129f; Santos, 130f; ditto washed, 135f; Winard, 140f. At *Bordeaux*, Winard, 146f; La Guayra garbled, 147f; Santiago, in bond, 96f. At *Marseilles*, Rio, 126f, and in bond, 68f; Port Rico in bond, 80f.

SUGAR.—At *Havre*, French West India usine, 68f to 71f. At *Marseilles*, French West India, 36f 25c bonne quatrieme.

COCOA.—At *Havre*, Haiti, 95f; Guayaquil, 106f. At *Bordeaux*, Caracoa, 165f.

TALLOW.—At *Havre*, Buenos Ayres sheep, 55f 50c; New York, 55f.

WOOL.—At *Havre*, Monte Video unwashed, 67f 60c to 106f 25c; Buenos Ayres unwashed, 57f 50c.

HIDES.—At *Havre*, Rio Janeiro salted cow, 68f.

COMMERCIAL AND MISCELLANEOUS NEWS.

In the nine months ending 31st March, 1871, the imports of merchandise into the United States were of the value of $366,925,555, being above 54 millions more than in the corresponding period of the previous year; and the imports of specie were $16,974,639, a decrease of four millions. The domestic exports of merchandise were of the (specie) value of $320,050,248, being an increase of 39 millions; and of specie, $54,777,274, an increase of 25 millions. The foreign exports were—merchandise, $10,120,449; specie, $11,904,530. The share of foreign vessels in the carrying trade was very large; they brought imports of the value of $263,884,032, and they took away domestic exports of the (mixed) value of $274,771,628, and foreign exports $13,111,426. The entrances and clearances of vessels engaged in the foreign trade in the 12 months ending March 31, 1871, were as follows:—Entered, 10,693 American vessels of 3,638,511 tons, and 19,195 foreign vessels of 5,913,184 tons, cleared, 10,366 American vessels of 3,613,085 tons, and 19,089 foreign vessels of 5,830,261 tons.

The Inland Revenue Department report that the amount of property and profits charged to income tax in the financial year 1870-71 was £360,421,062—viz., £31,288,300 in England and Wales, £2,817,431 in Scotland, and £5,317,219 in Ireland; or, by schedules, £13,478,032 under Schedule A, £7,447,874 Schedule B, £4,790,120 Schedule C, £61,794,418 Schedule D, £22,110,456 Schedule E. The increase over the preceding year was but £8,500,000, and the whole of that increase was furnished by England. There was considerable increase under Schedule A from houses, under Schedule C from dividends on colonial and foreign loans, and on railways in India; under Schedule D in railways, but in this the total is long stationary. The assessments to income tax in the following year, 1871-72, amounted to £18,162,000, being an increase of £741,000 over the preceding year; an increase of £700,000 in England, £34,000 in Scotland, and £8,000 in Ireland. The assessments under Schedule A in England amounted in 1870-71 to £10,172,000, and show an increase of £600,000 on lands and £1,111,000 on houses; those in Scotland amounted to £1,570,000, showing a decrease of £2,000 on lands, and an increase of £9,000 on houses. The profits of trades and professions charged under Schedule D amounted to £61,879,000, being an increase of £1,777,000 over the previous year—viz., £1,587,000 in England, £170,000 in Scotland, £20,000 in Ireland. This large increase under Schedule D shows a marked recovery from the depression caused by the commercial disasters of 1866; in the year 1867-68 Schedule D showed an increase of only £1,774,644, and in 1868-69 of only £2,344,000.

The annual report of the Registrar-General of births states that in the year 1870 [illegible] emigrants left the United Kingdom, being 1,087 more than in 1869. The emigrants comprising the total in the country increased by no less than 17,000; but it cannot be said that this increase exceeded in the first half of the year that which followed the war. The English, Irish, and Scotch emigrants were more in number in 1870 than in 1869. The emigrants of English people in 1869 reached 90,430, a number exceeded by the English emigration of all previous years except 1854; in 1870 it increased to 100,204, by far the largest English emigration on record. It appears to consist of 41 per cent. of the adults; and the Irish emigrants of 1870 was little more than 70 per cent. of the English, or 58 of the English emigrants went to the United States, being an increase of 3,861 over 1869; 20,824 went to British North America, an increase of 6,168; 11,165 went to Australasia, an increase of 1,892. Many of this increase, especially of men wending their way to British North America, is no doubt to be attributed to the benevolent exertions of associations for assisting emigration. It is satisfactory to observe that 5,881 persons were assisted to emigrate to Canada by charitable associations and the benevolence of individuals; and in these must be added 1,859 artizans and labourers, with their families, from the Government emigrants, to whom passages were granted in the metropolitan Tenter and Consolidated. 23,935 of the emigrants of 1870 are distinguished as being Scotch, an increase of only 376 over the preceding year; and 74,269 as Irish, an increase of 956. The proportion which the Irish emigration bears to the whole emigration of the people of the United Kingdom continues to decrease, and has declined to 58 per cent. in 1870 (the two years in 1870; but the proportion which the number of emigrants bears to the population of Ireland far exceeds the proportion which it bears to England and Scotland. Of the whole [illegible] emigrants in 1870—70,841 Britons or Irish, 48,200 foreigners (chiefly Germans) went to the United States, 10,295 to British North America, 17,008 to Australasia, 4,766 to other parts. On the other hand, the proportion [illegible] of 69,167 passengers came to this country in 1870 in emigrant ships. 24,758 of the number are steerage passengers, 18,709 cabin, and 32,706 steerage passengers came from North America. The emigration from this country in the first quarter of 1871 has amounted to 37,241, being 4,800 fewer than in the corresponding period of 1870. The falling off is principally in the Irish emigration, but this was expected to increase in the year advanced.

The following is a return of the number of paupers [illegible] of London in asylums and [illegible] on the last day of the fourth week of July 1871, and of the corresponding week in 1870 :—

	Paupers					
	Inmates		Outdoor	Total		Corresponding week of 1870
	Adults and children	Adults	Children under 16	Women	July 1871	
West District	6,000	6,000	4,000	10,000	26,000	27,000
South [illegible]	6,000	5,000	2,000	3,000	16,000	16,000
Central District	5,000	4,000	3,000	11,000	23,000	23,000
East District	6,000	5,000	8,000	8,000	27,000	27,000
South District	7,000	6,000	6,000	6,000	25,000	25,000
Total of the Metropolis	30,000	26,000	23,000	38,000	117,000	118,000

* The corresponding week in 1870 was [illegible]

Indoor Paupers of the Metropolis in 1871, 1,351,000

At the close of the last managed banks year on 20th November 1870 there were 470 (registered) savings' banks in operation in the United Kingdom, with 1,064,758 depositors open, and 1,[illegible] due to depositors thereon, £[illegible] paid for England and Wales, £[illegible] in Scotland, £2,903,994 in Ireland, and £[illegible] in the Channel Islands. To meet this liability the trustees had in the hands of the National Debt Commissioners £[illegible] on general account, and £[illegible] separate deposit fund, and the investments of the banks had £[illegible] in land, making in all £[illegible]. The year's expenses of management were £[illegible], averaging 6s 9d per cent. on capital. The rate of interest averaged £2 19s 4d per cent. There were in the year 1,505,544 receipts from depositors, and the average amount was £7 12s; and there were 911,438 payments to depositors, the amount averaging £8 1s 7d. The post office savings' banks had deposits at the end of the year, 1870, amounting to £15,099,104, making with the 'deposits in the trustee savings' banks as ascertained on 20th November a total of £[illegible]. As compared with the amounts a year previously, the trustee savings' banks show an increase of £[illegible], and the post office savings' banks an increase of £1,574,804, making a total increase of £1,979,067 deposits in savings' banks in the year 1870.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during June, 1871.—

IMPORTS.

By Sea.	Ships.	Tons.	By Railway and Canal.	Tons. cwt.
Newcastle	[illegible]	114,144	London and North-Western	61,773 12

EXPORTS, showing the distribution of coal imported into the port or district of London by sea, rail, and canal, and afterwards exported coastwise or to foreign parts, or sent beyond limits of London district, by rail or inland navigation, during June, 1871 :—

EXPORTS.

1. Railway-borne coal passing "in transit" through district	tons		11,702
2. Shipborne coal exported to British Possessions, or to foreign ports, or to the coast	tons	10,[illegible]	
Ditto sent beyond limits by railway		1,[illegible]	
Ditto by canal and inland navigation		2,[illegible]	
			13,486
3. Railway-borne coal exported to British Possessions, or to foreign ports, or to the coast		23,[illegible]	
Ditto by coastwise inland navigation		47	
Ditto by canal and inland navigation		48	
			23,933
4. Sea-borne coal brought into port and exported in same ships			700
Total quantity of coal conveyed beyond limits of coal duty district in June, 1871			109,914
Ditto, June, 1870			80,047

The following return, showing the number and tonnage of vessels which have paid rates to the Liverpool Dock Board, together with the amount of rates and dues received both for ships and goods, for the years ending June 24, 1870, and June 24, 1871, has just been issued :—The number of sailing vessels paying tonnage rates and harbour lights was this year 3,431 foreign and 4,389 coastwise, against 3,482 foreign and 4,[illegible] coastwise last year; steamships, 1,775 foreign and 4,820 coastwise this year, against 1,531 foreign and 4,632 coastwise last year. The vessels paying harbour rates only were this year, 510 foreign and 1,[illegible] coastwise, against 466 foreign and 4,224 coastwise last year; steamships, 51 foreign and 779 coastwise this year, against 68 foreign and 7[illegible] coastwise last year. The receipts from these sources this year amount to £10,174/ 8s 9d, against £87,113/ 14s 10d last year. The dock rates on goods this year amount to £84,120/ 14s 9d, against £83,516/ 10s last year. The town dues on goods, foreign and coastwise were as follow :—£20,077/ 19s 1d this year, against £[illegible] 15s 3d last year. Anchorage dues, £12/ 19s 8d this year, against £8/ 4s 11d; graving dock rates, £1,[illegible]/ 7s this year, against £2,[illegible] 19s 2d last year; graving block rates, £1,[illegible]/ 1s 6d this year, against £1,[illegible]/ 6s last year; dock rent, £4,[illegible]/ 17s 1d this year, against £[illegible] 11s 4d last year. Ground rent, £[illegible] 7s 10d this year, against £[illegible] 0s 4d last year.

An annual Parliamentary return shows that in the year 1870 the imports of sugar and sugar candy into the United Kingdom comprised [illegible],405 cwt. from the British West Indies, against 2[illegible] cwt. from the Mauritius, [illegible] cwt. from Bengal, India, and [illegible],112 cwt. of foreign sugar—making a total of 14,[illegible],807 cwt. In 1869 the total quantity was only 14,[illegible],[illegible] cwt. The import of foreign sugar in 1870 was [illegible] 2,[illegible],[illegible] cwt. more than in 1869, Cuba sending no less than [illegible],[illegible],482 cwt., and Brazil 1,[illegible],[illegible] cwt. The imports from the West Indies and from the Mauritius also showed an increase, that from India a decline. The quantity of sugar and candy retained for consumption in the United Kingdom in 1870 was [illegible],[illegible],[illegible] cwt.; in 1869, 11,[illegible],[illegible] cwt. The reduction of the import duty by one-half in April, 1870, caused a serious loss of revenue. The net revenue from sugar duties was [illegible]/ in 1869 and [illegible]/ in 1870. The export of British refined sugar was [illegible] in 1870 to 579,[illegible] cwt., a value of £[illegible]. The quantity of rum imported in 1870 from the British West Indies and British Guiana increased to 5,764,[illegible] gallons, from Mauritius to [illegible] gallons, and from India and the Straits Settlements to [illegible] gallons. The total is 6,[illegible],[illegible] gallons, an increase of 1,[illegible] gallons over 1869. The British West Indies and British Guiana sent us 5,[illegible],[illegible] lb of coffee in 1870, Java sending nearly 7,[illegible],[illegible] lb, or more than double the quantity in 1869. Ceylon sent us [illegible],[illegible] lb, India [illegible],[illegible] lb, the Straits Settlements 2,[illegible],[illegible] lb, Mauritius only [illegible],[illegible] lb—the total, [illegible],[illegible],[illegible] lb, exceeding that of 1869. So also did the import of cocoa; Trinidad sent as much as 4,[illegible],[illegible] lb, and Grenada, 2,[illegible],[illegible] lb. Of cotton wool we received in

1870, 2,324,256 lb (a larger quantity than in 1869) from the British West Indies and Guiana, one-third of it from Trinidad, and above 500,000 lb from the Bahamas; from India, 340,541,600 lb, being nearly 140,000,000 lb less than in 1869; the import of cotton from Ceylon also fell to 926,128 lb, and from Mauritius to 672 lb. The total import of cotton from these sources in 1870 was 343,782,656 lb, being nearly 140,000,000 less than 1869.

Total.....	116,642,000	... ..	3 25 ·000	.....	89,535,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, August 3rd, 1871

The total since the 4th of January, 1871, is 2,682,710,000*l*, compared with 2,345,403,000*l* for the corresponding period last year, showing an increase of 287,307,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week.	Aug. 7, 1861.	Aug. 5, 1868.	Aug. 4, 1869.	Aug. 3, 1870.	Aug. 2, 1871.
	£	£	£	£	£

Clearing-house return...	...	75.665.000	80,998,000	89.535.000	116.642.000

In 1861, the stagnation of business continued, and the demand for money at the rate to which the Bank minimum had recently been reduced was moderate. The prospect of a long blockade of the southern ports was now inevitable, owing to the victories of the South.

In 1862, the 2 per cent. period continued. Great preparations were being made for the new election, the first after the Reform Act of 1867.

In 1869, money was for the moment a little more in demand, owing principally to Stock Exchange requirements, but the general tendency was still downwards. Affairs in France were becoming very difficult, owing to the strong Liberal vote at the last elections. The Bank of England had just agreed to adopt the practice of paying the Government dividends by means of warrants, if stockholders preferred that course.

In 1870, the Bank rate was advanced to 6 per cent., owing to the continued pressure which the outbreak of the war had caused. War had been declared on the 15th of July, and the campaign on the frontier had just commenced.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 6,090,670*l*; in 1868, an excess of 4,375,052*l*; in 1869, an excess of 3,088,996*l*; and in 1870, a deficiency of 2,902,938*l*. In 1871, there is an excess of 6,890,125*l*.

DISCOUNT AND MONEY MARKET.—The current rates have been, if anything, a shade lower during the week than they were when we last wrote, and the supply of money continues most superabundant. There is a fair business doing, however, in the open market, and it is only the most unusual supply which keeps money at its present low level. The impression is that the tendency in the market is now towards a little more firmness, the demand for all purposes being very good.

The event of the week is the large withdrawal of bullion from the Bank, a second shipment of half-a-million having followed the first shipment to Germany, and the Bank account for the week showing a reduction of the stock of bullion by 1,231,000*l*. In any other circumstances but those of the present plethora of money, so large a withdrawal could hardly have failed to make a sensible impression on the money market, but it has had no discernible effect apart from the slight apprehensiveness which it appears to have excited on the Stock Exchange. It is noticeable that while the bullion in the Bank of England has diminished, that in the Bank of France has increased 720,000*l*, so that the stock there is very nearly what it was a fortnight since.

The principal other change in the Bank account for the week is the diminution of the private deposits by 2,389,000*l*, a change due in part to the withdrawal, but partly also to the natural working of things when there is fair activity in Lombard street just after the payment of the dividends. The private deposits are still very large.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months	1⅝ ¾	per cent.
Do 4 months	2	per cent.
Do 6 —	2⅛ ¼	per cent.
Trade bills—2 and 3 months	2	per cent.
Do 4 months	2¼ ½	per cent.
Do 6 —	2¼ ⅝	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	1	per cent.
Discount houses at call	1	per cent.
Do with seven days' notice	1¼	per cent.
Do fourteen days	1¼	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.

Amsterdam	6	3	6	3½
Brussels	7	4	7	3¾ ½
Hamburg	...	...	7½	3 ¼
St Petersburg	7	6	nom.	6

THE STOCK MARKETS.—As was the case last week, the stock markets have been subject to a great deal of fluctuation according to the varying influences of the weather, and in the case of English railways according to the traffic returns and the announcements of the half-year's results. The general tone has also been dull—the reaction after the great recent rise continuing, and the markets, in the absence of many large operators for the holidays, being less firmly supported than they were. Business for the same reason is restricted, and this is always a cause of depression. In the case of the leading English home securities the general tone is however still apparent. The run upon particular stocks varies, but at intervals it is perceived that a real advance in value takes place in consequence of the general growth of the country, and there is hardly a week but some particular stock changes its level of value. Though there has not been much dealing this week, the new asphalte companies continue to attract attention. The business, from its simplicity and the value of the monopolies acquired, appears to be well fitted for joint-stock management, and the monopoly in some cases, according to the opinion of the best judges, is of singular value. Generally, as we noticed last week, the invitations to the public to embark in new ventures are not meeting with much favour.

The Clearing-house returns for the week confirm what we stated last week as to the magnitude of the settlement. The amount cleared on Friday was 30,356,000*l.* or 2,000,000*l.* in excess of the corresponding settling day of last year, which included a part of the war panic. The figure too is even larger than that of the previous settling day—viz., 28,712,000*l.*—which was remarked as the heaviest settlement which had occurred. We understand that the present settlement was not really so heavy as the previous one, as a large amount of business then remained over to the following days, but it cannot have fallen very far short. The satisfactory feature is that the large figures of the settlements indicate a continuous process of absorption of stock for investment, and are not so much the differences of speculators as they sometimes are. The change in the level of prices which we have lately seen is thus likely to be well sustained.

ENGLISH GOVERNMENT SECURITIES.—These stocks have remained very flat all the week, the apprehensiveness of the Stock Exchange as to the events in France, the prospects of the harvest, and the withdrawals of bullion on German account continuing. The approach of the settlement, which took place to-day has also had some slight influence. To-day the settlement passed off very easily, contangoes being light, and no large amount of dealing to carry over. The closing quotations of Consols, both for money and the account is 93¼ ⅜, and the tone of the market is more easy now than it has been for some time. It seems inevitable, in the absence of any disturbing cause, that a higher value must be shortly attained by English Government and all first-class securities.

The tenders for the new Metropolitan Consolidated Stock were opened yesterday. The amount issued being 900,000*l.*, the total applications were 2,300,000*l.* at prices ranging from 93*l.* to 97*l.* 1s. The sealed minimum was 96*l.* per cent., and tenders above 96*l.* 3s will receive in full—at 96*l.* 3s about 34 per cent.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	93¼	93⅜	93⅜	93½	2s to 9s pm
Monday	93⅜	93⅜	93⅜	93⅝	5s to 10s pm
Tuesday	93⅜	93⅝	93⅜	93⅝	5s to 10s pm
Wednesday	93⅜	93⅝	93⅜	93⅝	7s to 12s pm
Thursday	93⅜	93⅝	93⅜	93⅝	7s to 12s pm
Friday	93⅜	93⅝	93⅜	93⅝	7s to 12s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Nova Scotia 6 % Bonds, 1875	102½ 3½	103 4	+ ½
Queensland Government 6 % Bond, 1884-5	107½ 8½	108½ 9½	+ 1
Victoria 6 %	112 13	113 14	+ 1
Do 5 New 5 %	104 5	104 5	... ...

FOREIGN GOVERNMENT SECURITIES.—There is hardly any feature to notice here, except the continued weakness in all departments. French stocks have apparently reached their maximum price for the moment, the disposition of great holders to realise, and the payments of the instalments, both tending of course to check the advance of the new loan. Spanish securities have also been weak, though speculators are somewhat reassured as to the intentions of the new Ministry; and Turkish have been flat, owing to the non-appearance of the new loan, and the repeated and contradictory announcements regarding it. It has now been three times distinctly stated, and we believe with some truth, that either the actual contract for the loan had been signed, or the negotiation brought to what was understood on both sides to be a conclusion; but at the very last moment a hitch has occurred. The public therefore will be inclined to believe little regarding the new loan till a prospectus is actually issued. Italians have been an exception to the general weakness, and have advanced for the week on the strength of the resolution of France not to interfere on behalf of the Pope. Russian securities have also been exceptionally strong. To-day, the market has continued in much the same as throughout the week, and the changes for the week are mostly insignificant.

The closing quotations of French securities are—New Loan, 53⅝ ¼ prem.; Rentes, 54⅛ 55; and National Defence loan, 98½ ⅝.

With regard to the weakness in Spanish stocks, it may be useful to repeat what we stated last week as to the difficulties in the way of any Government repudiating. The flatness which prevails on the mere rumour of something wrong is itself a warning to any Government which designs repudiation. But if warning were needed, the experience of Austria, which is the latest instance of a great Power repudiating, would be sufficient. It would be difficult indeed to over-estimate the amount of embarrassment and loss which Austria has sustained through the fatal policy of taxing the debt which was adopted. The Government has been entangled and checkmated at every turn in its policy, and is especially impeded in a great scheme of railway extension which would benefit the country immensely, but which cannot make progress. We do not think that on balancing accounts the Austrian rulers and people would see any cause for rejoicing in the course they so hastily adopted. Of course Spain has had experience already of the mischief of repudiation, but Austria's case is more recent, and shows that penalties still follow on similar acts of bad faith.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

English Railways.—This department has been variously influenced. The general tone was flat, especially in the beginning of the week, but particular stocks were adversely or favourably affected by special reports and rumours. Midland especially was flat, owing to rumours that the dividend would be no better or worse than that for the corresponding period of last year, but afterwards rallied on the announcement of a 6½ dividend, which is an advance of ¼. Great Eastern, on the other hand, has been depressed, owing to the report showing that there is nothing available for the ordinary shareholder this half-year, notwithstanding the increase of traffic. In the same way Metropolitan and Metropolitan District stocks were depressed on Thursday by the report of an accident on the joint line at South Kensington, but afterwards rallied on the first accounts of the accident proving to be exaggerated. Great Northern were likewise adversely influenced by the statements in the Great Eastern report as to the unprofitable nature of the competitive coal traffic. Caledonian and North British were on Tuesday especially depressed by a rumour that the arrangements for an understanding had been broken off, but they speedily rallied, owing to the denial of the rumours and the very favourable traffic returns. To-day the market, after opening quietly, became very good, and there was generally an upward turn in prices. Great Northern especially advanced on the announcement of a dividend of 5½ per cent. on the ordinary stock, which gives 5 per cent. on the A stock—figures which are rather better than were anticipated during the last few days. As a result, not only is Great Northern greatly better for the week, but there is a material improvement in other stocks as well. Among the most striking changes for the week are those in London and Brighton, and London and South-Western, the former especially being greatly run upon since the report and the recent traffic returns.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
Caledonian	100¼ ½	.....	101¼ 2	+	1½
Great Eastern	39⅝ 1¼	.....	40 ½	−	⅞
Great Northern	131 ½	.....	133 4	+	3½
Ditto A	146¾ 7½	.....	150 ½	+	3½

South-Eastern	86½ ¾ xd	.....	87¾ ⅞	+	1
Ditto Preferred	117 19	.....	116 18	−	1
Ditto Deferred	56½ 7	.....	57 ½	+	⅜

The quotations for the leading debenture stocks compare as follows with last week:—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
Great Eastern A 5 %	112 14	.....	114 16	+	2
Ditto 1867 Redeemable	110 12	.....	114 16	+	4
Great Western 5 %	113 15	.....	114 16	+	1
London and Brighton 4½ %	102 4	.....	104 6	+	2
London, Chat. & Dover Arbitration 4½ %	95 6	.....	97 8	+	2
Metropolitan District 6 %	123 5	.....	121 3	−	2

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined, amounted for the week ending July 29 to 858,231*l*, being an increase of 43,930*l* on the corresponding week of last year. The principal increases for the week are—North-Eastern, 8,966*l*; Midland, 5,558*l*; London and North-Western, 5,200*l*; Lancashire and Yorkshire, 5,116*l*; Caledonian, 5,008*l*; and North British, 3,663*l*. The following shows the details of the increase or decrease in each case for the week and for the whole period:—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half year to date. Amount.	Inc. or Dec. on Corresndg. per. in '70.
	£	£	£	£
Bristol and Exeter	9,208	− 18	35,899	− 96

American Securities.—United States' Government bonds continue to improve in value, Five-Twenties having again advanced this week. It would appear that the real value of these bonds is at last becoming recognised, and that investors have discovered that they offer a remunerative means of investment in the present state of the money market, even should they be at once paid off at par. There is little doubt that this course would be adopted if a sufficient amount could be realised by the sale of the new 5 per Cents. to carry out the operation. In any event the constant absorption of debt by Mr Boutwell cannot but improve the credit of the United States' Government. A reaction has taken place in Atlantic and Great Western bonds; but Erie shares are better.

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	92¼ ⅜	.....	93⅛ ½	+	⅛
Ditto 1865 Issue	92⅛ ⅜	.....	92 13/16 ⅝	+	1/16

Virginia 6 % Bonds	54 5	.....	54 5	...	...

Joint Stock Banks.—There has been a steady demand for joint stock bank shares, and the quotations leave off at the best point reached for some time past. Bank of Egypt have risen 3; Australasia, Hong Kong, and Shanghai, New South Wales, and Union of Australia, 1; Anglo-Austrian, ⅝; Char-

tered Mercantile of India and Imperial Ottoman, ½. We note no adverse movement of importance.

Telegraph Shares have again been in fair request, and the result of the week's operations is in favour of holders. Anglo-American stock has advanced 2; Marseilles and Algiers shares are ¼ higher; British Indian Extension and French Cables, ¼; British Australian, British Indian Submarine, China Submarine, Falmouth and Gibraltar, ¼. On the other hand, Reuter's and West Indian have given way ¼ and ⅛ respectively. Telegraph Construction shares have ruled flat, and close at a decline of 1. Silver's show a similar reduction, but Hooper's are ¼ better.

Mines.—The mining share market calls for little remark, either in the home or foreign department. Only a moderate amount of business has been transacted, nevertheless the tendency of prices has been upwards. East Lovell has risen 3; Wheal Buller, 2; Wheal Seton, 1; Great Wheal Vor, 1; South Condurrow and Tankerville, ½; Wheal Bassett, ¼; South Wheal Frances shares have given way 2½. In the foreign market we note an advance of 1¼ in Pacific; 1 in Cape Copper and Eberhardts, and ½ in Panulcillo; General Mining have declined 1, and St John del Rey ½.

Miscellaneous.—The changes in this department have been of a favourable nature on the whole, and a fair amount of business has been transacted. We note an advance of 2 in Crystal Palace debentures and Royal Mail Steam shares; 1 in British Indian Tea, Foreign and Colonial Trust, and Canada; and of ½ in Anglo-Austrian Bondholders' certificates. British American Land shares have given way 2, and Rhymney Iron 1.

In the new undertakings transactions have again been limited. Hungarian Land Credit being ¼ to 1; Nantyglo and Blaina Ironworks preference, 4 to 5; Russian Copper Company, 1½ to 2½ pm.; Anglo-Austrian Bitumen, ¼ to 1¼; Anglo-Hungarian Bitumen, 4 to ½; Anglo-German Bitumen, and Belgian-Dutch Paving, ¼ to 1¼. Limmer Asphalte, ¼ to ½; Edinburgh Tramways, ½ to 1¼ pm.; and Dublin Tramways, par to 1 pm.; Lisbon Tramway shares are ½ discount to par. Val de Travers Asphalte, 29 to 31; and Neufchatel Bitumen, 52 to 53 per share.

The Nantyglo and Blaina Ironworks Company announce that the applications for the 5,000 100*l* preference shares have been very numerous, the subscriptions for shares to be paid up in full having exceeded 1,800,000*l*. No allotment will therefore be made to applicants wishing to pay by instalments. The letters of allotment will be posted to-morrow.

With regard to the above Company, the following passage in the prospectus has, we learn, given rise to some inquiries which it should be the duty of the directors to answer. They say:—"An approximate idea of the value "of the property may be arrived at by the statement in the "report, that the rental from surface and land, ground-"rents, rents of cottages, royalties (including those payable "on the company's own consumption), with shops, managers' "houses &c. (in all upwards of 1,500 in number), is estimated "at upwards of 52,000*l* per annum, exclusive of profits from "the works proper." This is hardly explicit enough. If there was an independent rental of 52,000*l* the security of the preference shares would clearly be first-rate, but the statement gives no real information as to what the independent rental is. The sum of 52,000*l* includes "royalties on the "company's own consumption," which of course would not exist at all apart from the company. Their amount then should be stated, as only the balance can be considered independent rental, and therefore a kind of separate security apart from the company.

Exchanges.—Bills of exchange on Antwerp and Paris have been rather more in demand.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Bevan, on the transactions in bullion during the week:—

Gold.—The arrivals from America have somewhat declined during the past week; there is, however, an increased enquiry for bars for the continent, and all gold that have come to hand since our last circular have been sent into the Bank, the total thus disposed of being 331,000*l*. On the other hand, large withdrawals of sovereigns to the value of 1,301,000*l*, have taken place for continental and Eastern requirements, principally from the Bank, and it is expected that further withdrawals will follow. We have received during the week about 250,000*l* from New York, and 81,000*l* per Tagus from the West Indies. The Bank has taken 10,750*l* to Bombay, and the Arawa has 1,300*l* to the Brazils.

Silver remains at the last quotation, say 60½*d* per oz standard. The demand is, however, not quite so good, and the export is entirely to Holland. We have received about 60,000*l* from New York, 40,000*l* from China, and 110,000*l* from the West Indies.

Mexican Dollars.—The amounts lately arrived have been placed, with some little difficulty, at 59 1/16*d* per oz for the new, and 59 3/16*d* per oz for the old coinage, showing a reduction in pricein both instances. The old coinage has declined ¼*d* per oz, as the demand for China has almost entirely ceased.

Exchange on India for Bank's drafts at 60 days' sight 1s 10 15/16*d* per rupee. Applications for India Council bills were received yesterday. The minimum, as before, was 1s 10 1/16*d* per rupee. Tenders on Calcutta at 1s 10 3/16*d* received 26 per cent., and on Bombay at the same rate in full.

Quotations for Bullion.—Gold—Bar gold, 77s 8 1/16*d* to 77s 9*d* per oz std; ditto refinable, 77s 11*d* per oz std; United States gold coin, 76s 3*d* per oz. Silver—Bar silver, fine, 5s 0 5/16*d* per oz std, firm; ditto containing 5 grains gold, 5s 1 1/16*d* per oz std,; Mexican dollars, 4s 11 1/16*d* to 4s 11 3/16*d* per oz.

The sum of 27,000*l* in bar gold was sent into the Bank to-day; while 18,000*l* has been withdrawn, principally for transmission to the Cape.

The *Gazette* return states that the imports of the precious metals during the week ended August 2 were—gold, 235,062*l*; silver, 260,431*l*. The exports were—gold, 595,824*l*; silver, 375,040*l*.

Notice.—Monday next, the 7th inst., will be observed as a close holiday on the Stock Exchange.

NOTICES AND REPORTS.

STOCKS.

Roumanian 8 per Cent. State Domains Loan.—The Bank of Roumania offered to receive subscriptions at the price of 75*l* per cent. for the above loan for 78,000,000f, but upon representations that Roumania is a defaulting State, the advertisement has been withdrawn.

Turkish 6 per Cent., 1864.—Bonds representing 71,900*l* have been drawn for redemption at par.

RAILWAY COMPANIES.

Belfast and Northern Counties.—The half-year's revenue was 62,334*l* as compared with 56,902*l*. The working expenses were 1,507*l* higher than for the same half of last year. The net receipts amounted to 32,065*l*, out of which was deducted the dividends on the preference shares, amounting to 6,791*l*, and the directors recommended the payment of a dividend at the rate of 6 per cent. per annum on the ordinary shares—16,737*l*, leaving 5,000*l* for reserve, and carrying forward 3,537*l*. The doubling of the line between Ballyclare and Dunadry stations will be completed in the course of a month. The Londonderry and Coleraine Purchase Bill has passed. Capital expended, 1,166,241*l*.

Bristol and Exeter.—A dividend at the rate of 4½ per cent. per annum is announced; surplus, 2,118*l*.

Great Eastern.—The following is the half-yearly comparison of the revenue accounts with those of the corresponding period :—

	1870.		1871.
	£		£
Gross receipts	1,016,683		1,050,139
Working expenses	527,084		549,318
Net	489,599		500,821
Add previous surplus	26,592		16,978
Available	516,191		517,799
Deduct preference charges	502,658		512,357
Available for dividend	13,533		5,442
—On the ordinary stock—"nil."	...	("nil.")	...
Surplus	13,533		5,442

Capital Account

	Expended.		Received.
	£		£
To 31st December, 1870	26,956,041		27,013,455
During the half-year	362,243		93,826
Total, 30th June, 1871	27,318,284		27,107,281

The increase in the working expenses was due in a slight degree to the greater cost of renewing payment way, but in the main it was the result of the lamentable conflict which arose between two of the principal railway companies in reference to coal traffic. The Metropolitan Extensions are being rapidly carried out.

Great Southern and Western of Ireland.—Dividend announced at the rate of 5 per cent. per annum; surplus, 9,358*l*.

London and Blackwall.—The report states that the rent has been duly paid by the Great Eastern, and that the usual dividend of 4½ per cent. per annum may be declared. The dividends on the ordinary stock will be paid free of income tax. Sanction is asked for an outlay of 8,000*l* on alterations and improvements.

London, Brighton, and South Coast.—The new spur line to Eastbourne has been opened for traffic.

London and South-Western.—Dividend announced at the rate of 4¾ per cent. per annum; surplus 12,700*l*.

Metropolitan.—The revenue accounts for the half-year showed that 236,601*l* had been received, and 70,474*l* expended in working, leaving a balance of 166,127*l*. To this was added 99*l*, besides 1,591*l* for dividend on shares in the St John's Wood Railway—making 167,817*l*. From this was deducted 51,206*l* for interest on loans, &c., and 114,370*l* for dividends on preference, and at the rate of 3¾ per cent. on the ordinary stocks, leaving 2,240*l* for next half-year. The corresponding distribution was at the rate of 3¼ per cent. Capital expenditure, 7,437,847*l*. The directors propose to take such steps as may be necessary to enable the works of the Eastern Extension between Moorgate and Bishopsgate to be commenced in the spring of next year. The agreement under which this company worked the traffic upon the Metropolitan District terminated at the end of the half-year, and the Metropolitan District Company now conduct their own traffic. A new agreement has been entered into which the directors believe will prove mutually advantageous. The works for the accommodation of the traffic of the London, Chatham, and Dover Railway at Smithfield and at Moorgate street are completed and ready for occupation. The progress during the past six months in the letting and realisation of the surplus lands has been satisfactory.

Metropolitan District.—The capital account showed that 5,145,239*l* had been expended, leaving a balance against the company of 175,251*l*. The estimate of further expenditure was 495,000*l*. The revenue account for the half-year showed that 59,090*l* had been received, and 30,962*l* expended, leaving a balance of 28,128*l* carried in reduction of interest.

Memphis and Ohio Railroad 7 per Cent. First Mortgage Bonds.—Messrs Baring Brothers and Co. receive applications for 3,500,000 dollars, or 700,000*l* sterling, first mortgage bonds of 1,000 dollars, or 200*l* sterling each, bearing interest from the 1st June, 1871, payable by half-yearly dividend warrants on 1st June and 1st December. The half-yearly dividend warrants are each for 35 dollars, payable in New York, free of United States Government tax, or 7*l* 5s 10d sterling, payable in London, at the option of the holders. The principal is to be reimbursed on 1st June, 1901, in New York, or in London. These bonds are secured by a first mortgage of the Memphis and Ohio Railroad, and are also guaranteed by the Louisville and Nashville Railroad Company, a large dividend-paying undertaking, which leased the Memphis and Ohio a few years back. The issue price is 92 per cent.

Midland.—Dividend announced at the rate of 6½ per cent. per annum.

North British.—It has been decided to consolidate all the stocks having a lien upon the line into "4 per cent. Consolidated Lien Stock."

Sirhowy.—Half-year's gross revenue, 14,960*l*, showing 1,241*l* increase. Ordinary dividend notified at the rate of 10 per cent. per annum; surplus, 3,571*l*.

Toronto, Grey, and Bruce Railway of Canada—8 per Cent. First Mortgage.—Messrs Mullens, Marshall, and Daniell have received subscriptions for 80,000*l* (the residue of 134,000*l*) in sterling bonds of 100*l* each, at the issue price of par. The bonds have five years to run.

Ulster.—The gross traffic receipts amounted to 86,355*l*, being 8,966*l* over the corresponding half of 1870. The increase in the passenger traffic amounted to 2,528*l*, and in the goods traffic to 5,734*l*. The working expenses, after being credited with 2,785*l* for working the Banbridge line, amounted to 39,423*l*, showing an increase of 5,062*l*. The amount remaining, after payment of expenses and interest, was 40,990*l*, which included a balance of 7,341*l* brought forward. Out of this the directors recommended the payment of dividends on the preference stock, and at the rate of 6 per cent. per annum on the ordinary shares, leaving 8,362*l*, of which they propose to carry 1,000*l* to renewals. Capital expended, 1,462,382*l*.

Union Pacific.—Messrs Morton, Rose, and Co. announce that the coupons of this company's first mortgage gold bonds will in future be paid at their office, at the exchange of 4s 1d per dollar, and likewise the currency coupons of the Union Pacific land grant bonds, at the rate of 3s 7dd per dollar, both free of all American taxes.

BANKS.

London and Brazilian.—At the meeting, the proposed reconstruction was unanimously agreed to. The nominal capital will be 1,000,000*l*, in 50,000 shares of 20*l* each, one-half paid up.

London and County.—Half-year's profit, including 4,349*l* brought into the account, 94,449*l*. A dividend and bonus, together at the rate of 18 per cent. per annum, were declared absorbing 90,000*l*, leaving 4,449*l*. Deposits, 14,505,287, and acceptances, 2,640,138*l*.

London and South-Western.—The report recommends a dividend of 8s per share for the half-year, or at the rate of 4 per cent. per annum, which will absorb 3,506*l*, and leave 2,563*l*. At the corresponding date of last year the distribution was at the rate of 3 per cent.

ASSURANCE COMPANIES.

Commercial Union Assurance.—An interim dividend at the rate of 5 per cent. per annum is payable on the 8th September.

Globe Marine.—A dividend of 5 per cent. has been declared carrying forward 34,857*l*.

MISCELLANEOUS COMPANIES.

Anglo-Indian Tea, Limited.—Capital, 50,000*l*, in 10*l* shares. An established and progressive business in the wholesale tea trade will be acquired, which is already making profits at the rate of 20 per cent. Dr Edwin Lancaster, late Superintendent of the Government Food Museum, is the chairman.

Australian Agricultural.—A call of 10s per share falls due on the 1st September.

Birmingham and District Tramways, Limited.—Capital, 130,000*l*, in 6,500 shares of 20*l* each, of which 3,500 shares have been already subscribed. The General Tramways Company transfer their interest in the lines sanctioned by the "Birmingham" and "Birmingham and Staffordshire" Tramways Acts to this new undertaking. The routes to be occupied run from Birmingham to Handsworth, West Bromwich, and Tipton, to Aston Park, Moseley road, and to Kingsheath; and the business and plant of the Omnibus Company will be acquired to act as feeders to the great tramway lines.

Birmingham Wagon.—An interim dividend at the rate of 10 per cent. per annum has been declared.

Brighton Clarendon Hotel.—Capital, 32,000*l*, in 10*l* shares. 22,000*l* is to be first issued, to purchase a property known as the Clarendon Mansion and Brill's Old Baths, on the site of which has been erected a building containing whatever is necessary for the requirements of a large hotel.

City of London Brewery.—Out of the profit for the last half-year an interim dividend of 5 per cent. was declared, which will absorb 29,325*l*, and leave a good balance to be carried forward. The reserve now stands at 52,500*l*.

Improved Industrial Dwellings Company.—The report states

that the total income of the half-year is 8,062*l.*, total expenditure 4,370*l.*, profit 4,292*l.* Making deductions and adding previous balance, the sum available for dividend is 6,695*l.*, out of which the directors recommend payment of the usual dividend of 5 per cent. per annum, free of income tax, carrying forward 347*l.*

Iron Ship Coating, Limited.—A further dividend of 5*s* in the pound is payable to the creditors on the 7th instant.

London and Home Wood, Limited.—Creditors are required to send particulars of claims to the liquidators by the 31st inst.

London and Lisbon Contract.—The report for the year shows a balance of 9,122*l.* and recommends the declaration of a dividend at the rate of 8 per cent., free of income tax, half to be paid on the 1st of December, and the rest on the 1st of March. It is also proposed that 4,000*l.* be written off "leases, plant, &c., of Contract Funds, Portugal."

London Investment.—The maximum interim dividend, at the rate of 9 per cent. per annum, is recommended.

Metropolitan Bonded Iron and Steel Co., Limited.—Creditors' claims must be transmitted to Mr Edwin Waterhouse, the liquidator, by the 15th instant.

Midland Railway.—The half-year's net profit, 8,448*l.*, as compared with 6,000*l.*

Northern Assam Tea, Limited.—A dividend of 2*s* 6*d* in the pound is announced on the creditors.

Portland Iron Company of Workington.—The undertaking is to be wound up voluntarily.

Queen's Bench Building.—Mr J. E. Ollive has been appointed official liquidator.

Russian Copper Limited.—Capital, 300,000*l.*, in 30,000 shares of 10*l* each, to be paid up to 5*l* by the 1st December. This company has been established to purchase and increase the productiveness of the "Workings of freehold land in Eastern Russia, belonging to Mr Hodgkin, M.P., and others, and known as the Perm Land Estates." Extensive copper mines and smelting works thereon are stated to produce copper of a valuable description, and charcoal fuel is abundant. It is also stated that limestone and magnetic iron ore abound, labour is cheap and plentiful, and the reports of Captain Rickard and of Messrs Bain Taylor and Sims are of an encouraging character. 313,148 acres consist of forests, from which a good revenue is expected, and 1,818 acres are "rich pasture and corn lands." The purchase price is 250,000*l.*, exclusive of a mortgage of 50,000*l.*, and as much as 100,000*l.* of the price will be taken in shares, and 50,000*l.* in 6 per cent. debentures. The working capital will be about 50,000*l.* Large profits are anticipated.

Scottish Union, Limited.—Dividend proposed at the rate of 4*l* per cent. per annum, payable 5,400*l.*

West India and Pacific Steamship.—Interim dividend, 12*s* per share.

West Surrey Water Company.—Capital, 25,000*l.* in 10*l* shares, and a loan borrowing powers. The object is to supply Chertsey, Walton-on-Thames, Byfleet, Ottershaw, Pyrford, Woking, Guildford, Ripley, and Shepperton, with a regular service of filtered water.

MINING COMPANIES.

Bentinck Coal Co.—Call of 2*l* per share, payable on the 11th August.

Cwm Dwgdu Copper and Silver Lead Mines.—Capital, 12,500*l.*, in 1*l* shares, to be fully paid on allotment. The property, which has been favourably reported upon, is situated in North Wales, and has good railway communication. Both the copper and lead veins are stated to be rich, containing silver, and can be worked to a great depth by means of adit levels.

Imperial Brazilian Collieries, Limited.—Capital, 100,000*l.*, in 20,000 shares of 5*l* each. First issue, 12,000 shares, of which 4,000 are taken by the Provincial Government. The Arroio dos Ratos Collieries, situated in the Province of Rio Grande, are stated to possess an inexhaustible supply of coal equal to Newcastle, and are the only coal mines worked in Brazil. Dwellings in the shape of a heritage of rates rather than dowry to the convent girls, and a world of comfort, have prevented any very extensive trade being done; but the new company will provide a railway and wagons, and will soon begin a production to supply 500 tons daily, at about half the cost of imported British coal. The concession has 26 years to run, and if not renewed the property will be taken by the Government at a valuation.

Richmond Consolidated Mining Limited.—Capital, 220,000*l.*, in 44,000 shares of 5*l* each. The "Virginia," "Richmond," and "Gold Hill" mines situated in the Russian district of Nevansk, in which it is anticipated over 20,000 tons of carbonate of lead ore containing gold and silver ore will be raised, will be made over to this new company together with the best smelting works in the district of Nevansk, or any buildings erected for the sum of 200,000*l.*, of which amount will be in shares. The produce during the first 10 days working has been 30,000 *l.* The promoters have deposited 2,000*l.* to defray the expenses of bringing out the company, and of making an independent investigation of the property.

Tharsis.—Quarterly dividend, 6*s* per share.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade at Mark lane to-day, under the influence of heavy imports and more favourable harvest prospects, ruled dull, and Monday's prices were with difficulty supported for wheat. Maize and oats sold slowly at about stationary currencies. Barley, beans, and peas were nominally unaltered in value in the absence of important business. This week's imports of foreign and colonial produce into London have amounted to 259,509 quarters of wheat, 430 barley, 41,900 oats, 1,530 beans, 340 peas, 12,250 maize, 1,320 sacks and 6,130 barrels of flour.

A steady tone has prevailed in the Liverpool and Wakefield corn markets this morning, though the transactions were far from extensive.

The Liverpool cotton market opened very dull on Friday last, and with only a limited demand prices were rather irregular at a decline of ¼d to ¼ per lb. On Tuesday there was a slightly better feeling, and with more business doing prices have since been much steadier, closing at about last Friday's rates. The total sales are 64,060 bales; of which the trade have taken 51,580 bales; speculators and exporters, 13,480 bales. The imports for the week are 32,532 bales; the actual exports, 8,149 bales; and to day's stock is estimated at 672,950 bales. Quotations for American descriptions have declined $\frac{1}{16}$d per lb, East Indian ⅛d per lb, and Bengals ¼d per lb since this day se'nnight. To-day the market is firm; sales, 15,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended August 3, 1871 :—

	Imported.	Exported.
American.....bales	15,225	2,605
Brazilian	2,383	551
East Indian	14,898	5,630
Egyptian	758	132
Miscellaneous	1,816	242
Total	35,080	9,160

At New York, on July 3, middling Upland cotton was quoted at 19¾ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, July 4 :—Cotton—When our last circular was written our market, under the influence of rather discouraging news from Liverpool, was quiet, and prices had declined to a level of 215 rs per candy for Dhollerah. Yesterday morning Reuter's message of the 3rd instant was received, quoting Dhollerah 7$\frac{3}{16}$d on the spot and 7⅜d. May-June shipment, which has had a further hardening effect on our market, and at the close the tendency is towards higher prices. The transactions reported aggregate as much as 6,800 candies, comprising about 3,400 candies Barsee, Julgaum, and Oomrawuttee descriptions, the balance being chiefly Dhollerah and Veerumgaum. The weather during the past week has again been most unseasonable, only a few showers having fallen, and the rainfall both here, and as far as we have heard in the districts also, is fast falling below the average. No material injury has yet resulted from this, however, and we trust that all apprehensions will be removed by a good downpour before long. The continuance of dry weather has unusually prolonged the cotton season, which it was at first thought would be curtailed materially by the heavy rains in May, and a reference to the figures given below will show that our clearances are now about 60,000 bales in excess of last year's, clearances for June alone having amounted to about 300,000 bales. Arrivals are still coming forward by railway, both from the Dhollerah and Central Indian districts, but they have not latterly kept pace with the sales, and the stock in Bombay, especially of cotton offering fair selection, is now very small.

Export of Cotton from Bombay to July 3.

	1871.	1870.
London.....bales	18,387	1,420
Liverpool	560,159	644,202
Total, Great Britain	578,546	645,622
Channel for orders	44,886	10,379
Continent	220,989	120,434
China	39,623	35,785
Grand total	884,044	812,220

Actual exports since last mail left, 44,659 bales.

There has been more activity in the colonial produce markets, and British West India sugar has sold somewhat freely, at a slight improvement. The decrease in the stocks, as compared with last year, is now about 43,000 tons. Coffee has been in better demand, and we note an advance of 1s per cwt. Cocoa has continued quiet, but rice afloat has met with more inquiry.

Annexed is Messrs Durant and Co.'s circular :—The activity of purchase and buoyancy of market continued more or less throughout the month with some further slight advance in prices. The extent of business in China silk has been limited apparently only by the comparatively exhausted stock. The deliveries are good—far in excess of any previous month in the last few years with the exception of last month and the month of March, 1870, and the aggregate stocks are only slightly in excess of last year. Thus we begin the new campaign comparatively light handed. A very large portion of the business done during the last month has been for arrival—rather a new feature, but the agency of the telegraph seems to render it comparatively free from difficulty, especially in the early part of the season. Japan silk shows a large difference in the deliveries as compared with last month, but this was to be expected. They are still good if only present figures can be maintained. The stock is very large. In Canton silk the stock has been reduced to comparatively moderate dimensions, notwithstanding the very large importation of the two past seasons; but in this silk prices do not mark the same improvement as in China and Japan silk. In Bengal silk the deliveries are far from satisfactory, the comparative abundance of European silk, and the low prices at which large quantities of Japan silk were sold in June, competing with it too successfully.

Mr L. Th. van Houten thus reviews the Dutch tin trade :—A strong feeling prevailed in the tin market this month, and with very little offering a further advance in prices has been established. Banca has been in active demand, and with a limited supply the price improved from 79 fl to 80½ fl. Ex the autumn sale some transactions at 77 fl to 78½ fl took place. Billiton has been in good request, but in consequence of the reduced stock only a limited business is reported at 77 fl to 79½ fl. Some floating parcels changed hands at 77 fl to 79 fl, according to date of sailing. The following statement shows the position of Banca tin in Holland on the 31st July from the official returns published by the Dutch Trading Company :—

	1871.	1870.	1869.
Import in July.....slabs	6,833	9,456	3,035
Previously this year	66,714	114,477	41,414
Total 7 months	73,547	123,933	44,449
Deliveries in July	12,400	7,230	7,322
Previously this year	87,449	73,516	48,951

Unsold stock	70,784	107,875	40,202
Total stock	122,626	166,840	129,449
Stock of Billiton	3,924	2,998	6,914
Import in July	1,273	3,300	...
Delivered and shipped in July	3,500	4,475	900
Quotation July 31... Banca	80½fl	71fl	79½fl
Quotation July 31... Billiton	79½fl	69fl	77½fl

The quantity of Banca tin now afloat for the Dutch Trading Company is 16,100 peculs, equal to 1,006 tons, against 13,900 peculs, equal to 869 tons last year. The estimated quantity of Billiton tin now afloat is 8,808 peculs, equal to 550 tons, against 6,228 peculs, equal to 389 tons, last year.

Messrs T. J. and T. Powell report :—The leather market of the past month has been marked with great activity. The supplies have been of moderate extent, with a very brisk demand; consequently a decided advance in prices of nearly all the leading articles has been the result, and the stocks are

reduced to an exceedingly low point. The cause of the present position of the market may be traced in some degree to the large quantity of leather that was absorbed by the late continental war, and the almost entire suspension of import, particularly of calf skins from France, which the war occasioned: but it is also to be attributed greatly to the generally-improved condition of this country, and the consequent increase in the home consumption. Raw goods have also sold freely. All sorts of sole leather hides have made a very decided advance. **The import of hides from Paris has continued, but the French tanners are now so alive to their own wants, that beyond the fulfilment of existing contracts, it is unlikely that further supplies will be obtained.** The total import reaches a full average, but the stocks, excepting of East India kips, are small.

The annexed is dated New York, July 21:—The general markets remain quiet, and the volume of trade is limited to about the usual summer proportions. Notwithstanding the abundant unemployed resources of the banks and capitalists, and extreme low rates of interest, **there is a marked absence of speculation, even in those departments of trade which, of late years, have been pretty much under control of speculators**—a feature of trade which bespeaks **the return of a more conservative and altogether healthier state of affairs in the world of commerce.** Our local banks now hold $70,000,000 of legal-tenders, against $53,000,000 at the corresponding period last year. This large accumulation is mainly due to the balance of exchanges with the South **having ruled in favour of the North** for some months past, which has brought hither a large amount of the greenback circulation that had long been drifting toward the South and resting there, somewhat to the inconvenience of other sections. A large reduction in the monetary balance of the Treasury has also had the effect of throwing into circulation many millions of money which hitherto has been hoarded, and this fact must operate very materially in favour of continued monetary ease. With cheap money, scarcity gold, and good crops, then, the fall trade promises well.

THE COTTON TRADE.

Total	...	10	14	18	24	27	30	16	20

The cotton market was very quiet in the early part of the week, and a decline of fully ¼d per lb was submitted to; yesterday and to-day the demand has increased, with some advance, but the quotations are still rather below those of last Thursday. For Sea Island there has been an extensive demand, but prices show no change except for the better qualities, which are again slightly dearer. American, after being for comparatively limited request and giving way ¼d to ½d per lb over a week, during the past few days has been more inquired for and business steadier, but prices are still ¼d to ½d below the rates of last week. New York advises to the 3rd instant quote middling Uplands 14½c, owning to sell in Liverpool 10¼d per lb by steamer. For Brazil the demand has been limited, and prices have given way ½d per lb except for Santos, which being scarce is without change. In Egyptian the business has been moderate, and prices of the fine qualities are about ½d per lb lower. East Indian has been freely offered, the recent severe gales giving a better chance to buyers, and prices have given way ¼d to ½d per lb.

In cotton "to arrive" the business has been limited, and after a decline of ¼d per lb, prices have partially recovered. The latest quotations are: American, Lower of middling, not below good ordinary, from any port, September-October delivery 9 5/16d; October-November, 9 5/16d; Mobile, August delivery, ½d. New Orleans, August delivery, not before 21st 9½d, September 9¾d; new crop, not below low middling October-November shipment, 9¼d, October and October-November shipment not below good ordinary, 9¼d, not below low middling. Savannah, August delivery, ½d, bales, September delivery, not below low middling, 9½d; Pernams, nearly due, mutual allowances, 8¾d; Broach, fair new merchants, June sailing, 7¼d; Dhollerah, Cape, fair new merchants, June sailing, 7¼d; Omrawuttee, fair new merchants, June sailing, 7¼d; Scinde, fair new merchants, at sea, 6¼d per lb.

The sales of the week, including forwarded, amount to 64,060 bales, of which 7,330 are on speculation, and 5,150 declared for export, leaving 51,580 bales to the trade.

Aug. 4.—The sales to-day will probably amount to about 15,000 bales, with a firm market.

Monday next, 7th August, being a bank holiday, according to the recent Act of Parliament, will be a close holiday in the cotton market.

585350	672950	1570810	1937430

The above figures show:—

	bales.
An increase of import compared with the same date last year of	777,750
An increase of quantity taken for consumption of	426,620
An increase of actual exports of	310,500
An increase of stock of	107,600

In speculation there is an increase of 183,270 bales. The imports this week have amounted to 32,532 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to July 28) is 46,000 bales, against 50,000 bales at the corresponding period last year. The actual exports have been 8,149 bales this week.

LONDON.—August 3.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market, which gave way ¼d to ¼d per lb, subsequent to the issue of our last circular, has since recovered its tone, and now closes with a better demand at prices nearly equal to that of last Thursday.

Monday, the 7th August, being a bank holiday, according to Act of Parliament, the cotton market will be closed on that day.

NEW YORK.—JULY 21.

For cotton on the spot we have to note a continued firm market, and though there is no actual advance full former figures are in all cases insisted upon, and holders of the stocks are quite indifferent operators. There is nothing particularly new at home to stimulate the position, but the public accounts from Liverpool are very strong, and late private advices are also of an encouraging character, and this throws the advantage in sellers' favour. With an absence of clear margins exporters are unable to operate to any extent in goods on the spot, but continue to take a great many parcels in transit, while for speculative use there has been a fair call to-day, and there is quite an increase in the amounts credited to spinners. The latter class of buyers, as a rule, are operating only on positive orders, and at some of the manufacturing towns we understand the stock to be much in excess of previous calculations. The supply here has been somewhat reduced of late, and this, with moderate arrivals, helps to strengthen the position of sellers. We quote as follows:—

	Upland and Florida.	Alabama.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	15⅜ @ ...	15⅜ @ ...	15⅞ @ ...	16 @ ...
Good ordinary	17⅛ ...	17⅛ ...	17⅞ ...	18⅛ ...
Low middling	19⅛ ...	20 ...	20⅛ ...	20⅛ ...
Middling	21 ...	21⅛ ...	21⅛ ...	21⅛ ...
Good middling	22 ...	22⅛ ...	22⅜ ...	22⅝ ...

For future delivery the movement has been about equal to the average for the week, but there did not appear to be the same confidence as in the market for goods on the spot, and values declined ⅛c in some cases. After 'Change, and up to the close, the feeling was a little irregular, but without resulting in any decided variation in prices for any month.

The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the cotton year:—Receipts at cotton ports since Sept. 1, 1870:—New Orleans, 1,425,840 bales; Mobile, 397,985; Charleston, 344,192; Savannah, 723,272; Memphis, 318,542; Galveston, 303,680; Wilmington, 91,077; Norfolk, 337,699; other ports, 12,587—total, 3,954,874 bales. Foreign exports at Southern ports and New York:—New Orleans, 1,267,590 bales; Mobile, 285,641; Charleston, 175,506; Savannah, 463,491; Galveston, 211,444; New York, 642,773; other ports, 47,307—total, 3,096,752 bales. Stocks at principal ports:—New Orleans, 49,876 bales; Mobile, 9,136; Charleston, 3,971; Savannah, 5,447; Galveston, 13,030; Norfolk, 710; New York, 58,000; Boston, 5,000—total, 145,170 bales.

NEW YORK, July 28.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 11,000 bales, and since the 1st September 3,965,000 bales. Shipments to England, 5,000 bales; total since the 1st September, 3,100,000 bales. Stock at all ports, 157,000 bales. Middling Upland, 9 1/16d, cost and freight, per steamer.

MANCHESTER, August 3.—During the past week our market has remained tame and lifeless in tone, and the aggregate business transacted very small, and much under the production. Producers, notwithstanding the firmer position of the cotton market at Liverpool, are more anxious to meet buyers, as orders are diminishing and running out. Stocks are much less exceptional than they were, still they are not yet numerous. There is but a limited demand for all classes of yarns, and chiefly for present wants. The cloth market is dull in all departments, and the regular trade is interfered with by resale lots, for which less than market rates are accepted. Nearly all our large buyers still keep aloof from the market. The tone at the close is dull, but prices generally steady.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Market is quiet but steady, at Tuesday's quotations; there are offers being made slightly under producers prices, which are refused.

BRADFORD.—The wool market continues very firm. Wethers and matchings are most in request, and there is a considerable amount of business doing in North wools, both hogs and wethers. In the yarn market, spinners are again quoting higher prices, though in most cases this is done to keep off customers. There is no appreciable change in the piece-market. Manufacturers are fully engaged, and could not, without difficulty, accept fresh contracts of any considerable extent, even if they were so disposed. Quotations are again higher.

LEEDS.—The buyers in the coloured cloth hall were not so numerous as lately. Tweeds and meltons are the most saleable goods. Some miscellanous selections were also made in coatings, and there was less hesitation than there has lately been to give the prices asked for the better class of these goods. The market for white goods and Victorias has been satisfactory, and manufacturers, who have for a time withheld from doing so, are beginning to work to stock.

ROCHDALE.—Flannels are not actually dearer than they were a week ago, but manufacturers hold out no other hope than that a still further advance in prices must soon occur. Stocks are low, and few goods are made except to positive order. The makers of Yorkshire goods are busy on orders at the improved prices. Wool is in good request, and prices are stiffer.

DUNDEE.—In our flax market there has been very little business passing, and the tendency of prices has been slightly downwards. Holders, however, do not yet seem disposed to make any material reduction in their demands in order to effect sales, while consumers refrain from adding to their stocks. Tows, of common and medium qualities, continue in moderate demand, and prices of such are unaltered. Fine sorts are still inactive. The jute market is rather weaker, the recent liberal arrivals having supplied the present wants of a good many consumers. Although the consumption continues large, the quantity coming forward is ample to supply it, and there seems now no likelihood of scarcity before supplies of the new crop come to hand via Suez. The trade in linens and jute goods is scarcely so brisk as it was, the dulness in the flax and jute market having caused buyers to refrain from giving out new orders for the present. Manufacturers, however, are still actively employed with former contracts.

BELFAST.—Flax—Supplies almost *nil*. Prices not tested. Yarns—Demand continues very quiet for all descriptions. Stocks have become further increased; prices steady. Linens, brown (handloom)—Demand has been very steady, especially for goods of approved manufacture. Prices rule very firm, with a slightly upward tendency. Powerloom—Transactions entered into for light linens for bleaching, heavy linens, and medium and fine sets of cloth for dying and hollands have been fair. Prices steady. Bleached and unfinished linens—Home business has been fair, still purchasers operate cautiously owing to the advanced rates now demanded. Prices unchanged.

WOLVERHAMPTON.—It has been some time since iron-masters were able to report so favourably of the demand as now. The inquiry extends alike to home and to export, and embraces all the descriptions of finished iron produced hereabouts. The United States and Canada continue to take large quantities of hoops, sheets, bars, and plates. Plates and angles are likewise in excellent request.

BIRMINGHAM.—Throughout the entire district the furnaces are fully occupied, and no small difficulty is experienced in turning out sufficient supplies of pig to meet the increased demand which has set in even at the advanced prices. The tendency of prices is upwards. The mills are at full work both for home and export.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—JULY 21.

The flour market was quite slow, and the tone weak throughout, all classes of buyers showing an indifferent tone, and sellers appearing somewhat anxious to realize, though there was no great excess of offerings. On Western and State the feeling was fairly active for family grades and trade brands, moderately active for shipping grades. Southern neglected, and the low grades are heavy, lower and difficult of sale. Rye flour lower. Extra State, in round lots, offered at $5 80c delivered to $5 70c delivered, with sales of round lots of good at the latter price. Minnesota unchanged. High grades

winter easier, and lower to sell. The wheat market had a slack tone, and the advantage was in buyers' favour generally. Wheat fell off in price, but the decline did not stimulate buyers, and business was very dull. Sales of 57,000 bushels, at $1 45c for amber State; $1 46c for amber Western; $1 35c for steamer No. 2 spring; $1 36c for sail No. 2 Chicago spring; nominal at about $1 37c to $1 38c for best dry No. 2 spring. The market closed heavy, and to sell 2 to 3c lower on spring. White State brought $1 55c, and Duhl Genesee nominal at $1 60c to $1 65c. Corn lower, but the decline buyers operated with freedom. Sales 247,000 bushels, at 71c for high mixed; 72c for yellow; 68½c to 69c for Western mixed, mostly at 69c for ditto, closing with sales at 68½c for ditto, and 68c bid. Southern white nominal at 85c to 84c, and Western white at 80c to 81c.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The short period immediately preceding harvest is usually a very dull time in the corn trade, and this year has proved no exception to the rule. The market has been entirely influenced by the state of the weather, and the character of the harvest reports coming to hand. As these are very variable there has been a great degree of uncertainty in the trade, and the actual amount of business transacted has been hardly sufficient to test prices. Wheat opened with more firmness on Monday last, but the subsequent fine weather caused a reaction in the market, and prices were not maintained to-day. The favourable change in the weather has had a most beneficial effect upon the crops generally, and the wheats have rapidly matured. Harvest is now general in Essex, and cutting will commence throughout the country at an earlier period than was very lately anticipated. The bright weather has also had the effect of improving the quality of the crops, while the complaints of rust and bulging which have reached us are not numerous. Should the weather continue that part of the crop to be harvested in good condition, the producers will generally give way; otherwise old wheat will command a relatively higher price in the market.

Spring corn has ruled dull. Maize and oats have sold greatly on former terms, while barley, beans, and peas have been neglected. The bean and pea crops have now been fairly secured, and the yield is better than could be expected, though where beans suffered much from the frost. The barley and oat crops are favourably spoken of.

Mr. George Dornbusch's return as to the state of the floating grain trade on the Thames during the last eight days [illegible] grain and seed [illegible] cargoes have arrived at ports of call, viz.—65 wheat, 7 maize, 15 barley, 4 rye, 3 beans, 3 linseed, 3 cottonseed. The floating grain trade has been steady in tone and prices tending upwards. Wheat.—Owing to the variable weather, business has been somewhat irregular, but on the whole a healthy tone has been maintained, and on the week a large business has been done. Maize.—Fair sales were effected, but to less money had to be submitted to. Barley.—Fair good marketable cargoes have been steadily dealt in. Rye.—Most of the cargoes arrived have been out of condition; for good marketable lots prices have been supported. The reported sales are as follows:—Wheat.—21 arrived cargoes. Marseilles, 60s. New [illegible] Odessa, from Taganrog, 48s 9d; Russian Odessa, 45s and 47s 6d; Galatz Taganrog, 48s; Saint Jean d'Acre, from Alexandria, 47s to 48s; Galatz, from Novorossiisk, 47s 6d per 480 lbs; No. 2 spring, from Marseilles, 48s; No. 1 ditto, 49s 6d. White Kinds, from Hull, 48s; and Dunkirk, 48s per 480 lbs. To be shipped 2 cargoes No. 1 spring American, 48s and 48s 6d per 480 lbs. Maize.—5 arrived cargoes: Odessa, 32s; Galatz, 31s, old and new Egyptian, 31s 6d per 472 lbs; Wallachian, 29s; and Roumelian, from Kavalla, 27s per 480 lbs; 1 cargo mixed American arrived at London at 28s per 480 lbs. Barley.—4 arrived cargoes Marianopoli, 33s 6d; Azow, 34s and 37s [illegible]; Wallachian, 28s 9d per 400 lbs. Rye.—2 arrived cargoes of Azow at 32s 3d per 420 lbs. Linseed dull and prices tending downwards. Arrived 100 tons East India and Calcutta, at 63s per 410 lbs, and 2,300 qrs Azow and Marianopoli, at 60s 6d per 424 lbs. Rapeseed—to sell, cheaper—arrived 350 tons ordinary brown Calcutta, at 65s to 65s 3d; and 100 tons ryeseed at 59s per 416 lbs. On passage, 500 tons ordinary brown Calcutta, at 64s to 65s per 416 lbs. Shipped, or to be shipped, 5,500 qrs cultivated Danubian, 65s 9d per 424 lbs, and 450 tons ordinary brown Calcutta, at 63s 6d to **64s per 416 lbs. Cottonseed quiet. Arrived, 1,127 tons** Egyptian from Alexandria, 9*l* per ton. On passage—500 tons ditto at 8*l* 18s 9d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTS SUPP."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market is firmer, the trade having made large purchases of West Indian, the latest prices showing 6s per cwt recovery. Other kinds are in some instances rather dearer. Several floating cargoes have sold for the United Kingdom at better prices than could be obtained last week. The very important decrease in the supply of Cuba sugar fails to "pull across the market, as the best crops promise to be very abundant. Imports into West India to yesterday are stated to 3,500 tons. Refined by auction part sold at 29s 6d to 32s; grainy and ordinary 24s to 25s 6d. Jamaica, 26s 6d to 30s 6d. In large, grainy yellow Barbadoes, 32s; grainy white Barbados, 37s to 37s 6d per cwt. Landings at West India last week were large; of most other kinds moderate. The deliveries continue satisfactory, and the stock is nearly 20,000 tons less than at the same date in the previous year.

MOLASSES.—The only business reported has been 300 bags crystallised white at 23s per cwt.

RICE.—1,000 bags sold steadily; fine soft yellow and white, 26s; soft brown and yellow, 24s to 25s.

WOOD.—1,000 bags Jaggery have sold at 29s.

LOGWOOD.—52 tons grainy Guatemala by auction sold at 32s to 34s. Philadelphia 2,500 bags Zaza Manila at 22s.

FUSTIC.—One of Havana is reported for the United Kingdom at 5*l* 12s 6d; 3 of Jamaica at 5*l* 5s to 5*l* 15s; one at 6*l* 5s; one Porto Rico at 27s 6d; lots of West India at 25s 6d to 27s 6d.

ARGOL.—The market is without improvement, and shows some decline. Low to middling dry grade, 32s 6d to 41s per cwt. Dutch brown by auction sold at 38s 6d to 41s per cwt.

MOLASSES.—400 puncheons St. Kitts, Nevis, and Antigua have sold at 11s to 12s per cwt.

RUM.—The market is steady, and the continued large deliveries have brought the stock to about the same as last year. A few sales have been made at firm prices. Demerara, 1s 9½d to 1s 11d; Leewards, 1s 7d to 1s 8d. 430 casks Mauritius sold at 1s 4½d per proof gallon; Jamaica, 3s 5d to 4s 4d per gallon.

COCOA remains quiet. The small quantity of colonial has sold at firmer rates, excepting for the finest qualities, which do not quite maintain their late very high value. 396 bags Trinidad partly sold at 64s 6d to 90s for mixed greyish to fine quality. 348 bags foreign were chiefly bought in—Bahia at 38s to 40s. A small parcel Caraccas sold at 65s to 75s. The sound portions of 2,747 bags Guayaquil withdrawn. Rather heavy landings last week increased the stock to 37,650 bags, against 32,440 bags and 41,650 in the two preceding years at the same date.

TEA.—The very large arrivals of new season's teas by steamers have so unsettled the market that the trade, contrary to their usual custom, refrain from buying. Most of the tea is of rather inferior quality than usual. Prices have hitherto ranged from 1s 7d to 2s 5d by private contract for Moning. 641 chests, per Enterprise, sold by auction, "without reserve," at 1s 10d to 1s 10½d per lb, a decline on the opening prices. Further parcels on the same terms will be offered to-day. At the sales on Tuesday 3,892 packages of old import part sold without material change for red-leaf congou. Siftings at 3d to 3½d per lb. Sales of Indian tea are declared for the 8th instant. The steamers already arrived are the Australia, Erl King, Enterprise, and Craigforth.

COFFEE.—The market has not shown much change, the supplies this week being moderate, but the arrivals continue heavy, and the public sales during the next few weeks will be very large. Native Ceylon meets with more inquiry at firmer rates, several parcels being sold at 53s 6d to 54s for good ordinary up to 56s for bold, and at 59s 6d for fine bold. 743 casks 551 barrels and bags plantation Ceylon went at about last week's rates: pale and grey, 58s to 68s; colory, rather small berry and low middling to middling, 62s to 68s 6d; good middling to fine 69s to 78s. 13 casks Jamaica, fine ordinary to low middling, 56s to 61s 6d. 193 cases 546 bags East India: Wynaad, 59s to 65s 6d; Courtallum, 57s 6d; fine native Mysore kind, 60s to 60s 6d. Privately 200 tons native East India sold at 56s to 57s. 80 half-bales common Mocha were taken in. 382 bags Singapore at 56s to 57s for Bontyne. 118 bags washed Rio sold at 64s. 2,662 bags Costa Rica chiefly found buyers at 55s 6d to 62s 6d. 1,754 bags Guatimala at 55s to 58s. Privately sales of Rio at 57s for good. The stock is now increasing, but it continues below that of last year by about 3,250 tons. Large quantities are in course of landing.

RICE.—The business has been chiefly in floating cargoes, five of which are reported for the continent; three Rangoon, 9s 9d to 10s; one of Necrancie Arracan at 9s 9d; Bassein, 9s 5½d Transactions on the spot are limited in extent. Middling white Bengal has brought 11s; Askoolie, 10s 1½d to 10s 3d; Madras, 9s 1½d to 9s 7½d per cwt.

IMPORTS and DELIVERIES of RICE to July 29, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ..... tons	38100	28860	50450	37470
Deliveries	6840	39600	33810	33380
Stock	22830	3605C	49320	20670

SAGO.—560 bags small grain were taken in above the value.

BLACK PEPPER.—There has been a revival of the demand, and the late highest prices are nearly attained. During the week a rather large business has been done. Singapore, 5⅛d to 5⅜d; Penang, 5⅜d to 5⅝d; about 650 tons reported sold for arrival at 5¼d to 5⅜d, and 5⅛d to 5⅜d for Penang and Singapore. 493 bags good black Trang sold by auction at 6d.

WHITE PEPPER.—Further business has been done in Singapore at 9⅝d. A small parcel in public sale sold at 9⅞d to 10d per lb, being rather higher.

OTHER SPICES.—There have not been any further public sales of nutmegs and higher rates are demanded by private contract, one case good reddish mace sold at 4s 1d. Pimento is without further alteration. 1,253 bags by auction about half-sold at steady prices, from 1⅜d to 2⅛d. Cloves remain without change. 201 bags cinnamon bark and chips sold from 2¼d to 5¼d per lb 214 cases cochin ginger were withdrawn. 250 bags Bengal bought in at 30s. 214 barrels Jamaica sold at full rates to some advance, from 40s to 65s per cwt for ordinary to middling rather bold. The latter description is now sold after the other spice, if the quantity printed exceeds 100 barrels.

SALTPETRE.—The market is firm. At the close of last week a large quantity of Bengal sold at rather higher prices, chiefly at 28s to 29s 6d, refraction 8 to 3½. Since then no change, and the advance has rather checked business. About 850 tons sold to arrive at 28s 6d to 29s 6d usual conditions, and 27s to 27s 6d per cwt without allowances, unless 15 to 10 per cent. refraction.

IMPORTS and DELIVERIES of SALTPETRE to July 29, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	7010	6250	6220	3840
Total delivered	6770	9280	5190	6170
Stock	2630	1780	5215	5800

Deliveries last week 206 tons.

DRYSALTERY GOODS.—The alterations in these markets have been few and unimportant. 300 tons Gambier are reported sold at 15s 9d ex ship. On the spot, a limited business in block. Some cubes have sold at 18s 9d to 23s. Fine cutch has been disposed of at 22s to 23s on the spot, and 150 tons to arrive at 22s. Common kinds are quiet. At public sale good Madras turmeric sold at 21s to 22s. 500 bags Bengal were taken in at 21s 6d. The latter has been sold afloat at 19s 3d per cwt. Some transactions have occurred in safflower at very full prices.

INDIGO.—There is not any new feature to notice in this market, which has been steady, with some inquiry for Kurpah.

METALS.—There has been diminished activity in these markets, and prices have occasionally fallen slightly from the late highest point attained. A few sales of Belgian and Silician spelter are reported at 18*l* 2s 6d to 18*l* 7s 6d; other kinds in proportion. The stock has increased to 5,660 tons. Tin is rather weaker in price, and transactions rather limited: Straits, 133*l* to 133*l* 10s cash or short prompt. To arrive, 134*l*. Banca quoted 136*l* to 136*l* 10s. No change in English. The tin plate trade remains steady. There has been less demand for copper, but prices are nearly as high as last quoted. Sales of Chili at 68*l* to 68*l* 15s. Burra and Walaroo, 77*l* 10s to 78*l*. English inactive. Prices of Scotch pig iron have varied but slightly during the week. This morning the market is active at 61s per ton cash. Railway bars steady at 6*l* 15s to 7*l* per ton at the works. Lead quiet at last week's quotations.

HEMP.—Some business has been done in Manila at firm rates, and holders generally are asking an advance. 300 bales by auction were taken in above the value. The stock of 2,616 tons is much larger than usual. 128 bales East India Sunn hemp were partly sold at 25*l* 5s to 27*l* 5s per ton. Russian is dull.

JUTE.—No alteration in prices can be quoted, but the market is quiet. Supplies in Dundee continue liberal and trade there is rather quiet. The business in this market has been chiefly for arrival. Stocks in London continue small.

LINSEED.—The market remains inactive. Calcutta afloat has sold at 60s 6d to 61s; on the spot, 63s; Bombay quoted 63s 6d to 64s. A cargo of Black Sea has sold at 60s 6d per quarter.

OILS.—Sales of common fish have been upon a small scale. Some business is reported in sperm at 81*l* 10s, but there are now sellers at that price. Olive firm. Business in Tunis and Mogadore at 47*l* to 47*l* 10s. For a cargo of Gioja off the coast 49*l* per tun demanded. Linseed oil is steady at 32*l* 5s to 32*l* 10s on the spot, and a large business for the last four months at 31*l* 17s 6d to 32*l*. Sellers now at the latter price. English brown rape oil firmer, at 41*l* to 41*l* 10s, and 41*l* 10s for delivery in the last four months. Fine palm is firm at 37*l* 10s per ton, and the lower sorts in proportion. Cocoa-nut quiet; Ceylon, 39*l* 10s to 40*l*; trifling sales of Cochin at 51*l* 10s per ton, as the stock is nearly exhausted.

PETROLEUM remains dull. American refined, 1s 6d to 1s 6¼d per gallon, according to date of delivery.

TURPENTINE.—American can be bought for arrival at 36s 6d. The price demanded on the spot is 39s per cwt.

TALLOW.—Prices of foreign are slightly weaker, and the market has been inactive during the week. About 1,500 casks Australian will be offered in the public sales this week. Petersburg is now at 43s 9d to 44s on the spot, and 45s per cwt October to December.

PARTICULARS OF TALLOW—Monday, July 31 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes with a steady demand. 1,108 casks West India sold, making 5,611 casks for the week. The public sales consisted of West India, which part sold at about the former value. Privately 4,000 bags Manila at 22s 3d for Zebu. By auction Belgian loaves part sold at 42s 6d to 43s per cwt.

COFFEE.—718 casks 58 barrels and bags plantation Ceylon by auction found buyers at steady rates. 1,338 bags Mysore were chiefly taken in. A few lots good sold at 73s to 75s. 1,107 bags Costa Rica obtained 59s 6d to 65s 6d. 465 bags Guatimala sold at 58s to 59s 6d.

RICE.—100 tons white Bengal sold at 11s 6d per cwt, ex quay.

BLACK PEPPER.—Singapore sold to-day at 5⅛d per lb.

SALTPETRE.—100 tons Bengal in course of landing sold at 28s 9d for 5 per cent. refraction. 150 tons to arrive at 27s for low quality, as previously quoted.

DRYSALTERY GOODS.—596 bales by auction were brought in at 16s 3d. 1,002 boxes cutch were chiefly taken in. A few lots low from Calcutta sold at 18s 6d to 19s per cwt. 36 bales Bengal safflower part sold at 7*l* 12s 6d to 11*l* per cwt for low middling to good.

SHELLAC.—80 chests sold, including some very fine pale orange, at 7*l* 10s per cwt.

OILS.—784 casks palm two-thirds sold, including Lagos at 37*l* 10s, and Coast oil from 34*l* per ton downward. 570 casks cocoa-nut were bought in.

TALLOW.—1,480 casks Australian sold steadily at 6d to 1s advance. Mutton, 43s to 44s—inferior in proportion. Beef, 36s to 42s. Y.C. advanced to 44s spot, and 45s 3d to 45s 6d per cwt last three months.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that Lisbon oranges sold at good prices. Malaga, Naples, and Sicily lemons easier in consequence of supply being large. West India pine apples and cocoa nuts in good demand. New Brazil firm. Large importations of Oporto onions are selling at a moderate figure.

COLONIAL WOOL.—The market is very firm at closing rates of last sales. Fair business doing by private contract.

FLAX.—Market steady.

HEMP.—Market for Russian is very quiet. Manila very firm, several large holders having withdrawn from the market. 49*l* paid for good roping.

SEEDS.—There is no alteration in the seed trade.

TOBACCO.—The market for North American tobacco has been extremely quiet throughout the past week; buyers have not even operated in small quantities, and there has been almost a total absence of inquiry. Prices continue steady, and for fine desirable descriptions holders are firm, caused no doubt by the unfavourable advices from the States as to the growing crop. In other growths, termed substitutes, and cigar tobaccos there has been but little doing.

METALS.—The business of the week has been rather less than for a fortnight past. Copper not having been in such full inquiry is a shade easier in prices of some kinds. Iron is steady. Tin is in moderate demand, and pretty steady in quotations. Spelter is quiet. Lead in rather more inquiry. Tin plates continue very firm.

METROPOLITAN CATTLE MARKET.

MONDAY, July 31.—The total imports of foreign stock into London last week amounted to 14,215 head. In the corresponding week in 1870, we received 10,626; in 1869, 10,613; in 1868, 11,244; and in 1867 10,217 head.

In the cattle trade to-day there has been less animation. The supply of English beasts has been short, but there has been liberal receipts from abroad. Prime qualities have been in request, and have realised full prices, the best Scots and crosses selling at 6s to 6s 2d per 8lbs. Inferior breeds, however, have been dull and drooping in value. Foreign sheep have come rather freely to hand, but English breeds have been poorly represented. The deficiency in the number, however, has been to some extent compensated for by the quality of the stock. Sales have progressed slowly, but prices have been maintained. The best Downs and half breds have realised 6s 8d to 6s 10d per 8lbs. Lambs have sold quietly at from 7s to 8s per 8lbs. For calves the inquiry has been limited at late quotations. Pigs have met a slow sale on former terms

Supplies on Sale.	August 1. 1870.	July 31. 1871.
Beasts	4,870	3,905

Lamb, 6s 0d to 8s 8d.

HOP MARKET.

BOROUGH, Friday, Aug 4.—This market has continued to exhibit rather a listless aspect owing to the unhealthy appearance of the bine. The business transacted, however, has been of a limited character. Mid and East Kents, 60s to 147s; Weald of Kent, 60s to 105s; Sussex, 60s to 105s; Farnham and country, 80s to 120s; and olds, 20s to 30s per cwt.

POTATO MARKETS

BOROUGH AND SPITALFIELDS, Friday, Aug. 4.—Fair supplies have been on sale. The market has been quiet, at about late rates. Shaws, 60s to 70s; Regents, 55s to 80s; kidneys, 80s to 110s per ton.

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 4.—There was a moderate attendance at this market to-day, but the tone of the market was quiet. Wheat is 1d down since Tuesday. Flour was in good demand at late rates. Indian corn was 3d lower. Beans Salts 33s, ticks, 32s 31; peas, 40s 6d; oats, 3s to 3s 1d; grinders, 2s 6d to 2s 8d; fine, 3s 3s to 3s 6d.

WAKEFIELD Friday, Aug 4.—At this market to-day we have had a fair trade for fine but stocks at last week's rates. Select white is rather in better request, and for such there is a fair sale, at last Friday's prices. Fine wheat is scarce, and in consequence rather dearer. Spring corn is also

The Gazette.

TUESDAY, August 1.

BANKRUPTS.

William Tweddle Bucknall, Devonshire crescent, Paddington, farmer.
Elizabeth Mary Hammond, Red Cross street, City, wholesale milliner.
Arthur Bayne, Exeter, baker and confectioner.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents may remark that their children on returning from the country to new-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, 26 October 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN.

Is extensively used for all kinds of

OUT-DOOR WORK.

It is especially applicable to

WOOD, IRON, BRICK, STONE, AND COMPO.

At the Half-Yearly General Meeting of the Proprietors, held on Thursday, the 3rd August, 1871, at the City Terminus Hotel Cannon Street Station, the following report for the Half-Year ending the 30th June, 1871, was read by the Secretary.

WILLIAM CHAMPION JONES, Esq., in the Chair.

The Directors in presenting to the proprietors the balance sheet of the Bank for the half-year ending the 30th of June last, have the satisfaction to report that after paying interest to customers and all charges, allowing for rebate and making provision for bad and doubtful debts, the net profits amount to £90,100 0s 8d. This sum, added to £4,349 0s 8d brought forward from the last account, produces a total of £94,449 17s 4d.

They have declared the usual dividend of 6 per cent., with a bonus of 3 per cent., for the half-year, free of income tax, being at the rate of 18 per cent. per annum, which will absorb £90,000 and leave £4,449 17s 4d to be carried forward to Profit and Loss New Account.

They have to announce the retirement of their esteemed colleague, John William Bormester, Esq., from the Direction, on account of advanced age, and the election of Frederick Youle, Esq., in his stead.

The dividend and bonus, together £1 16s per share, free of income tax, will be payable at the Head Office, or at any of the Branches on or after Monday, the 14th inst.

Threadneedle street, 1871.

BANK OF BOMBAY
IN LIQUIDATION.

Notice is hereby given, that an Extraordinary General Meeting of the Proprietors of the Bank of Bombay (in Liquidation) will be held at the Offices of the New Bank of Bombay (Limited), in Elphinstone Circle, Bombay, on Monday, the second day of October, one thousand eight hundred and seventy-one, at Three o'clock in the afternoon, for the following purposes:—

First,—To consider and determine as to the propriety of forthwith completing the Liquidation of the Bank, and distributing the surplus assets thereof, and dissolving the Bank according to the provisions of Section XCV. (sections 10 and 11) of Act XIX. of 1857, of the Legislature Council of India.

Second,—To consider and determine on the course to be adopted in order to provide for the debts and liabilities of the Bank not fully outstanding, the nominal amount of which is Rupees two hundred and six thousand five hundred and forty, Annas ten, and Pies nine, according to the particulars stated below, out of which sum of Rupees two hundred and six thousand five hundred and forty, Annas ten, and Pies nine, it is, however, estimated that not more than Rupees fifty-one thousand six hundred and thirty-five will be established as payable.

Third.—To consider and decide as to the adoption of a scheme, whereby, in order to facilitate the dissolution of the Bank and to provide for the said outstanding debts and liabilities, it is proposed that the sum of Rupees sixty-one thousand six hundred and thirty-five shall be placed in the hands of two or more Trustees, to be nominated or approved of by the proprietors at the meeting, Rupees fifty-one thousand six hundred and thirty-five thereof being contributed by the Bank, and Rupees ten thousand, the remainder thereof, being contributed by Mr William Rodgie (the Liquidator of the Bank) upon trust; that the said Trustees shall out of the said sum of Rupees sixty-one thousand six hundred and thirty-five pay all claims in respect of the said outstanding debts and liabilities of the Bank which shall be satisfactorily established before the thirteenth January, one thousand eight hundred and seventy-four; and that the said Trustees shall after the said day stand possessed of the balance of the said sum of Rupees sixty-one thousand six hundred and thirty-five then remaining in their hands (if any) in trust for the said Mr William Rodgie, solely as to any claim in respect of the said debts and liabilities which shall have been established before that time; and that the said Mr William Rodgie shall enter into covenants with the Bank and the Trustees for the payment by him of all claims in respect of the said outstanding debts and liabilities of the Bank which the sum of Rupees sixty-one thousand six hundred and thirty-five proposed to be placed in the hands of the trustees shall not be sufficient to pay, and also for the indemnity to him of the Bank and the proprietors and the Trustees from all responsibility in respect of the said outstanding debts and liabilities of the Bank.—Copies of the Deed by which it is proposed to carry the above scheme into execution in case the same shall be approved by the proprietors may be seen at the Office of Messrs Rivington, Hore, and Langley, Solicitors to the Bank, at Apollo street, Bombay, and at the Offices of E. M. Hore, Esquire, 52 Lincoln's Inn fields, London.

Schedule of outstanding debts and liabilities on twenty-third June, one thousand eight hundred and seventy-one:—

PROSPECTUS

This Company is formed for the purpose of acquiring, and working to an extensive scale, the valuable Collieries of Arroio dos Ratos, situate in the municipality of the town of San Jeronymo, on the river Jacuhy, in the province of Rio Grande do Sul, in the Empire of Brazil.

The vendors have brought the Collieries to their present state of development, and worked the same for some years past, during which time they have supplied, under a contract now expiring, the Provincial Government, with coal for the extensive plant of their steamers, and they have therefore, under the circumstances, as regards transport, all needful in raising the produce to the place of shipment, a distance of nine miles, by inclined trays.

There are two seams of workable qualities opened, throughout the whole of which coal equal to Newcastle of the Admiralty's trial is found.

The purposes to which the capital will be applied are the construction of a tramway from the pits a mile to the shore of embayment, the erection of extensive wharfs, the purchase of the requisite trolley and working stock, the payment of the purchase money, and the provision of the requisite working capital. The capital is fixed at an amount fully adequate to these purposes, the fulfilment of which will enable the Company to raise and distribute large profits, at 20 tons of coal.

The means and capabilities of the undertaking are considerable, as it is considered that these are the only collieries at work in Brazil, and they contain extensive fields of valuable coal, which will constitute a practically inexhaustible source of supply, and the present demands of the Empire, while the extensive works in the province of Parana and its interior will offer to the establishment of manufacturing industry will create a demand for coal enormously.

Official returns obtained from the Board of Trade show that in the year 1870, 37,000 tons of coal were exported from this country to Brazil, and the River Plate, exclusive of other Foreign Ports, to which large quantities have considerably increased.

The Admiralty, steamship and other coal consumers in the Channel Ports of home countries pay a heavy duty on their coals from England, amounting to upwards of 6s. and the present market price of the best steam coal is about 30s per ton; and those large interests in the vicinity of Rio Grande do Sul are about to be formed with gas.

As the results of careful estimates and after making a liberal allowance for all working and other expenses, there will still be a large fund to provide for the redemption of the bonds, a dividend on the capital of 10 per cent, and a balance of profit, of 10 per cent, may be expected to be earned on the capital of the Company in shipping of the coal at prices far below those at which English coal is sold in the Brazils. The following is offered as an approximate rating of the cost of coal per ton:—

Ports	Approximate Distance of Sailing from Rio Grande	Company's Prices	Profit to the Company per ton.
Porto Alegre	100 miles	24s	14s
Pelotas	160 „	24s	14s
Rio Grande do Sul	0 „	24s	14s
Rio	440 „	40s	14s
Montevideo	670 „	44s	14s
Buenos Ayres	970 „	44s	14s
Rosario	1,100 „	44s	14s

Power is reserved to the Directors to invest annually the whole profits of the Company in the name of Trustees or Nominees of the Company, Trustees, to be applied either as a working fund to increase the capital or to be divided as a bonus, or both as circumstances hereafter may arise upon.

The property acquired by the Company consists of—

1. The valuable and known Collieries, the parts immediately now about to come of development.

2. A working contract, and premises, with 60 acres of land, and other buildings.

3. The further right to work 347 acres of the said land for the Company.

4. The valuable contract with the Provincial Government, which, during a period of ten years, can easily be increased with the value of the coal to all steamers and other consumers. The contract commenced on the 1st January, 1871, and extends under a right over Government lands, to the value of the Company's coal, and the Government have the option of renewing it for 10 years from October 1st, 1881, and so on from time to time, as provided that should the Government thereafter not think proper to renew the concession, it shall purchase the entire property of the Company at a valuation. There is no dead rent, but a royalty of one-twentieth is reserved to the Crown, payable in coal or its wholesale money value.

The price to be paid by the Company is £30,000, and a royalty during the term of the present concession of 4½d per ton on the coal sold is reserved to the vendors, who pay the preliminary expenses.

The quality of the coal is equal to Newcastle coal, and at the Paris Exhibition of 1868 the prize was awarded to it.

The quantity of coal obtainable upon the property comprised in the concession may be deemed inexhaustible. Taking as an example the seam now under working, which is 42 feet in thickness, and as there are 7,500 cubic yards of coal in the acre, it follows that in the 347 acres in hand there are upwards of six millions tons of coal, which is equal to an output of 1,000 tons per day during the term of the concession, which is three times the quantity taken as a basis for the calculations leading to the above estimate of 20 per cent. profit. This estimate takes no consideration of the other seams of coal, nor of the 4,193 further acreage claimable by the Company.

In addition to the contract existing between the vendors and the Provincial Government for the supply of the coal, which will be transferred to the Company, the Government have further sanctioned their guarantee of the importations of the enterprise by directing a subscription for shares to the value of £5,000 and this being the first and only coal company in Brazil, any further assistance required from the Imperial or Provincial Government may fairly be expected to be rendered.

The estimates are based upon very low selling prices, and higher rates will undoubtedly be obtained both at the above ports and for delivery to the various steamers paying in the district. The Company will acquire further valuable rights under the same terms upon the expenditure for the above-named and purposes of the required capital, and it is believed that on the renewal the royalty reserved to the Brazilian Government will be remitted, and that an extension of the term of the concession to 60 years will be secured.

The Directors are most fortunate in having secured the valuable services of Mr Lame Jonnson, as Manager of the collieries. This gentleman has had great experience in working collieries in this country and for several years he has been engaged in working and developing the present collieries, he is thoroughly acquainted with the trade and resources of Brazil, and will undertake the same at a very moderate salary and a small percentage upon the net profits of the Company, after paying 10 per cent. dividend to the shareholders and he has agreed, at the option of the Company, to relieve them of the entire responsibility of the works and remove to work the same, and convey a minimum of 300 tons per day to the place of shipment for 7s per ton free on board.

As to the character of the collieries and works, the Directors have the authority of various public documents laid before the Legislature of this country and of Brazil, also the favourable reports of the President of the province and others, which can be seen at the Offices of the Company and of the Solicitors.

Amongst the reports there is the following gentlemen may be mentioned:—Commendador J. Antonio P. Leao, subsequently Minister of Public Works at Rio; of the late Dr L. C. Burlamaqui, Director of the National Museum, Rio de Janeiro; also of Professor Agassiz, and of Mr Carruthers, of the British Museum, together with others by Mr Hunt and Mr Etheridge of the Royal School of Mines.

The Directors will on the application of the shareholders who may have paid up in the full amount of their shares issue warrants transferable to bearer; or, if preferred, applicants can pay up the full amount of their shares in the first instance, and at once receive bearer scrip.

Power is reserved to the Directors to register the Company as a Limited Liability in Brazil.

Applications for Shares on the accompanying form may be sent to the Bankers or to the Secretary, and if no application is made the deposit will be returned without deduction.

The following agreement has been entered into:—

An agreement dated the 28th day of July, 1871, and made between James Johnson, Ignacio José Ferreira da Mesura, and Nathaniel Plant of the one part, and Henry Shaw, of the other part:

THE IMPERIAL BRAZILIAN COLLIERIES (Limited).

FORM OF APPLICATION FOR SHARES.

To the Directors of the Imperial Brazilian Collieries (Limited).

Gentlemen,—Having paid to the Bankers of the Company the sum of £ , being a deposit of 10s per Share on shares in the above company, I hereby request that you will allot me that number, and I agree to accept such shares or any less number you may allot me, and I agree to pay the sum of £1 per share on allotment, and to sign the Memorandum and Articles of Association of the Company when required, and I authorise you to insert my name on the register of members for the number of shares allotted to me.

Quod Attestor.

(Signed) W. W. VENN, Jun., Not. Pub.

The holders of these Bonds must present them on or after the 10th of October next either in London, at the House of Messrs Dent, Palmer, and Company, No. 11 King's Arms yard, Moorgate street; or in Paris, at the Comptoir of Messrs Rés-Odier, Goudchaux, and Co., No. 19 Boulevard Haussmann, where they are exchanged to reflect the remunerement terms for capital and interest.

N.B.—Bonds which are not presented within the delay of a year, reckoned from the period above fixed for their redemption, cannot, according to the conditions of the Loan, be paid subsequently without a special authorisation from the Administration of the Imperial Debt in London or Paris.

HOLLOWAY'S PILLS.—

Biliousness, Disease of the Liver.—Though imperfect sensations or sickness make a man uncomfortable, each will assure the sufferer to be accompanied with derangement of the digestive organs, and irritation of the bowels. In such the gentle actions of these pills produce the most beneficial results. The offer themselves to the notice of all who are troubled with these pills are strongly recommended. These pills are strongly and decidedly purgative, and when used either from [illegible] or [illegible] they produce a [illegible] effect. [illegible] Holloway's Pills [illegible] Sold by all Chemists and Medicine Vendors throughout the world, [illegible] at 1s. 1½d., 2s. 9d., 4s. 6d., 11s., 22s., and 33s. each box.

THE BIRMINGHAM AND DISTRICT TRAMWAYS COMPANY, LIMITED.

Incorporated under the Companies Acts 1862 *and* 1867, *by which the liability of Shareholders is limited to the amount of their Subscription.*

Capital, £130,000, in 6,500 Shares of £20 each.

OF WHICH 3,500 SHARES HAVE BEEN ALREADY SUBSCRIBED.

Payable, £1 on Application, and £3 on Allotment.

Future Calls not to exceed £4 each at intervals of not less than Two Months.

Interest at 6 per cent. will be allowed on all amounts paid in advance of Calls.

DIRECTORS.

The Right Hon. LORD ROBERT MONTAGU, M.P., Chairman.

William Busby, Esq., Chairman of the Liverpool Omnibus and Tramways Company.
Loftus Fitzwygram, Esq., 89 Eccleston square.
Thomas Short, Junior, Esq., Director of the Birmingham Joint Stock Bank.
William Morrison Warden Esq., Deputy-Chairman of the Birmingham Banking Company, Limited.
Major-General Wynne, Royal Engineers (late Government Inspector of Railways).

BANKERS.

The National Provincial Bank of England and its Branches, London.
The Birmingham Joint Stock Bank, Limited, Birmingham.

ENGINEERS.

J. H. Tolmé, Esq., Westminster, S.W.
A. S. Hamand, Esq., Birmingham.

SOLICITORS.

Messrs Cope, Rose, and Pearson, 26 Great George street, Westminster, S.W.
Messrs Allcock and Milward, Birmingham.

SECRETARY (PRO TEM.)—S. J. Nicolle, Esq.

AUDITOR—G. A. Cape, Esq. (Messrs Cape and Harris), 8 Old Jewry, E.C.

TEMPORARY OFFICES—No. 8 Old Jewry, London; and 28 High street, Birmingham.

PROSPECTUS.

The project of constructing and working the tramways sanctioned by "The Birmingham," and "The Birmingham and Staffordshire" Tramways Companies Acts, 1870, and the contemplated extension of those systems, formed originally part of the undertaking of "The General Tramways Company," but in deference to the wishes of many of the subscribers to that Company, and for the other reasons stated in the circular lately addressed to them, it has been determined to carry out these valuable lines as a separate undertaking, through the instrumentality of the present Company, which has been incorporated for the purpose.

The lines authorised by the Acts of Parliament referred to, extend from Birmingham to Handsworth, West Bromwich and Tipton, Aston Park, Moseley road, and King's Heath.

Negotiations have been opened with the Corporation of Birmingham for acquiring the right to establish a system of lines within the borough boundary, in connection with the above, and with other extensions in contemplation.

The Company takes over from the General Tramways Company (Limited) the contract that Company had made with Messrs Waring Brothers for the construction and equipment of the above lines, and also a contract to buy at a valuation to be settled by arbitration, in connection with, and as a feeder to the Birmingham tramways, the business and plant of the Birmingham Omnibus Company.

The lines of tramway authorised by the Acts referred to can be opened for traffic in six months from the present time.

The Directors feel it unnecessary to say more in reference to these lines than that they have been sanctioned by Parliament after due inquiry into the wants of the district, whilst the omnibus traffic of Birmingham is already very large, and, wherever this is the case in popular towns, tramways have invariably proved successful.

The introduction of tramways in large cities and towns, both here and abroad, has proved an immense convenience and an excellent investment. All the lines which have been judiciously selected give large returns on the capital invested, and the shares of most of the established companies command premiums varying from 12 to 50 per cent. The enormous street traffic in Birmingham, and to and from the adjoining manufacturing towns and districts, points to the present as inferior in promise to none of these undertakings.

Applications for shares in the accompanying form should be left at the Company's Bankers.

The deposit will be returned without deduction if no allotment is made.

If an allotment is made the deposit will be applied on account of the amount payable on the shares allotted.

Prospectuses and forms of application can be obtained at the Company's Bankers, the National Provincial Bank of England and its Branches; the Birmingham Joint Stock Bank, Limited, Birmingham; and from the Brokers, Messrs J. and A. Scrimgeour, 18 Old Broad street, E.C.; John Smith, Esq., Bennett's hill, Birmingham; Messrs G. and T. Irvine, India buildings, Liverpool; Robert McEwen, Esq., 9 Commercial buildings, Cross street, Manchester; and Messrs Underhill and Son, Wolverhampton.

The following deed has been executed:—

An indenture dated the 29th day of July, 1871, and made between the General Tramways Company, Limited, of the first part; William Waring, Henry Waring, and Charles Waring, of the second part; and the Birmingham and District Tramways Company, Limited, of the third part.

The above deed and copies of the memorandum and articles of association lie for inspection at the Offices of Messrs Cope, Rose, and Pearson, 26 Great George street, Westminster, S.W., and copies thereof are for the like purpose at the Offices of Messrs Allcock and Milward, 5 Union street, Birmingham, the Solicitors of the Company.

London, 3rd August, 1871.

No applications will be received after MONDAY NEXT, the 7th August inst.

THE BIRMINGHAM AND DISTRICT TRAMWAYS COMPANY, LIMITED.

FORM OF APPLICATION FOR SHARES.

(To be left with the Bankers.)

To the Directors of the Birmingham and District Tramways Company, Limited.

Gentlemen,—Having paid to your Bankers the sum of pounds, being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot to me that number; and I agree to accept such shares, or any less number you may allot me, and to pay a further sum of £3 per share upon allotment, and the subsequent calls thereon, and I authorise you to insert my name on the register of members for the number of shares allotted to me, according to the terms of the prospectus, dated 3rd August, 1871.

Usual signature.....
Name in full .....
Residence .....
Profession .....
Date .....

Addition to be filled up if the Applicant wishes to pay in full.

I desire to pay up my subscription in full, receiving interest according to the terms of the prospectus.

Signature .....

THE BIRMINGHAM AND DISTRICT TRAMWAYS COMPANY, LIMITED.

BANKERS' RECEIPT.

No.———

Received this day of 1871, on account of the Birmingham and District Tramways Company, Limited, from the sum of pounds, being a deposit made on an application for shares in the above Company.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for July, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Railway, Banking, Financial, Insurance, and Miscellaneous Companies, New Companies and New Capital. Prices made up to July 26.

Advertisements for the next Number, to be published on August 29, must be sent to insure insertion on or before August 24.

OFFICE—346 Strand.

THE VALUE OF MONEY.

We hope that there is reason to think that the value of money has seen its lowest point, and that all changes for the future will be in an upward rather than in a downward direction. During the past few weeks there has been a reduction in the supply of, and an increase in the demand for, money simultaneously. Four weeks ago the means of operating on the money market by the Bank of England were much greater than they now are. On the 12th July—

	£	£
Public deposits were	4,216,000	
Private deposits	27,957,000	
Aggregate deposits		32,173,000
Now—		
Public deposits are	4,704,000	
Private deposits	22,873,000	
Aggregate deposits		27,577,000
Decrease		4,596,000

And in consequence the bullion and the reserve of notes in the Banking Department have fallen, though not to the same extent.

The reduction in the means of the Bank is of course principally due to the export of gold to Germany in consequence of the French indemnity. As we showed when that indemnity was first spoken of, it was not likely to have the catastrophic effects expected from it, because it would not be to the German interest to keep up in Berlin much money of which they could make no use. Accordingly, though they obtained by bills in England, and in other ways, a large command over this market, they have not exercised it till lately at all, and are still exercising it only gradually. We cannot say how far this demand will go, but we have no doubt that there is more money to go to Germany, and that the export of it will tend to raise the value of money here.

Secondly. There has been, as we show elsewhere, by a careful analysis of the Clearing-house returns, a great increase in the trade of the country—meaning by trade, for the moment, the dealings in actual goods and merchandise, and not the transactions of the Stock Exchange; these have increased, though not equally. But if we take the returns since June and compare them with those of last year (omitting the Stock Exchange settling days) we have an increase of nearly 95,000,000*l* on 410,000,000*l*, or at the rate of 23 per cent. It is evident that such an increase in the volume of trade must cause an increase in the demand for money. The number of bills generated (so to say) by the trade of last year must be very considerably less than those drawn this year. The number coming to Lombard street for discount will accordingly be greater, and the augmentation in that number will co-operate with the diminution in the supply of money, previously explained, in tending to raise the value of money.

THE NEW ERROR OF THE LORDS.

The assigned reason of the Lords for rejecting the Ballot Bill was that it did not come up to them in time. But to this there are three answers.

First—That as all Bills of importance must be begun in the House of Commons, some must necessarily arrive rather late in the House of Lords. It cannot be said that the present Government has shown a disinclination to introduce important Bills first into the Lords; on the contrary, a very important member of the Government, the Chancellor of the Exchequer, on his first address to the London University, made it a cardinal maxim of policy that some such Bills should be annually so introduced. But in practice it was found that if the Bills came first into the Lords, the Lords would alter them so that the Commons would not pass them. The essentially antagonistic action of the two assemblies

made it certain that it would be so. The only mode of making two discordant chambers agree is to make the more powerful speak first; possibly the weaker may condescend to yield to the stronger; but if you make the weaker speak first, and it says (as in such circumstances it almost always will) what is disagreeable to the stronger, inevitably the stronger will not like it. Practically the introduction of an important Bill (like the Scotch Education Bill) first into the Lords is only so much waste of time; the Lords so change it that the Commons will not have it, and it has to be introduced afresh into the Commons, when time can be found. For the Scotch Education Bill time has never yet been found.

Secondly—That even if the Lords work late (and it is necessary from what has been said that they ought to work *very* late) they would not work one quarter as hard as the House of Commons. Everyone knows that to be an important member (in or out of office) of the Lower House is a severe strain, even upon a firm constitution. The work of a Minister in the Commons who is also at the head of a great department is becoming so severe that no one can for many years do it properly, and perhaps no one ought to attempt it at all. But who ever heard of a Peer being worn out with the work of the Lords? The idea might appear in *Punch*, but it is quite unsuitable for columns so grave as ours.

Thirdly. It is certain, or almost certain, that if the Ballot Bill had come to the Lords in April, the debate on it would not have taken a week. Lord Shaftesbury was no doubt right in claiming for the Lords a right to discuss essential points in the mode of electing the Commons. As the Commons is the supreme House, it would be absurd to exclude the Lords from a subject so important, and it would be pedantry so far to press the constitutional rule that "Peers should not interfere "in elections." But it is not reasonable that the minor points in the election of the Lower House should be settled by the Upper. If the Bill had come up in April, the Lords would not have interfered in the colour of voting papers, and the details of polling booths. They would have discussed the principle of the Ballot, but they would not have changed the mechanical clauses. And the principle of the Ballot they could have discussed now.

Of course we all know that the plea "this is not the time" covers in this case, as Bentham said it did in all cases, a strong objection to the plan at all times. The House of Lords (old Whigs as well as Conservatives) do not like the Ballot. And on the essential merits and demerits of the measure there would be much to be said if the Lords had gone into the argument. A real examination of the subject, we believe, would show that the Conservative Reform Act of 1867—whether that Act was right or wrong—required the Ballot as its complement and its corrective, and that its effects on many sides would be Conservative, and perhaps that the total balance of its consequences might be so.

Lord Granville said, what is no doubt true, that some clever and rich Peer would rather that the Lords should be abolished than not, for that with their wealth and rank they would be sure of seats in the Commons, and so have greater influence. And with his usual courtesy he warned them that even with this sinister aim they would not succeed in destroying the House; that its roots in the nation were too well fixed. But we should give these few and able Peers a stronger reason. It is an old saying that "those at the tops of the tree should not propose a great shake;" if you begin great and violent changes, those will presumably lose most whose advantages are great and unusual. The prestige of an aristocracy is like the credit of a bank: if you begin to impair it, probably it will go altogether. A Peer in England who wants a revolution for *his* benefit is a subject for satire, not for argument. In any change which destroys the House of Lords, titles will go; the custom of primogeniture will go; the right to tie up and entail land for anything like as long as now will go. The rich Peers will not (as Lord Salisbury fancies) have command and control of the Commons, for in a few years the legal system which creates and concentrates the Peers' property would pass away. There would be no such people as our present richest Peers to enter Parliament at all. It would be ridiculous, if it were not melancholy, to see those who have most to lose by a scramble suggesting a scramble, those who probably enjoy greater benefits from accidental circumstances than anyone else in the world proposing to reduce everyone to an equality.

The general public will not believe that Lord Granville's idea is just, or that any Conservative Peers do not care for the continuance of the House of Lords, or rather think they would have more influence if it did not exist. And of course the mass of the Lords do not think so. Their Conservative instincts are too keen, and their rational prudence is too great; but an intellectual minority does think so—one man of violent will strongly thinks so,—and under such guidance the majority of the Lords may be induced to vote for measures, the nature of which they do not see, and the results of which they would exceedingly regret.

THE ORGANISATION OF THE BRITISH ADMIRALTY

The loss of the Captain, the loss of the Megæra, the week's debating upon the business of the Admiralty, all leave on our minds the same impression—that the organisation of the department, as at present arranged, is faulty in principle upon two points. There is no general and permanent head under the First Lord, and he has not sufficient means of obtaining professional advice. The English system of administration, though it has grown up of itself, is in reality a very excellent one, suitable to correct the evils inherent in Parliamentary government, and the departure from it has been attended at the Admiralty with nothing but misfortune. That system is based upon the theory that there exists in every department a permanent and irremoveable chief, who carries on its traditions, who knows everything necessary to be known about all sub-departments, and who is competent to give orders upon any point not involving Parliamentary policy. This officer, though called in England only the permanent Under-Secretary, and paid only 2,000*l* a year, is trusted with the power of the Continental "Minister," but to secure responsibility is obliged to obey the orders of the Secretary appointed by Parliament. On all questions involving policy he does so, but still being experienced, capable, and permanent, he constantly guides his chief; he is rarely over-ruled, and in all matters of service detail he is the real Government. Mr Waddington was, for instance, for years the real Home Secretary, more especially in regard to all judicial questions, and admirably performed the duty; Sir H. Rogers was the real Colonial Office; and Mr Hammond is still, as far as the government of the diplomatic and consular offices is concerned, the Foreign Office embodied in the flesh. In the Admiralty there is no such officer, no man who is the shadow of the First Lord, who can represent him when he is away, who has an eye equally to all departments, and who maintains in all those traditions without which a department must be perpetually making dangerous little experiments in government. Mr Corry's speech of Monday on this point was very dull, as any speech must be when the speaker relies upon extracts from Blue Books as his arguments; but his case was unanswerable. He showed conclusively that there was no such officer, that when the First Lord was sick, or absent, or an incapable man, —as will happen every now and then under a system of election by public meeting,—there is no one to conduct ordinary business with equal knowledge of all its branches. Every such vacancy produces an interregnum, during which half-a-dozen heads of sub-departments grasp all the power they can, squabble with one another, and leave the interests of the State to drift. There is no lieutenant of the First Lord, habitually accustomed to be First Lord in all but name whenever the matter does not involve a policy to be decided on by the Cabinet, and to be defended in Parliament. It is clear to anyone familiar with politics that in a great and complicated department, with chiefs who are rapidly changed by the vicissitudes of Parliamentary warfare, and with men selected for First Lords, not because they understand navies, but because they understand the House of Commons, this deficiency alone must be the cause of disaster, and that until it is remedied there can be no security. Mr Goschen, we perceive, admits this, acknowledging that he is in favour of appointing a General Secretary, and we trust that he will carry out his view. A naval officer, if qualified in other respects, would be the best; but even a civilian would, if competent, become in a few years familar enough with business to steer the department clear of disasters. The Navy, for example, trusts Mr Romaine quite as much as any admiral.

We cannot repeat too strongly that this is the key note of reform, that without this no improvement whatever will or can be made in the Admiralty, but it is easy to see how the deficiency has been made more injurious by the change in the

constitution of the Board. The ancient permanent authority was the Board which, though liable to change, still did not change as often as the First Lord, and in the event of sickness or incapacity filled his place without the service immediately perceiving the loss. This Board has now disappeared. Owing partly to the demand of the public for more responsibility, partly to the growing dislike of Boards, and partly to the temperament of Mr Childers, the ancient Cabinet of the Admiralty has ceased to exist. The "Lords" are still consulted, but in detail, in the room of the First Lord instead of the Board room, and without urgent and public responsibility for their opinions. The effect of this change has been to deprive each subordinate "Lord" of the opportunity of knowing what is going on in other departments, and to make him contend for the interests of his sub-department without reference to the necessities of the whole service. Formerly, if the Administration lasted a decent time, every Lord became more or less competent to do every other Lord's duty; but now, in the event of accident, there is no one competent to fill efficiently a temporary vacancy. This is an urgent evil, and one which might be easily corrected by allowing the Board once more in its collective capacity to see everything, and consult thereon in presence of the First Lord. It need not decide. The notion has been that such a Board diminished the responsibility of the First Lord; but this is not necessarily the case, as we can show by many analogies. Every despotic monarch works with a Council of the kind, hears all that can be said, receives all advice, and gives his orders thereon. It is the same in constitutional countries. There are certain orders in England, for instance, which can be given only by the Premier, yet on which he must consult his colleagues. He does so fully, freely, and in public—that is, with publicity as regards them, all knowing what is being done, but his personal responsibility for the ultimate decision is in no respect impaired. The great railways also are, though not in theory yet in practice, conducted on that system. It is no doubt true that an incompetent, or weak, or infirm First Lord might in such a consultative Cabinet be morally overridden and borne down, but that, we take it, is a good not an evil. Unity of power is most beneficial when we are sure of the man to exercise it; but under the system carried to its logical extreme by Mr Childers, the monopoly of power in the hands of the First Lord is so complete that if he is incompetent or sick the machine goes to pieces, that he can write a minute changing the constitution of the Admiralty in vital points without any man in the Amiralty but himself knowing what has been done. The end to be desired is not however to be sought by diminishing the power of the First Lord, which can hardly be made too definite or real, but by inducing him to exercise it through certain constitutional forms in a manner which will compel him to think out his orders, instead of merely issuing them. Had such a system existed during the past two years the Captain would not have gone to sea without sufficient effort to ascertain how far, under given circumstances, she would lean over; and had there been a permanent Secretary he would have known that there was something very serious against the Megæra to be looked into before she was employed. And, we may add, it would with both advantages have been more easy to bring a powerful Admiral to trial for mistakes in orders which might, as professional opinion believes, have caused the loss of the Agincourt. The appointment of a General Secretary is, we hold, indispensable to the successful conduct of the ordinary business of the Admiralty, while the re-establishment of the Board as a consultative body would be most useful to increase the information at the disposal of the First Lord.

THE NEW LOAN FOR PARIS

The City of Paris is about to issue a loan of 14,000,000*l*. The Budget of the City has for long been on an imperial scale—revenue from taxes amounting to about 5,000,000*l* sterling, and the loan operations resembling those of the borrowing minor States. It was inevitable therefore that after the events which Paris has lately gone through, another great loan must be brought out. A great city which raised its revenue by an octroi could not be besieged for six months without running into debt. An insurrection in which its resources were seized by the insurgent power, and made the support of a campaign of two months, terminating moreover in conflagrations of municipal property, could not but be equally disastrous. As the circumstances described amply justify curiosity as to how the situation will be "liquidated," it is rather fortunate that the new Prefect, M. Léon Say, who has to manage the loan, should be an able and distinguished economist, long accustomed to the study of Parisian finance. The report which he has just issued explains what the history has cost Paris, glances at the means of recovery, as well as for relieving temporary pressure, and is the more interesting because the Hotel de Ville, which held the municipal archives, was burnt in the insurrection, and the Budget has necessarily been got up with such data as were obtainable. That the situation should be so well known, and the municipality be already in working order, is indeed not a little surprising, and is of course highly creditable to the French genius for organisation, and the ability of the new Prefect, on whom so much would depend.

A brief table in the report explains what the loan is wanted for, and tells a good deal that is essential as to how much Paris is the worse for its history. The following is the table:—

	£
1. Reimbursement of Exchequer bills (for public works) ..	1,395,520
2. Liquidation of special departments for bakeries and works	720,000
3. Reimbursement of general Exchequer bills	2,520,000
4. Reimbursement of the Bank (war contribution)	8,400,000
5. Urgent extraordinary expenses	772,749
6. Expenses of loan	191,731
Total	14,000,000

In addition there are certain remainders of the Budgets of 1870 and 1871 to meet, amounting in all to 2,400,000*l*, which it is proposed to add to the floating debt—making it altogether about 4,320,000*l*. Substantially Paris is about 16,000,000*l* worse by the siege. Nominally one or two of the items—especially the first—represent the bequest of the Haussmannic administration, but these remains, so far as included in the new loan, would have been cleared off had it not been for the siege, which made it necessary to divert sundry resources from their intended work. The only other doubtful item is the war contribution, for which Paris reserves its claims upon the State, but the odd 400,000*l* at least is hardly a part of the contribution. It represents a sum originally assigned for the expenses of negotiating the bills of exchange in which the Prussians were paid, but at least 320,000*l* of the amount came back, and was the first money which the new administration had to work with after the insurrection was put down. There is also a doubtful item of 360,000*l* for advances made by the Bank of France to the insurgents out of the City's balances, and for which the City still holds the Bank a debtor. If the City does not make good its claim it will be so much more to the bad.

While the above statement is plain enough it is difficult to frame a parallel statement, showing in what way Paris is worse—how much the ordinary revenue has been deficient, and what are the extraordinary expenses. The Budgets and accounts of 1870 and 1871 are necessarily incomplete. It will be observed, however, that the chief item of the deficiency is the 8,000,000*l* for the war contribution; and the deficiency of revenue in the two years apparently may be put at about 4,000,000*l*. In 1870 we are informed the receipts were less than the estimates by nearly 2,000,000*l*, the octroi alone falling from 4,320,000*l* to 3,272,000*l*. In 1871 again the deficiency of the receipts to meet the expenses will probably be nearly 2,000,000*l*, the receipts having in fact been "disturbed" for nearly half-a-year. About 12,000,000*l* out of the 16,000,000*l* is thus accounted for. The other 4,000,000*l* consist of the extraordinary expenses of various kinds to which Paris was put by the siege—among the principal being the expense of revictualling after the siege, which became a loss to the bakery department by depreciation, the seizures of the Communist, and incendiarism, and the expenses of reconstruction and other public works which were urgent when Paris was its own mistress again. These last amount, it will be observed, to 772,000*l* in the above list, but M. Léon Say makes no concealment of the fact that the above sum does not include the whole expense of rebuilding the Hotel de Ville, and there must be other works, we should imagine which the losses of the siege will render necessary. Anyhow, 14,000,000*l* borrowed and 2,000,000*l* added to the floating debt will tide over present difficulties, and considering that 8,000,000*l* are claimable from the Government the net loss must be pronounced singularly small. Practi-

cally the State of Paris, enjoying a revenue of between five and six millions sterling, has been in the greatest difficulties for a twelvemonth, deprived of its usual revenue, compelled to extraordinary expenses, and subjected to the waste of a siege and insurrection, yet six or eight millions sterling, apart from the disputed claim against the Government, will cover all losses sustained and provide for urgent repairs, the entire municipal life being resumed in a moment subject only to this new burden. It is really marvellous that Paris should come through what it has done with only the liquidated loss—apart always from the war contribution—of a year, or at the outside a year-and-a-half's, revenue.

M. Léon Say gives no statement of how the debt of Paris will stand after the new loan, but he promises a Budget statement when he has his accounts in order. The result we think will show the Paris municipality to occupy almost a unique position among cities in respect of its debt. The whole amount must be close upon 100,000,000*l*, with an annual charge of between 3,000,000*l* and 4,000,000*l*, or about half the revenue. We should think it a most unusual circumstance for a municipality which has only limited work to do and limited taxing powers to be in this position, which is a dangerous one for a State. M. Léon Say reckons however that with economies to be introduced about 400,000*l* or 500,000*l* of new taxes will suffice, so that Paris, in a municipal capacity, will have about a twelfth more taxation through the war. The additional State taxes must make the burden pretty severely felt. But the credit of the great city, as M. Say points out, emerges from the trial intact, and this is certainly a remarkable result of the events which have occurred.

BOARD OF TRADE RETURNS.

THE trade and navigation accounts for July have now been made up, and we are enabled to give our usual detailed statement of them this week. The aggregate figures, allowing for the discrepancy arising from the different mode of calculating the Returns, show a most satisfactory increase both in the inward and outward clearances during the current over any previous year. During the seven months ended July 31, the value of the imports was—

	£	
1869	149,931,303	(computed.)
1870	163,328,345	—
1871	186,507,467	(declared.)

In July only the value was—

	£
1869	24,716,217
1870	24,090,110
1871	31,251,153

Much of the increase, however, is more apparent than real, and is owing to the fact that this year's figures include later dates than formerly. The comparison is therefore not a complete one; nevertheless the actual augmentation is evidently great.

A similar elasticity is apparent in the export trade, and it is satisfactory to find that the increase is not owing to a heavy, and therefore probably temporary, demand for two or three articles, but is apparent almost throughout the list, and is on that account the more likely to be of a permanent character. The declared value of the exports for the seven months was in—

	£
1869	108,880,216
1870	114,555,872
1871	121,456,961

And in July only—

	£
1869	17,394,951
1870	17,446,764
1871	19,817,391

The following table shows the increase or decrease in the value of the imports of the articles enumerated during the seven months of 1871, as compared with the corresponding period in the previous year :—

Articles.	1870. £		1871. £		Increase. £		Decrease. £
Coffee	2,262,883	...	3,444,057	...	1,181,174	...	...
Wheat	8,478,042	...	11,403,685	...	2,925,643	...	...
Cotton	34,425,989	...	37,178,088	...	2,742,099	...	...
Flax	3,109,672	...	2,538,217	...	...	...	571,455
Hemp	732,958	...	1,163,328	...	430,370	...	...
Indigo	2,075,787	...	2,355,742	...	279,955	...	...
Silk, raw	4,183,408	...	3,964,310	...	...	...	119,098
Sugar, unrefined	9,145,209	...	10,425,478	...	1,270,269	...	...
Tallow	1,536,162	...	1,576,317	...	40,155	...	...
Tea	5,293,836	...	6,060,556	...	766,720	...	...
Tobacco	515,929	...	1,140,984	...	625,055	...	...
Wine	2,940,661	...	4,246,459	...	1,290,798	...	...
Wool	11,207,371	...	12,442,311	...	1,234,940	...	...

We give below a list of the leading articles of export, showing the declared values for the seven months, and the increase or decrease as compared with 1870 :—

Articles.	1870. £		1871. £		Increase. £		Decrease. £
Beer and ale	1,230,733	...	1,155,774	...	...	...	74,959
Coal	3,185,408	...	3,271,775	...	86,367	...	...
Copper	1,863,335	...	1,575,072	...	...	...	288,263
Cotton yarn	8,481,153	...	8,623,539	...	142,381	...	...
Manufactures	32,488,116	...	32,345,644	...	...	...	142,472
Haberdashery	2,651,963	...	3,284,683	...	532,720	...	...
Hardware and cutlery	2,162,396	...	2,059,820	...	...	...	102,576
Iron and steel	14,480,328	...	14,284,483	...	...	...	195,845
Linen and jute yarn	1,504,623	...	1,348,544	...	...	..	156,079
Manufactures	4,199,822	...	4,214,523	...	14,701	...	...
Silk manufactures	737,927	...	1,172,247	...	434,320	...	...
Woollen and worsted yarn	2,994,776	...	3,238,885	...	244,109	...	...
Manufactures	12,845,969	...	14,896,855	...	2,050,886	...	...

The following are the totals of wine imported and entered for home consumption respectively in the seven months ended July 31, 1870 and 1871 :—

	Imports. Quantities. 1870. gals.		1871. gals.		Value. 1870. £		1871. £
Red wine	4,713,509	...	5,134,608	...	1,178,743	...	1,590,338
White wine	5,702,675	...	5,938,348	...	1,767,318	...	2,656,521
Total of wine	10,416,184	...	11,072,956	...	2,946,061	...	4,246,859

Entered for Home Consumption.		1870. gals.		1871. gals.
From France	Red	1,793,749	...	2,121,774
	White	712,493	...	530,093
From Portugal		1,593,395	...	1,770,211
From Spain	Red	460,252	...	488,456
	White	3,158,128	...	3,335,908
Other countries		984,851	...	1,259,727
Total	Of wine	8,702,868	...	9,506,169
	Red	3,930,088	...	4,473,686
	White	4,772,780	...	5,032,483

The following is an account of the quantities of certain principal articles of imported merchandise (subject to duties of Customs) remaining in the bonded warehouses of the United Kingdom on the 31st July, 1871, compared with the quantities in warehouse on the 31st July, 1870 :—

	1870.		1871.
Cocoa lbs	7,239,607	...	9,014,084
Coffee	56,891,931	...	73,077,651
Fruit—Currants cwts	76,761	...	56,025
Raisins	54,562	...	33,831
Spirits—Rum ... proof gallons	*6,139,160	...	*6,704,065
Brandy	*9,218,430	...	*12,754,700
Sugar—Refined and candy cwts	90,822	...	108,685
Unrefined	3,338,914	...	3,149,630
Molasses	282,223	...	260,306
Tea lbs	79,448,321	...	75,809,667
Tobacco—Unmanufactured	45,599,555	...	51,034,773
Manufactured and Snuff	1,958,386	...	3,264,731
Wine—From France gals	1,231,246	...	1,682,023
Portugal	4,095,197	...	4,378,255
Spain	7,521,408	...	7,502,437
Other countries	1,045,091	...	1,066,185
Total of wine	*13,882,942	...	*14,628,900

* Including the stock in the Excise warehouses of spirits and wines received under bond from the Customs warehouses, under Act 32 and 33 Vic., c 103.

BUSINESS NOTES.

THE CLEARING-HOUSE RETURNS.—These returns are now becoming exceedingly valuable from the daily evidence they give as to the increase of the business of the country, and during the second half of the present year they have been very striking. The following are the figures compared with those of last year :—

Week ending—	1871. £		1870. £		Increase. £
July 5	120,650,000	...	106,586,000	...	14,064,000
12	86,871,000	...	71,916,000	...	14,955,000
19	122,824,000	...	100,940,000	...	21,883,000
26	83,256,000	...	65,473,000	...	17,783,000
Aug. 2	116,642,000	...	89,535,000	...	27,107,000
9	79,675,000	...	69,063,000	...	10,612,000
	609,917,000	...	503,503,000	...	106,414,000

These figures are really surprising. While the total increase of the present year to date has been 297,919,000*l*, or about 12½ per cent. on the weekly returns of last year, the increase since the beginning of July has been 106,414,000*l*, upon a total of 503,503,000*l*, or at the rate of 20 per cent. As the regular annual increase is about 8 or 9 per cent. per annum, it is obvious at once how the volume of transactions is swollen. Nor is the increase a purely Stock Exchange increase. To a considerable extent it is so, without weakening, however, the evidence furnished as to the increasing amount of real transactions, as the Stock Exchange business done has been largely for the purposes of investment. But it happens that owing to the war there was great activity in the Stock Exchange last year, and the principal part of the above increase is accordingly

not on Stock Exchange settling days. The figures of these days separated from the others are as follows :—

	1871.		1870.		Increase.
	£		£		£
June 29	28,564,000	...	30,366,000	...(- -)	1,802,000
July 14	36,712,000	...	32,461,000	...	4,251,000
— 28	39,356,000	...	30,300,000	...	9,056,000
	104,632,000	...	93,127,000	...	11,505,000

Thus the increase on the settling days is 11,505,000*l* only upon an aggregate of 93,127,000*l*, or at the rate of 12 per cent., whereas the whole increase has been at the rate of 20 per cent. Leaving out the settling days, the increase has been 94,909,000*l*, upon an aggregate of 410,376,000*l*, or at the rate of 23 per cent. Such figures amply corroborate the inferences drawn from the growth of imports and exports, the increase of railway traffic, and the increase of the revenue. As the harvest is now assured as not a very bad one, we may take it as all but certain that 1871 will be one of the most prosperous years yet recorded in our history.

Coal.—The Royal Commission, appointed to consider the question of our coal supplies in consequence of the alarm created some years ago as to their probable exhaustion, has just made its report. The Blue Book is too elaborate to be dealt with at once and without the evidence, but the important fact is that substantially the famous calculation of Mr Jevons is amply confirmed. As the idea has got abroad that Mr Jevons has been refuted, it is to be hoped that due attention will be given to the report, and the popular error corrected. Mr Jevons's postulate was, that our present commercial prosperity and growth as a nation were dependent upon the consumption of a constantly-increasing quantity of coal per annum, that the rate of increase was about 3½ per cent. per annum, and that the workable supply within the islands was so limited that exhaustion would come at an early date. According to the statement of the Commissioners, the known workable supply is 146,480 millions, and beginning with a present consumption of 115,000,000 tons per annum, the whole available quantity would be exhausted in 110 years from this date. Mr Jevons's calculation was made in 1865, and the Commissioners say that the quantity consumed in 1869—107,000,000 tons—corresponded very nearly with Mr Jevons's reckoning. They also add that if they altered Professor Jevons's rate of increase to make it agree with the returns of the ten years ending 1869, they should have to increase it to nearly 4 per cent., which would further accelerate the period of final exhaustion. Mr Jevons is therefore confirmed and strengthened instead of being refuted, and it will be necessary to face the alternative of an exhaustion of our coal supply or a change in the character of our national growth and prosperity. The Commissioners indeed suggest that a diminution of the annual consumption per head of the population is observable if we compare the four years from 1865 to 1869 with the previous six years; but considering that the four years were a stationary period caused by the 1866 panic and the 1867 harvest, and that the average annual increase Mr Jevons refers to is independent of such fluctuations, we do not think the new calculations which the Commissioners submit will be found of much weight. The practical remark however to be made on Mr Jevons's calculations is that 110 years is three generations, and that even a much less period may suffice to change fundamentally the conditions of economic progress and wealth. There is no possibility of paternal legislation to affect our present system of dealing with the coal supply, for the sake of some future benefit or avoidance of danger, under conditions which we cannot foresee.

The Revenue and the Taxes.—We beg to call the attention of all persons having income tax to pay to the figures of the weekly Revenue table. When the quarterly account was published at the end of June, there was a good deal of misplaced lamentation at the apparent falling off, and we pointed out at the time that there were good reasons for believing that the revenue was coming in at a more abundant rate than was estimated in the Budget. The improvement is now still more manifest. Putting aside altogether the exceptional item of "miscellaneous," though it is of good omen that Mr Lowe has already received half of his unusually large estimate, we find that the revenue has increased as follows, so far as the year has gone, under the following heads :—

	1871-2.		1870-71.		Increase.
	£		£		£
Excise	7,394,000	.....	7,290,000	.....	104,000
Stamps	3,323,000	.....	3,265,000	.....	58,000
Income tax	1,206,000	.....	1,155,000	.....	51,000
Telegraph service	170,000	.....	120,000	.....	50,000
	12,093,000	.....	11,833,000	.....	263,000

Although it must be taken into account that the income tax is being levied at an increased rate, the figures as a whole are evidence that there is no real falling off in the sources of our revenue. The point which is apt to be forgotten is that many of the reductions of 1870 are only now coming into effect, and instead of expecting an increase we should rather be quite satisfied if there is no diminution. Mr Lowe estimated last April that he would receive 368,000*l* less from the Excise, and 257,000*l* less from stamps than he had received the previous year, whereas under these important heads, as we have seen, there is actually more money coming in this year than there was last. With regard to Customs again, on which there is a falling off to date of 277,000*l*, the difference is still due to the fact that in the corresponding quarter of last year the sugar duty was levied for some time at the old rate, and that there was a sudden spurt of business immediately after the new duty. The deficiency on Customs moreover has been reduced from 302,000*l* to 277,000*l* since the 30th of June, so that as the year goes on the effect of the special cause of falling off in the first quarter is telling less and less. The whole result is satisfactory, and as the harvest is now turning out fairly well, it is fair to assume that there will be no check this year at least to the growth of the aggregate wealth of the nation and the revenue of the State which depends on it. It is quite likely indeed that the Government, from the desponding estimate they made and their care to provide new taxes for a formidable deficiency, will find itself next April in possession of a heavy surplus—a surplus perhaps so large as to make the twopenny income tax, or at least the half of it, an entire superfluity. Instead of paying the extra pennies in January to meet a serious necessity, we shall all be contributing to swell the plethora of the Exchequer.

Bankruptcy in Absence.—The Lords Justices of Appeal in Chancery have reversed an adjudication of bankruptcy granted against Messrs Charles Brelaz and Gustave Abt, bankers, 121 Regent street, forming the firm of Brelaz, Abt, and Co, under the clauses of the Act which authorise a Registrar to hear a creditor's petition immediately when the bankrupt is alleged to have gone abroad for the purposes of delay. It appeared that Mr Brelaz went to Paris on the 27th of July, returned to London on Saturday the 29th, and found that meanwhile a sealed petition of bankruptcy by a Mr Emiliano Lopez, on the ground that he had gone abroad for purposes of delay, had been left at his house. He attended on the 31st July before the Registrar and obtained a day's delay, but on Tuesday the Registrar declined to receive certain affidavits, and made the adjudication. Their Lordships, however, now decided that the clause in the Act authorising the immediate hearing of petitions in the case of debtors alleged to have gone abroad, did not apply to a case where the debtor was actually present in Court when the petition was being heard. He was then entitled to be heard in opposition as in an ordinary case. The adjudication was accordingly discharged, and the matter referred back to the Registrar to be properly heard.

Ten per Cent. Railway Dividends.—A contingency for which it was thought expedient to provide by the railway legislation of 1844, but which has seemed remote enough for many years, has apparently at last come within the range of possibility, and is perhaps of even probable occurrence within the next two years. It is quite likely that at a very early date we may witness the phenomena of one or more of our great leading lines paying 10 per cent. dividends, and this is a contingency which was contemplated and arranged for by the Act of 1844. The railway world has changed so much since then that it may seem hardly worth while looking up the old clauses, but it may at least gratify curiosity to see how a contingency which has been so long deferred was looked forward to in the infancy of railways. The following is the clause of the 1844 Act, providing for the public interests when railway shareholders were getting 10 per cent. —

1. Be it enacted by the Queen's most excellent Majesty, by and with

the advice and consent of the Lords spiritual and temporal, and Commons, in this present Parliament assembled, and by the authority of the same, that if at any time after the end of twenty-one years from and after the 1st day of January next, after the passing of any Act of the present or any future Session of Parliament, for the construction of any new line of passenger railway, whether such new line be a trunk, branch, or junction line, and whether such new line be constructed by a new company, incorporated for the purpose, or by any existing company, the clear annual profits divisible upon the subscribed and paid-up capital stock of the said railway, upon the average of the three then last preceding years, shall equal or exceed the rate of ten pounds for every hundred pounds of such paid-up capital stock, it shall be lawful for the Lords Commissioners of her Majesty's Treasury, subject to the provisions hereinafter contained, upon giving to the said company three calendar months' notice in writing of their intention so to do, to revise the scale of tolls, fares, and charges limited by the Act or Acts relating to the said railway, and to fix such new scale of tolls, fares, and charges applicable to such different classes and kinds of passengers, goods, and other traffic on such railway, as in the judgment of the said Lords Commissioners, assuming the same quantities and kinds of traffic to continue, shall be likely to reduce the said divisible profits to the said rate of ten pounds in the hundred: provided always, that no such revised scale shall take effect, unless accompanied by a guarantee to subsist as long as any such revised scale of tolls, fares, and charges shall be in force, that the said divisible profits, in case of any deficiency therein, shall be annually made good to the said rate of ten pounds for every hundred pounds of such capital stock: provided also, that such revised scale shall not be again revised or such guarantee withdrawn, otherwise than with the consent of the company, for the further period of twenty-one years.

On the whole, we think the intention of the clause is creditable to the framers of the Act, but their foresight is ludicrously at fault. There will be a doubt, in the first place, as to what is the "paid-up capital stock" of a company. Is it the ordinary capital only, the only capital which should be meant, as it practically receives the profits of the business, and bears the loss? Or does the phrase include preference stocks and perhaps borrowed capital too—the whole capital which has been employed in construction and equipment? The latter interpretation would of course adjourn the period of Government intervention indefinitely, as most railways are far enough yet from paying 10 per cent. on their whole capital, whatever ordinary shareholders receive. If such a point is awaited, the latter would have truly enormous dividends to receive before they need think of revising their fares. The last part of the clause will also strike people who are familiar with the magnitude of our great railways as eminently unpractical. The Government may revise the fares, but then they are to guarantee 10 per cent. to the railways affected. Fancy an undertaking of this kind in regard to only one of our great lines—the London and North-Western, the Midland, Great Western, or North-Eastern, whose aggregate paid-up capital is about forty or fifty millions each, and gross traffic from five to eight millions each per annum. It is clear that when Government thinks of undertaking a monster guarantee of this sort, it must superintend the business to see that it sustains no loss, and that it might as well purchase the railways at once. Plainly when the clause was framed the present great development of railways was not contemplated, but a rare power of interference was reserved for any particular line on the scale then existing if it should chance to be making over 10 per cent. There are many other objections to the clause, such as the difficulty of revising the fares of one company without affecting others, and the constant disputes between the Government and the railway interest which would thus be occasioned; but the foregoing will be enough to show how unsuitable the clause is for the circumstances of the railway world now that the contingency anticipated is about to happen. May we express a hope however that the railway companies will perceive it to be their own interest to act on the spirit of the clause? They are at length making profits enough to be able to try experiments, and one of them ought to be a judicious reduction of fares for every-day travelling, which we are convinced will, in the long run, pay the companies best.

THE COAL TRAFFIC COMPETITION.—The statement of the Midland Railway directors in their report just issued, that the competition between them and the Great Northern for the coal traffic for the North and Midlands is to be abated, will be a welcome announcement to the shareholders of the lines affected. The companies have not quite made it up, but they are essentially reconciled, and see that each would gain more by less traffic than by the attempt to drive the other into an arrangement at a frightful present expense. Accordingly the Midland has raised its rates from the 1st July, and we trust this will be the beginning of the end to the competition. It would be difficult to estimate what the companies have lost. Lord Salisbury, who has no notion of being reticent in such matters, tells us that the Great Eastern, which is only indirectly affected, lost 20,000*l* last half-year, and we may presume that the principal companies concerned lost very much more. But for the insane competition, the Great Northern and Midland might both have made much more considerable additions to their dividend than they have made, and the Great Eastern might have begun to pay something for the first half of the year. The cause of loss being removed, shareholders are entitled to anticipate next year not only the regular improvement of one year upon another, but that the deficiency caused by the untoward competition will at once be made good.

ENDORSEMENT OF DELIVERY ORDERS.—An important question as to the effect of "delivery orders," in the case of goods in dock, came before Mr Bramwell and a special jury on the Home Circuit this week. The question referred to eight butts of wine which the plaintiffs had sold with other parcels to Messrs Crawford, Cruikshank, and Co., whose acceptances they took for the price, and to whom they endorsed the delivery orders. Crawford and Co. sold to the defendant for value, and endorsed the delivery orders to him, and he actually got delivery of all except the eight butts, on which there happened to be a Custom-house stop. Before the stop was removed Crawford and Co. had failed, and the plaintiffs then gave notice to the Dock Company not to act on the delivery orders. It appeared that the wine had always remained in the plaintiffs' names, but the Judge ruled that they had no lien, and that the verdict must be for the defendant. The opinion of a higher Court is to be taken, but the judgment of the inferior Court is thus completely in favour of the view that a delivery order may pass by endorsement, and that those who pass the order also pass the article included.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, August 10.

The return of the Bank of France of to-day, that of last week, and that of the corresponding week of last year, are as follow:—

	Aug. 10, 1871.		Aug. 3, 1871.		Sept. 8. 1870.

In comparing this week with last, these results are presented:—

	francs.
Increase.	
Coin and bullion	1,871,000
Bills discounted at Paris	4,656,000
Treasury balance	8,019,000
Deposits in branches	1,891,000
Decrease.	
Prolonged bills	22,770,000
Treasury bonds	1,000,000
Bills discounted in branches	19,235,000
Deposits in Paris	51,356,000
Notes in circulation	3,744,000

Thus the taking up of the "prolonged" bills in Paris it is already completed in the provinces) has this week made not unimportant progress, though less than that of last week. It is permitted to hope, if nothing untoward should arise, that this item will in two or three months disappear altogether from the Bank accounts. Last week the discounts in Paris declined, and those in the provinces augmented; this week the reverse is the case, and striking a balance of the two there is a rather high decline. In deposits there is a falling off of some importance in Paris, compensated only to a very small extent by an augmentation in the branches. A slight increase in coin and bullion is accompanied by a slight decline in notes.

The news from Versailles is that the Government, *id est*, M. Thiers, maintains its project of taxing raw materials 20 per cent., with drawbacks, notwithstanding the almost universal condemnation it has encountered. It will consequently be brought before the Assembly. We also learn from Versailles that there is, according to present appearances, little chance of the diminution in expenditure that was counted on being effected, at least with the consent of M. Thiers. The Committee on the Budget thought an army costing 380,000,000f would suffice, but Ion. gentlemen insists on having one at a minimum of 480,000,000f. The Committee was in favour of a large reduction of the Navy Budget; M. Thiers requires it to be augmented. So little indeed is this personage disposed to economy that he has just had presented a demand for "supplementary credits" for the army of 1871, amounting to 238,110,155f.

There has been a grand debate in the National Assembly as to whether or not the persons who had houses and property destroyed in the war, or who were made to pay contributions or fines, were entitled to an indemnity, the Government represented by M. Thiers maintaining the negative. A compromise has been come to, under which the persons injured are to receive reparation (*dédommagement*), and until the amount to which they are entitled can be ascertained 100,000,000f shall be immediately distributed among the most necessitous. The arrogant manner in which M. Thiers opposed the demand for redress displeased the Parliament greatly, and the pompatudo with which he has since given up the point is thought to be wanting in dignity.

A Bill has been presented to the Assembly for the sale of the jewels of the Crown, with the exception of those of artistic or historical value. This sale has been more than once proposed, and some months back the remark was made in your Paris correspondence that it was wrong in France, in her straitened financial situation, to keep an important capital dormant in the form of jewelries. Another Bill submitted to the House proposed to augment 20 per cent. the charge for telegraphic despatches.

The report with which M. Wolowski, in French fashion, accompanies the Bill he has presented to the Legislature for imposing a tax on insurance has been printed. It is a very remarkable document. It shows in brief terms that the Government project of taxing raw materials would be ruinous to industry, and that that of drawbacks would open the door to extensive frauds. At the same time it admits that manufacturing industry must bear its share of the financial burden the war has cast on the country, and it proposes that to make it do so its products shall be taxed. But how are those products to be got at? M. Wolowski answers by means of invoices or bills of sale (*factures*), and he proposes that the amount of the tax shall be 2 per cent. The practical means he recommends are ingenious. Suppose (he says) a cotton spinner buys a bale of cotton for 500f. The invoice indicating the sale will have to bear a stamp of 10f. The spinner in turning the cotton into yarn will sell it for 750f, and will require a stamp of 15f. In that stamp of 15f he will count 10f as paid, and will only have to pay 5f. The weaver of the yarn, having transformed it into a fabric, will sell his product at a higher figure and with a higher stamp but will calculate 15f as paid. The retailer, on his part, will have to pay another tax, counting therein all those previously paid, and he will divide the whole among individual consumers, "on whom in definitive all taxes fall." The stamps used are to be obliterated at each transfer, and without them no receipt for payment is to be legal. As to retail transactions in which bills are not given, the stamp is to be imposed on the declaration of the trader, and to prevent fraud he is to be made liable to produce his books showing the quantities of goods received and sent out, also to a heavy fine. M. Wolowski calculates that this stamp duty will produce 180,000,000f, which is 10,000,000f more than M. Peuyer-Quertier calculated on for his 20 per cent. on raw materials. In case of goods exported, M. Wolowski proposes that the stamp duty shall be restored.

The Prefect of the Seine (Paris), M. Leon Say, has lost no time in laying before the new municipal council a report on the financial situation of Paris. The preparation of it presented some difficulty, owing to the destruction of books and papers in the burning of the Hotel de Ville. It says that it is necessary to liquidate the situation left by the costly administration of Imperialism and by the siege, and comes to the conclusion that the amount required for that purpose is 345,206,730f, thus composed:—Reimbursement of the bonds of the Caisse des Travaux (one of Baron Haussmann's machines for raising money), 34,888,000f; winding-up of the said Caisse and of the Caisse de Boulangerie, 18,000,000f; reimbursement of bonds of the Caisse Municipale, 63,000,000f; reimbursement to the Bank of France for the war contribution, 210,000,000f; and extraordinary expenses of an urgent character, 19,318,730f. M. Leon Say proposes to borrow the said amount, and to add to it 4,793,270f for the expenses of the operation, the total to be got being thus 350,000,000f. He remarks that when a loan has to be raised for a public purpose, it is necessary to prove two things—first, that it is not too high; next, that it is not too low; and he establishes both points with great clearness. His report has been read with marked interest by the public, and is much admired. Within the next few days the municipal council, and after it the National Assembly, will have to sanction the loan, and then the former will fix the conditions and the date of issue.

A good impression has been created on the Bourse by the statement that the Prussian troops will soon evacuate the vicinity of Paris, and by the expectation that the powers of M. Thiers will be prolonged, so as to give France a Government that will present a certain degree of stability. The movements of the Credit Mobilier have been watched with interest, from the report that Baron Haussmann is about to be placed at the head of that "institution." The Suez Canal has been made to advance because a loan is about to be demanded. The following are the quotations:—

According to a newspaper of Lille, M. Thiers was proposed to England to let cotton yarn imported into France of No. 60, be augmented 5 per cent., and above 60, 5 per cent., but to leave linen yarns untouched. The journal describes this news as "grave" for the industries of the town.

The newspapers relate that a curious statement has been made by M. Leon Say, Prefect of Paris, to the Committee on the Budget at Versailles. The war contribution of 200,000,000f imposed by the Prussians on the City of Paris being payable in gold, was furnished by the Bank of France on condition that the City shall repay in metal. While the town was engaged in buying up money in foreign markets, a proposition was made to it to purchase at a premium part of the gold originally paid. Thus the Prussian Government sold at a profit part of the money extorted from Paris.

In an action before the Civil Tribunal relative to the Compagnie Immobilière, the decision has been given that a single shareholder may proceed against a director personally. The directors attacked contended that actions could only be

brought against the whole board collectively, and by the shareholders collectively.

The report of the Comptoir d'Escompte, mentioned last week, states that the total operations of 1871 were 1,770,000,000f, whereas those of 1869-70 were nearly 3 *milliards*; that the discounts in Paris, in the country, and abroad, declined more than 600,000,000f; that the operations of colonial agencies fell off 671,000,000f.

In the meeting of the shareholders of the Orleans Railway which has just been held, the report stated the receipts of the new network in 1870, after deductions of working expenses, 12,300,000f, so that the Government will have to supply 31,630,000f to make up the 4.65 per cent. guaranteed on the expenses of construction. The gross receipts of the old network were 88,800,000f, about 8,200,000f less than in the year preceding. After deducting working expenses and charges of all kinds there remained 30,149,104f for the shareholders. Of this sum 12,000,000f, representing 20f per share, have been paid, and a further sum of 13.800,000f, or 23f, is to be distributed. Another distribution of 7f is to be made hereafter, and there will remain a balance to be carried forward. In 1869 the dividend was 56f, and that of 1870 is not so much below it as from the war might have been feared.

The shareholders of the Lyons-Mediterranean Railway, in their meeting which has also taken place, were informed that the receipts of the new network had necessitated a levy of 8,697,123f from those of the old, and that the total of these latter were 199,773,384f. After deducting working expenses and all outgoings from that sum there were 34,636,104f for distribution. This gives 40f; in the year preceding the dividend was 60f. Thus the company has suffered severely from the war and from the Commune. In addition to the loss of receipts, a material damage, to the amount of 3,365,900f, was done.

The Messageries Maritimes (ex-Imperiales) have held their meeting. Considerable perturbation in the operations of 1870 was occasioned by the war. The number of passengers carried was 254,227, about 27,000 more than in 1869; but a great many of them were Government officials or military, who travelled gratuitously or at reduced prices. The quantity of goods conveyed was 204,786 tons, 19,000 less than in the year preceding; and that of precious metals and articles of value was 251,508,483f, an increase of 11,500,000f. The gross receipts of all kinds were 42,916,778f; in 1869 they were 45,376,822f. The net profits were 3,346,378f; the year before 5,284,774f. A dividend of 27f 50c on old shares, and of 13f 75c on new was declared.

The Credit Agricole reports that its net profits in 1870 were 134,084f, notwithstanding its operations in the last six months of the year were, on account of the war and the siege, extremely limited. A dividend of 10f per share was declared; it will absorb 800,000f, and the rest is to be added to the reserve.

The Comptoir d'Agriculture, a similar establishment, made profits of 374,452f in 1870, and gives 10f per share.

An advertisement informs the shareholders of the Comptoir des Capitalistes, in liquidation, that they can recover the whole of their capital, and in addition to 7½ per cent. of it as their share of the assets left, a further sum to be distributed hereafter. It is stated that during the five years the Comptoir was in existence it distributed dividends amounting to 93 per cent. The reason for winding-up so prosperous an enterprise is not stated.

The new Belgian loan of 50,000,000f effective, which has been for some time talked of, has been brought out this week at Brussels. 31,000,000f were offered to public subscription, and the rest was taken by Messrs de Rothschild and other bankers. The loan is in 4 per cent. stock, and the price is 98f. The part offered to the public was immediately covered.

Transactions in the markets have not been very active during the last three days. The following are the quotations per 50 kilogrammes, duty paid:—

COTTON.—At *Havre*, New Orleans very ordinary, 106f to 107f: Oomrawuttee, good ordinary, 88f to 89f, and fair, 86f.

SUGAR.—At *Havre*, French West India usine, 70f. At *Marseilles*, Havana, 42f 50c, No 12. At *Bordeaux*, Guadeloupe usine, 71f.

COFFEE.—At *Havre*, Cape, 133f; Rio, 129f; ditto washed, 142f; Santos, 130f to 133f 50c; Java, 145f; Capitania, 127f 50c. At *Bordeaux*, La Guayra garbled, 145f. At *Marseilles*, Rio, 127f.

WOOL.—At *Havre*, Monte Video washed, 290f the 100 kilogs; ditto unwashed, 175f to 215f; Buenos Ayres ditto, 160f.

TALLOW.—At *Havre*, Buenos Ayres, 53f 50c; New York, 55f 50c and 56f 50c.

INDIGO.—At *Havre*, Bengal, 12f the half-kilog.

OLEAGENOUS SEEDS.—At *Marseilles*, Coromandel, 50f and 49f 50c; Calcutta, 49f 50c the 100 kilogs.

HIDES.—At *Havre*, Monte Video salted ox, 75f; Para salted, 65f; Lima salted ox, 66f 50c; cow, 67f; Rio Grande salted ox, 70f; Pernambuco dry salted, 98f.

THE PUBLIC REVENUE AND EXPENDITURE.

Increase	14,956	57,501	72,457

COMMERCIAL AND MISCELLANEOUS NEWS.

In illustration of the results of the introduction of steam, *viâ* the Suez Canal, into the China trade, it is mentioned that the steamship Craigforth, of Leith, a vessel of 1,109 tons gross register, and 140-horse power, arrived at London on the 3rd inst. from Hankow, with a full cargo of the new season's teas, having been absent from London exactly four months and 22 days, during which time she had made her outward voyage, and delivered and re-shipped cargo at Singapore, Hong Kong, Shanghai, and Hankow, returning one of the first three steamers, and having accomplished the voyage to and from Hankow in a shorter time, it is believed, than any previous vessel.

A Parliamentary return, moved for by Mr Baines, gives an account of the business transacted in the year 1870 at every Post Office Savings' Bank in the United Kingdom. The return shows that there are several Post Office Banks in England with deposits exceeding 50,000*l*; and the bank at the head Post Office at Birmingham has deposits exceeding half-a-million sterling, although there are several other Post Office Banks in that town. The deposits in the Post Office Banks in Middlesex, including the "city" of London, amounted at the close of 1870 to no less than 2,728,634*l*; in Surrey, to 1,084,899*l*; in Kent, 1,011,893*l*; in Warwickshire, 925,791*l*; in Lancashire only 899,345; and in all Yorkshire only 613,566*l*. The Post Office Banks appear to be, to a considerable extent, used for other purposes than that of permanent investment of savings, for about a third of the entire deposits held was withdrawn in the year, and at many Post Offices one-half. Some country districts or centres of country districts show a great contrast to this; the deposits in the Post Office Bank at Blandford exceed 50,000*l*, and in that at Canterbury they exceed 138,000*l*; and in both instances the year's withdrawals did not amount to a fifth of the total deposits held. In the whole United Kingdom 6,332,082*l* was added to the deposits in 1870, and 4,758,187*l* was withdrawn. The net increase of deposits in the year (the excess of deposits over withdrawals) was 1,399,728*l* in England, 161,077*l* in Wales, 37,488*l* in Scotland, 88,761*l* in Ireland, 2,911*l* in the Channel Islands; making a total increase of 1,574,865*l* in the amount of deposits. At the close of the year 1870 there were 1,072,953 depositors' accounts open in the English Post Office Banks, and sums amounting to 13,727,459*l* were due to the depositors; in Wales 30,646 depositors, and 403,298*l* due to them; in Scotland, 39,033 depositors, and 504,285*l* due to them; in Ireland, 38,279 depositors, and 633,000*l* due to them; in the Channel Islands 2,242 depositors, and 31,021*l* due to them; making a total of 1,183,153 depositors, and 15,099,104*l* due to them.

The Constabulary returns show that in the year 1870 549 families, comprising 2,622 persons, were evicted in Ireland. 104 families, comprising 758 persons, were re-admitted; so that the number of families actually evicted was 445 and of persons 2,004. 520 of these persons were evicted from houses, and 18 houses were levelled. In county Leitrim 108 persons were actually evicted; in Wicklow, 126; in Mayo, 251, 30 of them from houses; in Kerry, 145, 30 from houses; in Tipperary, 188, 52 from houses; in Galway, 240, 58 from houses; in Donegal, 250, 53 from houses.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the fifth week of July, 1871, and of the corresponding week in 1870 —

The cause of a famine year in the United States always produces many statistical returns, but those of more value than usual at present, are the year's movements of the port of New York. When the year closed, on June 30 New York had a tonnage of greater volume than at any previous period. During June 1871, the imports amounted to $31,309,417, the largest June importation on record; that of June, 1870, having been $4,415,696. About one-half the increase went into warehouse and the remainder entered into consumption. For the six months ending June 30 the imports exceeded 153 hundred millions of dollars, the largest half-yearly total recorded in the history of New York, and for the year ending June 30 the aggregate imports were $303,473,000, again the largest annual total recorded, the nearest approach to it having been the importations of the year ending June 30, 1870, which was $296,148,000. For the three fiscal years of currency (1869, 1870, 1871) the comparative imports were the following —

Years ending June 30			
Imports.	1869.	1870.	1871.
Entered for consumption	180,[illegible]	[illegible]	[illegible]
Entered for warehouse	1,[illegible]	[illegible]	[illegible]
Free	[illegible]	[illegible]	[illegible]
Specie and bullion	[illegible]	[illegible]	[illegible]
Total imports	[illegible]	[illegible]	[illegible]
Withdrawn from warehouse	[illegible]	[illegible]	[illegible]

In the above table of imports the amounts of specie and bullion are given. Of dry goods the imports were in 1869, $92,499,847; in 1870, $94,414,276; and in 1871, $126,123,210. These values are all in gold, freight and duty unpaid; and the Customs receipts of the year 1870-1, which were by far the largest of any year at New York, were $141,424,292. Of exports, which, with the exception of specie exported, are reckoned in greenback values (gold being now about 112), the total for the last fiscal year was $305,622,363, as compared with $231,742,542 for the previous year; the year 1870-1 showing much the largest export of any year on record. The trade of New York usually represents about two-thirds of the imports and four-tenths of the exports of the entire country, the specie movement being omitted from this calculation. Upon this basis for the last fiscal year the imports of the United States, exclusive of specie, may be estimated at 520 millions of dollars in gold; and the exports, also exclusive of specie, at 550 millions of dollars in greenbacks. The specie export just now is quite heavy, but no more so than was the case in 1868.

During the three months ending the 30th of June there arrived at New York 101,015 immigrants, of whom 60,082 were males and 40,933 females. Germany sent the largest proportion of these—30,814; and Ireland the next—26,149; the two contributing over one-half the immigration. England sent 17,845; Scotland, 4,613; Wales, 309; Great Britain, locality unknown, 6,672; Austria, 1,983; Sweden, 5,727; Norway, 1,286; Denmark, 1,143; France, 849; Italy, 8,671; Russia, 295; Holland, 409; and other nations smaller numbers.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 9th day of August, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued.....	39,434,170	Government debt.....	11,015,100

JOHN C. POCOCK, Deputy Inspector

Bankers' Clearing-house, August 10th, 1871

The total since the 4th of January, 1871, is 2,712,385,000*l*, compared with 2,414,466,000*l* for the corresponding period last year, showing an increase of 297,919,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week	Aug. 14, 1861.	Aug. 12, 1868.	Aug. 11, 1869.	Aug. 10, 1870.	Aug. 9, 1871.
Circulation, including bank post bills	£ 20,829,296	£ 25,147,260	£ 24,315,275	£ 24,463,737	£ 26,037,001
Public deposits	3,926,955	3,088,830	3,241,671	5,606,067	4,704,497

Clearing-house return	...	60,915,000	57,936,000	69,063,000	79,675,000

In 1861, the Bank rate was reduced from 5 to 4½ per cent., as had been for a short time anticipated. The demand outside was good at the Bank minimum, though business was still greatly restricted by the apprehension of American complications.

In 1868, the 2 per cent. period continued, but withdrawals were beginning to be made, mainly, it was supposed, on account of the French loan, though it was afterwards suspected that the money was really required to foment an insurrection in Spain. A Bankruptcy Act, introduced by Mr Moffatt, to correct the frauds of "arrangements," had just been passed.

In 1869, the resources of the Bank of England had increased during the week, and money was for the moment easier, but apprehensions as to effect of recent loans and other requirements were believed to justify the maintenance of a 3 per cent. rate. A dispute between Turkey and Egypt, verging on actual hostilities, had caused great alarm in the foreign market.

In 1870, the Bank rate was reduced from 6 per cent., at which it had been placed a week previous, to 5½. The war had already caused a great resort to the London money market on the part of foreign bankers and capitalists for safety. The news of the battles of Woerth and Forbach had produced a great panic in Paris, but there had been a general reaction on the London Stock Exchange from the previous depression.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,539,670*l*; in 1868, an excess of 4,056,982*l*; in 1869, an excess of 4,577,822*l*; and in 1870, a deficiency of 1,511,806*l*. In 1871, there is an excess of 5,886,169*l*.

Discount and Money Market.—We have still the report to make of continued ease in the general discount market. Though the Bank account for the week shows a considerable withdrawal of bullion and diminution of the reserve, it was previously so strong, and there is so much gold to arrive, that the withdrawal, though on so large a scale, has had no appreciable effect on the value of money. There is still great abundance of money in Lombard street. As we noticed last week however, there is a large supply of bills at the present rates, which continue to be 1⅝ for the best short-dated Bank paper, and 1¾ for bills at three months. To-day there has been only a moderate demand at the Bank, but yesterday there was a good deal of activity, and the tone of the market is one of active business.

The principal changes in the Bank account for the week are a diminution of the bullion by 1,126,672*l*, and of the reserve by 854,995*l*. In addition to the requirements on German account there has been a large withdrawal this week on account of the Argentine loan, which was concluded some time ago. The private deposits have decreased 1,538,607*l*—a change corresponding to the withdrawal of bullion. Measured by the proportion of the reserve to the liabilities the Bank is still nearly as strong as it has lately been, and the store of bullion is still very large.

In the Bank of France account the changes for the week are generally but trifling, the stock of bullion especially having only varied by the slight increase of 75,000*l*. The deposits in Paris, however, have increased 2,077,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—3 months	1¾	per cent.
Do 4 months	2	per cent.
Do 6 —	2⅜	per cent.
Trade bills—3 months	1⅞ 2	per cent.
Do 4 months	2¼ ½	per cent.
Do 6 —	2⅓ 3	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	1	per cent.
Discount houses at call	1	per cent.
Do with seven days' notice	1¼	per cent.
Do fourteen days'	1¼	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	6	5	6	...
Vienna	5	5	6	5
Berlin	8	4	8	3¼ ½
Frankfort	7	3½	7½	3¼
Amsterdam	6	3	6	3¼
Brussels	7	4	6	3¼ ½
Hamburg	...	...	6 8	3 ¼
St Petersburg	...	6	...	6

The Stock Markets.—The event of the week has been another great rise in English railways, to which a great deal of attention has been given. In English and Foreign Government securities the feeling has even been one of dulness, the foreign market at least having been neglected for English railways. The rise in English railways being so special is obviously due to their peculiar circumstances, and these circumstances have been the simultaneous announcement of good dividends and good returns of traffic, while the singularly good weather of the week has also had its effect. It is calculated, we understand, that the advance is likely to continue during the holiday months of August and September, the improvement anticipated being the greater from the bad weather of the spring and summer having caused many people to postpone their holidays. Still, as other securities have been neglected so much lately for this department, the attention of investors might profitably be directed elsewhere. The foreign market especially has been greatly neglected of late, and in miscellaneous securities generally, apart from the Asphalte and Tramway companies which have had their rise, there must be many opportunities for judicious investment.

The new undertakings announced this week are on a small scale. Almost the only noticeable one is a Liberian loan for 100,000*l*, which is understood to have been more than fully subscribed.

English Government Securities.—As we have noticed there has been a feeling of dulness in this department, and the fluctuations have been of the slightest, with hardly any change for the week. There has also been little dealing. An exception must be made however for the Metroplitan Consolidated stock, which have at length attracted attention, and have advanced to 99⅛, the maximum tender for the new stock last week having been 97*l* 1*s*. At 99⅛ they still offer an advantage to investors compared with Consols, and the security is practically as good.

A good deal of surprise is still expressed at the sluggish market for Consols, the reason assigned still being a vague feeling of apprehensiveness as to what the increasing demand for money and the German command over the money market may lead to. It seems inevitable, however, that with a low value of money likely to rule for many months, even though the Bank minimum should advance to 2½ or 3 in November, Consols must inevitably advance. No doubt bankers and other large holders of Consols are now more chary of taking them than they were, on account of the danger of losses by depreciation, but the proportion of Consols to other securities is also much less than it was, and the real demand for them must be great. The feeling on the Stock Exchange is very decided that when the present apprehensiveness about foreign withdrawals passes away there will be an important rise in English Government securities.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	93⅛	93⅛	93⅛	93⅛	12s to 17s pm
Monday		Holiday.			
Tuesday	93⅛	93⅛	93⅛	93⅛	12s to 17s pm
Wednesday	93⅛	93⅛	93⅛	93⅛	12s to 17s pm
Thursday	93⅛	93⅛	93⅛	93⅛	12s to 17s pm
Friday	93⅛	93⅛	93⅛	93⅛	12s to 17s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	93⅛ ⅛	93⅛ ⅛	– ⅛
Ditto September	93⅛ ⅛	93⅛ ⅛	– ⅛
Reduced 3 %	93⅛ ⅛	93⅛ ⅛	– ⅛
New 3 %	93⅛ ⅛	93⅛ ⅛	– ⅛
Bank Stock last dividend 4½ %	241 3	241 3	... ...
India Stock, 10½ % red. at par Apl. 30, 1874	256 5	256 5	... ...
Ditto 5 % red. at par, July 5, 1880	112⅝ 13	112⅝ 13⅞	+ ⅛

EXCHEQUER BILLS.—12s to 17s prem.

COLONIAL GOVERNMENT SECURITIES.—The has been a good deal of buying this week, chiefly on account of bankers, and prices show a general improvement. The following shows the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	107 8	107½ ⅝	+ ⅛
Ditto 5 %	100⅝ 1⅛	101¼ 2⅛	+ 1
New Zealand 5 % Consolidated Bonds	100⅝ ⅛	100⅝ 1	+ ⅛
New South Wales 5 % Bonds, 1858 to 1886	103 4	103⅛ 4⅛	+ ⅛
Nova Scotia 6 % Bonds, 1873	108 4	108⅛ 4⅛	+ ⅛
Queensland Government 6 % Bonds, 1864-5	108⅝ 9⅛	108⅝ 10	+ ⅛
Victoria 6 %	114 14	114 15	+ 1
Ditto New 5 %	104 5	104 5	... ...

FOREIGN GOVERNMENT SECURITIES.—The dulness for the week has been so general that there is hardly any incident to notice. To-day there is a better feeling, and Spanish, Turkish, Egyptian, and Italian, indeed the principal foreign securities, are on the whole better for the week—Italian especially. The expectation is that in the autumn there must be a general advance, owing to the great accumulation of money seeking investment, and the necessity under which investors will lie of accepting a lower rate of interest. French stocks during the week have also had little movement, the closing quotations being—French Rentes, 54⅞ 55 ; New loan, 5⅔ ¼ prem. ; National Defence loan, 98 1/16 3/16. These show hardly any change for the week.

The position of the Morgan loan continues to invite attention. The quotation is still about 98 to 98½, at which the investors would receive over 6 per cent., as against 5¼ on Rentes and 5⅓ on the New loan. Actually with the accrued dividend the difference is rather more to the advantage of the Morgan loan. Of course there is no chance of a rise in capital value, but to bankers and others, who wish only to use money temporarily at a good interest, the opportunity is tempting. The higher price of other French securities of course furnishes this stock with a margin against depreciation.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Argentine 6 %	92⅝ ¾	92⅝ ¾	... ...
Buenos Ayres 6 %	2⅞ ⅞ pm	3 1 pm	+ 1⅛
Buenos Ayres 6 % 1868	96½ ¾	96½ ¾	+ ¼

Ditto 5 % Bonds, 1869	69⅛ ¼	69⅛ ¼	+ ⅛

Among the stocks which are likely to improve are the better South American stocks, which have lately been creeping up. For instance, the new 1871 Argentine 6 per cent. loan, introduced by Messrs C. de Murrietta and Co., appears to have recently attracted considerable investments, the drawing at par next fortnight, and the dividend due 1st September, together with its relatively low price compared to old Argentine, Brazilian, Chilian, and other high class stocks, naturally inducing purchases. And there are other similar opportunities for investors who turn their attention to foreign securities.

ENGLISH RAILWAYS.—The rise in this department, as we have stated, has been very remarkable, and though there is a slight reaction this afternoon in London and Brighton and one or two other stocks which are understood to have been bought largely by speculators, still in Great Western and the principal lines there has been a fresh advance to-day. In Metropolitan and District stocks there has also been improvement this afternoon. The usual list which we subjoin however will best show our readers the changes which have occurred this week.

The improvement is very easily accounted for by the events of the week. In the beginning of the week came the announcement of the London and North-Western dividend at 6¾ per cent., which was better than was expected, and an advance of ¾ on the corresponding dividend of last year. The result was an immediate advance in the stock, which has been firmly maintained. The Brighton and South-Eastern traffics were also very good, causing these stocks to advance, and later in the week *all* the traffics were good, especially Great Western and North-Eastern, causing the general movement which we have described. With the favourable weather besides, a great increase of holiday making is expected ; the weather will also be favourable to the harvest and contribute to the augmentation of the traffic returns. In these circumstances the rise of the week appears to be quite justified, though in special cases there may be some reaction at the settlement, owing to the purely speculative nature of the purchases. In Brighton, South-Eastern, and Chatham and Dover stocks especially, there is understood to have been a large amount of speculative dealing, the magnitude of the traffic improvement and the low price of the stocks being a great temptation to speculators. It seems quite possible however that even in these cases the great growth of railway business will speedily cover the speculative advance.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending August 5 to 891,87*l*, being an increase of 23,161*l*, or more than 10 per cent. on the corresponding week of last year. The aggregate returns of the current half-year to date (including however one week only in the case of four railways) amount to 3,453,945*l*, being an increase of 226,163*l* on the corresponding period of last year. The principal increases for the week are—North-Eastern, 12,233*l*; London and North-Western, 12,417*l*; Midland, 10,292*l*; and Great Western, 9,410*l*. The following shows

the details of the increase in each case for the week and for the whole period:—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half-year to date. Amount.	Inc. or Dec. on Correspndg. per. in '70.
	£	£	£	£

*Great Western	96.124	+ 9,410	96,124	+ 9,410
*North British	36,478	+ 2,502	36,478	+ 2,502
	891,879	+93,161	3,453,045	+226,163

* In these cases the aggregate is calculated from the 1st of August.

An issue is announced this evening of 100,000*l* debenture stock of the Great Northern and Western (of Ireland) Railway, to carry a 4½ per cent. dividend. The company, it is stated, is secured a clear rent-charge upon the revenues of the Midland Great Western Railway of Ireland Company, augmented by those of the company's undertaking, in priority of all dividend on the ordinary share capital and future preference share capital of the Midland Great Western Company. The rent-charge for 1871 is 28,500*l*, and rises by yearly increments to 33,050*l* in 1885, and continues at that amount to the end of the term. There is also an additional rent-charge of 2,767*l*, rising to 3,174*l* on the construction of nine additional miles of line. The only payment preferential to the rent-charge is 6,400*l* for debenture interest, and the net income of the two companies is 109,000*l* per annum.

FOREIGN AND COLONIAL RAILWAYS.—The following shows the changes for the week in this department:—

AMERICAN SECURITIES.—American Government bonds continue in good request, and the upward movement in the quotations has made steady progress. It is not improbable, in the present state of the money market, that a larger amount of the new Five per Cents. may be floated, more especially as the continued absorption of the old bonds must force their quotation to a par with the new issue. Erie shares have risen 1, notwithstanding the extraordinary judgment recently pronounced by Judge Blatchford. A relapse of ½ has taken place in Atlantic bonds.

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	93¾ ½	93¾ ¼	+ ⅛
Ditto 1865 Issue	92 13/16 11/16	93⅛ ⅛	+ 1/16

Atlantic and Great Western Consol. Bonds	41½ ¾	41 2	− ⅛
Erie Shares	23¾ ¼	24½ 5	+ 1
Illinois Central Shares	107⅛ 8	107⅛ 8	... ...
Massachusetts 5 % Sterling Bonds, 1900	94 5	94 5	... ...
Panama General Mortgage 7 % Bonds, 1897	77 80	77 80	... ...
Pennsylvania Gen. Mort. 6 % Bonds, 1910	94 ¼	94 ¼	... ...
Virginia 6 % Bonds	54 5	52 4	− 1

JOINT STOCK BANKS.—A fair business has been done in this department, and though the changes are not all of a favourable nature, the tone was firm at the close to-night. Union of Australia has risen 2; Australasia 1; New Zealand ½. On the other hand, Anglo-Egyptian have declined ¼; London Joint Stock and London and Westminster ½.

TELEGRAPHS.—Cable shares have continued in fair request, and prices have again tended in favour of sellers. Anglo-Mediterranean stock has risen 2; while there is an advance of ⅜ in British Indian Extension shares; ¼ in China Submarine, Great Northern, and Great Northern Extension; Anglo-American stock is 2 lower.

MINES.—British mining shares generally have ruled quiet, and prices show a slight reduction. North Roskear have given way 1½; East Lovell 1; Great Laxey and South Condurrow ½. Wheal Seton are quoted 7 and Wheal Bassett ½ higher. In the foreign market there is a rise of ¼ in Pacific and United Mexican, while Colorado have given way to a similar extent.

MISCELLANEOUS shares have participated in the general firmness which has prevailed, and a considerable quantity of stock has been taken up for investment. We note an advance of 4 in London General Omnibus; 3 in Royal Mail Steam and Crystal Palace preference; 1 in London Tramways and Foreign Government Trusts; ½ in British American Land, British Indian Tea, Silver's India Rubber, Telegraph Construction, and Van Dieman's Land.

In the new undertakings, Hungarian Land Credit shares are quoted ⅜ to 1, Russia Copper 2 to 3, Anglo-Austrian Bitumen 2 to 2½, Anglo-Hungarian Bitumen 4 to ½, Anglo-German Bitumen 1 to ½, Belgian-Dutch Paving 1 to 1½, Limmer Asphalte ¼ to ½, Edinburgh Tramways ⅜ to 1¼, Dublin Tramways par to ½, and Lisbon Tramways 1 to 1½ premium. Val de Travers Asphalte shares opened this morning 33 to 33½, but declined to 32⅜ sellers, afterwards improving to 35, and finally closing at 34 to 34½. Neufchatel Bitumen shares are quoted 62 to 63, Imperial Brazil Collieries ⅜ to 1¼ premium, Nantyglo and Blaina Ironworks preference 1 dis. to 1 prem., Native Guano 6 to 8 premium, Mexican Railway debentures 5 to 4 discount, and Southwark Subway shares ⅜ to 1¼ prem.

It is announced that the share list of the Imperial Brazilian Collieries, Limited, will close on Monday next, 14th inst., for London, and on Tuesday, 15th, for the country. The price to-day is 1¼ ⅜ p.m.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—Sovereigns continue to be withdrawn from the Bank, the quantity taken away since our last circular of the 3rd instant being 456,000*l*. There is no demand for bar gold, and about 128,000*l* has been purchased by the Bank during the week. Further amounts will shortly be sent in, as the Australian mail steamer, with 547,000*l*, is due on the 14th instant. We have received during the past few days 103,500*l* from New York. The Poonah has taken 5,340*l* to the East, and the Carolina 36,000*l* to the Cape.

Silver.—The market is quiet, and the price, although without alteration for the present, is not quite so firm. We have received 68,200*l* from New York during the week.

Mexican dollars are without any alteration in price. We have received about 25,000*l* from New York during the week, and the demand for the old coinage for China is not quite so active.

Exchange on India for Banks' drafts 60 days' sight is 1s 10 1/16d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 8⅜d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 8d per oz. Silver—Bar silver, fine, 5s 0⅝d to 5s 0⅞d per oz std, firm; ditto containing 5 grains gold, 5s 1¼d per oz std.; Mexican dollars, 4s 11 1/16d to 4s 11⅜d per oz. last price.

The sum of 5,000*l* in bar gold was sent into the Bank of England to-day, while 23,000*l* was withdrawn for transmission to Oporto.

According to the *Gazette* return the import of the precious metals during the week ended August 9 were:—Gold, 99,174*l*; silver, 30,301*l*. The exports were:—Gold, 1,476,884*l*; silver, 134,280*l*.

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, August 14.

Bank of Australasia, general.
British American Land, special general, London Tavern.
Hull and Selby Railway, general, Kingston-upon-Hull.
Nottingham and Grantham Railway, general, Grantham.

TUESDAY, August 15.

Midland Railway, general, Derby.

WEDNESDAY, August 16.

Liverpool Tramways Company, general
Kent Coast Railway, general.
Mid Wales Railway, general, Ethelburga House.

THURSDAY, August 17.

London, Chatham, and Dover Railway, general, City Terminus Hotel.
Dublin and Drogheda Railway, general, Dublin.
North London Railway, general, Euston Station.
Northern and Eastern Railway, general, Bishopsgate street.

FRIDAY, August 18.
North-Eastern Railway, general, York.
Langham Hotel Company, general, Hotel.
SATURDAY, August 19.
London and North-Western Railway, general, Euston Station.
Great Northern Railway, special general.
Mwyndy Iron Ore, general.
Buckinghamshire Railway, general, Euston Station.
Cockermouth, Keswick, and Penrith Railway, general, Keswick.
Cork and Bandon Railway, general, Dublin.

SETTLING DAYS.

Ticket Days—Tuesday, August 15, and Wednesday, August 30; Wednesday, Sept. 13, and Thursday, Sept. 28.
Settling Days—Wednesday, August 16, and Thursday, August 31; Thursday, Sept. 14, and Friday, Sept. 29.
Consols—Thursday, August 3.

NOTICES AND REPORTS.

STOCKS.

French 3 per Cent. National Loan.—It is notified that the French Financial Agency in London will receive instalments and exchange provisional bonds which have been fully paid up for definitive bonds. The prepayments in full and anticipated instalments will be received under discount at the rate of 6 per cent. up to the 31st of December next, after that date the rate of discount may be altered by decision of the Minister of Finance.

Liberian 7 per Cent. Loan.—Messrs Helderness, Nott, and Co., have invited subscriptions for 500,000*l*. or 100,000*l*. in 50*l*. and 100*l*. bonds, to be issued at the price of 85 per cent., with instalments payable up to the 1st November. The half yearly interest is payable on the 1st February and 1st August, and the Liberian Government have the option of redemption by half yearly drawings. This is the first public loan of the Republic, and the United States' Minister in Monrovia has been nominated to receive periodically the amount of revenue accruing from certain Excise and Customs duties hypothecated as security. The money is required for works of improvement, and for liquidating some Treasury bonds.

RAILWAY COMPANIES.

Girvan and Portpatrick Junction Railway.—Capital, 250,000*l*., in 10*l*. shares, of which 80,000*l*. has been locally taken up. Messrs Cindlay, Adamson, Collier, and Co. are authorised to receive subscriptions for the remainder at the price of 9 per share. The contractors guarantee 6 per cent. interest during construction. The line, 20¼ miles, will commence by a junction with the Glasgow and South-Western Railway at Girvan, and terminate near to Stranraer by a junction with the Portpatrick line. A great saving of time and distance between Glasgow and Belfast will be effected, and from through, and local, and mineral traffic good returns are expected.

Lancashire and Yorkshire.—The recent half-yearly accounts, compared with the corresponding period of 1870:—

	1870. £		1871. £
Gross revenue	1,281,880		1,398,217
Working expenses	569,535		627,328
Net	712,305		770,889
Add former surplus	11,782		23,717
	724,087		794,606
Preference charges	269,786		279,699
Available for dividend	454,301		514,907
—On the ordinary stock at the rate of 7 per cent. per annum	444,276	(7¼ % p. a.)	491,877
Surplus	10,025		23,030

Capital Account.

	Expended. £		Received. £
To 31st December, 1870	24,702,680		23,597,048
During the half-year	203,688		324,299
Total, 30th June, 1871	24,906,368		23,921,347

Estimated outlay during the current half, 282,500*l*. The sum of 41,979*l* premium on new share issues has been transferred to the capital account. The Ripponden and Clayton West branches will be proceeded with. The construction of a dock at Fleetwood, and of an extension to Hellifield, has been sanctioned.

London, Chatham, and Dover.—The revenue accounts for the first half of 1871, contrasted with those of 1870:—

	1870. £		1871. £
Gross revenue	313,688		320,181
Working expenses	201,155		197,445
Net revenue	112,513		122,736
Add previous balance	nil.		29,762
	112,513		152,498
Deduct debenture interest and rents			136,922
Balance			15,576

From this balance a dividend of ¼ per cent. for the year on the preference stock will leave 4,597*l* out of which to vote a testimonial to the arbitrators. The accounts with the Kent Coast Company have not been adjusted to the satisfaction of that company's board; but an agreement has been entered into whereby the whole of that line will be vested in the London, Chatham, and Dover, in consideration of allotments of 241,000*l* debenture stock, 302,500*l* preference stock, and 550,000*l* ordinary stock of the Chatham and Dover. The construction of the eastern section will be finished by Sept. 1, when also the line to Moorgate street will be opened for traffic. 154,604*l* of the surplus lands have been sold during the year. Capital expenditure, 17,611,679*l*, including 68,776*l* during the half-year; balance in hand, 31,926*l*. It will therefore be seen that the reconstructed company has earned a small preference dividend during a year when the Franco-Prussian war withdrew one of the principal sources of traffic.

London and North-Western Railway.—The report of the directors, to be submitted to the half-yearly general meeting on the 19th inst., has been issued. The accounts for the half-year ending 30th June showed—Net proceeds, 1,284,333*l*; balance from last account, 36,910*l*; disposable balance, 1,321,243*l*; which enables the directors to recommend a dividend at the rate of 6¼ per cent. per annum on the ordinary share capital, and carry forward a balance of 35,156*l*. The amounts received show an increase under all heads—total in 1871, 3,497,008*l*; and in 1870, 3,267,112*l*. A special meeting will be held after the conclusion of the business of the ordinary meeting, for creating 100,000*l* of 5 per cent. preference stock, in substitution of a like amount redeemable shares of the late St Helen's Railway, now vested in this company, and for confirming the agreement entered into with the Metropolitan District Railway Company for the use of their lines and stations, in conformity with the recommendations approved by the proprietors at the last half-yearly meeting.

London and South-Western.—The revenue accounts for the past six months, compared with those in the first half of 1870:—

	1870. £		1871. £
Gross receipts	830,424		891,150
Working expenses	440,715		468,239
Net revenue	389,709		422,911
Add previous surplus	8,897		14,198
	398,606		437,109
Preference charge	210,009		247,484
Available for dividend	188,197		189,681
—On the ordinary stock at the rate of 4 per cent. per annum	186,315	(4 p.c. p.a.)	186,999
Surplus	2,882		12,762

Capital Account.

	Expended. £		Received. £
To 31st December, 1870	17,039,657		17,020,892
During the half-year	72,125		92,375
Total, 30th June, 1871	17,111,882		17,109,267

Estimated outlay during the current half-year, 120,500*l*. Works under construction have been progressed with; [An

Act has been obtained for the purchase of the Poole and Bournemouth Railway when completed.

Metropolitan and St John's Wood.—Six months' net receipts, 6,513*l*; divisible balance, 6,940*l*. After deducting debenture charges 3,029*l* remained, out of which a preference dividend at the rate of 3¼ per cent. per annum absorbed 2,976*l*. Capital expended, 615,330*l*.

Midland.—The accounts recently issued present the following comparison with those of the corresponding six months of 1870:—

	1870. £		1871. £
Gross revenue receipts	1,839,739		1,996,844
Working expenses	861,079		950,640
Net receipts	978,660		1,046,204
Former surplus	14,188		15,507
	992,849		1,061,711
Preference charges	553,401		603,875
Available for	439,448		457,836
—Ordinary dividend at the rare of 6¼ per cent. per annum	*432,895	(6½ % p. a.)	*450,480
Surplus	6,653		7,356

* These figures include the Birmingham and Derby dividends at the rates of 4¾ and 5½ per cent. per annum respectively.

Capital Account.

	Expended. £		Received. £
To 31st December, 1870	37,886,147		37,681,089
During the half-year	989,700		1,302,170
Total, 30th June, 1871	38,875,847		38,983,259

The increase of traffic was due—39,374*l* to passengers, 81,893*l* to merchandise, and 21,469*l* to minerals. The capital expended on works unproductive is over 2,026,000*l*. The works on the Settle and Carlisle line are making progress, and the same with the Ashby and Nuneaton. The Mansfield and Southwell and the Wigston lines have been opened for traffic.

North-Eastern.—Outline of the revenue accounts for the first half-year of 1870 and 1871:—

	1870. £		1871. £
Gross receipts	2,170,448		2,354,671
Working expenses	934,258		1,033,953
Net receipts	1,236,190		1,320,718
Add previous balance	9,470		12,927
	1,245,660		1,333,645
Deduct preference charges	622,419		622,419
Available for dividend	623,041		711,226
—On the ordinary stock at the rate of 7½ per cent. per annum	609,841	(8½ % p. a.)	700,144
Surplus	13,200		11,082

Capital Account.

	Expended. £		Received. £
To 31st December, 1870	41,759,068		41,880,643
During the half-year	441,091		331,625
Total, 30th June, 1871	42,201,060		42,212,268

The estimated capital outlay during the current half-year is 814,428*l*, including 300,458*l* for rolling stock. Half-a-million in 4 per cent. debenture stock has been issued, while debentures receiving a higher rate of interest have been paid off. The Hull and Hornsea dividend will be at the rate of 1 per cent. per annum. The directors have equalised the tariffs upon different portions of the system during the past half-year, but the sacrifice does not appear to have affected revenue. They also recommend that the new station at York be commenced forthwith.

North London.—Dividend announced at the rate of 6 per cent. per annum. The half-year's revenue, 174,472*l*, showed an increase of 5,479*l*. Balance after dividend, 1,914*l*.

North Staffordshire.—The half-yearly accounts for 1870 and 1871 contrasted:—

	1870.		1871. £
Railway gross receipts	197,875		212,101
Canal gross receipts	50,442		46,802
Gross revenues	248,317		258,903
Working expenses	118,050		119,486
Net	130,267		139,417
Add former balance	1,589		1,301
Available	131,856		140,718
—For preference dividends	89,948		91,240
—For ordinary dividend at the rate of 2¾ per cent. per annum	40,377	(3 % p. a.)	48,452
Surplus	1,531		1,026

Capital Account.

	Expended. £		Received. £
Total, 31st December, 1870	6,680,551		6,760,092
During the half-year	69,427		94,454
Total, 30th June, 1871	6,729,978		6,854,546

The Pottery Loop line is in progress. The committee of shareholders recommend "that it is not desirable to consider any question of amalgamation with any other company," thereby endorsing the policy of the directors.

Salisbury and Yeovil.—Ordinary dividend notified at the rate of 6 per cent. per annum.

South Devon.—Dividend announced at the rate of 2¾ per cent. per annum.

Staines, Wokingham, and Woking.—Dividend announced at the rate of 3¼ per cent. per annum.

BANKS.

Bombay New Bank.—Dividend declared at the rate of 6 per cent. per annum.

Lloyd's Banking.—The report announces that the available balance of profit for the half-year, including the amount brought forward, is 29,470*l*, out of which the directors recommend a dividend at the rate of 15 per cent. per annum. They also propose that 5,000*l* be added to the reserve fund, raising it to 90,000*l*, and that 1,628*l* be carried forward.

ASSURANCE COMPANIES.

Liverpool and London and Globe.—Dividend on account, 10 per cent.

Royal.—At the annual meeting it was stated that the fire revenue for 1870 amounted to 511,836*l*, exhibiting an increase of 26,656*l*. The losses were 339,810*l*, and the net profit on this branch was 60,195*l*, from which, after the declation of the usual dividend and bonus to the shareholders of 7s per share—the large sum of 27,376*l* was carried to reserve, increasing this fund to 314,304*l*. The results of the life branch were likewise very satisfactory, the new premiums being 20,349*l*, while the net life premiums for the year amounted to 220,784*l*. After payment of all claims and expenses 147,240*l* was added to the life fund.

MISCELLANEOUS COMPANIES.

Berlin Waterworks.—At the meeting the general revenue account showed a disposable balance of 35,376*l*, out of which an interim dividend was declared at the rate of 10 per cent. per annum, leaving 5,376*l*.

Frederick Braby and Co.—The accounts showed a surplus of 14,754*l*, making a total of 18,981*l* to the credit of profit and loss. A dividend of 5 per cent. was declared for the half-year. After the addition of 2,500*l* to the general reserve fund, 8,566*l* was carried forward.

Great Northern Telegraph (China and Japan Extension).—The cable to Nagasaki (Japan) has been laid.

John Crossley and Sons.—A dividend at the rate of 15 per cent. has been declared.

Langham Hotel.—Dividend announced at the rate of 10 per cent. per annum, free of income tax. After appropriating 2,000*l* to reserve, 2,790*l* remains to be carried forward.

London and Lisbon Corkwood.—A dividend at the rate of 8 per cent. has been declared, free of income tax.

Mediterranean Extension Telegraph.—A dividend at the rate of 3 per cent. per annum, leaves 462*l* to be carried to reserve.

Natal Land and Colonisation.—Call of 1*l* per share, payable on the 1st September.

North of Europe Wood Pulp, Limited.—Capital, 50,000*l*, in shares of 5*l* each. The supply of wood pulp to paper makers is stated to be an established trade, and profitable enough to return at least 10 per cent. dividends to the shareholders.

North Metropolitan Tramways.—At the meeting the report, announcing a dividend on the old capital at the rate of 12 per cent. per annum, and a dividend at the rate of 10 per cent. per annum on the whole capital from the 1st of March to the 30th of June, was agreed to. The gross receipts were 17,370*l*, and the available balance 8,501*l*.

Société du Cable Transatlantique Francais.—Quarter's interim dividend, 2 per cent.

Southwark and City Subway.—Capital, 100,000*l*, in 10*l* shares. This new company has been incorporated by Act of Parliament to make an underground railway of 5¼ furlongs from St George's church, Southwark, under the Thames, to Arthur street west, close to King William street and Cannon street. The present enormous traffic passing along the Borough, and over London bridge, will thus be relieved, while the City will be connected with the extensive system of tramways having their termini south of the Thames. The principles upon which the subway will be constructed are identical with those adopted in the Tower subway, and from the fares (one penny) proposed to be charged large returns are expected.

Welsh Ironworks, Limited.—Capital, 125,000*l*, in 50*l* shares. 1,000 ordinary shares reserved for the vendors, and 1,500 participating 10 per cent. preference shares offered for public subscription. The company is formed to acquire the Aberdare Smelting Furnaces and Ironworks of Mr Francis Crawshay, as well as some hematite iron mines, stated to be of an extensive and valuable character. The works are well situated, close to the Vale of Neath Railway, and fitted with all appliances, and the purchase price is 50,000*l* in money, and 50,000*l* in ordinary shares.

MINING COMPANIES.

Hamilton Smelting, Limited,—Capital, 60,000*l*, in 12,000 shares of 5*l* each. The smelting works and mining properties to be acquired are situated near Hamilton in the midst of the White Pine District of Nevada. The prospectus states:—

The works consist of smelting furnaces, steam power, and necessary plant complete, occupying a site of about 9¾ acres of freehold land The mining property consists of the following valuable mining claims, viz. "Massachusetts," "Marion," "Ethan Allen," "Ebenezer," and "Silver

Star." This company is formed to purchase such works and mines for the sum of 8,500*l* in cash, of which 3,500*l* is to be paid down, and the remaining 5,000*l* only if the shareholders themselves at a general meeting approve the results of the working, and 27,500*l* in fully paid-up shares (such shares to be left in trust till the company pays a dividend of at least 20 per cent.), or in cash at the option of the Directors.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

According to information received by telegraph from Hong Kong, the steam vessel which has hitherto carried mails between that place and Manilla has been withdrawn, and in lieu of it a service has been established between Singapore and Manilla. Consequently, all correspondence for the Philippine Islands will in future be forwarded to Singapore instead of to Hong Kong.

According to information received from the French Post Office, the private steamers of the Fraissinet line, which for some time past have left Marseilles for Malta on the 1st and 15th of the month, have increased the frequency of their sailings to three times a month, the dates of departure from Marseilles being now the 7th, 17th, and 27th of each month. Mails for Malta, intended for conveyance via Marseilles, will therefore be made up on the mornings of the 5th, 15th, and 25th of each month, with supplementary mails on the evenings of those dates, except when either of them falls on a Sunday, on which occasions the mails will be made up on the previous evening. In addition to the above, mails for Malta will continue to be made up every Monday and Friday evening for conveyance via Italy.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The brilliant weather has had a most favourable effect upon the crops, and has brought all field produce rapidly to maturity. Harvest prospects are much more satisfactory than they were a short time back, and the trade at Mark-lane to-day was much depressed. English wheat was nominal in value in the absence of any important sales, but the tendency was downwards. American wheat gave way 1s per quarter, but there was little inquiry for every description of foreign. Maize sold on rather easier terms, but the late reduction in the price of oats induced buyers to operate more freely. Barley, beans, and peas were unchanged in value. This week's imports of foreign and colonial produce into London have amounted to 45,500 qrs of wheat, 20,670 barley, 75,250 oats, 3,090 beans, 1,420 peas, 18,320 maize, and 1,250 sacks of flour.

At Liverpool and Wakefield this morning the wheat trade was extremely dull, and purchases could be effected on easier terms.

The Liverpool cotton market has been very dull throughout the past week, and only a limited business has been transacted. The total sales for the five days (Monday having been a holiday) are 53,250 bales, of which the trade have taken 42,660 bales; speculators and exporters, 10,590 bales. The imports for the week are 19,000 bales; the actual exports 5,712 bales, and to-day's stock is 643,830 bales. Quotations for American descriptions have declined ¼d per lb, East Indian ¼d to $\frac{3}{16}$d per lb, and Bengals ½d per lb since last Friday. To-day the market closes quiet. Sales, 8,000 bales, and prices are barely supported.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended August 10, 1871:—

	Imported.	Exported.
American.....bales	5,170	1,289
Brazilian	4,945	1,557
East Indian	9,623	5,928
Egyptian	1,378	316
Miscellaneous	1,257	391
Total	22,373	9,481

At New York on August 11, midling Upland cotton was quoted at 19¼ cents per lb. Advices from Bombay to 7th current report the cotton shipments for the week at 36,250 bales.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, July 11:—Telegrams to hand from Liverpool after last mail left reported a quiet market for cotton, with rather weaker prices, the quotation for Dhollerah having receded from 7 5/16d on the 4th, and 7¼d on the 5th, 6th, and 7th, and as buyers here seemed disposed in consequence to hold aloof for a time, there was little or no business done during the first four days of the week. Dealers were however

very unwilling to reduce their quotations, the scarcity of passable cotton placing them in a very strong position and at the lowest point. Dhollerah to class "fair" could not have been bought under 228 rs. Yesterday morning Reuter's message of the 8th was received reporting renewed activity in Liverpool, Dhollerah, ship named, being quoted 7¼d, while private telegrams of the same date are said to quote as high as 8d. This led to a fresh inquiry on the part of shippers, but the smallness of stock, and the consequent indifference of holders as to selling, greatly impede business. The week's purchases do not aggregate quite 2,000 candies, of which Barsee, Julgaum, and low Oomrawutee descriptions comprise the greater proportion. Of Dhollerah there is very little now available, and what goes by that name is chiefly Veerungaum and Ahmedabad kinds, which are still coming forward in small quantities by the Bombay and Baroda Railway. The weather throughout the week has again been fine, and shipping operations have gone on without interruption. The want of rain is, however, giving rise to some uneasiness, only 15 to 17 inches having been registered in Bombay as yet, or less than half the average quantity. We are glad to learn, however, there has so far been a sufficiency of rain in the districts to enable the ryots to make fair progress with their sowing. Tinnevelly—We have a telegram dated yesterday quoting 7 7/16d, c. and f.

Export of Cotton from Bombay to July 10.

	1871.		1870.
London..bales	18,589	.....	1,570

Continent	226,669	.....	126,913
China	41,947	.....	37,145
Grand total	921,472	.....	854,652

Actual exports since last mail left, 37,428 bales.

The Imperial Ottoman Bank has furnished the following report, dated Alexandria, July 31:—We have rather more doing since our last, as holders showed themselves a little easier with the unfavorable news from Liverpool, and sales were made at—fair, 9¼d; fully fair, 9¾d; good fair, 9½d, f.o.b. A small lot of fine cotton realised about 13¾d, f.o.b. For the moment holders won't agree to any further reduction, and buyers are keeping aloof. Contracts have fallen to equal to 9¾d to 9¾d for November delivery, but there are few buyers, and the week's transactions have been very moderate. The Nile is rising steadily, but is considerably below last year's level at this season. This, however, is not very important, as it was unusually high last year. Shipments from July 16 to July 29—England, 1,056 bales; Austria, 55 bales—total, 1,741 bales.

The colonial produce markets have closed with considerable firmness, and more business has been done both in sugar and coffee. Prices remain firm. Rice and cocoa have met a moderate demand on former terms. Spices generally have sold freely.

The following report, dated July 8, has been forwarded by Messrs. Fryer, Sabonjee, and Co., of Colombo:—We have to report a fair amount of export business during the fortnight just elapsed, though shipments of coffee have been interrupted for some days by bad weather, and the total of clearances are below the usual amount at this period of the year. The distribution of these may be seen below as—

Plantation Coffee.

	1871.		1870.
To Great Britain	[illegible]	.....	723,573
Foreign ports	[illegible]	.....	45,370
Australia and India	[illegible]	.....	12,856
	[illegible]	.....	781,809

Native Coffee.

	1871.		1870.
To Great Britain	[illegible]	.....	[illegible]
Foreign ports	[illegible]	.....	41,362
Australia and India	[illegible]	.....	2,557
	111,761	.....	153,678

Recent telegrams from Europe advising an advance in the rates of sailing have been accompanied by orders which have led to a somewhat better tone in our market. During the fortnight about 20,000 bags have been purchased for delivery in July and August at 70/ rates. The value of native coffee remains without change.

The annexed is dated Rangoon, June 30:—The supply of tonnage having been unusually small throughout the month, the demand for the rice has considerably declined, and our market has again taken a downward tendency. Prices for Nyaoun paddy have declined to 55 rs to 56 rs per 100 baskets, equal to 122 rs to 124 rs per 100 baskets, or 5s 6¾d to 5s 8¼d per cwt., free on board, for 5 to 6 parts rice. Supplies, which had become pretty fair, are falling off again, on account of the decline of prices. The vessels loading rice for Europe aggregate about 3,500 tons burden only. There is but little demand for soft kinds, and supplies of the same are small and irregular. We quote nominally 122 rs per 100 baskets, 5 to 6 parts Ngakyouk rice. Exports during the last six years, from 1st January up to date, compare as follows:—

These quantities include all that has arrived off coast and the different ports, but not yet taken into stock.

Messrs. Hunt and King report:—We have had much less activity in the silk market generally during the past month, and excepting for the most current sorts of China silk, prices have become rather easier; the deliveries are satisfactory. In China silk transactions "to arrive" continue, and we quote an advance in prices of about 2½ per cent., still they are below those at Shanghai, the second crop being unfavourably reported upon, and a diminished supply expected. In Japan silk the demand has continued only for the coarser kinds, Oshu and good "brick" sorts, which are always more or less in favour but inferior or muddling hank sorts are still at a low price. Canton silk is in fair request at fully previous rates. In Bengal silk the best filatures only are of ready sale at extreme rates, but Fair working native sorts are also taken for their relative cheapness. In European silk prices on the continent have been advancing, and most of the silk temporarily sent here has been exported.

Messrs. Sanderson, Barnes and Co. report:—Since the close of the last season of wool sales, plain indications have been forthcoming that the recently improved rate of consumption is still in progress, and the quantity of the raw material constituting the balance of the last clip, which still remains to come forward, being comparatively very moderate, there seems no reason to expect any reaction, at all events for the next few months from the late advance in value. In looking forward to the prospect of the new season's clip however, though generally the conditions appear to exist for a continued develop-

ment of commercial activity, it may be well to bear in mind that the extent of the deficiency in the American production, which has largely influenced the advance in particular classes of wool is, in a great measure, a matter of surmise, and that though a strong feeling exists in France against the imposition of a duty on the raw material, the question is not yet finally shelved. Sales by private treaty since the close of the late series have been comparatively limited, notwithstanding the existence of inquiry, liberal both in extent and character—merchants being generally indisposed to anticipate the public sales of September. Total arrivals from January 1st to present date, 566,728 bales. Total for 12 months, 1870, 673,314 bales. Arrivals for the September series to date are as under:—Sydney, 31,056 bales; Port Phillip, 20,391; Adelaide, 6,394; Swan River, 291; Tasmania, 19; New Zealand, 26,441; Cape, 13,522—total, 98,654 bales.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on June 30, thus refer to the Cape wool trade:—The arrivals of wool during the past fortnight have been less than at any corresponding period for many years past. Letters from the country advise of more waggons offering and rates of carriage declining, so that we may shortly look for increased supplies. Uitenhage scoured has been eagerly competed for, especially superior kinds. The advance on this class is fully ½d to 1d per lb. Country scoured is in active demand, and superior shafty kinds meet with ready sale at 1d advance, and inferior at ¼d to ½d per lb advance. Fleece-washed is in good demand at fully former rates. Superior parcels command higher prices. The arrivals of greasy wools have been exceedingly small. Good, full grown lots are placed immediately on arrival to American buyers at ⅛d to ¼d advance. Choice clips are now worth 7d per lb. There is a very active demand for washing wools at a rise of ¼d per lb. Grease—Full-grown, superior, 6½d to 7d; fine, light, for scouring, 5¾d to 6d; heavy and inferior, 5d to 5½d. Fleece-washed—Superior, clean, 10d to 10¾d; good average, 8¾d to 9¾d; inferior and seedy, 7½d to 8½d. Snow-white—Prime Uitenhage scoured, 17d to 18d; second quality ditto, 15¾d to 16½d; superior country scoured, machine washed, 15½d to 16¼d; superior country scoured, 15d to 15½d; inferior to good country scoured, 13d to 14¾d.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, July 7:—Since the date of our last there has been a great and unexpected rise of the Ganges, which has submerged a good deal of land, and destroyed a quantity of plant in the Bhagulpore district; and although the river has since receded almost as fast as it rose, we fear the effect of the inundation may have been felt and injury done in Monghyr, Malda, Moorshedabad, and the southern part of Purneah. As yet our advices from these Zillahs continue pretty good, although there are few complaints of too much rain. In Kishnaghur and Jessore the heavy rain appears to have moderated somewhat, but even with good weather for the future, we fear these districts can now scarcely look for more than a saving season. From Eastern Bengal the reports are still to the effect that there is too much rain, and that the plant is yielding badly. In Tirhoot, Champarun, and Chupra, matters still promise well. Manufacturing is progressing steadily, and the plant is giving a fair return; in some factories the produce is above the usual average. In the Benares provinces and the Doab the rainfall has been very heavy, and though not sufficiently so to injure the Khoontee crop, has interfered with the progress of present sowings.

Messrs Churchill and Sim have published the following statistics:—

The annexed is dated New York, July 28:—Financial and commercial affairs move along placidly, and the volume of business enlarges a little as the season for activity draws nigh. The indications for a good fall trade are promising. The crops this season, if not so large in all respects as in some years, are yet sufficient to leave a handsome surplus for exportation, while the accounts from Europe point to a good demand for leading American staples. Financially, the outlook is most encouraging. Money is exceptionally plenty and cheap in Europe, and the condition of our international trade is a decided improvement upon last year, so that the specie drain will be light, and the gold market free from that disturbing influence. Our local money market is likely to rule easy, and with the measurable decline in the spirit of speculation, a greater percentage of the floating capital of the country is likely to flow into the industrial reproductive channels, with the consequence of increased employment of labour, and a new impetus towards the development of the nation's resources. The rates for money remain substantially as for many weeks past, while gold and exchange have not varied materially.

THE COTTON TRADE.

LIVERPOOL.—AUGUST 10.

The cotton market was without animation on Saturday, and re-opened on Tuesday, after the Bank holiday, with a quiet tone; this has since continued, and a decline of about ⅛d per lb has been submitted to in most descriptions. Sea Island has only been in limited request, and is without change in prices. American has been freely offered, and the lower qualities are irregular, at a decline of ⅛d to ¼d per lb; middling and the better descriptions have given way ⅛d per lb. New York advices to the 10th instant quote middling Upland 19¼ cents, costing to sell in Liverpool 9⅞d per lb by steamer. Brazil of the middling to fair qualities have been freely offered at easier rates, whilst the good to fine qualities are very scarce, and command full prices. Egyptian has been dull of sale, and, though prices have been irregular, the quotations are not reduced. East Indian continues in very limited demand, and with considerable pressure to sell prices have declined fully ⅛d per lb.

In cotton "to arrive" the business continues limited, and at easier rates; the latest quotations are—American, basis of middling, from any port, new crop, October-November shipment, not below low middling, 9d; delivery, not below low middling, from any port, October, 9d; New Orleans, September, 9 9/16d; not below good ordinary, New Orleans, September-October, 9⅛d; October, 9⅛d; October-November, 9⅛d; Broach, good fair new merchants, machine-ginned, May sailing, 7 1/16d; Dhollerah, fair new merchants, June sailing, 7⅛d, 7d; July sailing, 7 1/16d; June shipment, 7 3/16d, 7⅛d; Oomrawuttee, fair new merchants, not below middling fair, October-November delivery, 7d per lb.

The sales of the week, including forwarded, amount to 53,250 bales, of which 4,880 are on speculation, and 5,710 declared for export, leaving 42,660 bales to the trade.

AUGUST 11.—The sales to-day will probably amount to about 8,000 bales, with a quiet market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	722,570
An increase of quantity taken for consumption of	410,230
An increase of actual exports of	311,410
An increase of stock of	76,170

In speculation there is an increase of 178,590 bales. The imports this week have amounted to 19,201 bales, and the quantity of American cotton reported at sea for Great Britain, according cable advices to August 4, is 52,000 bales, against 38,000 bales at the corresponding period last year. The actual exports have been 5,712 bales this week.

The following is a return showing the number of bales of cotton imported, exported, and forwarded inland for consumption during the month of July, 1871, and also showing the stock on hand on the 31st day of July, 1871, and the total imports and exports of cotton during the first seven months of the year:—

NEW YORK.—JULY 28.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, July 28. From the figures thus obtained it appears that the total receipts for the seven days have reached 10,500 bales, against 10,661 bales last week, 15,386 bales the previous week, and 18,468 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,967,247 bales, against 2,849,096 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,118,151 bales. The exports for the week ending this evening reach a total of 5,314 bales, of which 5,314 were to Great Britain, none to France, and none to rest of the continent, while the stocks as made up this evening are now 156,002 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending July 28.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.

Total since Sept. 1	2419249	704523	3083762	2169512	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 4,299 bales, while the stocks to-night are 40,837 bales *more* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to July 21, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1.		Exported since September 1 to				Shipments to Northern Ports	Stock
	1870.	1869.	Great Britain.	France	Other Foreign.	Total.

The market the past week has been very quiet, and prices for all but the poorer grades have given away about ⅛, middling Uplands closing to-night at 20⅛ against 21c last Friday. This unfavorable turn has been due mainly to the less favorable Liverpool accounts, and increased by the weight of our stock, which is so large that there is a growing disposition, very natural toward the close of the crop year to offer with more freedom. Crop accounts appear on the whole to be favourable, and if they continue so another month or six weeks it is feared that the new crop will come in so freely as to force prices below the present level. Besides, from the receipts, it would appear that the old crop is in considerable supply yet. In view of these facts there has not been for many days the same confidence among holders observable during previous weeks, and yet there has been an unwillingness until to-day to make any considerable concession to realize. What we have said applies especially to the better grades, which are in large supply and as our spinners are pretty well stocked up, the demand has been limited. For forward delivery there has

been a fair business doing, and prices for the autumn and winter months have been pretty well sustained until to-day, but at the close prices for all the months were off from about 1c to ¼c. Low middling closed to-night at 18⅞c for July, 18⅞c for August, 18⅞c for September, 18⅝c for October, 18½c for November, 18⅜c for December, 18½c for January, and 18¾c for February and March. The total sales of this description for the week are 62,650 bales. For immediate delivery the total sales foot up this week 10,700 bales, including 2,314 for export, 4,476 for consumption, 60 for speculation, and 3,650 in transit. Of the above 689 bales were to arrive. The following are the closing quotations :—

Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending July 28, 1871.			Week ending July 28, 1870.		
	Receip's	Ship-ments.	Stock.	Receipts	Ship-ments.	Stock.
Augusta	506	559	3850	268	1003	3429
Columbus	125	72	2010	71	271	2580
Macon	43	173	1588	97	284	3825
Montgomery	126	226	1995	66	194	2790
Selma	78	88	667	49	63	1700
Memphis.....	1260	1168	4893	387	1234	6465
Nashville.....	153	342	876	26	295	3434
	2291	2628	15879	964	3344	24223

The above totals show that the interior stocks have decreased during the week 337 bales, and are to-night 8,344 bales *less* than at the same period last year. The receipts have also been 1,327 bales in excess of same week last year.

Below we give our usual table of exports from New York for the week :—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Aug. 4.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 11,000 bales, and since the 1st September 3,980,000 bales. Shipments to England, 8,000 bales; total since the 1st September, 3,109,000 bales. Stock at all ports, 151,000 bales. Middling Upland, 8⅞d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS

MANCHESTER, Aug. 10.—We have passed another week of extreme inactivity in all branches of our trade. The tone of the market is now less buoyant than formerly, and the position of producers is gradually weakening, owing to the running out of orders, which are not being renewed to the same extent. The cotton market is now dull, and prices of that staple barely steady; this contributes also to the prevailing dulness. Considering the small business lately done, prices continue remarkably steady, but the tendency is in the buyers' favour, and likely to become more so should we continue to receive favourable reports of the growing cotton crop in America. Yarns for shipment to India and China continue in limited request at barely steady rates. Some business has lately been done in water twist for China, but the inquiry has now subsided. Home trade yarns are very dull, especially the low counts, which are not saleable except at a concession; the medium and finer counts are tolerably steady. There is no improvement to notice in the demand for cloth, which is still very meagre. India and China shirtings are lower by 1½d per piece, and in little request. Other fabrics are equally dull and lower in value.

Messrs Alex. Collie and Co. received the following telegram from Manchester yesterday :—Market exceedingly flat and lower since Tuesday by one-eight per pound on yarns, and three halfpence per piece on cloth, with little disposition on part of buyers to operate.

BRADFORD.—The wool market is full of animation. There is a large consumption of wool, and prices have still an upward tendency. This is particularly the case in prime wethers, which are most in request. The yarn market is without any appreciable change. Single 30's are in good request, as are also two-fold 32's and 36's, and, though a fair amount of business is doing, the higher rates form an obstacle to operations in many quarters. The piece market is without change. Most manufacturers are fully engaged, and cannot accept orders except for distant delivery.

LEEDS.—Excellent indications of a sound woollen trade are apparent. The absence of some of the largest manufacturers was easily accounted for by the impossibility of their accepting any more orders. All kinds of seasonable cloths are much sought after, and owing to the want of any stocks beforehand, it is not expected to get goods for immediate requirements without paying extraordinary rates for them.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—JULY 28.

The whole market has been very unsettled and irregular during the past week. The abnormal features peculiar to the termination of a crop year have seldom been more conspicuously displayed than at the present time. The receipts of flour have been liberal, but a large proportion of the supplies have been from new winter wheat; these have been dull and depressed, but flours from spring wheat, and especially good shipping extras, have been scarce and wanted, and with an advance of sixpence in Liverpool, have advanced 15c to 25c per bbl. Thus while prime extra State brought $6 yesterday, good family brands were to be had in abundance at $7 to $7.25. The receipts of all grades have been less liberal towards the close, and to-day the market was again higher—lines of fair to prime shipping extras selling at $5.80 to $6.05; superfine advancing 25c per bbl, and southern shipping extras were saleable at $6 to $6.50. The receipts of spring wheat, both here and at the west have become quite small, and with a better and rather pressing export demand, prices have advanced 3c to 4c per bushel, with a considerable reduction effected in stocks on hand. But the new crop of winter wheat is being marketed quite freely; it will be seen that receipts at Baltimore, Toledo, and St Louis are quite liberal, even at the low prices current. The sales in this market have been at about the prices of spring wheat; thus yesterday No. 2 and No. 1 spring sold at $1.40 to $1.43; new white and amber winter, $1.40 to $1.44, at which prices exporters have been able to buy pretty freely. Corn has fluctuated daily, almost hourly; receipts have been large, but have been met by a brisk local demand for speculation and consumption, and the chief depressing influence has been the matter of ocean freights; scarcity of room and high rates have checked shipments. To-day prime mixed opened at 69c and closed at 68c; yellow, however, was firmer at 73c.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The brilliant weather experienced during the past week has brought the crops rapidly forward, and the harvest is becoming general at a much earlier period than could have been expected considering the character of the season we have passed through. Our food prospects have changed greatly for the better, though even now there is reason to believe that the actual yield of wheat will be below the average. A large quantity of wheat has now been secured, and the new samples exhibited here have been of fair weight and quality. We hear of good samples, weight 63 lbs. having sold at 58s per quarter. Trade has consequently been depressed, more particularly for foreign qualities, the imports of which have been very liberal; and prices may be quoted fully 1s per quarter lower on the week. The large supplies afloat tend further to depress the market, there being now 497 cargoes of wheat on passage, against 368 at the corresponding period last year. Flour has sold slowly at drooping currencies.

Spring corn has been inactive, with the exception of oats, **which have changed hands more freely at the late decline. Maize and barley have been very dull; while beans and peas** remain nominal in value.

Mr George Durabusch thus reports the state of the floating grain and seed trade:—During the last eight days 22 grain and seed-laden vessels have arrived at ports-of-call, viz.:—15 wheat, 5 maize, 2 barley, 1 rye, 1 millet-seed and barley. The floating grain trade has on the whole been quiet in tone. Wheat has been 4d to 6d to sell, and prices are 1s 6d cheaper at the week. Maize slow sale, and prices 6d to 9d cheaper. Barley—All the cargoes lately arrived were in imperfect condition. Rye cheaper, only one cargo sold at 31s per 480 lbs. The reported sales are as follows:—Wheat—20 arrived cargoes, Marseilles, 39s 3d and 40s 6d; Ghirka Taganrog, 47s 6d and 48s; Nanged Ghirka, 46s 6d to 47s 6d; Ghirka, from Nicolaeff, 47s and 47s 6d; Don Ghirka, 43s 6d; Rostoff Ghirka, 46s 6d; and New Crop Ghirka from Taganrog, 42s per 492 lbs; Saxkan Ghirka, 44s; Walachian, from Kustendje, 40s 6d per 480 lbs; Walachian, from Braila, 40s 6d; Moldavian, 41s 6d. No. 2 winter spring, from Montreal, 52s; prime white Canadian, 53s 3d per 480 lbs. On passage, 3 cargoes Chilian 46s 6d and 50s 6d per 480 lbs; Californian, 53s per 500 lbs. Shipped or to be shipped, 1 cargo red winter, from New York or Montreal 51s 6d per 480 lbs. Maize—5 arrived cargoes Walachian, 26s 6d to 27s 6d; mixed American from Baltimore, 30s per 480 lbs; old Galatz, from Salonica, 34s per 482 lbs. Shipped or to be shipped, 1 cargo mixed American from New York, 29s 6d per 480 lbs. Barley—3 arrived cargoes Azow Taganrog, 22s to 23s 10½d. Peas, 27s 10½d per 496 lbs. Rye—1 arrived cargo Azow Taganrog, 31s per 480 lbs. Linseed quiet at 6d to 1s below late rates. Arrived, 1 cargo Azow, from Taganrog, 50s 6d per 424 lbs, A.T. Shipping, 1 cargo Azow, from Taganrog, 51s 6d per 424 lbs. Shipped or to be shipped, 1,800 tons R.I. Odessa, 63s to clearer 64s per 496 lbs, A.T. Rapeseed—A fair amount of business has been done at a decline of 1s. Arrived in London 450 tons ordinary brown Calcutta, 61s to 61s 6d, and 150 tons yellow refined, 71s 6d per 416 lbs, A.T. On passage, 200 tons ordinary brown Calcutta, 67s per 416 lbs, A.T. Shipped or to be shipped, 500 tons ordinary brown Calcutta, 61s 6d to 62s 3d. Cotton-seed steady. 2,000 tons Egyptian, from Alexandria, at 7l 7s 6d per ton.

Since August 28.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market was rather quiet at the opening, but became much firmer yesterday, when the refiners took large supplies, chiefly of West India. Several parcels of Barbadoes sold this week and last. The reported sales to yesterday were 4,060 casks. Barbadoes by auction part sold at 29s to 33s; grainy, 33s to 34s; crystallised Jamaica, 36s to 38s; Demerara, 34s to 37s. 797 bags refined grocery Barbadoes were bought in at 31s 6d to 32s. Two floating cargoes of Trinidad have sold 27s 3d and 27s 6d per cwt for the United Kingdom. Transactions in other descriptions have been upon a limited scale; but at firm prices. The fine weather is calculated to ensure a very large production of beet sugar. **The deliveries still contrast favourably with last year, and the stock at this port is nearly 30,000 tons smaller.** According to official returns the duty payments in the United Kingdom showed an increase of 1,050 tons to the end of July.

Mauritius.—2,660 by auction were partly disposed of on former terms; low brown, 25s to 26s 6d. Privately small sales of grainy white are reported at 37s to 38s.

Penang.—130 tierces brown sold at 22s 6d.

Manilla.—15,261 bags were bought in above the value.

Bonding Cargoes, Foreign.—One of Havana, No. 12, to 13, at 29s 10½d for the United Kingdom.

Rice.—There has been a moderate business in dry goods at about last week's quotations. Prices are in better demand.

MOLASSES.—A large business has been done in West India this week, the sales amounting to 1,400 casks at 10s to 11s 6d, and Antigua at 12s per cwt.

RUM.—The market is steady, and the late advance maintained. A few sales have been made in Jamaica at 3s 2d to 3s 7d. Common kinds from Barbadoes, to 2s; Demerara, to 2s 4d to 2s 10d up to 3s 0½d per proof gallon, in bonded. The deliveries continue good, and the total stock is now rather below that of last year.

COFFEE.—There have been fair sales of West India, and the terms are making small purchases by private contract.

TEA.—The new season's supplies are still the bulk of the supply remained being of quality not liked by the trade. On Wednesday 2,750 packages sold by auction went at some further decline in prices, from 1s 1½d to 1s 2½d per lb. By private contract the business has been very limited. Indian teas have been more in demand, at the low prices now current. The public sales to-day, however, have given way to a decline, and of 4,184 packages in the catalogue a considerable portion had still by private contract. Really fine teas are taken readily. The deliveries have been large. Stock in the Kingdom on the 1st inst., 57,000,000 lbs, against 74,000,000 the last year.

COTTON.—A much better tone pervades this market, although the supply is still large. The public sales of plantation, to-day, have gone off with spirit, the enormous quantity brought forward

selling at fully 1s above last week's quotations, viz., 503 casks 239 barrels and bags, as follows:—Low middling to middling colory, 62s to 70s; good middling to fine, 71s to 84s. Native is held for higher rates, the stock being still comparatively small. 148 casks superior bold by auction were taken in and since sold at 60s. Privately the advanced rates required have checked business. 166 bales and half-bales Mocha were bought in or withdrawn. 592 bags East India sold at 71s 6d to 85s 6d for small and pale to bold Mysore, and 60s 6d to 66s for greyish Wynaad, &c. 900 bags Guatimala, at 58s to 59s 6d, for pale and mixed. 790 bags Rio were chiefly taken. 1,190 bags Costa Rica sold at 59s to 63s for pale mixed and low middling. 377 bags Central American were bought in at 61s. Two floating cargoes of Rio are reported, of which particulars do not transpire. The stock has been increased by large arrivals, but according to the latest return the falling off upon last year was about 2,800 tons. The Dutch sale on the 16th inst. will contain 125,000 bags.

RICE.—The business of the week has been chiefly in floating cargoes. One of Necrancie Arracan has sold at 9s 6d ex quay. One of Rangoon 9s 6d ex ship, one at 9s 10½d continental terms. One Bassein at 9s 7½d for the continent. 600 tons Rangoon 9s 7½d ex quay. Transactions on the spot have been very moderate in extent, including Dacca at 9s 6d, good to fine white Bengal at 11s 6d to 12s 4½d per cwt.

IMPORTS and DELIVERIES of RICE to Aug. 5, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports .....tons	39700	29700	52840	38509
Deliveries	69700	41500	35960	33650
Stock	23350	37870	49550	21450

Deliveries last week, 1,315 tons.

SAGO FLOUR.—579 bags Singapore by auction was bought in, and a few lots since sold at 14s 9d per cwt.

TAPIOCA.—319 bags were chiefly taken in. A few lots small Singapore selling at 2¼d per lb. 260 bags pearl tapioca part sold at 20s per cwt.

BLACK PEPPER.—Higher rates have been paid and, the market is very firm. At the public sales yesterday 797 bags Singapore chiefly sold at 6¼ for very good quality. By private contract 5⅞d to 5 15/16d had been paid, also for Penang. 200 tons sold to arrive, Singapore at 5⅞d, Penang 5¾d.

WHITE PEPPER.—The stock is now reduced to 307 tons, against 690 tons last year and 565 tons in 1869 at the same date. A further advance is demanded, which tends to check business. At auction yesterday, 151 bags Singapore were offered, when a few lots good sold at 10½d, and the remainder at 10d per lb, cash.

OTHER SPICES.—Nutmegs cannot be obtained unless at a farther advance, but business is partly suspended, owing to the announcement of 1,010 casks for sale by the Netherland Trading Company on the 30th inst. At the same date there will be 560 casks mace brought forward. The latter is very scarce in this market. 1,181 bags pimento chiefly sold at easier rates, from 1¾d to 2⅛d per lb. The next cinnamon sales will be held on the 28th inst. Jamaica ginger is in steady demand, and prices about the same as last week. 244 barrels by auction sold at 42s to 91s for ordinary to very good quality. 244 cases Cochin were only partly sold at last week's quotations: ordinary rough, 46s; part scraped, small to bold, 52s to 74s. 226 bags rough Bengal were taken in at 30s per cwt.

SALTPETRE.—The market is firm, and there has not been much offering for sale. About 1,000 bags Bengal have changed hands by private contract—refraction 2½ at 30s; 8½ to 7½ at 28s 3d to 28s 6d cash or short prompt. 560 bags by auction were taken in above the value. 40 tons have sold to arrive at 29s per cwt, usual terms.

IMPORTS and DELIVERIES of SALTPETRE to Aug. 5, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported .....tons	7410	6520	6370	4230
Total delivered	7070	9520	5590	6330
Stock	2730	1830	4970	6030

Deliveries last week, 302 tons.

COCHINEAL.—The public sales this week have gone at full prices to 1d advance, there being a good demand, and the bulk of the quantity in Wednesday's sales found buyers. 1,000 bags Teneriffe: silver, 2s 4d to 2s 6d; black, 2s 4d to 3s 6d. 74 bags Honduras: silver, 2s 3d to 2s 8d; black, 2s 6d to 3s 1d. 199 bags Mexican: silver, 2s 3d to 2s 4d; black, 2s 4d to 2s 8d per lb.

OTHER DRYSALTERY GOODS.—Business has been done in Bengal turmeric to arrive at 19s 1½d to 19s 3d, and on the spot at 20s to 20s 6d. At auction Madras sold at 15s to 21s. Small sales have been made in cutch in former terms. Gambier firm. 150 tons sold to arrive at 16s 9d to 16s according to conditions, including some near at hand at the higher prices. Good block on the spot quoted 16s to 16s 3d per cwt.

SHELLAC.—At the public sales 637 chests were chiefly disposed of at full rates for orange, viz., 6/ 12s 6d to 6/ 17s 6d for middling to good; native orange, 6/ 5s to 6/ 10s. Button sorts were dearer: common to fine, 6/ to 8/ 5s; very low down to 5/ per cwt.

METALS.—The late improvement in these markets has not been quite supported, owing to the cessation of speculative demand. Scotch pig iron is, however, the exception, for it is again higher and in good demand, the last sales being at 62s to 62s 3d cash. Rails are very steady in price, and likely to remain so. Foreign tin has fallen about 1/. Yesterday sales of Straits were reported at 131/ 10s to 132/ 10s cash. No change in British, and the supply is rather limited. There has been a diminished inquiry for copper, and Chili is rather easier in price, viz., 67/ 10s to 68/ 10s. English quiet. Spelter has been dull, and very small sales effected. No change to report in lead.

SHELLS.—At the public sales, 500 cases Bombay part sold, fine at 98s, the remainder at 66s to 87s. 328 cases Manila part sold for good at 8/ to 8/ 5s per cwt.

HEMP.—Manila is held for higher rates for the recent arrivals, and transactions have been limited, including good roping at 48/ per ton. 270 bales by auction were bought in above the value. Petersburg clean quiet.

JUTE.—The principal feature of the week has been the public sales, which comprised a much larger quantity than usual, viz, 13,441 bales. About one-third part sold at 10s to 20s reduction, the range of prices being from 18/ 10s to 25/ 10s for low to fine quality. Few sales reported for arrival. The Dundee market for both jute and yarns remains rather quiet.

LINSEED.—There has been rather a quiet market. Calcutta to arrive has sold at 60s 6d; Bombay, August shipment, 62s. A coast cargo of Black Sea at 59s 6d. The latter for shipment is worth 60s. On the spot Calcutta quoted at 62s 6d to 62s 9d per quarter.

OILS.—Olive firm. Sales of Tunis and Mogadore at 47/ 10s to 48/ 5s. A cargo of Taranto, autumn shipment, has sold at 47/ 10s, f.o.b. Fish oils have been almost neglected, and prices nominal. Sperm, 81/ to 81/ 10s. Pale seal, 33/ per tun. Cocoa-nut is in moderate demand: Ceylon, 39/ 10s; sales to arrive at 39/. The market for palm is steady. Fine Lagos quoted 37/ to 37/ 10s. Linseed oil rather firmer, at 32/ 10s to 32/ 15s on the spot, and 10s less for delivery to the end of the year. English brown rape steady but rather quiet, at 41/ to 41/ 10s per ton in all positions, to the end of the year. Refined without change.

SPIRITS TURPENTINE quiet. American, 39s; July, 36s per cwt.

PETROLEUM.—American refined quiet at 1s 5½d to 1s 6d, and 1s 5½d to 1s 6d per gallon to the end of the year.

TALLOW.—Although nearly 3,000 casks (chiefly) Australian are declared for public sale to-day, the market for Russian is firmer. New Petersburg, 44s; October to December, 45s 3d to 45s 6d per cwt.

PARTICULARS OF TALLOW—Monday, Aug. 7. 1871.

	1868. casks.	1869. casks.	1870. casks.	1871. casks.

HIDES.—At the sales on Thursday, 210,000 East India went at about former rates for kips. Tanned hides were slightly dearer.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is without farther alteration. West India continues in good demand. To-day 1,048 casks sold, including the parcels by auction, making 5,100 casks for the week. 1,509 bags Penang, part sold at 27s to 30s 6d for soft brown and grey. Two floating cargoes of Havana sold to-day for the United Kingdom, No. 10½ to 11, at 28s 6d. One Maceio is at 24s 3d.

COFFEE.—At the public sales to-day 283 casks 41 barrels 149 bags plantation sold at steady prices. 1,631 cases 306 bags East India all sold at higher rates, from 62s to 87s for Neilgherry. 742 bags Manila, 60s. 6,963 bags Costa Rica, 60s to 73s 6d. 605 bags Guatimala, 54s to 61s 6d. 183 bags Singapore, 54s to 55s 6d. 1,250 bags Rio, part sold at 52s for ordinary mixed.

SHELLAC.—96 chests sold rather dearer. Fine orange, 7/ 2s 6d to 7/ 5s. Garnet, 5/ 15s to 5/ 17s 6d.

TUMERIC.—2,862 bags Bengal were chiefly taken in. A few lots sold at 20s per cwt.

SAFFLOWER.—41 bales Bengal part sold at 5/ 5s to 5/ 7s 6d for ordinary quality.

OILS.—522 casks E.I. fish were bought in at 30/ per tun. 190 casks cocoa-nut bought in.

TALLOW.—Petersburg unaltered. At auction to-day 2,321 casks Australian all sold; mutton, at 43s to 44s 3d; beef, at 41s to 42s 3d; mixed melt at 41s 6d to 42s 6d, and inferior at 35s 6d to 39s; of 600 casks South American beef part sold at 44s.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that some small parcels of Lisbon oranges are selling at a high figure. Naples and Sicily lemons of good quality have a ready sale. Business doing in new Brazil nuts with a firm market. Barcelona advanced in price. West India cocoa-nuts in fair demand. West India pineapples finished for the season.

DRY FRUIT.—All reports of the coming crops are satisfactory, and the first Spanish arrivals will take place in about ten days. Crops of Valencias and currants will be very large. No trade doing in London.

ENGLISH WOOL.—A very large trade doing, prices advancing.

FLAX.—Market steady.

HEMP.—Market for Russian very quiet. Manila firm at late advances.

SEEDS.—There has been very little doing in seeds during the past week, and values are almost nominal.

SILK.—Market strong, but little doing.

TOBACCO.—The market for North American tobacco has been extremely dull, but those sales that have been effected have been of so trifling a character that they are not worthy of any comment. The last import has not yet been sampled, therefore there is but a poor assortment offering. In other growths nothing of importance has transpired.

LEATHER.—The demand for nearly all descriptions of leather continues unabated, and with a moderate supply of fresh goods at Leadenhall on Tuesday prices were in all cases firm, and for some articles, particularly for English butts and English shoulders, a further advance was in many cases obtained. There was also a good inquiry for foreign butts, stout bellies, English and foreign dressing hides, shaved hides, calf skins, kips, and horse hides, all which realised extreme quotations.

METALS.—The business of the week has been limited in all branches. Copper has been sold to a small extent at slightly lower rates. Iron is steady. Tin has fluctuated somewhat, is at best fully 20s a ton lower than last week. Spelter is quiet. Lead is rather more inquired for. Tin plates continue very firm.

METROPOLITAN CATTLE MARKET.

MONDAY, August 7.—The total imports of foreign stock into London last week amounted to 21,993 head. In the corresponding week in 1870, we received 9,884; in 1869, 11,142; in 1868, 10,862; and in 1867 8,174 head.

In the cattle trade to-day, there has been an absence of animation. The supply of beasts has been good, the arrivals from abroad having been on a liberal scale, including about 1,600 from Tonning, 700 from Germany, and 100 from Spain. English stock has come slowly to

hand. The demand has been inactive. Prime breeds have been scarce and have realised 6s per 8 lbs; but other sorts have been difficult of disposal. The top price for the best stock has been 6s per 8 lbs. There has been a good show of sheep in the pens. The demand has been only to a moderate extent; but prices have been maintained. The best Downs and half-breds have sold at 6s 8d to 6s 10d per 8 lbs. Lambs have changed hands quietly at from 6s 6d to 8s per 8 lbs. There has been a good show of Dutch calves, but not many English. The inquiry has been limited, at about late rates. Pigs have been dull.

Lamb, 6s 8d to 6s 8d

HOP MARKET.

BOROUGH, Friday, Aug. 11.—The hue has greatly benefited by the warm weather, and more satisfaction is expressed in reference to the coming crop. Transactions in this market have been restricted, but the prices have been well maintained. Mid and East Kents, 60s to 147s; Weald of Kent, 60s to 105s; Sussex, 60s to 100s; Farnham and country, 90s to 120s; and Olds, 20s to 30s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Aug. 11.—The markets are well supplied. The demand has been inactive on former terms. Shaws, 80s to 85s. Regents, 50s to 70s; Kidneys, 60s to 80s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 11.—The market continues in a very animated state, and sellers, fresh supplies have arrived somewhat more freely, still the demand is strong enough to prevent stocks from accumulating, and the tendency of prices is generally in favour of sellers.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 11.—There was only a moderate attendance to-day, and the business done was on a limited scale. Wheat of the better quality fully maintained its latest quotations. Flour was unchanged.

WAKEFIELD, Friday, Aug. 11.—The wheat trade was quiet to-day, owing to the unsettled weather, and the little business passing was at rather lower prices than were current last Friday. Another report says:—The weather continues intensely hot, and, after so much wet, it is becoming a question whether it is favourable to the crops or otherwise. At all events wheat was held more firmly to-day than on Tuesday.

The Gazette.

TUESDAY, August 8.

BANKRUPTS.

John Carruthers, Stratford, Essex, woollen draper.
Charles Cameron, Hyde End, Wandsworth.
S. Solomons, Upper Thames street, cigar importer.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using unwholesome paints. Parents have remarked that their children's recovering from the measles or other diseases have suffered in health. The reason is evident—the breath exhausts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1863.

CARSON'S PAINT,

BANK OF BOMBAY

IN LIQUIDATION.

Notice is hereby given, that an Extraordinary General Meeting of the Proprietors of the Bank of Bombay (in Liquidation), will be held at the Offices of the New Bank of Bombay (Limited), in Elphinstone Circle, Bombay, on Monday, the second day of October, one thousand eight hundred and seventy-one, at Three o'clock in the afternoon, for the following purposes:—

First,—To consider and determine as to the propriety of forthwith completing the Liquidation of the Bank, and distributing the surplus assets thereof, and dissolving the Bank according to the provisions of Section XCV. (subsections 10 and 11) of Act XIX. of 1857, of the Legislative Council of India.

Second,—To consider and determine on the course to be adopted in order to provide for the debts and liabilities of the Bank now still outstanding, the nominal amount of which is Rupees two hundred and six thousand five hundred and forty, Annas ten, and Pies nine, according to the particulars stated below, out of which sum of Rupees two hundred and six thousand five hundred and forty, Annas ten, and Pies nine, it is, however, estimated that not more than Rupees fifty-one thousand six hundred and thirty-five will be established as payable.

Third,—To consider and decide as to the adoption of a scheme, whereby, in order to facilitate the dissolution of the Bank and to provide for the said outstanding debts and liabilities, it is proposed that the sum of Rupees sixty-one thousand six hundred and thirty-five shall be placed in the hands of two or more Trustees, to be nominated or approved of by the proprietors at the meeting, Rupees fifty-one thousand six hundred and thirty-five thereof being contributed by the Bank, and Rupees ten thousand, the remainder thereof, being contributed by Mr William Rodgie (the Liquidator of the Bank) upon trust; that the said Trustees shall out of the said sum of Rupees sixty-one thousand six hundred and thirty-five pay all claims in respect of the said outstanding debts and liabilities of the Bank which shall be satisfactorily established before the thirteenth January, one thousand eight hundred and seventy-four; and that the said Trustees shall after the said day hold and possessed of the balance of the said sum of Rupees sixty-one thousand six hundred and thirty-five then remaining in their hands (if any) in trust for the said Mr William Rodgie, subject to any claim in respect of the said debts and liabilities which shall have been made before that time; and that the said Mr William Rodgie shall enter into covenants with the Bank and the Trustees for the payment by him of all claims in respect of the said outstanding debts and liabilities of the Bank which the sum of Rupees sixty-one thousand six hundred and thirty-five proposed to be placed in the hands of the Trustees shall not be sufficient to pay, and also for the indemnification by him of the Bank and the proprietors and the Trustees from all responsibility in respect of the said outstanding debts and liabilities of the Bank.—Copies of the Deed by which it is proposed to carry the above scheme into execution in case the same shall be approved by the proprietors may be seen at the Office of Messrs Rimington, Hore, and Langley, Solicitors to the Bank, at Apollo street, Bombay, and at the Offices of E. M. Hore, Esquire, 52 Lincoln's inn fields, London.

Schedule of outstanding debts and liabilities on twenty-third June, one thousand eight hundred and seventy-one:—

MANAGER—Theod. Dromel.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-named places.

The Agency will conduct banking business of every description with the Continent, India, China, &c., &c., &c. upon terms to be ascertained at the Office.

THE CAPE COPPER MINING COMPANY (Limited).

6 Queen street place, London, E.C., August 9, 1871.

Notice is hereby given, that the Ordinary General Meeting of this Company will be held at the Terminus Hotel, Cannon street, in the City of London, on Friday, the 25th day of August instant, at Two o'clock in the afternoon, to receive the report and accounts of the year 1870, and for general purposes.

In conformity with the Articles of Association, two Directors, viz., Edmund A. Pontifex, Esq., and John Galsworthy, Esq., retire from office at the above-named Meeting, but, being eligible, offer themselves for re-election.

The Directors regret to have to report the death of John King, Esq. Two qualified shareholders, viz., Alexander Croll, Esq., and Henry Hodgson, Esq., have given due notice of their intention to offer themselves as candidates to fill the vacancy in the Board thereby occasioned.

Robert Henty, Esq., having disqualified for the post of Auditor, the Directors have appointed Robert Fletcher, Esq., Public Accountant, of No. 2 Moorgate street, to fill the vacancy; which appointment will be submitted for confirmation.

The General Meeting will have to elect two Auditors for the current year, and F. W. Collard, Esq., and Robert Fletcher, Esq., being eligible, offer themselves for election.

The Transfer Books will be Closed from the 11th to the 25th day of August, both days inclusive.—By order of the Board, J. C. LEAVER, Secretary.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

PARTICULARS OF ISSUE.

The Directors of the Welsh Ironworks Company (Limited) are prepared to receive applications for 1,500 Perpetual 10 per Cent. Preference Shares of £50 each, which are entitled to dividend in preference and priority to the Ordinary share capital of the Company, with a further right to participate in the surplus profits after 10 per cent on amount has been paid on the ordinary share capital.

The payment of these preference shares—now offered for subscription—is as follows, viz.:—£5 for each preference share payable at the times above mentioned, or on the approval of subscribers the whole amount may be paid up at once.

If the preference shares are fully paid up by dividend will accrue at such rate per cent from the date of payment, or if they are fully paid up on allotment, the preference dividend at 10 per cent per annum will accrue as from 1st January next. Payment in full of the preference shares will be considered equal to 10 per cent per annum or about 8 per cent on the entire capital.

The above 1,500 preference shares constitute the whole of the preference shares capital of the Company, and are considered safe for the ordinary share capital which has not been fully paid up, besides having a right to participate in the profits after 10 per cent has been paid upon the preference shares. When the ordinary shares have received 10 per cent, all surplus profits will be divisible equally between the preference and ordinary shareholders.

Letters of allotment will be issued on allotment, exchangeable for share certificates when fully paid up.

The allotment of the preference shares will take place in the following order:—

First. To persons who desire to pay up in full on allotment for immediate.

Second. To those persons who desire to pay by instalments as in the prospectus.

Should the whole amount of the preference shares be applied for by persons desiring to pay up in full on allotment, the money will be made to applicants wishing to pay by instalments.

If no allotment the whole deposit will be returned to the parties entitled thereto.

The objects of the promoters of the Company, the agreements for purchase and also the articles of association, can be seen at the Offices of the Solicitors.

Applications must be made on the annexed form, and be accompanied by a remittance of £5 for each preference share applied for, which may be forwarded to either of the Bankers of the Company or to the Secretary at the Company's Offices.

Offices—7 Great George street E.C.
London, 8th August, 1871.

1. The Company is formed to acquire, under leases the undermentioned Ironworks and Iron ore Mines and the other privileges stated hereafter:—

2. The Aberdare Steel Ironworks and Iron Works situate near Aberdare, South Wales, Carmarthenshire, now in the occupation of Mr. Francis Crawshay, the present Proprietor.

3. The right of working the native Ironstone on the Penrhiwfer, comprising over 1,000 acres.

4. The Tredegar Hematite Iron Mines, formerly worked and now supplied for the Rhymney Ironworks.

5. The Blaenavon Hematite Iron Ore Mine.

6. The Llanelly Hematite Iron Ore Mine.

7. The Coal for the use of the Ironworks and the native Ironstone is to be supplied to the works under an agreement entered into at 6d per ton only above the actual cost price.

8. Agreements already entered into with two Iron ore Companies for the supply to the Ironworks of Hematite Iron Ore.

2. Too much importance cannot be attached to the enormous demand existing for the supply of hematite pig iron for Bessemer steel rails and other purposes, which is so great that the present hematite makers have difficulty in executing the orders on hand. The Ironworks which the Company will acquire for the production of this class of hematite and other iron are on the Vale of North Railway, almost equidistant from the large shipping ports of Swansea and Cardiff, having both broad and narrow gauge rails running into the works, and in the same seat and iron holds as the following well known Ironworks, viz.:—

The Aberdare,	Messrs Fothergill and Co.
Cyfarthfa,	Messrs Crawshay.
Dowlais,	Messrs Guest and Co.
Rhymney,	The Rhymney Iron Company.
Tredegar,	The Tredegar Company
Ebbw Vale,	The Ebbw Vale Company.
Blaenavon,	The Blaenavon Company.

3. The works are most substantially built and admirably situated for the purpose of carrying on a large and profitable trade in the manufacture of hematite and other pigs, and consist of 4 massive stone-built blast furnaces fitted with the latest improvements for economising gases, blown by a powerful blast engine, with 52in diameter steam cylinder, 8 feet stroke, with blast cylinder 5 feet 8 inches diameter, length of beam 27 feet, with 4 boilers, 28 feet 8 inches long, 7 feet 11 inches diameter, with necessary air-receiver, hot-air ovens, calcining kilns and coke ovens, foundry; fitting shops, and fire brick factory; extensive forge; manager's house, offices, &c., &c. The four blast furnaces are capable of producing about 50,000 tons of pig iron per annum, about 70 per cent of which will be suited to the iron ore companies for the supply of ore, and the forge of turning at 1,000 tons of merchants iron per month, or 12,000 tons per annum. The profits on both classes of iron made under the arrangements proposed entered into, be taken at an average of not less than £1 per ton.

4. The hematite iron ore mines to be acquired, and the favourable arrangements for a supply of hematite ore from other mines, are supplemental considerations in the establishment of the Company, especially seeing the difficulty experienced by companies at the present time in obtaining regular delivery of good quality hematite ore, and it will be seen on a perusal of the several reports that an output of at least 5,000 tons per annum is considered upon from the four mines to be acquired, and taking this at the current market value per which leaves the profit on the pig iron is reckoned), the average of profit will not be less than 4s per ton.

5. The importance and value of this combination cannot be over-estimated as thereby the Company is relieved from any outlay, paying royalties for the ore supplied under contract, and a wide margin of profit in pig iron, thus securing a certain supply of the ore, whilst the Company may deal with either as smelters or merchants. The capital of the Company being but £125,000, compares very favourably with the other large ironmasters of a similar character having capitals ranging from £700,000 to £2,000,000.

6. An agreement has been entered into, dated the 22nd day of August, 1871, under which the mines and works are charged in consideration of the allotment of the ordinary shares of the Company, and the payment of £75 thousand pounds in money, the remaining capital of £75,000 being considered more than ample for the business purposes of the Company.

7. Considering these favourable features, the great and increasing prosperity of the iron trade, and that the sum of £75,000, the amount to about £15,000, being £37,500 from the pig and manufactured iron, and £37,500 from the iron ore, a sum equal to 30 per cent, on the entire capital, the preference shares, which would not exceed an annual charge of £7,500 may be regarded as a safe and desirable investment. They will be further stated particulars in all descriptions of persons entering with the ordinary shares, after payment of 10 per cent. of the preference shares and receipt of the allotment of the ordinary shares.

8. Prospectuses and forms of application for shares may be obtained by application to the Bankers, Solicitors, or Secretary at the Company's Offices.

London August 8th 1871.

FORM OF APPLICATION.

(To be from and to the Bankers.)

To the Directors of the Welsh Ironworks Company (Limited),

Gentlemen,—Having paid to your credit at your Bankers the sum of pounds, being £5 per share on the application for preference shares of £50 each, bearing 10 per cent preferential dividend, of the Welsh Ironworks Company (Limited), I request you to allot to me that or any less number of the said preference shares, and I hereby agree to accept the same, and to pay the balance in respect of every preference shares in the letter of the prospectus, dated the 8th day of August, 1871.

Name (in full).....
Address.....
Profession or trade.....
Date.....1871.
Signature.....

(Addition to be signed by Applicant declaring to pay up all the instalments as Allotment.)

I desire to pay up my subscription in full on Allotment. Letters containing to be Payable to the Allotment Signature.....

THE WELSH IRONWORKS COMPANY (Limited).

BANKERS RECEIPT.

To be signed by Bankers and returned by Applicants.

London, August, 1871.

Received of the sum of pounds being £5 per share of application for preference shares of £50 each, of the Welsh Ironworks Company (Limited). For Bank.

NEW WHEAL SPEEDWELL TIN MINE (Limited).

Now that the price of tin has been raised so as to render the working of the mines once more about one of the most profitable businesses in which capital can be invested, the attention of the outside public is being strongly directed to the oldest and what may be really termed the legitimate field of mining enterprise and speculation, the tin mining districts of West Cornwall. The advance in the price of shares in Cornish tin mines during the past month has been astonishing, and many investors have more than doubled their money during that time. For example, Carn Brea shares, which a very short time ago were unheeded at a price of about £20 per share, cannot now be bought under £100, and will doubtless soon go higher still. Indeed, it is the opinion of competent judges that now tin mines have begun to go up they will continue doing so for some time to come. Messrs LISCOMBE and CO., of 30 South Castle street, Liverpool, would therefore draw the attention of their clients and the public to the New Wheal Speedwell Mine, one of the most promising setts in a district which is unsurpassed for the value of its metalliferous deposits, and which is surrounded by mines which either are paying or have paid enormous profits. It immediately adjoins and is on the same lodes as Old Wheal Speedwell Mine, which on a small outlay returned upwards of £100,000 to its fortunate proprietors. Among other rich neighbours may be mentioned the Marazion Mines which returned over £100,000; Great Wheal Fortune, nearly £200,000; Great Work, £700,000; Wheal Neptune (which is almost immediately contiguous to New Wheal Speedwell), £400,000; and a score of others with nearly as large returns. Indeed, such examples as these might be referred to without number, but the enumeration of all such would occupy too much space. Messrs Liscombe will only remind their clients that it has been computed by the best authorities that the gross returns of this district may safely be estimated at not less than six millions sterling. The New Wheal Speedwell sett is traversed by all the most productive lodes of the neighbouring mines, and is even now in a position to return a large quantity of tin before the great deposits of ore are reached

SOUTHWARK AND CITY
SUBWAY COMPANY.

For making an Underground Railway from St George's Church, Southwark, to the City.

PROSPECTUS.

This Company has been formed for the purpose of affording relief to the present enormous traffic passing along High street, Borough, and over London bridge, and for connecting with the City the extensive system of tramways having their termini south of the Thames. The Parliamentary powers conferred upon the Company enable this to be effected by means of an Underground Railway, commencing at St George's Church, in the Borough, the junction of the important thoroughfares of Blackman street and Great Dover street, passing under the High street and the River Thames, and terminating in Arthur street west, close to King William street and Cannon street.

By the Report of the Committee on the Metropolitan Toll Bridges Bill, it appears that in the year 1865, 60 millions of passengers annually passed over London bridge, since which time such additions have been made to these figures that the consideration of the best mode of relieving the unparalleled traffic between the points to be served by the Subway has become a matter of the most urgent public importance.

The number of persons passing from the Borough to the City will also be largely increased by the passengers using the systems of tramways from the populous district south, south west, and south-east of the Metropolis, while the many objections to allowing the tramways to be extended over London bridge point to a Subway as the only other available method of conveying them cheaply and expeditiously.

The mode in which the communication will be effected has been practically demonstrated by the Tower Subway, which passes under the Thames between Tower hill and Vine street, Southwark; and which, being of iron, has been constructed for about a tenth of the cost which would have been entailed under the old system of masonry. The principles upon which the Southwark and City Subway will be constructed are identical with those adopted in the Tower Subway, the material being of the same character throughout; but the area of the tunnel will be half as large again.

By the means which will be employed for drawing the trains, all inconvenience arising from the use of ordinary steam engines in underground railways will be obviated, while the atmosphere in the tunnel will be constantly renewed by a current of fresh air.

The Tower Subway Tunnel, in length two furlongs, was executed at the rate of nine feet per day from one face. At the same rate of working the Southwark and City Subway, 5½ furlongs in length, can be constructed, by working from both faces, in seven months, or making allowances for the sinking of the shafts and the construction of the other necessary works within 12 months.

The cost of construction has been ascertained by the experience gained by the Tower Subway; but in order to enable the Directors to speak with greater confidence as to the cost of the Southwark and City Subway, contracts for a considerable portion of the land required have been made, and a contract for the execution of the work has been entered into with the same contractor who constructed the Tower Subway, at prices which leave no doubt that the undertaking will be carried out considerably within the share capital of the Company, and without making any use of its borrowing powers.

The Tower Subway was opened for foot traffic on the 24th December, 1870, and within the first six months, more than half a million people walked through.

The following is estimated as the minimum revenue of the Southwark and City Subway, viz.:—

	£
Trains to start from each terminus every five minutes, with an average of 36 passengers in each train, or one-third of the maximum accommodation, which will be for 108 passengers.	
Twelve trains each way, or 24 trips per hour, with 36 passengers in each train, would give an average of 864 per hour, and in a working day of 18 hours, 15,552 passengers. These at a toll of 1d each, would give a daily gross taking of £64 16s, and say £32 8s for half traffic on Sundays, or of, per annum.....	21,066
The Company by their Act have power to charge 3d per passenger for first-class passengers; but excluding all calculation on this head, and adding an additional penny for only one-tenth of the above number, as second-class passengers paying 2d	2,196
	24,162
Deduct one-third for working expenses	8,054
Leaving a balance of	16,108

Equal to a return of over 16 per cent. per annum on the entire share capital, or a considerably higher return on the estimated expenditure.

With reference to the estimate of one-third of the gross revenue for working expenses, there is no doubt such proportion will be amply sufficient, it having been satisfactorily proved that with a light narrow-gauge railway the expenses are far less than by the ordinary system.

Applications for shares, accompanied by a payment of £1 per share to the Company's Bankers, must be made on the annexed form, either to the Company, at their Offices, 6 Victoria street, Westminster; or to the Brokers, Messrs A. and W. Ricardo, 11 Angel court, Bank. In the event of the full number applied for not being allotted, the balance of the deposit will be credited to the payment due on allotment, and should no allotment be made, the deposit will be returned in full.

SOUTHWARK AND CITY SUBWAY COMPANY.

FORM OF APPLICATION.—(To be retained by the Bankers.)

To the Directors of the Southwark and City Subway Company.

Gentlemen,—Having paid to your Bankers the sum of pounds, being £1 per share on my application for shares of £10 each in the Southwark and City Subway Company, I request you to allot to me that or any less number of the said shares, and I hereby agree to accept the same, and to pay the balance in respect of such shares in terms of the Prospectus, dated this 10th day of August, 1871.

Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution 13 Strand.

EDUCATION.—"ONE YEAR'S
Good Schooling" at the English and Continental College, Harrow (close to the station).—A few ANNUAL VACANCIES.—Parents anxious to give their boys, before they put them into any business, a year's finishing instruction in a highly recommended boarding school, of limited number, near town, to be perfected (even if backward) in penmanship, commercial and polite correspondence, arithmetic, bookkeeping (or mathematics and drawing), French conversationally, and gentlemanly manners, are invited to address the Principal, who is assisted by efficient and hard-working masters. Younger boys, to be prepared for public schools, the professions, and competitive examinations, are received for a longer period. Dry playground, with a gymnasium and a splendid cricket field close to the house, which latter is replete in all its appointments. Highest references as to liberal board, kind treatment, excellent health, and first-class progress of the pupils. Eight first-class masters are engaged to secure the success of thirty pupils. Terms—50 guineas under 12, 35 guineas under 14, and 40 guineas per annum under 15 years of age. 10s for laundress, 10s for books and stationery, and for tuition of dancing, drilling, singing and brass band instruments. 10s per quarter are the only extras. Established 1857. Address Dr VEILLERE Harrow

HOLLOWAY'S PILLS.—
Bilious affections and stomach complaints, induced by atmospheric heat or too liberal diet, if not at once checked are often attended with serious consequences. When anyone finds his ideas less clear than usual, his eyesight dimmed, and his head dizzy, while he is indisposed for all exertion, physical or mental, he may be sure that he is in immediate need of some cooling and purifying medicine. Let him send at once for a box of Holloway's pills, after a few doses of which his head will be clear again, his spirits be elevated, and all his energies be restored. Printed directions for the guidance of patients in the use of this admirable medicine are affixed to every box.

KINAHAN'S LL WHISKY.
This celebrated and most delicious old mellow spirit is the very

CREAM OF IRISH WHISKIES,

in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.

Note the words—

"KINAHAN'S LL WHISKY,"

on seal, label, and cork.

Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY,
BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

SAUCE.—LEA & PERRINS.
THE "WORCESTERSHIRE.

Pronounced by Connoisseurs,

"THE ONLY GOOD SAUCE."

Improves the appetite, and aids digestion.

Unrivalled for piquancy and flavour.

Ask for LEA & PERRINS' SAUCE.

BEWARE OF IMITATIONS

And see the names,

LEA & PERRINS, on all bottles and labels.

Agents—CROSSE & BLACKWELL, London, and sold by all Dealers in Sauces throughout the World.

MILNERS' STRONG HOLDFAST
AND FIRE-RESISTING SAFES (of Six Progressive Qualities and Prices, suitable for all amounts of risk), CHESTS, STRONG ROOMS AND DOORS with all the Latest Improvements. Effectually guarding against the novel modes of attack, as used by the Caseley gang in the Cornhill and other robberies (against which, no safe made before 1865 is secure), but which addition to Milners' succession of improvements during the last half-century constitutes their safes the strongest, and (quality considered) the cheapest safe-guard against fire and the modern burglar. Milners' Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post.

ROYAL GALLERY OF
ILLUSTRATION.

Mr and Mrs German Reed's Entertainment.—A new Entertainment, written by Arthur Sketchley, will be produced at this popular place of amusement on Monday, August 14. A SENSATION NOVEL, in consequence, will be withdrawn on Saturday next, the 12th inst., after a run of 186 performances. The success of A SENSATION NOVEL may fairly be attributed to the clever satire of Mr W. S. Gilbert, and the admirable manner in which the present entertainment is sustained by Mr and Mrs German Reed and the talented company at their command.

ROYAL PRINCESS'S THEATRE.
Sole Lessee—Mr Benjamin Webster.

Managers—Messrs B. Webster and F. B. Chatterton.

Great success of EILEEN OGE.

SALES OF ESTATES, &c.

Bermondsey.—Valuable Leasehold Estates, comprising 132 Dwelling-houses, Shops, and Premises, situate in Nelson street, Charlotte row, West street, West place, Edmund street, and Albert place, Bermondsey, held on lease for an unexpired term of 86 years, at ground rents amounting to £300 per annum, and 14 at rentals producing upwards of £2,450 per annum.

MESSRS DRIVER HAVE received instructions from the Mortgagees to offer for SALE by AUCTION, at the Mart, Tokenhouse yard, London, on FRIDAY, August 25, at 2 o'clock precisely, in one or four Lots (and as an acceptable offer by private contract be previously made), the above PROPERTIES.—Particulars of Messrs Sutton and Greenaway, Solicitors, 80 Coleman street; and of Messrs Driver, Surveyors, Land Agents, and Auctioneers, No. 4 Whitehall, London.

FOR SALE.—VALUABLE Coffee Estate, situated at the head of the Tyrendly Valley, North Wynaad, East Indies. That very valuable Estate "LEDMORE," consisting of about 100 acres of coffee in full bearing and 200 acres of good virgin forest fit for coffee. This Estate is well situated in a good coffee-growing district, is watered by streams running right through it, has Lower Store, Vats, &c. The growing crops is estimated at 250 tons. The Estate with judicious management should produce good crops for the next 20 years. Also that very valuable estate, "CHACMATH MULLAY," situated about 15 miles from Manantoddy and about one-quarter of a mile from the "Ledmore" Estate, on the opposite range of the valley. This Estate is well protected from the south-west monsoon, is well watered, and the soil is about 50 acres of coffee in full bearing, and 250 acres of forest fit for coffee. The land is of great extent of superficies on a moderate slope well calculated for a crop of coffee and all that could be desired. The growing crop is estimated at 25 tons. This Estate has been pronounced to be the finest coffee Estate in the district.—For further particulars apply to Messrs Arbuthnot and Co., Madras, or Messrs Arbuthnot, Latham and Co., London.

London, 15th August, 1871.

THE SATURN SILVER MINING COMPANY OF UTAH (Limited).

NOTICE OF MEETING.

An Extraordinary General Meeting of the Shareholders will be held on Monday, the 28th August, at One o'clock, at the London Tavern, for the purpose of deciding whether any, and if any what, steps shall be taken in reference to a Telegraph Message, which it is expected will be received by the Directors before that date from Mr Fowler, who has been sent by them to report on the Mine.

H. N. WILKINSON, Secretary.

17 Gracechurch street, London, E.C.,

18th August, 1871.

NEW WHEAL SPEEDWELL TIN MINE (Limited).

Now that the price of tin has been raised so as to render the working of tin mines once more about one of the most profitable businesses in which capital can be invested, the attention of the outside public is being strongly directed to the oldest and what may be really termed the legitimate field of mining enterprise and speculation, the tin mining districts of West Cornwall. The advance in the price of shares in Cornish tin mines during the last month has been astonishing, and many investors have more than doubled their money during that time. For example, Carn Brea shares, which a very short time ago were unheard at a price of about £20 per share, cannot now be bought under £100, and will doubtless soon go higher still. Indeed, it is the opinion of competent judges that now tin mines have begun to go up they will continue doing so for some time to come. Messrs LISCOMBE and CO., of 39 South Castle street, Liverpool, would therefore draw the attention of their clients and the public to the New Wheal Speedwell Mine, one of the most promising setts in a district which is unsurpassed for the value of its metalliferous deposits, and which is surrounded by mines which either are paying or have paid enormous profits. It immediately adjoins and is on the same lodes as Old Wheal Speedwell Mine, which on a small outlay returned upwards of £160,000 to its fortunate proprietors. Among other rich neighbours may be mentioned the Marazion Mines, which returned over £180,000; Great Wheal Fortune, nearly £600,000; Great Work, £700,000; Wheal Neptune (which is almost immediately contiguous to New Wheal Speedwell), £400,000; and a score of others with nearly as large returns. Indeed, such examples as these might be referred to without number, but the enumeration of all such would occupy too much space. Messrs Liscombe will only remind their clients that it has been computed by the best authorities that the gross returns of this district may safely be estimated at not less than six millions sterling. The New Wheal Speedwell sett is traversed by all the most productive lodes of the neighbouring mines, and is even now in a position to return a large quantity of tin before the great deposits of ore are reached. Messrs Liscombe beg that no time may be lost in applying for shares, as very few remain on hand, and they may speedily be expected to go to a good premium.

MADRID.—WANTED, A LIGHT AGENCY, by a resident gentleman, well connected, and who can give every security as to integrity.—Write, enclosing 6d stamp, to D. José Grande, Caja di Depósitos, Madrid, Spain.

WANTED, AN EXPERIENCED ACCOUNTANT, to take charge of the Books in a Commission Merchant's Office. Only those thoroughly efficient need offer.—Apply to Box 25, Post Office, Bristol, stating salary required.

WANTED, BY A LEADING JOINT Stock Bank in the country, a Gentleman possessing a practical knowledge of banking in all its departments. Age from 30 to 35 preferred. Salary, £300 per annum to commence. All applications will be regarded as strictly confidential.—Apply, by letter only, to Banker, 340 Strand, W.C.

PARTNER WANTED, TO JOIN in working Fifteen Acres of Freehold Land, whereon several thousand pounds have been expended in the erection of substantial buildings, machinery, &c. Clay and white brick earth are abundant on the premises, and of a superior quality. One million best Suffolk bricks, and 7,500 tons of Portland cement can be made yearly, but with a small additional outlay in machinery 15,000 tons of cement could be made. The profits of this latter trade alone average 10s a ton. The premises are conveniently situated on a navigable river. The owner would not object either to lease the property, or to convey a moiety of it to eligible parties.—Apply Gilman and Son, Solicitors, Norwich.

RICHMOND CONSOLIDATED MINING COMPANY (Limited).

Notice is hereby given, that the SUBSCRIPTION LISTS for SHARES in the above Company will be CLOSED THIS DAY (SATURDAY), the 19th instant, for London, and on MONDAY, the 21st instant, for Country applications. By order.

E. T. GREGORY, Secretary (pro tem.).

KINAHAN'S LL WHISKY.

This celebrated and most delicious old mellow spirit is the very

CREAM OF IRISH WHISKIES,

in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.

Note the words—

"KINAHAN'S LL WHISKY,"

on seal, label, and cork.

Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY,

BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.
